(3) Subdivision (c)(1)(ii) of the clause at 52.227–17, Rights in Data—Special Works, which enables the Government to obtain assignment of copyright in any data first produced in the performance of the contract, may be deleted if the contracting officer determines that such assignment is not needed to further the objectives of the contract.

(4) Paragraph (e) of the clause, which requires the contractor to indemnify the Government against any liability incurred as the result of any violation of trade secrets, copyrights, right of privacy or publicity, or any libelous or other unlawful matter arising out of or contained in any production or compilation of data that are subject to the clause, may be deleted or limited in scope where the contracting officer determines that, because of the nature of the particular data involved, such liability will not arise.

(5) When the audiovisual or other special works are produced to accomplish a public purpose other than acquisition for the Government's own use (such as for production and distribution to the public of such works by other than a Federal agency) agencies are authorized to modify the Rights in Data—Special Works clause for use in such contracts, with rights in data provisions which meet agency mission needs yet protect free speech and freedom of expression, as well as the artistic license of the creator of the work.

(b) *Rights relating to existing data other than limited rights data*—(1) *Acquisition of existing audiovisual and similar works.* The clause at 52.227–18, Rights in Data—Existing Works, is for use in contracts exclusively for the acquisition (without modification) of existing motion pictures, television recordings, and other audiovisual works; sound recordings; musical, dramatic, and literary works; pantomimes and choreographic works; pictorial, graphic, and sculptural works; and works of a similar nature. The contract may set forth limitations consistent with the purposes for which the works covered by the contract are being acquired. Examples of these limitations are (i) means of exhibition or transmission, (ii) time, (iii) type of audience, and (iv) geographical location. If the contract requires that works of the type indicated in subparagraph (b)(1) of this section are to be modified through editing, translation, or addition of subject matter, etc. (rather than purchased in existing form) the clause at 52.227–17, Rights in Data—Special Works, is to be used. (See paragraph (a) of this section.)

(2) *Acquisition of existing computer software.* (i) When contracting other than from GSA's Multiple Award Schedule contracts for the acquisition of existing computer software (i.e., privately developed software normally vended commercially under a license or lease agreement restricting its use, disclosure, or reproduction), no specific contract clause prescribed in this subpart need be used, but the contract (or purchase order) must specifically address the Government's rights to use, disclose and reproduce the software, which rights must be sufficient for the Government to fulfill the need for which the software is being acquired. Such rights may be negotiated and set forth in the contract using the guidance concerning restricted rights as set forth in 27.404(e), or the clause at 52.227–19, Commercial Computer Software—Restricted Rights, may be used. Restricted computer software acquired under GSA Multiple Award Schedule contracts and orders are excluded from this requirement. The guidance concerning rights set forth in 27.404(e), as well as those in the clause at 52.227–19, are the minimum rights the Government usually should accept. Thus if greater rights than these minimum rights are needed, or lesser rights are to be acquired, they must be negotiated and set forth in the contract (or purchase order). This includes any additions to, or limitations on, the rights set forth in paragraph (b) of the clause at 52.227–19 when used. Examples of greater rights may be those necessary for networking purposes or use of the software from remote terminals communicating with a host computer where the software is located. If the computer software is to be acquired with unlimited rights, the contract must also so state. In addition, the contract must adequately describe the computer programs and/or data bases, the form (tapes, punch cards, disk pack, and the like), and all the necessary documentation pertaining thereto. If the acquisition is by lease or license, the disposition of the computer software (by returning to the vendor or destroying) at the end of the term of the lease or license must be addressed.

(ii) If the contract incorporates, makes reference to, or uses a vendor's standard commercial lease, license, or purchase agreement, such agreement shall be reviewed to assure that it is consistent with subdivision (b)(2)(i) of this section. Caution should be exercised in accepting a vendor's terms and conditions, since they may be directed to commercial sales and may not be appropriate for Government contracts. Any inconsistencies in a vendor's standard commercial agreement shall be addressed in the contract and the contract terms shall take precedence over the vendor's standard commercial agreement. If the clause at 52.227–19, Commercial Computer Software—Restricted Rights, is used, inconsistencies in the vendor's standard commercial agreement regarding the Government's right to use, duplicate or disclose the computer software are reconciled by that clause.

(iii) If a prime contractor under a contract containing the clause at 52.227–14, Rights in Data—General, with subparagraph (g)(3) (*Alternate III*) in the clause, acquires restricted computer software from a subcontractor (at any tier) as a separate acquisition for delivery to or for use on behalf of the Government, the contracting officer may approve any additions to, or limitations on the restricted rights in the Restricted Rights Notice of subparagraph (g)(3) in a collateral agreement incorporated in and made part of the contract.

(3) *Other existing data and works.* Except for existing audiovisual and similar works pursuant to subparagraph (b)(1) of this section, and existing computer software pursuant to subparagraph (b)(2) of this section, no clause contained in this subpart is required to be included in (i) contracts solely for the acquisition of books, periodicals, and other printed items in the exact form in which such items are to be obtained unless reproduction rights are to be acquired; or (ii) other contracts (e.g., contracts resulting from sealed bidding) that require only existing data (other than limited rights data) to be delivered and such data are available without disclosure prohibitions, unless reproduction rights

BEST COPY AVAILABLE

to the data are to be obtained. If the reproduction rights to the data are to be obtained in any contract of the type described in subdivision (b)(3) (i) or (ii) of this section, such rights must be specifically set forth in the contract. No clause contained in this subpart is required to be included in contracts substantially for on-line data base services in the same form as they are normally available to the general public.

(c) *Contracts awarded under Small Business Innovative Research (SBIR) Program.* The clause at 52.227–20, Rights in Data—SBIR Program, is for use in all Phase I and Phase II contracts awarded under the Small Business Innovative Research Program (SBIR) established pursuant to Pub. L. 97–219 (the Small Business Innovation Development Act of 1982). The clause is limited to use solely in contracts awarded under the SBIR Program, and is the only data rights clause to be used in such contracts.

**27.406 Acquisition of data.**

(a) *General.* (1) It is the Government's practice to determine, to the extent feasible, its data requirements in time for inclusion in solicitations. The data requirements may be subject to revision during contract negotiations. Since the preparation, reformatting, maintenance and updating, cataloging, and storage of data represents an expense to both the Government and the contractor, efforts should be made to keep the contract data requirements to a minimum, consistent with the purposes of the contract.

(2) To the extent feasible, all known data requirements, including the time and place for delivery and any limitations and restrictions to be imposed on the contractor in the handling of the data, shall be specified in the contract. Further, and to the extent feasible, in major system acquisitions, data requirements shall be set out as separate contract line items. In establishing the contract data requirements and in specifying data items to be delivered by a contractor, agencies may, consistent with subparagraph (a)(1) of this section, develop their own contract schedule provisions in agency procedures (including data requirements lists) for listing, specifying, identifying source, assuring delivery, and handling any data required to be delivered, first produced, or specifically used in the performance of the contract.

(3) Data delivery requirements should normally not require that a contractor provide the Government, as a condition of the procurement, unlimited rights in data that qualify as limited rights data or restricted computer software. Rather, form, fit, and function data may be furnished with unlimited rights in lieu of the qualifying data, or the qualifying data may be furnished with limited rights or restricted rights if needed (see 27.404 (d) and (e)). If greater rights are needed such need should be clearly set forth in the solicitation and the contractor fairly compensated for such greater rights.

(b) *Additional data requirements.* (1) Recognizing that in some contracting situations, such as experimental, developmental, research, or demonstration contracts, it may not be feasible to ascertain all the data requirements at the time of contracting, the clause at 52.227–16, Additional Data Requirements, may be used to enable the subsequent ordering by the contracting officer of additional data first produced or specifically used in the performance of such contracts as the actual requirements become known. The clause shall normally be used in solicitations and contracts involving experimental, developmental, research or demonstration work (other than basic or applied research to be performed under a contract solely by a university or college when the contract amount will be $500,000 or less) unless all the requirements for data are believed to be known at the time of contracting and specified in the contract. If the contract is for basic or applied research to be performed by a university or college, and the contracting officer believes the contract effort will in the future exceed $500,000, even though the initial award does not, the contracting officer may include the clause in the initial award.

(2) Data may be ordered under the clause at 52.227–16, Additional Data Requirements, at any time during contract performance or within a period of 3 years after acceptance of all items to be delivered under the contract. The contractor is to be compensated for converting the data into the prescribed form, for reproduction, and for delivery. In order to minimize storage costs for the retention of data, the contractor may be relieved of retention requirements for specified data items by the contracting officer at any time during the retention period required by the clause. The contracting officer may permit the contractor to identify and specify in the contract data not to be ordered for delivery under the Additional Data Requirements clause if such data is not necessary to meet the Government's requirements for data. Also, the contracting officer may alter the Additional Data Requirements clause by deleting the term "or specifically used" in paragraph (a) thereof if delivery of such data is not necessary to meet the Government's requirements for data. Any data ordered under this clause will be subject to the Rights in Data—General clause (or other equivalent clause setting forth the respective rights of the Government and the contractor) in the contract, and data authorized to be withheld under such clause will not be required to be delivered under the Additional Data Requirements clause, except as provided in *Alternate II* or *Alternate III*, if included in the clause (see 27.404 (d) and (e)).

(3) Agencies not having an established program for dissemination of computer software shall give consideration to not ordering additional computer software under the clause at 52.227–16, Additional Data Requirements, for the sole purpose of disseminating or marketing of the software to the public especially if this will provide the contractor additional incentive to make improvements to the software at its own expense and disseminate or market it. This should not preclude an agency from including a summary description of computer software available from a contractor in any data dissemination programs which it operates, with a statement as to how the potential user can obtain it through the contractor, licensee, or assignee. In cases where the contracting officer orders software for internal purposes, consideration shall be given, consistent with the Government's needs, to not ordering particular source codes, algorithms, processes, formulae or flow charts of the software if the contractor shows that this aids its efforts to disseminate or market the software.

(c) *Acceptance of data.* Acceptability of technical data delivered under a contract shall be in accordance with the appropriate contract clause as required by Subpart 46.3, and the clause at 52.227–21, Technical Data Certification, Revision, and Withholding of Payment—Major Systems, when it is included in the contract. (See paragraph (d) of this section.)

(d) *Major system acquisition.* (1) In order to assure that technical data needed to support a major system acquisition are timely delivered and are complete, accurate, and satisfy the requirements of the contract concerning the data, the clause at 52.227–21, Technical Data Certification, Revision, and Withholding of Payment—Major Systems, is to be included in contracts for or in support of a major system (as the term "major system" is defined in section 4 of the Office of Federal Procurement Policy Act, as amended by Pub. L. 98–577), including every detailed design, development, or production contract for a major system acquisition

and contracts for any individual part, component, subassembly, assembly, or subsystem integral to the major system, and other property which may be replaced during the service life of the system, and including spare parts and replenishment spare parts.

(2) The clause at 52.227–21, Technical Data, Certification, Revision, and Withholding of Payment—Major Systems, requires the contractor, upon delivery of any technical data made subject to the clause in the contract, to certify that to the best of its knowledge and belief, such data are complete, accurate, and comply with contract requirements. It also provides for corrections of any deficiencies in the data, as well as for the ability of the contracting officer to request revisions of the data to reflect engineering design changes made during performance of the contract and affecting form, fit, and function of the items the data depict. Further included is the authority for the contracting officer to withhold payment under the contract to assure timely delivery of the technical data and/or assure correction if the technical data are not complete, accurate, and in compliance with contract requirements.

(3) When the clause at 52.227–21, Technical Data, Certification, Revision and Withholding of Payment—Major Systems, is used, the section of the contract specifying data delivery requirements (see subparagraph (a)(2) of this section) shall expressly identify those line items of technical data to which the clause applies. Upon delivery of such technical data, the contracting officer or designee shall review the technical data and the contractor's certification relating thereto to assure that the data are complete, accurate, and comply with contract requirements. If not, the contractor is to be requested to correct the deficiencies, and payment may be withheld until such is done. Final payment should not be made under the contract until it has been determined that the delivery requirements of those line items of data to which the clause applies have been satisfactorily met.

(4) In a contract for or in support of a major system awarded by a civilian agency other than NASA or the U.S. Coast Guard the contracting officer shall include contractual provisions requiring, as an element of performance under the contract, the delivery of any technical data, other than computer software, relating to the major system or supplies for the major system procured or to be procured by the Government, which are to be developed exclusively with Federal funds in the performance of the contract if the delivery of such technical data is needed to ensure the competitive acquisition of supplies or services that will be required in substantial quantities in the future. The clause at 52.227–22, Major System—Minimum Rights, is to be included in such contracts in addition to the clause at 52.227–14, Rights in Data—General, and other required clauses, to ensure that the Government acquires at least those rights required by Pub. L. 98–577 in technical data developed exclusively with Federal funds. In any contract to which this subparagraph (d)(4) applies, technical data, other than computer software, relating to a major system or supplies for a major system, procured or to be procured by the Government and also relating to the design, development, or manufacture of products or processes offered or to be offered for sale to the public (except for such data as may be necessary for the Government to operate or maintain the product, or use the process if obtained by the United States as an element of performance under the contract), shall not be required to be provided to the Government from persons who have developed such products or processes as a condition for the procurement of such products or processes by the Government.

### 27.407 Rights to technical data in successful proposals.

(a) Contracting officers may, in consideration of contract award, desire to acquire unlimited rights in technical data (but not commercial or financial information) contained in a successful proposal upon which a contract award is based. However, before such unlimited rights are acquired, the prospective contractor must be afforded the opportunity either (1) to advise the contracting officer that the technical data, or portions thereof (to be identified by the prospective contractor), are covered by any restrictive notice regarding the disclosure and use of proposal information authorized by Subpart 15.4 or 15.5 (or any agency supplement thereto), and request that such protection be maintained by excluding the data from the Government's rights; or (2) to establish to the contracting officer's satisfaction that identified portions of the technical data do not relate directly to or will not be utilized in the work to be performed under the contract, and request that such portions be excluded from the Government's rights.

(b) If unlimited rights to technical data in successful proposals, as set forth in paragraph (a) of this section, are to be acquired, it shall be by use of the clause at 52.227–23, Rights to Proposal Data (Technical). Any excluded technical data will be identified by inserting appropriate proposal page numbers in the clause, which clause enables the identification of data to be excluded from the Government's rights, as discussed in paragraph (a) of this section. Such exclusion is not dispositive of the protective status of the data, but any excluded technical data, as well as any commercial and financial information contained in the proposal, will remain subject to the policies in Subpart 15.4 or 15.5 (or agency supplements thereto) relating to proposal information (i.e., will be used for evaluation purposes only). If the clause at 52.227–23, Rights to Proposal Data (Technical), is included in a contract, the prospective contractor must be specifically afforded the opportunity to exclude technical data as set forth in paragraph (a) of this section, and the contract file must reflect that fact. If there is a need to have access to any of the excluded technical data during contract performance, consideration should be given to their acquisition as limited rights data, if they so qualify, in accordance with 27.404(d).

### 27.408 Cosponsored research and development activities.

(a) In contracts involving cosponsored research and development wherein the contractor is required to make substantial contributions of funds or resources (i.e., by cost-sharing or by repayment of nonrecurring costs), and the contractor's and the Government's respective contributions to any item, component, process, or computer software, developed or produced under the contract are not readily segregable, the contracting officer may limit the acquisition of or acquire less than unlimited rights to any data developed and delivered under such contract. Agencies may regulate the use of this authority in their supplements. Basically such rights should, at a minimum, assure use of the data for agreed-to Governmental purposes (including reprocurement rights as appropriate), and will address any disclosure limitations or restrictions to be imposed on the data. Also, consideration may be given to directed licensing provisions if needed to carry out the objectives of the contract. Since the purpose of the cosponsored research and development, the legitimate proprietary interests of the contractor, the needs of the Government, and the respective contributions of both parties may vary, no specific clauses are prescribed, but a clause providing less than unlimited

rights in the Government for data developed and delivered under the contract (such as license rights) may be tailored to the circumstances consistent with the foregoing and the policy set forth in 27.402. As a guide, such clause may be appropriate when the contractor contributes money or resources, or agrees to make repayment of nonrecurring costs, of a value of approximately 50 percent of the total cost of the contract (i.e., Government, contractor, and/or third party paid costs), and the respective contributions are not readily segregable for any work element to be performed under the contract. Such clause may be used for all or for only specifically identified tasks or work elements under the contract. In the latter instance, its use will be in addition to whatever other data rights clause is prescribed under this subpart, with the contract specifically identifying which clause is to apply to which tasks or work elements. Further, such clause may not be appropriate where the purpose of the contract is to produce data for dissemination to the public, or to develop or demonstrate technologies which will be available, in any event, to the public for their direct use.

(b) Where the contractor's contributions are readily segregable (by performance requirements and the funding therefor) and so identified in the contract, any data resulting therefrom may be treated under such clause as limited rights data or restricted computer software in accordance with 27.404 (d) or (e), as applicable; or if such treatment is inconsistent with the purpose of the contract, rights to such data may, if so negotiated and stated in the contract, be treated in a manner consistent with paragraph (a) of this section.

**27.403 Solicitation provisions and contract clauses.**

(a)(1) The contracting officer shall insert the clause at 52.227–14, Rights in Data—General, including its use with *Alternate I* through *Alternate V* as may be required or authorized in accordance with paragraphs (b) through (f) of this section, in solicitations and contracts if it is contemplated that data will be produced, furnished, or acquired under the contract, unless the contract is—

(i) For the production of special works of the type set forth in 27.405(a), but the clause at 52.227–14, Rights in Data—General, shall be included in the contract and made applicable to data other than special works, as appropriate;

(ii) For the acquisition of existing data works, as described in 27.405(b);

(iii) To be performed outside the United States, its possessions, and Puerto Rico, in which case agencies may prescribe different clauses (see paragraph (n) of this section);

(iv) For architect-engineer services or construction work, in which case agencies may utilize the clause at 52.227–17, Rights in Data—Special Works, or may prescribe different clauses;

(v) A Small Business Innovation Research contract (see paragraph (l) of this section);

(vi) For the management, operation, design, or construction of a Government-owned facility to perform research, development, or production work, in which case agencies may prescribe different clauses (see paragraph (p) of this section) or

(vii) A contract involving cosponsored research and development in which a clause providing for less than unlimited right has been authorized. (See 27.408).

(2) Subparagraph (e)(3) of the clause at 52.227–14, Rights in Data—General, may be deleted or reserved by an agency not subject to Title III of the Federal Property and Administrative Services Act.

(b) If an agency determines, in accordance with 27.404(c), to adopt the alternate definition of "Limited Rights Data" in paragraph (a) of the clause, the clause shall be used with its *Alternate I*.

(c) In accordance with 27.404(d), if a contracting officer determines it is necessary to obtain the delivery of limited rights data, the clause shall be used with its *Alternate II*. The contracting officer shall, when *Alternate II* is used, assure that the purposes, if any, for which limited rights data are to be disclosed outside the Government are included in the "Limited Rights Notice" of subparagraph (g)(2) of the clause.

(d) In accordance with 27.404(e), if a contracting officer determines it is necessary to obtain the delivery of restricted computer software, the clause shall be used with its *Alternate III*. Any greater or lesser rights regarding the use, duplication, or disclosure of restricted computer software than those set forth in the Restricted Rights Notice of subparagraph (g)(3) of the clause must be specified in the contract and the notice modified accordingly.

(e) The clause shall be used with its *Alternate IV* in contracts for basic or applied research (other than those for the management or operation of Government facilities or where international agreements require otherwise), to be performed solely by universities and colleges. The clause may be used with its *Alternate IV* in other contracts if in accordance with 27.404(f)(2) an agency determines to grant blanket permission for the contractor to establish claim to copyright subsisting in all data first produced without further request being made by the contractor. When *Alternate IV* is used, the contract may exclude items or categories of data from the blanket permission granted, either by express provisions in the contract or by the addition of a subparagraph (d)(3) to the clause (see 27.404(g)(2)).

(f) In accordance with 27.404(i), if a contracting officer needs to have the right to inspect certain data at a contractor's facility or if by an agency, generally the clause shall be used with its *Alternate V*.

(g) In accordance with 27.404(d)(2), if the contracting officer desires to have an offeror state in response to a solicitation, to the extent feasible, whether limited rights data or restricted computer software are likely to be used in meeting the data delivery requirements set forth in the solicitation, the contracting officer shall insert in the solicitation the provision at 52.227–15, Representation of Limited Rights Data and Restricted Computer Software in any solicitation containing the clause at 52.227–14, Rights in Data—General. The contractor's response will provide an aid in determining whether the clause should be used with *Alternate II* and/or *Alternate III*.

(h) The contracting officer shall normally insert the clause at 52.227–16, Additional Data Requirements, in solicitations and contracts involving experimental, developmental, research, or demonstration work (other than basic or applied research to be performed solely by a university or college where the contract amount will be $500,000 or less) unless all the requirements for data are believed to be known at the time of contracting and specified in the contract. (See 27.406(b).) This clause may also be used in other contracts when considered appropriate.

(i) In accordance with 27.405(a), the contracting officer shall insert the clause at 52.227–17, Rights in Data—Special Works, in solicitations and contracts primarily for the production or compilation of data (other than limited rights data or restricted computer software) for the Government's internal use, or when there is a specific need to limit distribution and use of the data and/or to obtain indemnity for liabilities that may arise out of the content, performance, or disclosure of the data. Examples of such contracts are set forth in 27.405(a). The contract may specify the purposes and conditions (including

time limitations) under which the data may be used, released or reproduced by the contractor for other than contract performance. Contracts for the production of audiovisual works, sound recordings, etc. may include limitations in connection with talent releases, music licenses, and the like that are consistent with the purposes for which the data is acquired.

(j) The contracting officer shall insert the clause at 52.227–18, Rights in Data—Existing Works, in solicitations and contracts exclusively for the acquisition, without modification, of existing audiovisual and similar works of the type set forth in 27.405(b)(1). The contract may set forth limitations consistent with the purposes for which the work is being acquired. The clause at 52.227–17, Rights in Data—Special Works, shall be used if existing works are to be modified, as by editing, translation, addition of subject matter, etc.

(k) In accordance with 27.405(b)(2), when contracting (other than from GSA's Multiple Award Schedule contracts) for the acquisition of existing computer software, the clause at 52.227–19, Commercial Computer Software-Restricted Rights, may be used in the solicitation and contract. In any event, the contracting officer shall assure that the contract contains terms to obtain sufficient rights for the Government to fulfill the need for which the software is being acquired and is otherwise consistent with 27.405(b)(2).

(l) If the contract is a Small Business Innovation Research (SBIR) contract, the clause at 52.227–20, Rights in Data—SBIR Program shall be used in all Phase I and Phase II contracts awarded under the Small Business Innovation Research Program established pursuant to Pub. L. 97–219 (The Small Business Innovation Development Act of 1982).

(m) While no specific clause of this subpart is required to be included in contracts solely for the acquisition, without disclosure prohibitions, of books, publications and similar items in the exact form in which such items exist prior to the request for purchase (i.e., the off-the-shelf purchase of such items), or in other contracts (e.g., contracts resulting from sealed bidding) where only existing data available without disclosure prohibitions is to be furnished, if reproduction rights are to be acquired the contract shall include terms addressing such rights. (See 27.405(b)(3).)

(n) Agencies may prescribe in their procedures, as appropriate, a clause consistent with the policy of 27.402 in contracts to be performed outside the United States, its possessions, and Puerto Rico.

(o) Agencies may prescribe in their procedures the clause at 52.227–17, Rights in Data—Special Works, or prescribe, as appropriate, clauses consistent with the policy in 27.402 in contracts for architect-engineer services and construction work.

(p) Agencies may prescribe in their procedures, as appropriate, a clause consistent with the policy of 27.402 in contracts for management, operation, design, or construction of Government-owned research, development, or production facilities, and in contracts and subcontracts in support of programs being conducted at such facilities.

(q) In accordance with 27.406(d), the contracting officer shall insert the clause at 52.227–21, Technical Data Certification, Revision, and Withholding of Payment—Major Systems, in contracts for major systems acquisitions or for support of major systems acquisitions. When used, this clause requires that the technical data to which it applies be specified in the contract. (See 27.406(d).)

(r) In the case of civilian agencies except NASA and the U.S. Coast Guard, the contracting officer shall insert the clause at 52.227–21, Major System—Minimum Rights, in contracts for major systems or contracts in support of major systems.

(s) In accordance with 27.407, if a contracting officer desires to acquire unlimited rights in technical data contained in a successful proposal upon which a contract award is based, the contracting officer shall insert the clause at 52.227–23, Rights to Proposed Data (Technical). Rights to technical data in a proposal are not acquired by mere incorporation by reference of the proposal in the contract, and if a proposal is incorporated by reference, § 27.404 must be followed to assure that such rights are appropriately addressed.

## PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. Sections 52.227–14 through 52.227–23 are added to read as follows:

**52.227–14 Rights in data—general.**

As prescribed in 27.409(a), insert the following clause with any appropriate alternates:

**Rights in Data—General (June 1987)**

(a) *Definitions.*

"Computer software," as used in this clause, means computer programs, computer data bases, and documentation thereof.

"Data," as used in this clause, means recorded information, regardless of form or the media on which it may be recorded. The term includes technical data and computer software. The term does not include information incidental to contract administration, such as financial, administrative, cost or pricing, or management information.

"Form, fit, and function data," as used in this clause, means data relating to items, components, or processes that are sufficient to enable physical and functional interchangeability, as well as data identifying source, size, configuration, mating, and attachment characteristics, functional characteristics, and performance requirements; except that for computer software it means data identifying source, functional characteristics, and performance requirements but specifically excludes the source code, algorithm, process, formulae, and flow charts of the software.

"Limited rights," as used in this clause, means the rights of the Government in limited rights data as set forth in the Limited Rights Notice of subparagraph (g)(2) if included in this clause.

"Limited rights data," as used in this clause, means data (other than computer software) that embody trade secrets or are commercial or financial and confidential or privileged, to the extent that such data pertain to items, components, or processes developed at private expense, including minor modifications thereof.

"Restricted computer software," as used in this clause, means computer software developed at private expense and that is a trade secret; is commercial or financial and is confidential or privileged; or is published copyrighted computer software; including minor modifications of such computer software.

"Restricted rights," as used in this clause, means the rights of the Government in restricted computer software, as set forth in a Restricted Rights Notice of subparagraph (g)(3) if included in this clause, or as otherwise may be provided in a collateral agreement incorporated in and made part of this contract, including minor modifications of such computer software.

"Technical data," as used in this clause, means data (other than computer software) which are of a scientific or technical nature.

"Unlimited rights," as used in this clause, means the right of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so.

(b) *Allocations of rights.* (1) Except as provided in paragraph (c) of this clause regarding copyright, the Government shall have unlimited rights in—

(i) Data first produced in the performance of this contract;

(ii) Form, fit, and function data delivered under this contract;

(iii) Data delivered under this contract (except for restricted computer software) that constitute manuals or instructional and training material for installation, operation, or routine maintenance and repair of items,

components, or processes delivered or furnished for use under this contract; and

(iv) All other data delivered under this contract unless provided otherwise for limited rights data or restricted computer software in accordance with paragraph (g) of this clause.

(2) The Contractor shall have the right to—

(i) Use, release to others, reproduce, distribute, or publish any data first produced or specifically used by the Contractor in the performance of this contract, unless provided otherwise in paragraph (d) of this clause;

(ii) Protect from unauthorized disclosure and use those data which are limited rights data or restricted computer software to the extent provided in paragraph (g) of this clause;

(iii) Substantiate use of, add or correct limited rights, restricted rights, or copyright notices and to take other appropriate action, in accordance with paragraphs (e) and (f) of this clause; and

(iv) Establish claim to copyright subsisting in data first produced in the performance of this contract to the extent provided in subparagraph (c)(1) of this clause.

(c) *Copyright.* (1) *Data first produced in the performance of this contract.* Unless provided otherwise in paragraph (d) of this clause, the Contractor may establish, without prior approval of the Contracting Officer, claim to copyright subsisting in scientific and technical articles based on or containing data first produced in the performance of this contract and published in academic, technical or professional journals, symposia proceedings or similar works. The prior, express written permission of the Contracting Officer is required to establish claim to copyright subsisting in all other data first produced in the performance of this contract. When claim to copyright is made, the Contractor shall affix the applicable copyright notices of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For data other than computer software the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable worldwide license in such copyrighted data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government. For computer software, the Contractor grants to the Government and others acting in its behalf, a paid-up nonexclusive, irrevocable worldwide license in such copyrighted computer software to reproduce, prepare derivative works, and perform publicly and display publicly by or on behalf of the Government.

(2) *Data not first produced in the performance of this contract.* The Contractor shall not, without prior written permission of the Contracting Officer, incorporate in data delivered under this contract any data not first produced in the performance of this contract and which contains the copyright notice of 17 U.S.C. 401 or 402, unless the Contractor identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (c)(1) of this clause; *provided, however,* that if such data are computer software the Government shall acquire a copyright license as set forth in subparagraph (g)(3) of this clause if included in this contract or as otherwise may be provided in a collateral agreement incorporated in or made part of this contract.

(3) *Removal of copyright notices.* The Government agrees not to remove any copyright notices placed on data pursuant to this paragraph (c), and to include such notices on all reproductions of the data.

(d) *Release, publication and use of data.* (1) The Contractor shall have the right to use, release to others, reproduce, distribute, or publish any data first produced or specifically used by the Contractor in the performance of this contract, except to the extent such data may be subject to the Federal export control or national security laws or regulations, or unless otherwise provided in this paragraph of this clause or expressly set forth in this contract.

(2) The Contractor agrees that to the extent it receives or is given access to data necessary for the performance of this contract which contain restrictive markings, the Contractor shall treat the data in accordance with such markings unless otherwise specifically authorized in writing by the Contracting Officer.

(e) *Unauthorized marking of data.* (1) Notwithstanding any other provisions of this contract concerning inspection or acceptance, if any data delivered under this contract are marked with the notices specified in subparagraph (g)(2) or (g)(3) of this clause and use of such is not authorized by this clause, or if such data bears any other restrictive or limiting markings not authorized by this contract, the Contracting Officer may at any time either return the data to the Contractor, or cancel or ignore the markings. However, the following procedures shall apply prior to canceling or ignoring the markings.

(i) The Contracting Officer shall make written inquiry to the Contractor affording the Contractor 30 days from receipt of the inquiry to provide written justification to substantiate the propriety of the markings;

(ii) If the Contractor fails to respond or fails to provide written justification to substantiate the propriety of the markings within the 30-day period (or a longer time not exceeding 90 days approved in writing by the Contracting Officer for good cause shown), the Government shall have the right to cancel or ignore the markings at any time after said period and the data will no longer be made subject to any disclosure prohibitions.

(iii) If the Contractor provides written justification to substantiate the propriety of the markings within the period set in subdivision (e)(1)(i) of this clause, the Contracting Officer shall consider such written justification and determine whether or not the markings are to be cancelled or ignored. If the Contracting Officer determines that the markings are authorized, the Contractor shall be so notified in writing. If the Contracting Officer determines, with concurrence of the head of the contracting activity, that the markings are not authorized, the Contracting Officer shall furnish the Contractor a written determination, which determination shall become the final agency decision regarding the appropriateness of the markings unless the Contractor files suit in a court of competent jurisdiction within 90 days of receipt of the Contracting Officer's decision. The Government shall continue to abide by the markings under this subdivision (e)(1)(iii) until final resolution of the matter either by the Contracting Officer's determination becoming final (in which instance the Government shall thereafter have the right to cancel or ignore the markings at any time and the data will no longer be made subject to any disclosure prohibitions), or by final disposition of the matter by court decision if suit is filed.

(2) The time limits in the procedures set forth in subparagraph (e)(1) of this clause may be modified in accordance with agency regulations implementing the Freedom of Information Act (5 U.S.C. 552) if necessary to respond to a request thereunder.

(3) This paragraph (e) does not apply if this contract is for a major system or for support of a major system by a civilian agency other than NASA and the U.S. Coast Guard agency subject to the provisions of Title III of the Federal Property and Administrative Services Act of 1949.

(4) Except to the extent the Government's action occurs as the result of final disposition of the matter by a court of competent jurisdiction, the Contractor is not precluded by this paragraph (e) from bringing a claim under the Contract Disputes Act, including pursuant to the Disputes clause of this contract, as applicable, that may arise as the result of the Government removing or ignoring authorized markings on data delivered under this contract.

(f) Omitted or incorrect markings.

(1) Data delivered to the Government without either the limited rights or restricted rights notice as authorized by paragraph (g) of this clause, or the copyright notice required by paragraph (c) of this clause, shall be deemed to have been furnished with unlimited rights, and the Government assumes no liability for the disclosure, use, or reproduction of such data. However, to the extent the data has not been disclosed without restriction outside the Government, the Contractor may request, within 6 months (or a longer time approved by the Contracting Officer for good cause shown) after delivery of such data, permission to have notices placed on qualifying data at the Contractor's expense, and the Contracting Officer may agree to do so if the Contractor—

(i) Identifies the data to which the omitted notice is to be applied;

(ii) Demonstrates that the omission of the notice was inadvertent;

(iii) Establishes that the use of the proposed notice is authorized; and

(iv) Acknowledges that the Government has no liability with respect to the disclosure, use, or reproduction of any such data made prior to the addition of the notice or resulting from the omission of the notice.

(2) The Contracting Officer may also (i) permit correction at the Contractor's expense

of incorrect notices if the Contractor identifies the data on which correction of the notice is to be made, and demonstrates that the correct notice is authorized, or (ii) correct any incorrect notices.

(g) *Protection of limited rights data and restricted computer software.*

(1) When data other than that listed in subdivisions (b)(1) (i), (ii), and (iii) of this clause are specified to be delivered under this contract and qualify as either limited rights data or restricted computer software, if the Contractor desires to continue protection of such data, the Contractor shall withhold such data and not furnish them to the Government under this contract. As a condition to this withholding, the Contractor shall identify the data being withheld and furnish form, fit, and function data in lieu thereof. Limited rights data that are formatted as a computer data base for delivery to the Government are to be treated as limited rights data and not restricted computer software.

(2) [Reserved]

(3) [Reserved]

(h) *Subcontracting.* The Contractor has the responsibility to obtain from its subcontractors all data and rights therein necessary to fulfill the Contractor's obligations to the Government under this contract. If a subcontractor refuses to accept terms affording the Government such rights, the Contractor shall promptly bring such refusal to the attention of the Contracting Officer and not proceed with subcontract award without further authorization.

(i) *Relationship to patents.* Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government.

*Alternate I* (Jun 1987). As prescribed in 27.409(b), substitute the following definition for "Limited Rights Data" in paragraph (a) of the clause:

"Limited rights data," as used in this clause, means data (other than computer software) developed at private expense that embody trade secrets or are commercial or financial and confidential or privileged.

*Alternate II* (Jun 1987). As prescribed in 27.409(c), insert the following subparagraph (g)(2) in the clause:

(g)(2) Notwithstanding subparagraph (g)(1) of this clause, the contract may identify and specify the delivery of limited rights data, or the Contracting Officer may require by written request the delivery of limited rights data that has been withheld or would otherwise be withholdable. If delivery of such data is so required, the Contractor may affix the following "Limited Rights Notice" to the data and the Government will thereafter treat the data, subject to the provisions of paragraphs (e) and (f) of this clause, in accordance with such Notice:

**Limited Rights Notice (Jun 1987)**

(a) These data are submitted with limited rights under Government contract No. _____ (and subcontract _____, if appropriate). These data may be reproduced and used by the Government with the express limitation that they will not, without written permission of the Contractor, be used for purposes of manufacture nor disclosed outside the Government; except that the Government may disclose these data outside the Government for the following purposes, if any, provided that the Government makes such disclosure subject to prohibition against further use and disclosure: [Agencies may list additional purposes as set forth in 27.404(d)(1) or if none, so state]

(b) This Notice shall be marked on any reproduction of these data, in whole or in part."

(End of notice)

*Alternate III* (Jun 1987). As prescribed in 27.409(d), insert the following subparagraph (g)(3) in the clause:

(g)(3)(i) Notwithstanding subparagraph (g)(1) of this clause, the contract may identify and specify the delivery of restricted computer software, or the Contracting Officer may require by written request the delivery of restricted computer software that has been withheld or would otherwise be withholdable. If delivery of such computer software is so required, the Contractor may affix the following "Restricted Rights Notice" to the computer software and the Government will thereafter treat the computer software, subject to paragraphs (e) and (f) of this clause, in accordance with the Notice:

**Restricted Rights Notice (Jun 1987)**

(a) This computer software is submitted with restricted rights under Government Contract No. _____ (and subcontract _____, if appropriate). It may not be used, reproduced, or disclosed by the Government except as provided in paragraph (b) of this Notice or as otherwise expressly stated in the contract.

(b) This computer software may be—

(1) Used or copied for use in or with the computer or computers for which it was acquired, including use at any Government installation to which such computer or computers may be transferred;

(2) Used or copied for use in a backup computer if any computer for which it was acquired is inoperative;

(3) Reproduced for safekeeping (archives) or backup purposes;

(4) Modified, adapted, or combined with other computer software, provided that the modified, combined, or adapted portions of the derivative software incorporating restricted computer software are made subject to the same restricted rights;

(5) Disclosed to and reproduced for use by support service Contractors in accordance with subparagraphs (b) (1) through (4) of this clause, provided the Government makes such disclosure or reproduction subject to these restricted rights; and

(6) Used or copied for use in or transferred to a replacement computer.

(c) Notwithstanding the foregoing, if this computer software is published copyrighted computer software, it is licensed to the Government, without disclosure prohibitions, with the minimum rights set forth in paragraph (b) of this clause.

(d) Any other rights or limitations regarding the use, duplication, or disclosure of this computer software are to be expressly stated in, or incorporated in, the contract.

(e) This Notice shall be marked on any reproduction of this computer software, in whole or in part."

(End of notice)

(ii) Where it is impractical to include the Restricted Rights Notice on restricted computer software, the following short-form Notice may be used in lieu thereof:

**Restricted Rights Notice**

*Short Form (Jun 1987)*

Use, reproduction, or disclosure is subject to restrictions set forth in Contract No. _____ (and subcontract _____, if appropriate) with _____ (name of Contractor and subcontractor)."

(End of notice)

(iii) If restricted computer software is delivered with the copyright notice of 17 U.S.C. 403, it will be presumed to be published copyrighted computer software licensed to the Government without disclosure prohibitions, with the minimum rights set forth in paragraph (b) of this clause, unless the Contractor includes the following statement with such copyright notice: "Unpublished—rights reserved under the Copyright Laws of the United States."

*Alternate IV* (Jun 1987). As prescribed in 27.409(e), substitute the following subparagraph (c)(1) in the clause:

(c) *Copyright.* (1) *Data First Produced in the Performance of the Contract.* Except as otherwise specifically provided in this contract, the Contractor may establish claim to copyright subsisting in any data first produced in the performance of this contract. When claim to copyright is made, the Contractor shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For data other than computer software, the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable, worldwide license for all such data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government. For computer software, the Contractor grants to the Government and others acting on its behalf, a paid up, nonexclusive, irrevocable worldwide license for all such computer software to reproduce, prepare derivative works, and perform publicly and display publicly, by or on behalf of the Government.

*Alternate V* (Jun 1987) As prescribed in 27.409(f), add the following paragraph (j) to the clause:

(j) The Contractor agrees, except as may be otherwise specified in this contract for specific data items listed as not subject to this paragraph, that the Contracting Officer or an authorized representative may, up to three years after acceptance of all items to be delivered under this contract, inspect at the Contractor's facility any data withheld

pursuant to paragraph (g)(1) of this clause, for purposes of verifying the Contractor's assertion pertaining to the limited rights or restricted rights status of the data or for evaluating work performance. Where the Contractor whose data are to be inspected demonstrates to the Contracting Officer that there would be a possible conflict of interest if the inspection were made by a particular representative, the Contracting Officer shall designate an alternate inspector.

**52.227-15 Representation of limited rights data and restricted computer software.**

As prescribed in 27.409(g), insert the following provision in solicitations that include the clause at 52.227-14, Rights in Data—General:

**Representation of Limited Rights Data and Restricted Computer Software (Jun 1987)**

(a) This solicitation sets forth the work to be performed if a contract award results, and the Government's known delivery requirements for data (as defined in FAR 27.401). Any resulting contract may also provide the Government the option to order additional data under the Additional Data Requirements clause at 52.227-16 of the FAR, if included in the contract. Any data delivered under the resulting contract will be subject to the Rights in Data—General clause at 52.227-14 that is to be included in this contract. Under the latter clause, a Contractor may withhold from delivery data that qualify as limited rights data or restricted computer software, and deliver form, fit, and function data in lieu thereof. The latter clause also may be used with its *Alternates II and/or III* to obtain delivery of limited rights data or restricted computer software, marked with limited rights or restricted rights notices, as appropriate. In addition, use of *Alternate V* with this latter clause provides the Government the right to inspect such data at the Contractor's facility.

(b) As an aid in determining the Government's need to include any of the aforementioned *Alternates* in the clause at 52.227-14, Rights in Data—General, the offeror's response to this solicitation shall, to the extent feasible, complete the representation in paragraph (b) of this clause to either state that none of the data qualify as limited rights data or restricted computer software, or identify which of the data qualifies as limited rights data or restricted computer software. Any identification of limited rights data or restricted computer software in the offeror's response is not determinative of the status of such data should a contract be awarded to the offeror.

**Representation Concerning Data Rights**

Offeror has reviewed the requirements for the delivery of data or software and states (offeror check appropriate block)—

☐ None of the data proposed for fulfilling such requirements qualifies as limited rights data or restricted computer software.

☐ Data proposed for fulfilling such requirements qualify as limited rights data or restricted computer software and are identified as follows:

_____

_____

_____

**Note:** "Limited rights data" and "Restricted computer software" are defined in the contract clause entitled "Rights In Data—General."

(End of provision)

**52.227-16 Additional data requirements.**

As prescribed in 27.409(h), insert the following clause:

**Additional Data Requirements (June 1987)**

(a) In addition to the data (as defined in the clause at 52.227-14, Rights in Data—General clause or other equivalent included in this contract) specified elsewhere in this contract to be delivered, the Contracting Officer may, at any time during contract performance or within a period of 3 years after acceptance of all items to be delivered under this contract, order any data first produced or specifically used in the performance of this contract.

(b) The Rights in Data—General clause or other equivalent included in this contract is applicable to all data ordered under this Additional Data Requirements clause. Nothing contained in this clause shall require the Contractor to deliver any data the withholding of which is authorized by the Rights in Data—General or other equivalent clause of this contract, or data which are specifically identified in this contract as not subject to this clause.

(c) When data are to be delivered under this clause, the Contractor will be compensated for converting the data into the prescribed form, for reproduction, and for delivery.

(d) The Contracting Officer may release the Contractor from the requirements of this clause for specifically identified data items at any time during the 3-year period set forth in paragraph (a) of this clause.

**52.227-17 Rights in data—special works.**

As prescribed in 27.409(i), insert the following clause:

**Rights in Data—Special Works (June 1987)**

(a) *Definitions.*

"Data," as used in this clause, means recorded information regardless of form or the medium on which it may be recorded. The term includes technical data and computer software. The term does not include information incidental to contract administration, such as financial, administrative, cost or pricing or management information.

"Unlimited rights," as used in this clause, means the right of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose whatsoever, and to have or permit others to do so.

(b) *Allocation of Rights.* (1) The Government shall have—

(i) Unlimited rights in all data delivered under this contract, and in all data first produced in the performance of this contract, except as provided in paragraph (c) of this clause for copyright.

(ii) The right to limit exercise of claim to copyright in data first produced in the performance of this contract, and to obtain assignment of copyright in such data, in accordance with subparagraph (c)(1) of this clause.

(iii) The right to limit the release and use of certain data in accordance with paragraph (d) of this clause.

(2) The Contractor shall have, to the extent permission is granted in accordance with subparagraph (c)(1) of this clause, the right to establish claim to copyright subsisting in data first produced in the performance of this contract.

(c) *Copyright.* (1) *Data first produced in the performance of this contract.*

(i) The Contractor agrees not to assert, establish, or authorize others to assert or establish, any claim to copyright subsisting in any data first produced in the performance of this contract without prior written permission of the Contracting Officer. When claim to copyright is made, the Contractor shall affix the appropriate copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to such data when delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. The Contractor grants to the Government, and others acting on its behalf, a paid-up nonexclusive, irrevocable, worldwide license for all such data to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government.

(ii) If the Government desires to obtain copyright in data first produced in the performance of this contract and permission has not been granted as set forth in subdivision (c)(1)(i) of this clause, the Contracting Officer may direct the Contractor to establish, or authorize the establishment of, claim to copyright in such data and to assign, or obtain the assignment of, such copyright to the Government or its designated assignee.

(2) *Data not first produced in the performance of this contract.* The Contractor shall not, without prior written permission of the Contracting Officer, incorporate in data delivered under this contract any data not first produced in the performance of this contract and which contain the copyright notice of 17 U.S.C. 401 or 402, unless the Contractor identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (c)(1) of this clause.

(d) *Release and use restrictions.* Except as otherwise specifically provided for in this contract, the Contractor shall not use for purposes other than the performance of this contract, nor shall the Contractor release, reproduce, distribute, or publish any data first produced in the performance of this contract, nor authorize others to do so, without written permission of the Contracting Officer.

(e) *Indemnity.* The Contractor shall indemnify the Government and its officers, agents, and employees acting for the Government against any liability, including

costs and expenses, incurred as the result of the violation of trade secrets, copyrights, or right of privacy or publicity, arising out of the creation, delivery, publication, or use of any data furnished under this contract; or any libelous or other unlawful matter contained in such data. The provisions of this paragraph do not apply unless the Government provides notice to the Contractor as soon as practicable of any claim or suit, affords the Contractor an opportunity under applicable laws, rules, or regulations to participate in the defense thereof, and obtains the Contractor's consent to the settlement of any suit or claim other than as required by final decree of a court of competent jurisdiction; nor do these provisions apply to material furnished to the Contractor by the Government and incorporated in data to which this clause applies.

(End of clause)

**52.227-18 Rights in data—existing works.**

As prescribed in 27.409(j), insert the following clause:

**Rights in Data—Existing Works (June 1987)**

(a) Except as otherwise provided in this contract, the Contractor grants to the Government, and others acting on its behalf, a paid-up nonexclusive, irrevocable, worldwide license to reproduce, prepare derivative works, and perform publicly and display publicly, by or on behalf of the Government, for all the material or subject matter called for under this contract, or for which this clause is specifically made applicable.

(b) The Contractor shall indemnify the Government and its officers, agents, and employees acting for the Government against any liability, including costs and expenses, incurred as the result of (1) the violation of trade secrets, copyrights, or right of privacy or publicity, arising out of the creation, delivery, publication or use of any data furnished under this contract; or (2) any libelous or other unlawful matter contained in such data. The provisions of this paragraph do not apply unless the Government provides notice to the Contractor as soon as practicable of any claim or suit, affords the Contractor an opportunity under applicable laws, rules, or regulations to participate in the defense thereof, and obtains the Contractor's consent to the settlement of any suit or claim other than as required by final decree of a court of competent jurisdiction; and do not apply to material furnished to the Contractor by the Government and incorporated in data to which this clause applies.

(End of clause)

**52.227-19 Commercial computer software—restricted rights.**

As prescribed in 27.409(k), insert the following clause:

**Commercial Computer Software—Restricted Rights (June 1987)**

(a) As used in this clause, "restricted computer software" means any computer program, computer data base, or documentation thereof, that has been developed at private expense and either is a trade secret, is commercial or financial and confidential or—privileged, or is published and copyrighted.

(b) Notwithstanding any provisions to the contrary contained in any Contractor's standard commercial license or lease agreement pertaining to any restricted computer software delivered under this purchase order/contract, and irrespective of whether any such agreement has been proposed prior to or after issuance of this purchase order/contract or of the fact that such agreement may be affixed to or accompany the restricted computer software upon delivery, vendor agrees that the Government shall have the rights that are set forth in paragraph (c) of this clause to use, duplicate or disclose any restricted computer software delivered under this purchase order/contract. The terms and provisions of this contract, including any commercial lease or license agreement, shall be subject to paragraph (c) of this clause and shall comply with Federal laws and the Federal Acquisition Regulation.

(c)(1) The restricted computer software delivered under this contract may not be used, reproduced or disclosed by the Government except as provided in subparagraph (c)(2) of this clause or as expressly stated otherwise in this contract.

(2) The restricted computer software may be—

(i) Used or copied for use in or with the computer or computers for which it was acquired, including use at any Government installation to which such computer or computers may be transferred;

(ii) Used or copied for use in or with backup computer if any computer for which it was acquired is inoperative;

(iii) Reproduced for safekeeping (archives) or backup purposes;

(iv) Modified, adapted, or combined with other computer software, provided that the modified, combined, or adapted portions of the derivative software incorporating any of the delivered, restricted computer software shall be subject to same restrictions set forth in this purchase order/contract;

(v) Disclosed to and reproduced for use by support service Contractors or their subcontractors, subject to the same restrictions set forth in this purchase order/contract; and

(vi) Used or copied for use in or transferred to a replacement computer.

(3) If the restricted computer software delivered under this purchase order/contract is published and copyrighted, it is licensed to the Government, without disclosure prohibitions, with the rights set forth in subparagraph (c)(2) of this clause unless expressly stated otherwise in this purchase order/contract.

(4) To the extent feasible the Contractor shall affix a Notice substantially as follows to any restricted computer software delivered under this purchase order/contract; or, if the vendor does not, the Government has the right to do so: *"Notice*—Notwithstanding any other lease or license agreement that may pertain to, or accompany the delivery of, this computer software, the rights of the Government regarding its use, reproduction and disclosure are as set forth in Government Contract (or Purchase Order) No. ———.)

(d) If any restricted computer software is delivered under this contract with the copyright notice of 17 U.S.C. 401, it will be presumed to be published and copyrighted and licensed to the Government in accordance with subparagraph (c)(3) of this clause, unless a statement substantially as follows accompanies such copyright notice: "Unpublished—rights reserved under the copyright laws of the United States."

(End of clause)

**52.227-20 Rights in data—SBIR program.**

As prescribed in 27.409(l), insert the following clause:

**Rights in Data—SBIR Program (June 1987)**

(a) *Definitions.*

"Computer software," as used in this clause, means computer programs, computer data bases, and documentation thereof.

"Data," as used in this clause, means recorded information, regardless of form or the media on which it may be recorded. The term includes technical data and computer software. The term does not include information incidental to contract administration, such as financial, administrative, cost or pricing or management information.

"Form, fit, and function data," as used in this clause, means data relating to items, components, or processes that are sufficient to enable physical and functional interchangeability as well as data identifying source, size, configuration, mating and attachment characteristics, functional characteristics, and performance requirements except that for computer software it means data identifying source, functional characteristics, and performance requirements but specifically excludes the source code, algorithm, process, formulae, and flow charts of the software.

"Limited rights data," as used in this clause, means data (other than computer software) developed at private expense that embody trade secrets or are commercial or financial and confidential or privileged.

"Restricted computer software," as used in this clause, means computer software developed at private expense and that is a trade secret; is commercial or financial and confidential or privileged; or is published copyrighted computer software; including modifications of such computer software.

"SBIR data," as used in this clause, means data first produced by a Contractor that is a small business firm in performance of a small business innovation research contract issued under the authority of 15 U.S.C. 638 (Pub. L. 97-219, Small Business Innovation Development Act of 1982), which data are not generally known, and which data without obligation as to its confidentiality have not been made available to others by the Contractor or are not already available to the Government.

"SBIR rights," as used in this clause, mean the rights in SBIR data set forth in the SBIR Rights Notice of paragraph (d) of this clause.

"Technical data," as used in this clause, means that data which are of a scientific or technical nature.

"Unlimited rights," as used in this clause, means the right of the Government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose whatsoever, and to have or permit others to do so.

(b) *Allocation of rights.* (1) Except as provided in paragraph (c) of this clause regarding copyright, the Government shall have unlimited rights in—

(i) Data specifically identified in this contract as data to be delivered without restriction;

(ii) Form, fit, and function data delivered under this contract;

(iii) Data delivered under this contract (except for restricted computer software) that constitute manuals or instructional and training material for installation, operation, or routine maintenance and repair of items, components, or processes delivered or furnished for use under this contract; and

(iv) All other data delivered under this contract unless provided otherwise for SBIR data in accordance with paragraph (d) of this clause or for limited rights data or restricted computer software in accordance with paragraph (g) of this clause.

(2) The Contractor shall have the right to—

(i) Protect SBIR rights in SBIR data delivered under this contract in the manner and to the extent provided in paragraph (d) of this clause;

(ii) Withhold from delivery those data which are limited rights data or restricted computer software to the extent provided in paragraph (g) of this clause;

(iii) Substantiate use of, add, or correct SBIR rights or copyrights notices and to take other appropriate action, in accordance with paragraph (e) of this clause; and

(iv) Establish claim to copyright subsisting in data first produced in the performance of this contract to the extent provided in subparagraph (c)(1) of this clause.

(c) *Copyright.* (1) *Data first produced in the performance of this contract.* Except as otherwise specifically provided in this contract, the Contractor may establish claim to copyright subsisting in any data first produced in the performance of this contract. If claim to copyright is made, the Contractor shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government, as well as when the data are published or deposited for registration as a published work in the U.S. Copyright Office. For data other than computer software the Contractor grants to the Government, and others acting on its behalf, a paid-up nonexclusive, irrevocable, worldwide license to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the Government, for all such data. For computer software, the Contractor grants to the Government, and others acting on its behalf, a paid-up, nonexclusive, irrevocable worldwide license for all such computer software to reproduce, prepare derivative works, and perform publicly and display publicly, by or on behalf of the Government.

(2) *Data not first produced in the performance of this contract.* The Contractor shall not, without prior written permission of the Contracting Officer, incorporate in data delivered under this contract any data that are not first produced in the performance of this contract and that contain the copyright notice of 17 U.S.C. 401 or 402, unless the Contractor identifies such data and grants to the Government, or acquires on its behalf, a license of the same scope as set forth in subparagraph (c)(1) of this clause.

(3) *Removal of copyright notices.* The Government agrees not to remove any copyright notices placed on data pursuant to this paragraph (c), and to include such notices on all reproductions of the data.

(d) *Rights to SBIR data.* (1) The Contractor is authorized to affix the following "SBIR Rights Notice" to SBIR data delivered under this contract and the Government will thereafter treat the data, subject to the provisions of paragraphs (e) and (f) of this clause, in accordance with such Notice:

**SBIR Rights Notice (Jun 1987)**

These SBIR data are furnished with SBIR rights under Contract No._____ (and subcontract _____ if appropriate). For a period of 2 years after acceptance of all items to be delivered under this contract, the Government agrees to use these data for Government purposes only, and they shall not be disclosed outside the Government (including disclosure for procurement purposes) during such period without permission of the Contractor, except that, subject to the foregoing use and disclosure prohibitions, such data may be disclosed for use by support Contractors. After the aforesaid 2-year period the Government has a royalty-free license to use, and to authorize others to use on its behalf, these data for Government purposes, but is relieved of all disclosure prohibitions and assumes no liability for unauthorized use of these data by third parties. This Notice shall be affixed to any reproductions of these data, in whole or in part.

(End of notice)

(2) The Government's sole obligation with respect to any SBIR data shall be as set forth in this paragraph (d).

(e) *Omitted or incorrect markings.* (1) Data delivered to the Government without any notice authorized by paragraph (d) of this clause, and without a copyright notice, shall be deemed to have been furnished with unlimited rights, and the Government assumes no liability for the disclosure, use, or reproduction of such data. However, to the extent the data have not been disclosed without restriction outside the Government, the Contractor may request, within six months (or a longer time approved by the Contracting Officer for good cause shown) after delivery of such data, permission to have notices placed on qualifying data at the Contractor's expense, and the Contracting Officer may agree to do so if the Contractor—

(i) Identifies the data to which the omitted notice is to be applied;

(ii) Demonstrates that the omission of the notice was inadvertent;

(iii) Establishes that the use of the proposed notice is authorized; and

(iv) Acknowledges that the Government has no liability with respect to the disclosure or use of any such data made prior to the addition of the notice or resulting from the omission of the notice.

(2) The Contracting Officer may also (i) permit correction, at the Contractor's expense, of incorrect notices if the Contractor identifies the data on which correction of the notice is to be made and demonstrates that the correct notice is authorized, or (ii) correct any incorrect notices.

(f) *Protection of limited rights data.* When data other than that listed in subdivisions (b)(1) (i), (ii), and (iii) of this clause are specified to be delivered under this contract and such data qualify as either limited rights data or restricted computer software, the Contractor, if the Contractor desires to continue protection of such data, shall withhold such data and not furnish them to the Government under this contract. As a condition to this withholding the Contractor shall identify the data being withheld and furnish form, fit, and function data in lieu thereof.

(g) *Subcontracting.* The Contractor has the responsibility to obtain from its subcontractors all data and rights therein necessary to fulfill the Contractor's obligations to the Government under this contract. If a subcontractor refuses to accept terms affording the Government such rights, the Contractor shall promptly bring such refusal to the attention of the Contracting Officer and not proceed with subcontract award without further authorization.

(h) *Relationship to patents.* Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government.

(End of clause)

**52.227-21 Technical data certification, revision, and withholding of payment—major systems.**

As prescribed in 27.409(q), insert the following clause:

**Technical Data Certification, Revision, and Withholding of Payment—Major Systems (Jun 1987)**

(a) *Scope of clause.* This clause shall apply to all technical data (as defined in the Rights in Data—General clause included in this contract) that have been specified in this contract as being subject to this clause. It shall apply to all such data delivered, or required to be delivered, at any time during contract performance or within 3 years after acceptance of all items (other than technical data) delivered under this contract unless a different period is set forth herein. The Contracting Officer may release the Contractor from all or part of the requirements of this clause for specifically identified technical data items at any time during the period covered by this clause.

(b) *Technical data certification.* (1) All technical data that are subject to this clause shall be accompanied by the following certification upon delivery:

**Technical Data Certification (Jun 1987)**

The Contractor, _____, hereby certifies that to the best of its knowledge and belief the technical data delivered herewith under Government contract No._____ (and subcontract _____, if appropriate) are complete, accurate, and comply with the requirements of the contract concerning such technical data.

(End of certification)

(2) The Government shall rely on the certification set out in subparagraph (b)(1) of this clause in accepting delivery of the technical data, and in consideration thereof may, at any time during the period covered by this clause, request correction of any deficiencies which are not in compliance with contract requirements. Such corrections shall be made at the expense of the Contractor. Unauthorized markings on data shall not be considered a deficiency for the purpose of this clause, but will be treated in accordance with paragraph (e) of the Rights in Data—General clause included in this contract.

(c) *Technical data revision.* The Contractor also agrees, at the request of the Contracting Officer, to revise technical data that are subject to this clause to reflect engineering design changes made during the performance of this contract and affecting the form, fit, and function of any item (other than technical data) delivered under this contract. The Contractor may submit a request for an equitable adjustment to the terms and conditions of this contract for any revisions to technical data made pursuant to this paragraph.

(d) *Withholding of payment.* (1) At any time before final payment under this contract the Contracting Officer may, in the Government's interest, withhold payment until a reserve not exceeding $100,000 or 5 percent of the amount of this contract, whichever is less, if in the Contracting Officer's opinion respecting any technical data that are subject to this clause, the Contractor fails to—

(i) Make timely delivery of such technical data as required by this contract;

(ii) Provide the certification required by subparagraph (b)(1) of this clause;

(iii) Make the corrections required by subparagraph (b)(2) of this clause; or

(iv) Make revisions requested under paragraph (c) of this clause.

(2) Such reserve or balance shall be withheld until the Contracting Officer has determined that the Contractor has delivered the data and/or has made the required corrections or revisions. Withholding shall not be made if the failure to make timely delivery, and/or the deficiencies relating to delivered data, arose out of causes beyond the control of the Contractor and without the fault or negligence of the Contractor.

(3) The Contracting Officer may decrease or increase the sums withheld up to the sums authorized in subparagraph (d)(1) of this clause. The withholding of any amount under this paragraph, or the subsequent payment thereof, shall not be construed as a waiver of any Government rights.

(End of clause)

**52.227-22 Major system—minimum rights.**

As prescribed in 27.409(r), insert the following clause:

**Major System—Minimum Rights (Jun 1987)**

Notwithstanding any other provision of this contract, the Government shall have unlimited rights in any technical data, other than computer software, developed in the performance of this contract and relating to a major system or supplies for a major system procured or to be procured by the Government, to the extent that delivery of such technical data is required as an element of performance under this contract. The rights of the Government under this clause are in addition to and not in lieu of its rights under the other provisions of this contract.

(End of clause)

**52.227-23 Rights to proposal data (technical).**

As prescribed in 27.409(s), insert the following clause:

**Rights to Proposal Data (Technical) (Jun 1987)**

Except for data contained on pages _____, it is agreed that as a condition of award of this contract, and notwithstanding the conditions of any notice appearing thereon, the Government shall have unlimited rights (as defined in the "Rights in Data—General" clause contained in this contract) in and to the technical data contained in the proposal dated _____ upon which this contract is based.

(End of clause)

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 31

**Federal Acquisition Regulation (FAR); Trade, Business, Technical and Professional Activity Costs**

**AGENCIES:** Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Proposed rule.

**SUMMARY:** The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering changes to FAR 31.205–43, Trade, business, technical and professional activity costs, that are intended to clarify allowability policy.

**DATE:** Comments should be submitted to the FAR Secretariat at the address shown below on or before July 13, 1987, to be considered in the formulation of a final rule.

**ADDRESS:** Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 87–18 in all correspondence related to this issue.

**FOR FURTHER INFORMATION CONTACT:** Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

**SUPPLEMENTARY INFORMATION:**

**A. Background**

There has been a proliferation of non-Federal Government sponsored symposia resulting in possibly unreasonable costs being charged against Government contracts. In addition, Government contracting officers and auditors have found that the present cost principle does not address the attendance of company employees at such activities, it does not describe the circumstances in which the cost of attendance by noncontractor employees' costs might be allowable, and it does not distinguish between setting up or sponsoring meetings, conferences, symposia, and seminars and attending those events. This proposed rule was necessitated by a need to control costs, to clearly state the policy of the Government with respect to these costs, and to describe more specifically the nature of costs which are allowable. The proposed changes do not reflect or result from a change in allowability policy.

**B. Regulatory Flexibility Act**

The proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most contracts awarded to small entities are awarded on a competitive fixed-price basis and cost principles do not apply. An initial Regulatory Flexibility Analysis has therefore not been performed. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected FAR Subpart will also be considered in accordance with Section 610 of the Act. Such comments must be submitted separately and cite FAR Case 87–610 in correspondence.

**C. Paperwork Reduction Act**

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because this proposed change to FAR 31.205–43 provides clarifications as to the allowability of trade, business, technical and professional business activity costs, and does not impose any additional reporting or recordkeeping requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

**List of Subjects in 48 CFR Part 31**

Government procurement.

Dated: May 1, 1987.

**Lawrence J. Rizzi,**

*Director, Office of Federal Acquisition and Regulatory Policy.*

Therefore, it is proposed that 48 CFR Part 31 be amended as set forth below:

## PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

1. The authority citation for Part 31 continues to read as follows:

**Authority:** 40 U.S.C. 486(c); 10 U.S.C. Ch. 137; and 42 U.S.C. 2473(c).

2. Section 31.205–43 is amended by revising paragraph (c) and the introductory text is republished to read as follows:

**31.205–43 Trade, business, technical and professional activity costs.**

The following types of costs are allowable:

* * * * *

(c) When the principal purpose of a meeting, conference, symposium, or seminar is the dissemination of trade, business, technical or professional information, or the stimulation of production or improved productivity:

(1) Costs of organizing, setting up and sponsoring the meetings, symposia, etc., including rental of meeting facilities, transportation, subsistence, and incidental and directly associated costs.

(2) Costs of attendance by contractor employees, including travel costs (see 31.205–46).

(3) Costs of attendance by noncontractor personnel provided (i) such costs are not also reimbursed to the individual by the employing company or organization, and (ii) the individual's attendance is essential to achieve the purpose of the conference, meeting, symposium, etc.

[FR Doc. 87–10642 Filed 5–12–87; 8:45 am]

BILLING CODE 6820-61-M

48 CFR Part 31

**Federal Acquisition Regulation (FAR); Extraordinary Compensation and Certain Organization Costs in Connection With Mergers and Other Business Combinations (Golden Parachutes and Golden Handcuffs)**

**AGENCIES:** Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Proposed rule.

**SUMMARY:** The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering revising FAR 31.205–6 and 31.205–27 to clarify the allowability of extraordinary compensation and certain organization costs incurred in connection with mergers and other business combinations.

**DATE:** Comments should be submitted to the FAR Secretariat at the address shown below on or before July 13, 1987, to be considered in the formulation of a final rule.

**ADDRESS:** Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 87–19 in all correspondence related to this issue.

**FOR FURTHER INFORMATION CONTACT:** Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

**SUPPLEMENTARY INFORMATION:**

**A. Background**

The Defense Acquisition Regulatory and Civilian Agency Acquisition Councils have been reviewing for some time the subject of business combinations, and particularly the

appropriate Government contract costing resulting from such combinations. This review has been occasioned both by the increased pace and size of such events in recent years, and also by the Councils' perception that existing regulations on certain aspects of this subject are inadequate. Of special concern are the costs of "golden parachutes" and "golden handcuffs," which are extraordinary payments above and beyond ordinary, customary, and reasonable compensation payments to employees for services rendered. Also of concern is the fact that there is no explicit coverage on the allowability of the costs of resisting a corporate takeover. In the special circumstances of Government procurement, in which companies' recorded cost structures are often directly reflected in price, the Councils believe the Government should not be at risk of paying higher prices simply because of ownership changes at its suppliers. Instead, the Councils have concluded that additional coverage at FAR 31.205–6 and 31.205–27 is necessary to protect the Government from having to bear the costs of special compensation arrangements and various organization costs often attendant upon business combinations.

**B. Regulatory Flexibility Act**

The proposed changes to FAR 31.205–6 and 31.205–27 are not expected to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C., *et seq.*) because most contracts awarded to small entities are awarded on a competitive fixed-price basis and the cost principles do not apply.

**C. Paperwork Reduction Act**

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed rule does not impose any additional recordkeeping or information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

**List of Subjects in 48 CFR Part 31**

Government procurement.

Dated: May 4, 1987.

**Lawrence J. Rizzi,**

*Director, Office of Federal Acquisition and Regulatory Policy.*

Therefore, it is proposed that 48 CFR Part 31 be amended as set forth below:

1. The authority citation for Part 31 continues to read as follows:

**Authority: 40 U.S.C. 486(c); 10 U.S.C. Ch. 137; and 42 U.S.C. 2473(c).**

## PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

2. Section 31.205–6 is amended by adding paragraph (l) to read as follows:

**31.205–6 Compensation for personal services.**

* * * * *

(l) *Compensation incidental to business acquisitions.* The following costs are unallowable:

(1) Payments to employees under agreements in which they receive special compensation, in excess of the contractor's normal severance pay practice, if their employment terminates following a change in the management control over, or ownership of, the contractor or a substantial portion of its assets. These arrangements are commonly known as "golden parachutes."

(2) Payments to employees under plans introduced in connection with a change (whether actual or prospective) in the management control over, or ownership of, the contractor or a substantial portion of its assets in which those employees receive special compensation, in addition to their normal pay, provided that they remain with the contractor for a specified period of time. These arrangements are commonly known as "golden handcuffs."

* * * * *

2. Section 31.205–27 is amended by revising paragraph (a) to read as follows:

**31.205–27 Organization costs.**

(a) Except as provided in paragraph (b) of this subsection, expenditures in connection with (1) planning or executing the organization or reorganization of the corporate structure of a business, including mergers and acquisitions, (2) resisting or planning to resist the reorganization of the corporate structure of a business or a change in the controlling interest in the ownership of a business, and (3) raising capital (net worth plus long-term liabilities), are unallowable. Such expenditures include but are not limited to incorporation fees and costs of attorneys, accountants, brokers, promoters and organizers, management consultants and investment counselors, whether or not employees of the contractor. Unallowable "reorganization" costs include the cost of any change in the contractor's financial structure, excluding administrative costs of short-term borrowings for working capital, resulting in alterations in the rights and interests of security holders, whether or not additional capital is raised.

Part V

# Department of Health and Human Services

**Food and Drug Administration**

**21 CFR Part 870**

**Cardiovascular Devices; Effective Date of Requirement for Premarket Approval; Replacement Heart Valve; Final Rule**

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 870

[Docket No. 85N-0331]

## Cardiovascular Devices; Effective Date of Requirement for Premarket Approval; Replacement Heart Valve

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule to require the filing of a premarket approval application or a notice of completion of a product development protocol for the replacement heart valve, a medical device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: December 9, 1987.

FOR FURTHER INFORMATION CONTACT: Arthur A. Ciarkowski, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7559.

SUPPLEMENTARY INFORMATION: In the Federal Register of February 5, 1980 (45 FR 7948), FDA published a final rule (21 CFR 870.3925) classifying into class III (premarket approval) the replacement heart valve, a medical device. Section 870.3925 applies to (1) any replacement heart valve that was in commercial distribution before May 28, 1976, and (2) any device that FDA has found to be substantially equivalent to a replacement heart valve described in (1) and that has been marketed on or after May 28, 1976.

In the Federal Register of February 12, 1986 (51 FR 5296), FDA published a proposed rule to require the filing under section 515(b) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(b)) of a premarket approval application (PMA) or a notice of completion of a product development protocol (PDP) for the replacement heart valve. In accordance with section 515(b)(2)(A) of the act, FDA included in the preamble to the proposal the agency's proposed findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to meet the premarket approval requirements of the act, and the benefit to the public from use of the device (51 FR 5297). The agency also provided an opportunity for interested persons to submit comments on the proposed rule and the agency's proposed findings, and, under section 515(b)(2)(B) of the act, provided an opportunity for interested persons to request a change in the classification of the device based on new information relevant to its classification. Any petition requesting a change in the classification of the replacement heart valve was required to be submitted by February 27, 1986. The comment period closed on April 14, 1986.

Although FDA did not receive any petitions requesting a change in the classification of the replacement heart valve, the agency received one comment in response to the proposal of February 12, 1986. The comment from a trade association did not relate to the proposal, but referred to FDA's guidance relating to replacement heart valves.

FDA has reexamined its proposed findings with respect to the degree or risk of illness or injury designed to be eliminated or reduced by requiring the replacement heart valve to meet the statute's approval requirements. The agency concludes that its proposed findings and its conclusion discussed in the preamble to the proposed rule are appropriate. Accordingly, FDA is promulgating a final rule requiring premarket approval for the replacement heart valve under section 515(b)(3) of the act and is summarizing its findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the replacement heart valve to have an approved PMA or declared completed PDP, and the benefits to the public from the use of the device.

### I. Findings With Respect to Risks and Benefits

#### A. Degree of Risk

1. *Mechanical failure of replacement heart valve.* Replacement heart valves tend to fail in characteristic ways. They may fail mechanically due to chemical or physical changes in portions of the valve, defects in materials, or faulty manufacturing processes. Failure mode may be slow or sudden. If the valve fails slowly, congestive heart failure may result and reoperation will be required. Rapid failure results in the need for urgent reoperation, or may result in death.

2. *Unacceptable hemodynamic performance.* A replacement heart valve may produce unacceptable hemodynamic performance, thus eliminating or reducing the benefits expected from surgery. Unacceptable hemodynamic performance usually requires reoperation for correction.

3. *Perivalvular leak.* The incidence of perivalvular leakage depends on the replacement heart valve design, the condition of heart tissue at the site of implantation, and surgical technique, and may result from infection around the valve. Perivalvular leaks may develop early or late after implantation, may be of mild to severe degree, and may be associated with hemolytic anemia or congestive heart failure of such severity as to require reoperation.

4. *Surgical procedure.* The operation required to implant a replacement heart valve is not without risk. The morbidity and mortality associated with heart valve replacement are comparable to other open heart cardiac surgical procedures.

5. *Thrombus (blood clot) formation on the device.* The incidence of valve thrombus formation varies with the replacement heart valve design and placement of the valve in the mitral, aortic, or tricuspid position. In addition, the amount and type of anticoagulation hemodynamics and indigenous patient factors affect the incidence of valve-related thrombus.

6. *Thromboembolism.* Clots formed in the heart may break off and travel to various other organs, which are then damaged by loss of blood supply. The greater the loss of blood supply, the greater the damage to the affected organ. The incidence of thromboembolism is affected by the valve design and position and is decreased by the use of anticoagulant drugs.

7. *Anticoagulant complications.* Although careful medical followup is required, anticoagulant drugs significantly reduce the incidence of thrombosis and thromboembolism after the implantation of replacement heart valves constructed entirely of prosthetic materials.

8. *Hemolytic anemia.* Because of exposure of blood to an artificial surface, turbulent blood flow, and shear forces, a replacement heart valve produces some hemolysis (breakdown of red blood cells).

9. *Infection.* A replacement heart valve may become the site of infection, either at the time of surgery or later, as a result of dental procedures, intravascular catheterization, or surgery elsewhere in the body. Infection can lead to a number of other injuries even in the presence of anticoagulants.

FDA concludes that these risks could be eliminated or reduced by requiring the replacement heart valve to undergo premarket approval.

#### B. Benefits of the Device

The benefits of implantation of the replacement heart valve are unquestioned in patients with valvular

heart disease. Without the device, many such patients have a poor prognosis characterized by congestive heart failure, chest pain, arrhythmias, loss of consciousness, embolic phenomena, and death. For some abnormalities of the natural heart valve, there is no satisfactory alternative to valve replacement (Ref. 1). Deformity of natural heart valves, when severe enough to produce significant stenosis or incompetence, is irreversible. The abnormal circulatory dynamics that result can be controlled by medication only to a limited degree. Following implantation of a replacement heart valve, many patients became asymptomatic and others experience a marked improvement in heart function and exercise tolerance.

## II. Final Rule

Under section 515(b)(3) of the act, FDA is adopting the proposed findings as published in the preamble to the proposed rule and issuing this final rule to require premarket approval of the generic type of device, the replacement heart valve, by adding a new paragraph (c) to § 870.3925.

Under the final rule, a PMA or a notice of completion of a PDP is required to be filed on or before December 9, 1987, for any replacement heart valve that was in commercial distribution before May 28, 1976, or that has been found by FDA to be substantially equivalent to such a device on or before December 9, 1987. An approved PMA or a declared completed PDP is required to be in effect for any such device on or before June 8, 1988. (If FDA finds that continued availability of a replacement heart valve for which a PMA has been timely filed is necessary for the public health, FDA may, under section 515(D)(1)(B)(i) of the act, extend the 180-day period for taking action on the PMA). Any replacement heart valve that was not in commercial distribution before May 28, 1976, or that has not on or before December 9, 1987 been found by FDA to be substantially equivalent to a replacement heart valve that was in commercial distribution before May 28, 1976, is required to have an approved PMA or a declared completed PDP in effect before it may be marketed.

If a PMA or a notice of completion of a PDP for a replacement heart valve is not filed on or before December 9, 1987, that device will be deemed adulterated under section 501(f)(1)(A) of the act (21 U.S.C. 351(F)(1)(A)), and commercial distribution of the device will be required to cease. The device may, however, be distributed for investigational use, if the requirements of the investigational device exemption (IDE) regulations (21 CFR Part 812) are met.

Under § 812.2(d) of the IDE regulations, FDA hereby stipulates that the exemptions from the IDE requirements in § 812.2(c)(1) and (2) will no longer apply to clinical investigations of the replacement heart valve. Further. FDA concludes that investigational replacement heart valves are significant risk devices as defined in § 812.3(m), and advises that as of the effective date of § 870.3925(c) the requirements of the IDE regulations regarding significant risk devices will apply to any clinical investigation of a replacement heart valve. For any such device, therefore, an IDE submitted to FDA, under § 812.20, is required to be in effect under § 812.30 before an investigation is initiated or continued on or after December 9, 1987. FDA advises all persons who intend to sponsor any clinical investigation involving the replacement heart valve to submit an IDE application to FDA no later than November 9, 1987 to avoid the interruption of ongoing investigations.

## III. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) and (e) that this action is of a type that does not individually or cumulatively have significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

## IV. Economic Impact

FDA has examined the economic consequences of this final rule in accordance with the criteria in section 1(b) of Executive Order 12291 and found that the rule will not be a major rule as specified in the Order. The agency believes that eight firms will be affected by this rule. Therefore, the agency certifies under the Regulatory Flexibility Act (Pub. L. 96–354) that the rule will not have a significant economic impact on a substantial number of small entities. An assessment of the economic impact of this final rule has been placed on file in the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857, and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

## Reference

The following reference has been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 870 is amended as follows:

## PART 870—CARDIOVASCULAR DEVICES

1. The authority citation for 21 CFR Part 870 continues to read as follows:

**Authority:** Sec. 501(f), 510, 513, 515, 520, 701(a), 52 Stat. 1055, 76 Stat. 794–795 as amended, 90 Stat. 540–546, 552–559, 565–574, 576–577 (21 U.S.C. 351(f), 360, 360c, 360e, 360j, 371(a)); 21 CFR 5.10.

2. Section 870.3925 is amended by adding new paragraph (c), to read as follows:

**§ 870.3925 Replacement heart valve.**

* * * * *

(c) *Date premarket approval application (PMA) or notice of completion of a product development protocol (PDA) is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before December 9, 1987 for any replacement heart valve that was in commercial distribution before May 28, 1976, or that has on or before December 9, 1987 been found to be substantially equivalent to a replacement heart valve that was in commercial distribution before May 28, 1976. Any other replacement heart valve shall have an approved PMA or a declared completed PDP is effect before being placed in commercial distribution.

Dated: April 17, 1987.

**Frank E. Young,**

*Commissioner of Food and Drugs.*

Part VI

# Department of Education

**Office of Elementary and Secondary Education**

## Intent To Repay to the Robeson County, North Carolina Board of Education Funds Recovered as a Result of a Final Audit Determination; Notice of Intent To Award Grantback Funds

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

## Intent To Repay to the Robeson County, NC Board of Education Funds Recovered as a Result of a Final Audit Determination

AGENCY: Department of Education.

ACTION: Intent to award grantback funds.

SUMMARY: Under section 456 of the General Education Provisions Act (GEPA), the Secretary of Education (Secretary) intends to repay under a grantback arrangement to the Robeson County Board of Education (local educational agency; LEA) an amount equal to 75 percent of funds recovered by the Department of Education as a result of a final audit determination. This notice describes the LEA's plan for the use of repaid funds and the terms and conditions under which the Secretary intends to make these funds available and invites comments on the proposed grantback.

DATE: All written comments must be received on or before June 12, 1987.

ADDRESS: All written comments should be submitted to Mr. Hakim Khan, Acting Director, Indian Education Programs, U.S. Department of Education (Room 2177, FOB #6), 400 Maryland Avenue, SW., Washington, DC 20202–6267.

FOR FURTHER INFORMATION CONTACT: Mr. Hakim Khan, (202) 732–1887.

SUPPLEMENTARY INFORMATION:

### A. Background

In May 1986, the Department of Education recovered $50,000 from the LEA in satisfaction of an audit, covering the period from July 1, 1973 to June 30, 1976. The auditors examined the accounting procedures, procurement practices, and system of internal controls to determine the adequacy of the LEA's management policies and decisions affecting costs.

The auditors found that funds awarded under Part A of the Indian Education Act of 1972 (the Act), Title IV, Part A of Pub. L. 92–318 (20 U.S.C. 241aa through 241ff) had been misspent in violation of the Act's requirements as follows:

(1) Federal funds were not used to supplement but rather to supplant funds that would have been made available by the LEA in the absence of Federal funds (20 U.S.C. 241dd(a)(5));

(2) Federal funds were used to purchase items and finance activities not provided for in the budget approved by the parent committee (20 U.S.C. 241dd(b)(2)(B)(ii);

(3) Federal funds were used for activities not specifically designed to meet the special educational or culturally related academic needs of Indian children (20 U.S.C. 241cc); and

(4) Federal funds were used for costs that were not adequately documented to demonstrate that the funds had benefitted Indian students (20 U.S.C. 241dd(a)(6)).

### B. Authority for Awarding a Grantback

Section 456(a) of GEPA, 20 U.S.C. 1234e(a), provides that whenever the Secretary has recovered funds following a final audit determination with respect to an applicable program, the Secretary may consider those funds to be additional funds available for the program and may arrange to repay to the LEA affected by that determination an amount not to exceed 75 percent of the recovered funds. The Secretary may enter into this so-called "grantback" arrangement if the Secretary determines that the—

(1) Practices and procedures of the LEA that resulted in the audit determination have been corrected, and that the LEA is, in all other respects, in compliance with the requirements of the applicable program;

(2) LEA has submitted to the Secretary a plan for the use of the funds to be awarded under the grantback arrangement which meets the requirements of the program, and, to the extent possible, benefits the population that was affected by the failure to comply or by the misexpenditures that resulted in the audit exception; and

(3) Use of the funds to be awarded under the grantback arrangement in accordance with the LEA's plan would serve to achieve the purposes of the program under which the funds were originally granted.

### C. Plan for Use of Funds Awarded Under a Grantback Arrangement

Pursuant to section 456(a)(2) of GEPA, the LEA has applied for a grantback of $37,500 and has submitted a plan to use the grantback funds consistently with the Act. The LEA proposes to use the grantback funds to expand the computer-assisted instruction laboratory services that provide remedial instruction in reading and mathematics. The LEA's plan is available on request from the Department of Education contact person listed above.

### D. The Secretary's Determination

The Secretary has carefully reviewed the plan and other information submitted by the LEA. Based upon that review, the Secretary has determined that the conditions under section 456 of GEPA have been met.

These determinations are based upon the best information available to the Secretary at the present time. If this information is not accurate or complete, the Secretary is not precluded from taking appropriate administrative action.

### E. Notice of the Secretary's Intent To Enter Into a Grantback Arrangement

Section 456(d) of GEPA requires that, at least thirty days before entering into an arrangement to award funds under a grantback, the Secretary must publish in the Federal Register a notice of intent to do so, and the terms and conditions under which the payment will be made.

In accordance with section 456(d) of GEPA, notice is hereby given that the Secretary intends to make funds available to the Robeson County, North Carolina Public Schools under a grantback arrangement. The grantback award would be in the amount of $37,500, which is 75 percent—the maximum percentage authorized by the statute—of the funds recovered by the Department as a result of the audit.

### F. Terms and Conditions Under Which Payment Under the Grantback Arrangement Will Be Made

The LEA agrees to comply with the following terms and conditions under which payment under the grantback arrangement would be made:

(1) The funds awarded under the grantback must be spent in accordance with—

(a) All applicable statutory and regulatory requirements, and

(b) The plan that was submitted in conjunction with the LEA's request for a grantback dated May 20, 1986, and any amendments to that plan that are approved in advance by the Secretary.

(2) All funds received under the grantback arrangement must be expended not later than June 30, 1988, in accordance with the LEA's plan.

(3) The LEA must, not later than September 30, 1988, submit a report to the Secretary which—

(a) Indicates how the funds awarded under the grantback have been used;

BEST COPY AVAILABLE

(b) Shows that the funds awarded under the grantback have been liquidated; and

(c) Describes the results and effectiveness of the project for which the funds were spent.

(4) Separate accounting records must be maintained documenting the expenditures of funds awarded under the grantback arrangement.

Dated: May 7, 1987.

# Department of Transportation

**Federal Aviation Administration**

**14 CFR Part 15**

**Administrative Claims Under the Federal Tort Claims Act; Final Rule**

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 15

[Docket No. 25264; Adoption of Part 15]

# Administrative Claims Under the Federal Tort Claims Act

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This final rule sets forth a new part for the Federal Aviation Regulations which requires prospective claimants under the Federal Tort Claims Act to follow certain procedures for filing their claims with the Federal Aviation Administration. The rule is needed because the current absence of a published rule of procedure has caused problems due to lack of knowledge by some parties as to how or where to file claims, and the minimum information which must be provided. The rule ensures that these claims are channeled to the appropriate division and expedites their evaluation by the FAA.

DATE: Effective date of this amendment is May 13, 1987. Comments must be received on or before June 12, 1987.

ADDRESS: Send comments on this final rule in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 25264, 800 Independence Avenue, SW., Washington, DC 20591; or deliver comments in duplicate to: Federal Aviation Administration Rules Docket, Room 916, 800 Independence Avenue, SW., Washington, DC 20591. Comments must be marked Docket No. 25264. Comments may be examined in the Rules Docket on weekdays except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: James S. Dillman, Assistant Chief Counsel, Litigation Division, AGC-400, Office of the Chief Counsel, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591. Telephone: (202) 267-3561.

SUPPLEMENTARY INFORMATION:

## Comments Invited

This regulation is being adopted without notice and public comment. However, the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034; February 26, 1979) provide that, to the maximum extent possible, DOT operating administrations should provide an opportunity for public comment, after issuance, for regulations issued without prior notice. Accordingly, interested persons are invited to comment on this final rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-204, Docket No. 25264, 800 Independence Avenue, SW., Washington, DC 20591. All comments received will be available in the Rules Docket for examination by interested persons. This amendment may be changed in the light of comments received.

Commenters wishing the FAA to acknowledge receipt of their comments on this final rule must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 25264." The postcard will be date and time stamped and returned to the commenter.

## Background

The FAA evaluates a significant number of claims against the agency arising under the Federal Tort Claims Act (FTCA). Between calendar years 1980 and 1985, the FAA received an average of 321 claims per year, with a total average amount claimed of almost $7.0 billion per year. The largest number of claims were received in calendar year 1983 when 411 claims were presented. The highest dollar amount to be claimed in a single year occurred in 1984 when over $21.0 billion in claims was presented. Thus, the FAA must deal with a significant number of claims involving sizeable sums of money.

The FTCA requires claims be presented to the appropriate Federal agency. 28 U.S.C. 2675(a). Claims must be in writing. 28 U.S.C. 2401(b). The Attorney General can prescribe regulations concerning the consideration, ascertainment, adjustment, determination, compromise, and settlement of claims brought under the Federal Tort Claims Act. 28 U.S.C. 2672. Federal agencies are authorized to issue regulations and establish procedures consistent with the regulations prescribed by the Attorney General. 28 CFR 14.11. The Administrator of the FAA is authorized to exercise the authority of the Secretary of Transportation as executive head of a department under any statute, Executive Order, or regulation. 49 CFR 1.45(a)(2). Under 49 CFR 1.47(a), the Federal Aviation Administration is delegated authority to carry out the powers and duties transferred to the Secretary of Transportation by section 6(c)(1) of the Department of Transportation Act, 49 U.S.C. 1655(c)(1).

## The Final Rule

There is currently no published rule of procedure informing the public how or where to file claims against the FAA under the FTCA. Such a rule is necessary for three reasons. First, some parties bringing claims against the FAA do not know how or where to file a claim. Second, sometimes claims are presented at remote FAA locations and to FAA personnel who do not understand the nature of the claim, or the statutory and regulatory requirements involved. For these reasons, FAA evaluation of the merits of the claim is frequently delayed. To remedy this, the rule specifies where and with whom claims must be filed.

The third reason for the rule is that the FAA receives some claims which cannot be adjudicated because they are incomplete or otherwise defective. The rule stipulates the minimum information that claimants must provide the FAA before their claim is deemed presented to the agency. Also, the rule lists additional information which the FAA may require the claimant to provide so that the claim can be adequately evaluated.

## Reason for No Notice and Immediate Adoption

This amendment is needed to ensure that claimants know where to correctly file their claims against the agency and what information must be filed with their claims. It does not provide for any change in agency policy nor affect the substantive rights of the claimant. It merely provides notice of current agency practice.

For these reasons, notice and public procedure are unnecessary, and good cause exists for making this amendment effective in less than 30 days. Moreover, publication for prior comment would not reasonably be expected to result in the receipt of useful information on these procedural requirements. In accordance with DOT Regulatory Policies and Procedures, an opportunity for public comment after publication is being provided.

## Economic Assessment

The rule sets out procedures which prospective claimants must follow to have their claims evaluated by the agency. The rule imposes no greater burden than that already required by 28 CFR Part 14. However, 28 CFR Part 14 does not stipulate when, where, and with whom to file claims.

The rule does not affect the national economy, and it is unrelated to events which would produce a major increase in costs or prices for consumers, individual industries, governmental authorities or agencies, or geographic regions. Industry, government, and geographical regions are outside the scope of the rule. The effect of the rule on a prospective claimant is minimal since it merely states publicly that information which the agency would otherwise require of the claimant to substantiate the claim.

For those claimants who would have hand-delivered or mailed their claim to any FAA facility, the requirements may impose additional postage costs, but those costs are negligible. Finally, the new rule does not address matters which affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Since the impact of the rule is minimal, no full Regulatory Evaluation is necessary.

**Trade Impact Assessment**

The rule will have no impact on international trade. The subject of the rule is unrelated to the manufacture or distribution of aviation-related products and services either by United States-based manufacturers and air carriers or foreign-based manufacturers and air carriers.

**Regulatory Impact Determination**

The vast majority of claims filed against the FAA under the FTCA are filed by individuals. Small entities seldom file claims against the FAA. Accordingly, the number of small entities that will be affected by the new rule is not substantial.

Additionally, the rule will not have a significant economic impact on the transaction costs of those small entities filing claims against the FAA. Conceivably, those claimants who would have hand-delivered or mailed their claim to any FAA facility may be required by the new rule to pay additional postage costs in order to properly file their claim. These additional costs do not constitute a significant economic impact on prospective claimants. While the rule is expected to increase the efficiency with which the FAA processes these claims, no monetary benefits are expected to accrue to the claimant as a result. Therefore, the number of small entities who would be affected by the rule is not expected to be substantial and the rule is not expected to have a significant economic impact, positive or negative. Accordingly, a regulatory flexibility analysis is not required.

**Conclusion**

Because the rule inserts into 14 CFR requirements which are already in place in 28 CFR Part 14, the FAA has determined that the rule involves a regulation which is not major under Executive Order 12291 or significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since very few, if any, small entities would be affected by the rule, and only minimal postage costs are involved, it is certified that under the criteria of the Regulatory Flexibility Act the rule will not have a significant economic impact, positive or negative, on a substantial number of entities. Because of the absence of any costs attendant with the rule, the FAA has determined that the expected impact of the regulation is so minimal that it does not warrant a full regulatory evaluation.

**List of Subjects in 14 CFR Part 15**

Federal Tort Claims Act, Administrative claims, Air transportation, Aircraft, Airports, Airplanes, Helicopters, Rotorcraft, Heliports.

**The Amendment**

Accordingly, the Federal Aviation Administration amends Chapter I, Subchapter B, Procedural Rules, of Title 14 of the Code of Federal Regulations by adding a new Part 15 (14 CFR Part 15) to read as follows:

## PART 15—ADMINISTRATIVE CLAIMS UNDER FEDERAL TORT CLAIMS ACT

Sec.
15.1 Scope of regulations.
15.3 Administrative claim, when presented; appropriate office.
15.5 Administrative claim, who may file.
15.7 Administrative claims; evidence and information to be submitted.
15.9 Investigation and examination.

Authority: 49 U.S.C. 1354; 5 U.S.C. 301; 28 U.S.C. 2672, 2675; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983).

**§ 15.1 Scope of regulations.**

(a) These regulations apply to claims asserted under the Federal Tort Claims Act, as amended, for money damages against the United States for injury to, or loss of property, or for personal injury or death, caused by the negligent or wrongful act or omission of an employee of the FAA acting within the scope of office or employment. The regulations in this part supplement the Attorney General's regulations in 28 CFR Part 14, as amended. The regulations in 28 CFR Part 14, as amended, and the regulations in this part apply to consideration by the FAA of administrative claims under the Federal Tort Claims Act.

**§ 15.3 Administrative claim, when presented; appropriate office.**

(a) A claim is deemed to have been presented when the FAA receives, at a place designated in paragraph (b) of this section, an executed Standard Form 95 or other written notification of an incident, accompanied by a claim for money damages in a sum certain for injury to, or loss of, property or for personal injury or death, alleged to have occurred by reason of the incident. A claim which should have been presented to the FAA but which was mistakenly filed with another Federal agency, is deemed presented to the FAA on the date the claim is received by the FAA at a place designated in paragraph (b) of this section. A claim addressed to, or filed with, the FAA by mistake will be transferred to the appropriate Federal agency, if that agency can be determined, or returned to the claimant.

(b) Claims shall be delivered or mailed to: Assistant Chief Counsel for Litigation, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591.

Alternatively, claims may be delivered or mailed to: Office of the Regional Counsel, in any of the FAA Regional Offices.

(c) Claim forms are available at each location listed in paragraph (b) of this section.

(d) A claim presented in accordance with this section may be amended by the claimant at any time prior to final FAA action or prior to the exercise of the claimant's option, under 28 U.S.C. 2675(a), to deem the agency's failure to make a final disposition of his or her claim within 6 months after it was filed as a final denial. Each amendment to a claim shall be submitted in writing and signed by the claimant or the claimant's duly authorized agent or legal representative. Upon the timely filing of an amendment to a pending claim, the FAA has 6 months thereafter in which to make a final disposition of the claim as amended, and the claimant's option under 28 U.S.C. 2675(a) does not accrue until 6 months after the filing of the amendment.

**§ 15.5 Administrative claim, who may file.**

(a) A claim for injury to, or loss of, property may be presented by the owner of the property interest which is the subject of the claim or by the owner's duly authorized agent or legal representative.

(b) A claim for personal injury may be presented by the injured person or that person's duly authorized agent or legal representative.

(c) A claim based on death may be presented by the executor or administrator of the decedent's estate or by any other person legally entitled to assert such a claim under applicable State law.

(d) A claim for loss wholly compensated by an insurer with the rights of a subrogee may be presented by the insurer. A claim for loss partially compensated by an insurer with the rights of a subrogee may be presented by the insurer or the insured individually, as their respective interest appear, or jointly. Whenever an insurer presents a claim asserting the rights of a subrogee, it shall present with its claim appropriate evidence that it has the rights of a subrogee.

(e) A claim presented by an agent or legal representative shall be presented in the name of the claimant, be signed by the agent or legal representative, show the title or legal capacity of the person signing, and be accompanied by evidence of authority to present a claim on behalf of the claimant as agent, executor, administrator, parent, guardian, or other representative.

**§ 15.7 Administrative claims; evidence and information to be submitted.**

(a) *Death.* In support of a claim based on death, the claimant may be required to submit the following evidence or information:

(1) An authenticated death certificate or other competent evidence showing cause of death, date of death, and age of the decedent.

(2) The decedent's employment or occupation at time of death, including monthly or yearly salary or earnings (if any), and the duration of last employment or occupation.

(3) Full names, addresses, birth dates, kinship, and marital status of the decedent's survivors, including identification of those survivors who were dependent for support upon the decedent at the time of death.

(4) Degree of support afforded by the decedent to each survivor dependent upon decedent for support at the time of death.

(5) Decedent's general, physical, and mental conditions before death.

(6) Itemized bills for medical and burial expenses incurred by reason of the incident causing death or itemized receipts of payment for such expenses.

(7) If damages for pain and suffering prior to death are claimed, a physician's detailed statement specifying the injuries suffered, duration of pain and suffering, any drugs administered for pain, and the decedent's physical condition in the interval between injury and death.

(8) Any other evidence or information which may have a bearing on either the responsibility of the United States for the death or the amount of damages claimed.

(b) *Personal injury.* In support of a claim for personal injury, including pain and suffering, the claimant may be required to submit the following evidence or information:

(1) A written report by the attending physician or dentist setting forth the nature and extent of the injuries, nature and extent of treatment, any degree of temporary or permanent disability, the prognosis, period of hospitalization, and any diminished earning capacity.

(2) In addition to the report required by paragraph (b)(1) of this section, the claimant may be required to submit to a physical or mental examination by a physician employed by the FAA or another Federal agency. A copy of the report of the examining physician is made available to the claimant upon the claimant's written request if the claimant has, upon request, furnished the report required by paragraph (b)(1), and has made or agrees to make available to the FAA any other physician's reports previously or thereafter made on the physical or mental condition which is the subject matter of the claim.

(3) Itemized bills for medical, dental, and hospital expenses incurred or itemized receipts of payment for such expenses.

(4) If the prognosis reveals the necessity for future treatment, a statement of expected expenses for such treatment.

(5) If a claim is made for loss of time from employment, a written statement from the claimant's employer showing actual time lost from employment, whether the claimant is a full or part-time employee, and wages or salary actually lost.

(6) If a claim is made for loss of income and the claimant is self-employed, documentary evidence showing the amount of earnings actually lost.

(7) Any other evidence or information which may have a bearing on the responsibility of the United States for the personal injury or the damages claimed.

(c) *Property damage.* In support of a claim for injury to or loss of property, real or personal, the claimant may be required to submit the following evidence or information:

(1) Proof of ownership of the property interest which is the subject of the claim.

(2) A detailed statement of the amount claimed with respect to each item of property.

(3) An itemized receipt of payment for necessary repairs or itemized written estimates of the cost of such repairs.

(4) A statement listing date of purchase, purchase price, and salvage value, where repair is not economical.

(5) Any other evidence or information which may have a bearing on either the responsibility of the United States for the injury to or loss of property or the damages claimed.

**§ 15.9 Investigation and examination.**

The FAA may investigate a claim or conduct a physical examination of a claimant. The FAA may request any other Federal agency to investigate a claim or conduct a physical examination of a claimant and provide a report of the investigation or examination to the FAA.

Issued in Washington, DC, on May 5, 1987.

Donald D. Engen,

*Administrator.*

BILLING CODE 4910-13-M

federal register

Wednesday
May 13, 1987

Part VIII

# Department of Education

**34 CFR Part 309**

**Handicapped Children's Early Education Program; Proposed Rule and Notices**

DEPARTMENT OF EDUCATION

34 CFR Part 309

Early Education for Handicapped Children

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations governing the Handicapped Children's Early Education Program (HCEEP) authorized by section 623 of Part C of the Education of the Handicapped Act (EHA). These proposed regulations are needed to implement new requirements under the EHA amendments of 1986 (Pub. L. 99–457) and to revise selection criteria for awards under this program. The intended effect of these proposed regulations is to clarify statutory requirements and to improve the operation of the program.

DATE: Comments must be received on or before June 12, 1987.

ADDRESSES: All comments concerning these proposed regulations should be addressed to: Dr. Thomas R. Behrens, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 4605), Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Ruth Ward. Telephone: (202) 732–1045.

SUPPLEMENTARY INFORMATION: The HCEEP provides Federal financial assistance for a variety of programs and activities designed to address the special problems of children with handicaps, birth through age eight—including demonstration and outreach projects, and other programs authorized under the EHA amendments of 1986 (e.g., research and training activities, research institutes, experimental programs, and a technical assistance development system.) The following are changes that have been made in the existing HCEEP regulations in order to implement the EHA amendments of 1986 (Pub. L. 99–457):

(1) Experimental programs have been added as a type of project, along with demonstration and outreach projects;

(2) Research and training activities (previously under section 624 of the EHA, but now authorized under section 623) have been added;

(3) Early childhood research institutes to carry on sustained research and to generate and disseminate new information on preschool and early intervention programs for young children with handicaps and their families have been added;

(4) The State planning, development, and implementation grant provisions for preschool and early intervention have been deleted. Under Pub. L. 99–457, States may conduct these authorities under (1) the preschool grant program (section 619 of the EHA), and (2) the new program for infants and toddlers with handicaps.

In addition to the changes required by the statute, the proposed regulations add new selection criteria for all of the programs and activities that are authorized under this Part. With regard to training projects, the Secretary may use selection criteria under this part or Part 318 (Training Personnel for the Education of the Handicapped program). It is expected that, in general, for preservice training, the selection criteria for Part 318 will be used if appropriate for the priority. These proposed regulations do not apply to contracts which are subject to Title 48 of the Code of Federal Regulations.

A technical assistance development system designed "to assist entities operating experimental, demonstration, and outreach programs, and to assist State agencies to expand and improve services provided to handicapped children" is now authorized under section 623 of the EHA. That system will be implemented through a Request for Proposal, (RFP), which will be published in the *Commerce Business Daily*.

## Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

## Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities.

The small entities that would be affected by these regulations are small local educational agencies (LEAs) and public and private nonprofit organizations receiving Federal financial assistance under this program. However, the regulations would not have a significant economic impact on the small LEAs and organizations affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

## Paperwork Reduction Act of 1980

Sections 309.20 and 309.21 contain information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget (OMB) for its review. Organizations and individuals desiring to comment on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: Joseph F. Lackey, Jr.

## Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

## Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 4605, 330 C Street, SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comments on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

## Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

**List of Subjects in 34 CFR Part 309**

Education, Education of the handicapped, Education—research, Grants program—education, Preschool, Reporting and record keeping requirements, Teachers.

(Catalogue of Federal Domestic Assistance Number has not been assigned.)

Dated: April 20, 1987.

**William J. Bennett,**

*Secretary of Education.*

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by revising Part 309 to read as follows:

## PART 309—HANDICAPPED CHILDREN'S EARLY EDUCATION PROGRAM

### Subpart A—General

Sec.

309.1 What is the Handicapped Children's Early Education Program (HCEEP)?
309.2 Who is eligible for an award?
309.3 What activities may the Secretary fund?
309.4 What regulations apply to this program?
309.5 What definitions apply to this program?

### Subpart B—How Does One Apply for an Award?

309.10 What separate applications must an applicant submit?
309.11 How does the Secretary select and announce funding priorities under this program?

### Subpart C—How Does the Secretary Make an Award?

309.20 How does the Secretary evaluate an application?
309.21 What selection criteria does the Secretary use?
309.22 Are awards for experimental, demonstration, and outreach projects geographically dispersed?

### Subpart D—What Conditions Must Be Met After an Award?

309.30 What conditions must be met by recipients of experimental, demonstration, and outreach projects?
309.31 What are the matching requirements for experimental, demonstration, and outreach projects?

**Authority:** 20 U.S.C. 1423, unless otherwise noted.

### Subpart A—General

#### § 309.1 What is the Handicapped Children's Early Education Program (HCEEP)?

The HCEEP supports activities that are designed—

(a) To address the special problems of children with handicaps, birth through age eight; and

(b) To assist State and local entities in expanding and improving programs and services for these children and their families.

(Authority: 20 U.S.C. 1423)

#### § 309.2 Who is eligible for an award?

Public agencies and nonprofit private organizations are eligible for a grant or cooperative agreement under this part. In addition, profitmaking organizations are eligible under § 309.3(e) and (f).

(Authority: 20 U.S.C. 1423)

#### § 309.3 What activities may the Secretary fund?

The Secretary may provide financial assistance in the form of a grant or cooperative agreement under this part to support the following activities:

(a) *Experimental projects.* These projects support the design of investigative models that compare alternative and innovative educational practices related to early education services for children with handicaps.

(b) *Demonstration projects.* These projects assist in developing and implementing preschool and early intervention program practices that establish specific strategies and products worthy of dissemination and replication.

(c) *Outreach projects.* These projects support the replication of established practices to assist other agencies and organizations in expanding and improving services to children with handicaps.

(d) *Research institutes.* These institutes are designed to carry on sustained research to generate and disseminate new information on preschool and early intervention programs.

(e) *Research projects.* These projects are designed to identify and meet the full range of special needs of children covered under this part.

(f) *Training projects.* These projects support the training of personnel for programs specifically designed for children with handicaps.

(Authority: 20 U.S.C. 1423)

#### § 309.4 What regulations apply to this program?

The following regulations apply to grants and cooperative agreements under this program:

(a) The Education Department General Administrative Regulations (EDGAR) established in Title 34 of the Code of Federal Regulations in—

(1) Part 74 (Administration of Grants);

(2) Part 75 (Direct Grant Programs);

(3) Part 77 (Definitions that Apply to Department Regulations);

(4) Part 78 (Education Appeal Board); and

(5) Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(b) The regulations in this Part 309.

(Authority: 20 U.S.C. 1423)

#### § 309.5 What definitions apply to this program?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Applicant
Application
Award
Contract
Department
EDGAR
Fiscal year
Grant
Local educational agency
Nonprofit
Nonpublic
Private
Project
Public
Secretary
State
State educational agency

(b) *Definitions in 34 CFR Part 300.* The following terms used in this part are defined in 34 CFR Part 300. The section of Part 300 that contains the definition is given in parentheses:

Handicapped children (§ 300.5)
Include (§ 300.6)
Parent (§ 300.10)
Related services (§ 300.13)
Special education (§ 300.14)

(c) *Other definitions.* As used in this part, "Act" means the Education of the Handicapped Act, as amended.

(Authority: 20 U.S.C. 1423)

### Subpart B—How Does One Apply for an Award?

#### § 309.10 What separate applications must an applicant submit?

Applicants for assistance under this part must submit a separate application for each activity in § 309.3 that is announced for competition.

(Authority: 20 U.S.C. 1423)

#### § 309.11 How does the Secretary select and announce funding priorities under this program?

The Secretary may establish as a priority any activity in § 309.3.

(Authority: 20 U.S.C. 1423)

## Subpart C—How Does the Secretary Make an Award?

### § 309.20 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application under this part on the basis of the criteria in § 309.21.

(b) The Secretary awards up 100 points for these criteria.

(c) The maximum possible score for each criterion is indicated in parentheses.

(Authority: 20 U.S.C. 1423)

### § 309.21 What selection criteria does the Secretary use?

The Secretary uses the following criteria to evaluate applications unless, with regard to training projects, he determines that the selection criteria in 34 CFR Part 318 are more appropriate:

(a) *Importance.* (15 points)

(1) The Secretary reviews each application to determine the extent to which the proposed project addreses concerns in light of the purposes of this part.

(2) The Secretary considers—

(i) The significance of the problem or issue to be addressed;

(ii) The extent to which the project is based on previous research findings related to the problem or issue;

(iii) The numbers of individuals who will benefit; and

(iv) How the project will address the identified problem or issue.

(b) *Impact.* (15 points)

(1) The Secretary reviews each application to determine the probable impact of the proposed project in meeting the needs of children with handicaps, birth through age eight, and their families.

(2) The Secretary considers—

(i) The contribution that project findings or products will make to current knowledge and practice;

(ii) The methods used for dissemination of project findings or products to appropriate target audiences; and

(iii) The extent to which findings or products are replicable, if appropriate.

(c) *Technical soundness.* (35 points)

(1) The Secretary reviews each application to determine the technical soundness of the project plan.

(2) In reviewing applications under this part, the Secretary considers—

(i) The quality of the design of the project;

(ii) The proposed sample or target population, including the numbers of participants involved and methods that will be used by the applicant to ensure that participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition;

(iii) The methods and procedures used to implement the design, including instrumentation and data analysis; and

(iv) The anticipated outcomes.

(3) With respect to training projects in applying the criterion in paragraph (c)(2)(iii) of this section, the Secretary considers the curriculum, course sequence, and practice leading to specific competencies;

(4) In addition to the criteria in paragraph (c)(2) of this section, the Secretary, in reviewing outreach projects, also considers—

(i) The agencies to be served through outreach activities;

(ii) The current services, their location, and anticipated impact of outreach assistance for each of those agencies;

(iii) The model demonstration project upon which the outreach project is based, including the effectiveness of the model program with childen, families, or other recipients of project services; and

(iv) The likelihood that the demonstration project will be continued and supported by funds other than those available through this part.

(d) *Plan of operation.* (10 points)

(1) The Secretary reviews each application to determine the quality of the plan of operation for the project.

(2) The Secretary considers—

(i) The extent to which the management plan will ensure proper and efficient administration of the project;

(ii) Clarity in the goals and objectives of the project;

(iii) The quality of the activities proposed to accomplish the goals and objectives;

(iv) The adequacy of proposed timeliness for accomplishing those activities; and

(v) Effectiveness in the ways in which the applicant plans to use its resources and personnel to accomplish the goals and objectives.

(e) *Evaluation plan.* (5 points)

(1) The Secretary reviews each application to determine the quality of the plan for evaluating project goals, objectives, and activities.

(2) The Secretary considers the extent to which the methods of evaluation are appropriate and produce objective and quantifiable data.

(f) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application to determine the qualifications of the key personnel the applicant plans to use.

(2) The Secretary considers—

(i) The qualifications of the project director and project coordinator (if one is used);

(ii) The qualifications of each of the other key project personnel;

(iii) The time that each person referred to in paragraphs (f)(2) (i) and (ii) of this section will commit to the project; and

(iv) How the applicant will ensure that personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(3) The Secretary considers experience and training in areas related to project goals to determine qualifications of key personnel.

(g) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application to determine adequacy of resources allocated to the project.

(2) The Secretary considers the adequacy of the facilities and the equipment and supplies that the applicant plans to use.

(h) *Budget and cost-effectiveness.* (5 points)

(1) The Secretary reviews each application to determine if the project has an adequate budget.

(2) The Secretary considers the extent to which—

(i) The budget for the project is adequate to undertake project activities; and

(ii) Costs are reasonable in relation to objectives of the project.

(Authority: 20 U.S.C. 1423)

### § 309.22 Are awards for experimental, demonstration, and outreach projects geographically dispersed?

To the extent feasible, the Secretary, in addition to using the selection criteria in § 309.21, geographically disperses awards for experimental, demonstration, and outreach projects throughout the Nation in urban as well as rural areas.

(Authority: 20 U.S.C. 1423(a)(3))

## Subpart D—What Conditions Must Be Met After an Award?

### § 309.30 What conditions must be met by recipients of experimental, demonstration, and outreach projects?

(a) Experimental, demonstration, and outreach projects must include services and activities that are designed to—

(1) Facilitate the intellectual, emotional, physical, mental, social, speech, language development, and self-help skills of children with handicaps, birth through age eight;

(2) Encourage the participation of the parents of those children in the

development and operation of projects under this part;

(3) Acquaint the community in which the project is located with the problems and potentialities of those children;

(4) Offer training about exemplary models and practices to State and local personnel who provide services to children with handicaps, birth through age eight; and

(5) Support the adoption of exemplary models and practices in States and local communities.

(b) Experimental, demonstration, and outreach projects must be coordinated with State and local educational agencies, and appropriate public and private health and social service agencies, in order to—

(1) Inform those agencies of the nature and purposes of the assisted project's activities or services; and

(2) Provide opportunities for the project staff to coordinate their activities with staff of other agencies.

(Authority: 20 U.S.C. 1423(a) (1), (2))

**§ 309.31 What are the matching requirements for experimental, demonstration, and outreach projects?**

(a) Federal financial participation for an experimental, demonstration, or outreach project may not exceed 90 percent of the total annual costs of development, operation, and evaluation of the project.

(b) The Secretary may waive the matching requirement in paragraph (a) of this section in the case of an arrangement entered into with governing bodies of Indian tribes located on Federal or State reservations and with consortia of those bodies if they are able to demonstrate that insufficient resources are available.

(Authority: 20 U.S.C. 1423(a)(4))

BILLING CODE 4000-01-M

## DEPARTMENT OF EDUCATION

### Office of Special Education and Rehabilitative Services

[CFDA No: 84.024A]

### Invitation for Applications for New Awards Under the Handicapped Children's Early Education Program (HCEEP) for Fiscal Year 1987

*Purpose:* To provide Federal financial assistance for experimental or demonstration projects authorized under the Handicapped Children's Early Education Program.

*Deadline for Transmittal of Applications:* July 2, 1987.

*Deadline for Intergovernmental Review Comments:* September 2, 1987.

*Applications Available:* May 29, 1987.

*Estimated Range of Awards:* $75,000–$125,000.

*Estimated Average Size of Awards:* $100,000.

*Estimated Number of Awards:* 11.

*Project Period:* Up to 36 months.

*Priorities:* In accordance with 34 CFR 75.105(c)(3), the Secretary is establishing an absolute priority for the following categories: (1) Demonstration projects that assist in developing and implementing preschool and early intervention program practices that establish specific strategies and products worthy of dissemination and replication, and (2) experimental projects which support the design of investigative models that compare alternative and innovative educational practices related to early education services for children with handicaps. The Secretary particularly invites applications that address early intervention practices, service delivery strategies, or public policies, with the potential to improve early intervention for children with handicaps, birth through age two. However, in accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(1), an application submitted under this notice that meets this invitational priority will not be given a competitive or absolute preference over other applications.

*Applicable Regulations:* (a) When adopted in final form, the proposed regulations, Handicapped Children's Early Education Program, 34 CFR Part 309, published in this issue of the **Federal Register**. Applicants should base their applications on the proposed regulations. If substantive changes are made in the final regulations applicants will be given an opportunity to revise or resubmit their applications. (b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, 78, and 79).

*For Applications or Information Contact:* Thomas E. Finch, U.S. Department of Education, Office of Special Education Programs, 400 Maryland Avenue, SW., Room 4611, Switzer Building, Washington, DC 20202. Telephone: (202) 732–1084.

**Program Authority:** 20 U.S.C. 1423.

Dated: May 8, 1987.

**Madeleine Will,**

*Assistant Secretary, Office of Special Education and Rehabilitative Services.*

[FR Doc. 87–10940 Filed 5–12–87; 8:45 am]

BILLING CODE 4000-01-M

## Handicapped Children's Early Education Program; Final Annual Funding Priorities

**AGENCY:** Department of Education.

**ACTION:** Notice of final annual funding priorities.

**SUMMARY:** The Secretary announces annual funding priorities for the Handicapped Children's Early Education Program.

**EFFECTIVE DATE:** These final annual funding priorities take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of these final annual priorities, call or write the Department of Education contact person.

**FOR FURTHER INFORMATION CONTACT:** The person listed on each individual proposed priority.

**SUPPLEMENTARY INFORMATION:** The Handicapped Children's Early Education Program (HCEEP) was established under Pub. L. 91–230 on April 13, 1970, and is currently authorized by section 623 of Part C of the Education of the Handicapped Act (EHA), as amended most recently by Pub. L. 99–457. The purpose of the program is to support experimental preschool and early childhood demonstration, outreach, training, and research projects. The focus of these competitions is on: (1) the development of model demonstration, replication, and dissemination projects to assist in developing and implementing innovative and experimental practices that establish specific strategies and products worthy of dissemination and replication; (2) the training of personnel to work with handicapped children through age two; and (3) research on program components for promoting language or social development of handicapped children within the age range of birth through five years.

A notice of proposed annual funding priorities for the Handicapped Children's Early Education Program (HCEEP) and a notice soliciting applications for those priorities was published in the **Federal Register** on August 27, 1986, at 51 FR 30622. That notice contained two proposed priorities for: (a) Community Involvement Demonstrations, and (b) Severely Handicapped Infants Demonstrations. Another notice of proposed annual funding priorities for Auxiliary Activities—Research and Training for the Handicapped Children's Early Education Program and a notice soliciting applications for the training priority was published in the **Federal Register** on September 23, 1986, at 51 FR 33850. That notice contained two proposed priorities for: (a) Research on Early Childhood Program Features, and (b) In-Service Training. These last two priorities were published under the authority of section 624 of the Education of the Handicapped Act to support early childhood activities, because section 624 authorized funding of in-service training and research. However, The Education of the Handicapped Act Amendments of 1986, Pub. L. 99–457, transferred the authority for training and research activities to the Handicapped Children's Early Education Program (section 623). Therefore, this notice combines the two previous notices of proposed annual funding priorities into one final notice of annual priorities.

As noted above, when Congress reauthorized the Education of the Handicapped Act, the authority to conduct training and research activities for early childhood programs was transferred from section 624 to section 623. However, the authority remains identical. Therefore, the eligibility requirements and selection criteria under the current regulations implementing section 624 at 34 CFR 315.2 and 315.31 will apply to the fiscal year 1987 training competition.

For the fiscal year 1987 research competition the Secretary is planning to use new proposed selection criteria for research projects under section 623. These criteria will be published in the Notice of Proposed Rulemaking for the Handicapped Children's Early Education Program. Therefore, the Secretary will publish an application notice soliciting applications for the research priority with that Notice of Proposed Rulemaking.

Application packages for all fiscal year 1987 competitions will reflect the statutory changes made by the Education of the Handicapped Act Amendments of 1986.

Finally, a change has been made as a result of the amendment to section 623, which no longer authorizes Early Childhood State Plan Grants. The reference to collaboration with the Early Childhood State Plan Grant in the priorities section has been deleted. The amendment to the Pre-school Incentive Grant Program permits States to use part of their funds for activities similar to the planning and development activities previously authorized under section 623. Therefore, applications submitted under priorities 1 and 2 now demonstrate collaboration with State-wide planning activities for early childhood programs such as planning and development activities funded under section 619(c) of the Education of the Handicapped Act.

Awards will be made in each priority area described below. The Secretary may award grants or cooperative agreements.

**Summary of Comments and Responses**

The public was given thirty days in which to comment on each of the notices of proposed priorities. Comments were received from two professional organizations, both of which supported the priorities. Therefore, no changes have been made.

**Priorities**

In accordance with the Education Department General Administrative Regulations at 34 CFR 75.105(c)(3) and subject to available funds, the Secretary will give an absolute preference to each application submitted in response to one of the following priorities. Applications submitted under Priorities 1 and 2 must demonstrate innovative and experimental approaches to the education of handicapped children and demonstrate collaboration with the State-wide planning activities for early childhood programs such as planning and development activities funded under section 619(c). Each application submitted under any of the four priorities must provide satisfactory assurance that the recipient will use funds made available to conduct one of the following activities:

*Priority 1—Community Involvement Demonstrations*

This priority would support projects which demonstrate innovative and experimental approaches to the delivery of effective, comprehensive services to handicapped children from birth through age five (0–5) and their families. Projects under this priority must demonstrate a team approach (such as special education, health and social service agencies) in the planning and delivery of comprehensive services. Projects must also demonstrate a commitment to train parents and family members to facilitate team efforts to deliver effective services.

**FOR FURTHER INFORMATION CONTACT:** Dr. Thomas E. Finch, Early Childhood Branch, Division of Educational Services, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW (Switzer Building, Room 3094–M/S 2313), Washington, DC 20202. Telephone: (202) 732–1084.

*Priority 2—Severely Handicapped Infants Demonstrations*

This priority supports projects which demonstrate innovative and experimental methods of effectively serving handicapped infants from birth through two years (0–2) who have multiple handicaps or who are medically fragile. Projects must demonstrate provision of these services in the community and in the least restrictive environment with emphasis on home care models.

**FOR FURTHER INFORMATION CONTACT:** Dr. Thomas E. Finch, Early Childhood Branch, Division of Educational Services, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3094–M/S 2313), Washington, DC 20202. Telephone: (202) 732–1084.

*Priority 3—In-Service Training*

This priority supports projects that demonstrate innovative and experimental in-service training programs that focus on meeting the need for qualified personnel to provide services to handicapped and children who are at risk of becoming handicapped from birth through age two. Personnel to be trained under this priority would include, but not be limited to: pediatricians and neonatal caregivers (nurses, social workers, physical therapists, occupational therapists, speech pathologists, public health personnel; and parents). Within this priority projects must focus on one or more of the following:

(a) Establishing an inservice training program which focuses on training personnel to work as a team with handicapped children from birth through age two;

(b) Ensuring the development of a curriculum which includes a multi-agency approach to service delivery for handicapped children from birth through age two; or

(c) Ensuring the development of a curriculum which includes a focus on the role of the family and skills the family needs to participate in the delivery of service as part of a team working with handicapped children from birth through age two.

**FOR FURTHER INFORMATION CONTACT:** Dr. Thomas E. Finch, Early Childhood Branch, Division of Educational Services, Office of Special Education Programs, Department of Education, 400 Maryland Avenue SW., (Switzer Building, Room 3094 M/S 2313), Washington, DC 20202. Telephone (202) 732–1084.

*Priority 4—Research on Early Childhood Program Features*

To provide effective and replicable services for handicapped infants and preschool aged children, there is a major need for research to identify the most effective methods and materials for promoting children's progress in different developmental domains (e.g., social, language, motor). Presently, much of the available information on the effectiveness of services is limited to entire programs; little information is available on the comparative effectiveness of different program components for promoting, for example, language development of handicapped children, yet many professionals who are planning to establish a service program prefer to review and assemble components from several programs rather than to adopt an entire program. Similarly, many professionals who are now operating a service program desire to replace certain components of their program with more effective ones.

There are currently available several well-defined program components for promoting language development of young handicapped children and several well-defined program components for promoting social development of handicapped children. These components vary significantly in such matters as conceptual/theoretical bases, instructional procedures, and instructional materials. Although much is known about these components, information is generally not available on their relative effectiveness as indexed by a variety of measures of child progress.

This priority supports projects that use a variety of measures of child progress to compare the effectiveness of several (minimum of 3) program components for promoting (1) language development, or (2) social development

of handicapped children within the age range of birth through five years. These components must be well-defined sets of instructional goals and procedures which can be incorporated within planned or existing preschool programs of varying types. The components selected for study must be compared in multiple studies and in different types of existing preschool programs. Applicants must fully describe the components that will be studied, the justification for their selection, and the existing preschool programs in which they will be studied. In conducting the studies, projects must monitor the amount and quality of implementation of the components, as well as the children's experiences in other components of the program. Included within the research activities should be a plan for conducting studies to determine whether the initial findings can be replicated, and a plan for documenting the costs and other resources necessary to incorporate the components in different kinds of preschool programs. The goal of these research projects would be to provide information about the relative effects of the components studied, and to provide to professionals replicable components that can be incorporated in new or existing infant or preschool programs.

**FOR FURTHER INFORMATION CONTACT:** Linda Glidewell, Division of Innovation and Development, Office of Special Education Programs, Department of Education, 400 Maryland Avenue SW., (Switzer Building, Room 3094—M/S

**Intergovernmental Review**

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local governmental coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

**Invitation for Applications for New Awards Under the Handicapped Children's Early Education Program for Fiscal Year 1987**

*Purpose:* To provide support for research activities that meet the unique early educational needs of handicapped children.

*Deadline for Transmittal of Applications:* June 30, 1987.

*Deadline for Intergovernmental Review Comments:* August 31, 1987.

*Applications Available:* May 20, 1987.

*Estimated Range of Awards:* $200,000–$300,000.

*Estimated Average Size of Awards:* $250,000.

*Estimated Number of Awards:* 4.

*Project Period:* Up to 48 months.

*Applicable Regulations:* (a) When adopted in final form, the Notice of Proposed Rulemaking for the Handicapped Children's Early Education Program published in this issue of the **Federal Register**. Applicants should prepare their applications based on the proposed regulations. If the final regulations contain substantive changes, applicants will be given the opportunity to amend or resubmit their applications, (b) The Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, 78, and 79, and (c) The Notice of Final Annual Funding Priorities published in this issue of the **Federal Register**.

## Office of Special Education and Rehabilitative Services

**Handicapped Children's Early Education Program**

**AGENCY:** Department of Education.

**ACTION:** Notice of proposed annual funding priorities.

**SUMMARY:** The Secretary proposes annual funding priorities for the Handicapped Children's Early Education Program. These priorities would support early childhood research institutes required by the Education of the Handicapped Act, as amended by the Education of the Handicapped Act Amendments of 1986, Pub. L. 99–457.

**DATE:** Comments must be received on or before June 12, 1987.

**ADDRESS:** Comments should be addressed to: Linda Glidewell, Division of Innovation and Development, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3094—M/S 2313), Washington, DC 20202.

**FOR FURTHER INFORMATION CONTACT:** Linda Glidewell, Telephone: (202) 732–1099.

**SUPPLEMENTARY INFORMATION:** The Handicapped Children's Early Education Program (HCEEP) was established under Pub. L. 91–230 on April 13, 1970, and is currently authorized by section 623 of Part C of the Education of the Handicapped Act, as amended. The purpose of the program is to support a variety of activities designed to address the special problems of handicapped children from birth through age eight including experimental, demonstration, and outreach projects, research and training activities, early childhood research institutes, and a technical assistance development system. These priorities would establish two early childhood research institutes. The first institute would be established to develop new or improved interventions for infants and toddlers with handicaps who, because of the nature of their disabilities, require extended medical care in hospital intensive care units and who may require life-supporting technologies and systems of health care. The second institute would be established to develop, evaluate, and disseminate new or improved curricula and materials (for preservice, inservice, and self-study use) for training special education and related service personnel to deliver intervention services to infants and toddlers with handicaps and their families.

**Proposed Priorities**

In accordance with the Education Department General Administrative Regulations at 34 CFR 75.105(c)(3), and subject to available funds, the Secretary proposes to give an absolute preference to each application submitted in response to one of the following priorities. Each application must provide satisfactory assurance that the recipient

will use funds made available to conduct one of the following activities:

*Priority 1: Early Childhood Research Institute—Intervention*

This proposed priority would establish an Early Childhood Research Institute to develop new or improved interventions for infants and toddlers with handicaps who, because of the nature of their disabilities, require extended medical care in hospital intensive care units and who may require life-supporting technologies and systems of health care. The institute's purpose would be to conduct a program of research and development designed to produce information and materials that can be used in concert with the provision of intensive health care and that promote the developmental progress of these children. The institute's research and development activities must produce information and materials that can be used within intensive care units and that facilitate the successful transition of the child to the home and to community-based services. The research and development activities must consist of two major areas of inquiry.

First, the institute must conduct a program of research to develop new or improved procedures related to the identification, referral, and intervention process. The institute's research must include, but need not be limited to, studies that: (1) Develop exemplary practices related to physician referral, initial family counseling, and tracking of the child's progress and services; (2) identify effective practices and procedures for forming and involving a multidisciplinary team to plan services for the child and family; (3) establish criteria and procedures for enlisting the services of different State agencies, including the State Protection and Advocacy agency or other child protection groups; (4) develop exemplary models for determining the point in the child's life when nonmedical interventions can be appropriately and safely implemented; (5) identify a variety of effective nonmedical interventions that are keyed to child developmental needs, child medical needs, family needs and characteristics, and the potential for delivering these services within a hospital intensive care unit; and (6) develop new or improved interventions that will facilitate the transition of the child to the home and to community-based services.

Second, the institute must conduct a program of research to develop new or improved organizational structures related to the identification, referral, and intervention process. The institute's research must include, but need not be limited to, studies that: (1) Identify the full range of services and personnel needed in a comprehensive hospital-based intensive care unit; (2) develop model organizational structures (including roles, responsibilities, lines of authority, communication, and coordination) for a comprehensive hospital-based intensive care unit; (3) identify exemplary models for involving parents, siblings, friends, and extended family with a multi-disciplinary team; (4) develop procedures to prevent or solve role conflicts among team members; and (5) identify alternative approaches to team composition and team member roles in providing intervention and transitional services.

In carrying out its research activities, the institute must provide research training and experience for at least 10 graduate students annually.

In addition to conducting the activities described above, the institute must commit approximately 20% of its budget to inservice training activities. These training activities must be designed to assist hospital intensive care unit staff to learn about new or improved procedures and organizational structures to serve infants and toddlers with handicaps and their families. The training activities must be based on the results of the institute's research findings, already published information, and existing exemplary procedures and organizational structures.

*Priority 2: Early Childhood Research Institute—Personnel*

This proposed priority would establish an Early Childhood Research Institute to develop, evaluate, and disseminate new or improved curricula and materials (for preservice, inservice, and self-study use) for the training of special education and related service personnel to deliver intervention services to infants and toddlers with handicaps and their families. The goal of the institute would be to produce validated, replicable training curricula that can be used across settings, disciplines, and disciplinary training programs to prepare personnel to deliver effective services and to work effectively within multi-disciplinary teams. The final materials must be developed for broad application, including their use by existing training programs that currently prepare no specialists for this age group.

In developing new or improved training curricula and materials, the institute is expected to work with institutions of higher education and other agencies that have nationally recognized training programs in one or more of the relevant disciplinary areas (special education, speech/language and audiology, occupational therapy, physical therapy, psychology, social work, nursing, or nutrition). To take advantage of current best practices, institute researchers shall examine the curricula and materials now being implemented in exemplary training programs and use these as a point of departure in the institute's research and development program. In developing a series of training modules for each special education and related service area, the institute must, where appropriate, take advantage of overlap and commonalities in training content. The institute must also develop the curricula and materials in a manner that is responsive to different training uses. For example, some potential trainers will view their trainees as specialists not generalists. In those instances, the curricula and materials must be sufficiently flexible to accommodate this training approach, but contain enough information about other disciplines to enable effective communication and coordination of services. In other instances, the training program may be aimed at producing trainees for more generalist roles, such as those that may be required in rural areas, in which more extensive knowledge of delivering different services is required. In either instance, however, the training curricula and materials must develop trainee skills in working with parents and families, interacting with professionals from other disciplines, determining when other specialists must be consulted, developing an individualized family service plan, and accessing emerging information and research findings in the trainee's own and related disciplinary areas.

For each disciplinary area the institute must conduct a series of evaluation studies of the different versions of the training materials. In addition to addressing other goals and objectives established for the evaluations, curricula and material must be evaluated with respect to their effectiveness in preservice, inservice, and self-study applications.

In carrying out its research and development activities, the institute must provide research training and experience for at least 10 graduate students annually.

In addition to conducting the activities described above, the institute must commit approximately 20% of its budget to inservice training activities. These training activities must be designed to assist personnel in institutions of higher education and other agencies in learning

about effective training curricula and materials for this population. The training activities must be based on the results of the institute's research and development activities, already published information about training programs, and existing exemplary training programs.

*Period of Award*

The Secretary will approve cooperative agreements with a project period of 60 months subject to the requirements of 34 CFR 75.253(a) for continuation awards. In determining whether to continue the institute for the last two years of the project period, in addition to considering the factors in 34 CFR 75.253(a), the Secretary will also consider the recommendation of a review team consisting of three external experts selected by the Secretary and designated Federal program officials. The services of the review team are to be performed during the last half of the institute's second year, and will replace that year's annual evaluation which the recipient is required to perform under 34 CFR 75.590. During all other years of the project, the recipient must comply with 34 CFR 75.590. Costs associated with the services to be performed by the three external members of the review team are to be incorporated into the applicant's proposed budget. In developing its recommendation, the review team will consider, among other factors, the following:

(1) The timeliness and the effectiveness with which all requirements of the negotiated cooperative agreement have been or are being met by the recipient of the cooperative agreement and its subgrantees; and

(2) The degree to which the institute's research design and methodological procedures demonstrate the potential for producing significant new knowledge and products.

**Invitation to Comment**

Interested persons are invited to submit comments and recommendations regarding these proposed priorities. All comments submitted in response to these priorities will be available for public inspection, during and after the comment period, in Room 3522, Switzer Building, 330 C Street SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

## Invitation for Applications for New Awards Under the Handicapped Children's Early Education Program for Fiscal Year 1987

*Purpose:* To establish two early childhood research institutes.

*Deadline for Transmittal of Applications:* June 30, 1987.

*Deadline for Intergovernmental Review Comments:* August 31, 1987.

*Applications Available:* May 20, 1987.

*Available Funds:* $2.4 million for 24 mo.

*Estimated Range of Awards:* $550,000–$650,000 per year.

*Estimated Number of Awards:* 2 cooperative agreements.

*Project Period:* Up to 60 months.

*Applicable Regulations:* (a) When adopted in final form, the Notice of Proposed Rulemaking for the Handicapped Children's Early Education Program published in this issue of the Federal Register, (b) the Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, 78, and 79, and (c) when adopted in final form, the Annual Funding Priorities for this program. A notice of proposed annual funding priorities is published in this issue of the Federal Register. Applicants should prepare their applications based on the proposed regulations and the proposed priorities. If there are substantive changes made when the final regulations and final annual funding priorities are published, applicants will be given the opportunity to amend or resubmit their applications.

*For Applications or Information Contact:* Linda Glidewell, Division of Innovation and Development, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3094-M/S 2313), Washington, DC 20202. Telephone: (202) 732–1099.

Program Authority: 20 U.S.C. 1423.

Dated: May 8, 1987.

Madeleine Will,

*Assistant Secretary, Office of Special Education and Rehabilitative Services.*

Part IX

# Department of Education

34 CFR Part 237

Christa McAuliffe Fellowship Program; Proposed Rule

DEPARTMENT OF EDUCATION

34 CFR Part 237

Christa McAuliffe Fellowship Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to issue regulations governing the Christa McAuliffe Fellowship Program for outstanding teachers currently authorized by Title V, Part D, Subpart 2 of the Higher Education Act of 1965, as amended by the Higher Education Amendments of 1986. These proposed regulations would specify the responsibilities of the Secretary in administering the program, the duties of State panels in selecting fellows, and the terms and conditions that apply to recipients of the fellowship awards.

DATE: Comments must be received on or before June 12, 1987.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Ms. Willi Webb, Director, Policy, Planning, and Executive Operations, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW., Room 2189, Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget (OMB) as follows: Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: Joseph F. Lackey, Jr.

FOR FURTHER INFORMATION CONTACT: Ms. Willi Webb, telephone (202) 732-4158.

SUPPLEMENTARY INFORMATION: The Christa McAuliffe Fellowship Program is authorized by Title V, Part D, Subpart 2 of the Higher Education Act of 1965, as amended by the Higher Education Amendments of 1986. It establishes a national fellowship program for outstanding full-time public and private school teachers. These teachers may use awards for projects approved by the Secretary to improve their knowledge or skills and the education of their students, including (1) sabbaticals for study or research directly associated with the objectives of the statute, or their own academic improvement, (2) consultation with or assistance to other school districts or private school systems, (3) development of special innovative programs, of (4) model teacher programs and staff development.

### Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

### Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. The small entities that would be affected by these regulations are local educational agencies (LEAs) which are required to comment on the proposals submitted to the statewide panel. However, the regulations would not have a significant economic impact on the LEAs affected because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

### Paperwork Reduction Act of 1980

These regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

### Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 2189, FOB-6, 400 Maryland Avenue SW., Washington, DC 20202, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comments on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

### Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

### List of Subjects in 34 CFR Part 237

College and universities, Education, Elementary and secondary education, Scholarships and fellowships, Reports and recordkeeping requirements, Teachers.

(Catalog of Federal Domestic Assistance Number 84.199, Christa McAuliffe Fellowship Program)

Dated: April 30, 1987.

William J. Bennett,

*Secretary of Education.*

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 237 to read as follows:

## PART 237—CHRISTA MCAULIFFE FELLOWSHIP PROGRAM

### Subpart A—General

Sec.

237.1 What is the Christa McAuliffe Fellowship Program?
237.2 Who is eligible to apply under the Christa McAuliffe Fellowship Program?
237.3 How are awards distributed?
237.4 In what amount are fellowships awarded?
237.5 For what purposes may a fellow use an award?
237.6 What priorities may the Secretary establish?
237.7 What regulations apply?
237.8 What definitions apply?

### Subpart B—How Does One Apply For An Award?

237.10 How does an individual apply for a fellowship?

### Subpart C—How Are Fellows Selected?

237.20 What are statewide panels?
237.21 What are the responsibilities of a statewide panel?

### Subpart D—What Conditions Must Be Met By Fellows?

237.30 What is the duration of a fellowship?
237.31 May a fellowship be awarded for two consecutive years?
237.32 What records and reports are required from fellows?
237.33 What is the service requirement for a fellowship?
237.34 What are the requirements for repayment of the fellowship?

Authority: 20 U.S.C. 1113-1113e, unless otherwise noted.

### Subpart A—General

#### § 237.1 What is the Christa McAuliffe Fellowship Program?

The Christa McAuliffe Fellowship Program (CMFP) is designed to reward excellence in teaching by encouraging outstanding teachers to continue their education, to develop innovative programs, to consult with or assist LEAs, private schools, or private school systems, and to engage in other

educational activities that will improve the knowledge and skills of teachers and the education of students.

(Authority: 20 U.S.C. 1113, 1113b)

**§ 237.2 Who is eligible to apply under the Christa McAuliffe Fellowship Program?**

An individual is eligible to apply for a Christa McAuliffe Fellowship if the individual at the time of application—

(a)(1) Is a citizen or national of the United States;

(2) Is a permanent resident of the United States;

(3) Provides evidence from the Immigration and Naturalization Service that the individual is in the United States for other than a temporary purpose with the intention of becoming a citizen or permanent resident; or

(4) Is a permanent resident of the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or the Northern Mariana Islands; and

(b) Is a full-time teacher in a public or private elementary or secondary school.

(Authority: 20 U.S.C. 1113b, 1113d(a))

**§ 237.3 How are awards distributed?**

(a) Except as provided in section 563(a)(3) of the Act, the Secretary awards one national teacher fellowship under this part to an eligible teacher in each of the following:

(1) Each congressional district in each of the fifty States.

(2) The District of Columbia.

(3) The Commonwealth of Puerto Rico.

(4) Guam.

(5) The Virgin Islands.

(6) American Samoa.

(7) The Northern Mariana Islands.

(8) The Trust Territory of the Pacific Islands.

(b)(1) If the conditions stated in section 563(a)(3) of the Act apply, the Secretary publishes an alternative distribution of fellowships under this part that—

(i) Will permit fellowship awards at the level stated in § 237.4; and

(ii) Is geographically equitable as determined by the Secretary.

(2) The Secretary sends a notice of this distribution to each of the statewide panels established under § 237.20.

(Authority: 20 U.S.C. 1113b(a))

**§ 237.4 In what amount are fellowships awarded?**

A fellowship awarded under this part may not exceed the average national salary of public school teachers in the most recent year for which satisfactory data are available, as determined by the Secretary.

(Authority: 20 U.S.C. 1113b(a)(2))

**§ 237.5 For what purposes may a fellow use an award?**

Christa McAuliffe fellows may use fellowships awarded under this part for projects to improve education including:

(a) Sabbaticals for study or research directly associated with objectives of this part, or academic improvement of the fellows.

(b) Consultation with or assistance to LEAs, private schools, or private school systems other than those with which the fellow is employed or associated.

(c) Development of special innovative programs.

(d) Model teacher programs and staff development.

(Authority: 20 U.S.C. 1113b(b))

**§ 237.6 What priorities may the Secretary establish?**

(a) The Secretary may annually establish, as a priority, one or more of the projects listed in § 237.5.

(b) The Secretary announces any annual priorities in a notice published in the **Federal Register**.

(Authority: 20 U.S.C. 1113d(a))

**§ 237.7 What regulations apply?**

The following regulations apply to the Christa McAuliffe Fellowship Program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 77 (Definitions That Apply to Department Regulations).

(b) The regulations in this Part 237.

(Authority: 20 U.S.C. 1113d(a))

**§ 237.8 What definitions apply?**

(a) The following definitions apply to terms used in this part:

"Act" means the Higher Education Act of 1965, as amended.

"Fellow" means a fellowship recipient under this part.

"Fellowship" means an award made to a person under this part.

(b) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

EDGAR
Elementary school
Private
Public
Secondary school
Local educational agency
State educational agency
Secretary
Department

(Authority: 20 U.S.C. 1113d(a))

## Subpart B—How Does One Apply For An Award?

**§ 237.10 How does an individual apply for a fellowship?**

(a) To apply for a fellowship under this part, an individual must submit an application containing a proposal for a fellowship project as described in § 237.5, indicating the extent to which the applicant wishes to continue current teaching duties.

(b) The applicant shall provide this application to the appropriate LEA for comment prior to submission to the statewide panel for the State within which the proposal project is to be conducted as described in § 237.20.

(c) The applicant shall submit the application to the statewide panel within the deadline established by the panel.

(Authority: 20 U.S.C. 1113c, 1113d(a))

## Subpart C—How Are Fellows Selected?

**§ 237.20 What are statewide panels?**

(a) Recipients of Christa McAuliffe Fellowships in each State are selected by a seven-member statewide panel appointed by the chief State elected official, acting in consultation with the State educational agency (SEA), or by an existing panel designated by the chief State elected official and approved by the Secretary.

(b) The statewide panel must be representative of school administrators, teachers, parents, and institutions of higher education.

(Authority: 20 U.S.C. 1113c)

**§ 237.21 What are the responsibilities of a statewide panel?**

(a) Each statewide panel has the responsibility for—

(1) Establishing its own operating procedures regarding the fellowship selection process; and

(2) Disseminating information and application materials to the LEAs, private schools, and private school systems regarding the fellowship competition.

(b) Each panel may impose reasonable administrative requirements for the submission, handling, and processing of applications.

(c) Each statewide panel must consult with the appropriate LEA in evaluating proposals from applicants.

(d) In their applications to the statewide panel, individuals must include—

(1) Two recommendations from teaching peers;

(2) A recommendation from the principal; and

(3) A recommendation from the superintendent on the quality of the proposal and its educational benefit.

(3) A statewide panel may establish additional criteria, consistent with the

Act, for the award of fellowships in its area as it considers appropriate.

(f) A statewide panel shall submit to the Secretary its selections for recipients of fellowships under this part within the schedule established by the Secretary.

(Authority: 20 U.S.C. 1113d)

## Subpart D—What Conditions Must Be Met By Fellows?

### § 237.30 What is the duration of a fellowship?

An individual may receive a Christa McAuliffe Fellowship under this program for up to 12 months.

(Authority: 20 U.S.C. 1113d(a))

### § 237.31 May a fellowship be awarded for two consecutive years?

A Christa McAuliffe fellow may not receive an award for any two consecutive years.

(Authority: 20 U.S.C. 1113b(a)(2))

### § 237.32 What records and reports are required from fellows?

Each fellow shall keep any records and submit any reports that are required by the Secretary.

(Authority: 20 U.S.C. 1113d(a))

### § 237.33 What is the service requirement for a fellowship?

A fellow must return to a teaching position in the fellow's current LEA, private school, or private school system for at least two years following the completion of the fellowship.

(Authority: 20 U.S.C. 1113b(a)(2), 1113d)

### § 237.34 What are the requirements for repayment of the fellowship?

(a) If a fellow does not carry out the activities described in the approved application or does not comply with § 237.33, the fellow shall make repayment in accordance with this section.

(b) The Secretary prorates the amount a fellow is required to repay based on the length of time the fellow carried out the fellowship activities, and held a teaching position in accordance with § 237.33 compared to the length of time that would have been involved if the fellow had fully met these requirements.

(Authority: 20 U.S.C. 1113e)

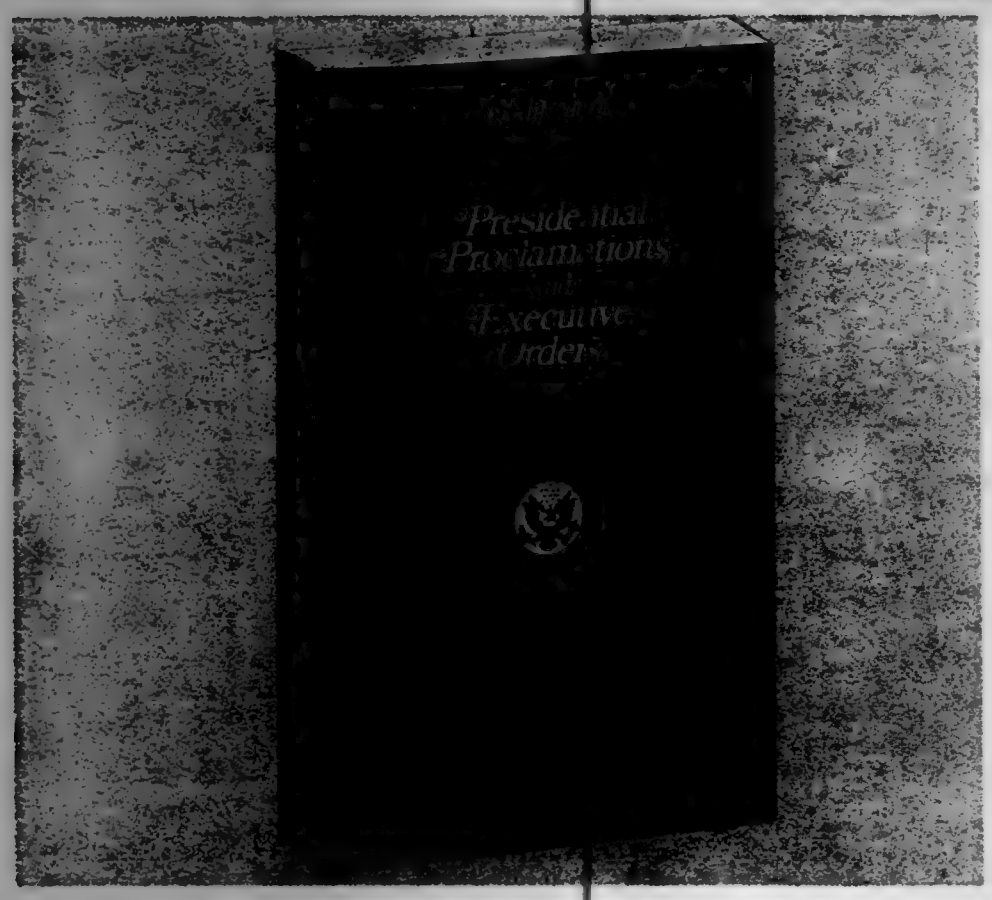
# New edition now available....



For those of you who must keep informed about Presidential Proclamations and Executive Orders, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20,1985, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961-1985 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

**Briefings on How To Use the Federal Register—**
For information on briefings in Washington, DC, Chicago, IL, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20401.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

**How To Cite This Publication:** Use the volume number and the page number. Example: 52 FR 12345.

## THE FEDERAL REGISTER
## WHAT IT IS AND HOW TO USE IT

**FOR:** Any person who uses the Federal Register and Code of Federal Regulations.

**WHO:** The Office of the Federal Register.

**WHAT:** Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

**WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

### WASHINGTON, DC

**WHEN:** June 9, at 9 a.m.
**WHERE:** Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
**RESERVATIONS:** Gertrude E. Belton, 202-523-5237

### CHICAGO, IL

**WHEN:** July 8, at 9 a.m.
**WHERE:** Room 204A, Everett McKinley Dirksen Federal Building, 219 S. Dearborn Street, Chicago, IL.
**RESERVATIONS:** Call the Chicago Federal Information Center, 312-353-0339.

### BOSTON, MA

**WHEN:** July 15, at 9 a.m.
**WHERE:** Main Auditorium, Federal Building, 10 Causeway Street, Boston, MA.
**RESERVATIONS:** Call the Boston Federal Information Center, 617-565-8120

The President

**Proclamation 5653 of May 12, 1987**

## Just Say No to Drugs Week, 1987

By the President of the United States of America

A Proclamation

In recent years, the American people have begun to work together and make significant progress against the intolerable effects of illegal drugs on our way of life. The possibility of realizing our dream of a drug-free generation of American youth took a giant step forward when young people started to join together and organize around the battle cry of JUST SAY NO TO DRUGS.

Today, Just Say No Clubs are setting a new standard of leadership with young people who want to be drug-free. The clubs are an expression of the concerns and the responsibility of young Americans—a positive, constructive step against the tyranny of drugs in schools and communities. The demand to be drug-free is one all of us should heed in our homes and workplaces; our Nation has a commitment to the safety and well-being of young people, and much remains to be done if we are to have a drug-free society that refuses to tolerate the presence and use of illegal drugs. The heritage and the promise of America bid all of us to live up to our responsibility to say no to illegal drugs and alcohol abuse.

I salute the young people who demonstrate their common sense by saying no to drugs and who exhibit leadership by encouraging their friends to do the same. I urge every American to support and emulate the commendable actions of these young people who give us the hope that our next generation may be drug-free.

To recognize the contributions of these young Americans, the Congress, by Senate Joint Resolution 124, has designated the week of May 10 through May 16, 1987, as "Just Say No to Drugs Week" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of May 10 through May 16, 1987, as Just Say No to Drugs Week. I call upon officials at every level of government, civic groups, the clergy, educators, the media, and all citizens to support our youth in observing this week with appropriate programs, ceremonies, and activities. I also ask all Americans to make a personal commitment to Just Say No to illegal drugs and alcohol abuse as they participate in activities during this week.

IN WITNESS WHEREOF, I have hereunto set my hand this 12th day of May, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and eleventh.

Ronald Reagan

**Proclamation 5654 of May 12, 1987**

## National Osteoporosis Awareness Week, 1987

**By the President of the United States**

**A Proclamation**

Every American should know the seriousness of osteoporosis and the need to find ways to cure and prevent it. This disease causes bone mass to decrease, which weakens bones and makes them susceptible to fracture. Osteoporosis afflicts 15 to 20 million Americans, most of them women. It affects half of the women in the United States age 45 or older, and 90 percent of women over 75—bringing pain, decreasing mobility, hampering daily functions, and sometimes ending independence. Every year more than a million Americans suffer fractures because of this disease, most often of the spine, wrists, and hips.

Because the number of elderly Americans continues to rise, so does the incidence of osteoporosis. Fortunately, private organizations and the Federal government are conducting research into this malady. Together they are making new research findings and developing new approaches to prevention, diagnosis, and treatment. In this way, working together, we can discover the causes and cure of this major public health problem and eliminate or diminish it.

The Congress, by Senate Joint Resolution 55, has designated the week of May 10 through May 16, 1987, as "National Osteoporosis Awareness Week," and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of May 10 through May 16, 1987, as National Osteoporosis Awareness Week. I urge the people of the United States and educational, philanthropic, scientific, medical and health care organizations, and professionals to observe this week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 12th day of May, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and eleventh.

Ronald Reagan

# Rules and Regulations

Federal Register
Vol. 52, No. 93
Thursday, May 14, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

**OFFICE OF PERSONNEL MANAGEMENT**

**5 CFR Part 842**

## Federal Employees Retirement System—Basic Annuity; Credit for Service

**AGENCY:** Office of Personnel Management.

**ACTION:** Interim rulemaking with request for comment.

**SUMMARY:** The Office of Personnel Management (OPM) is issuing interim rules implementing the provisions of the Federal Employees Retirement System (FERS) Act of 1986 governing creditable service and service credit deposits. These rules establish the conditions for allowing credit for both military and civilian service and for making deposits under FERS.

**DATES:** Interim rules effective January 1, 1987; comments must be received on or before July 13, 1987.

**ADDRESSES:** Send comments to Frank D. Titus; Director, FERS Implementation Task Force; Retirement and Insurance Group; Office of Personnel Management; P.O. Box 884; Washington, DC 20044; or deliver to OPM, Room 3311, 1900 E Street, NW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** John E. Landers, (202) 632–5560.

**SUPPLEMENTARY INFORMATION:** The FERS Act of 1986, Pub. L. 99–335, effective January 1, 1987, created a new retirement system to supplement social security coverage for Federal employees who were hired after 1983 and for others who may elect to come under it.

These interim regulations implement 5 U.S.C. 8411 establishing the conditions under which OPM will grant credit for service under FERS, except as otherwise provided under title III of Pub. L. 99–335, which sets forth the rules for employees who are not automatically covered by FERS but elect to join the new system. These elections and the rights of electing individuals will be addressed in upcoming OPM regulations creating a new Part 846 (Elections by Employees Covered by Civil Service Retirement System) of Title 5, Code of Federal Regulations.

### I. General

The basic concept of service credit under FERS is that, with certain exceptions explained below, all Federal Government service (both civilian and military) may be credited. Generally, service cannot be credited unless it is covered by contributions to the system. Beginning in 1989, civilian service not subject to retirement deductions at the time it is performed is not creditable.

Refunds under FERS permanently extinguish service credit. Employees who leave Federal service before retirement are generally eligible for a refund of their retirement deductions and deposits. The FERS law states at 5 U.S.C. 842(a) that with regard to FERS basic annuity, disability, and survivor benefits, payment of the refund before retirement "voids all annuity rights" based on the service included in the refund. Under the Civil Service Retirement System (CSRS) (subchapter III of chapter 83 of title 5, United States Code) the law contains similar language at 5 U.S.C. 8342(a): the refund "voids all annuity rights . . . until the employee . . . is reemployed in the service subject to this subchapter." However, unlike CSRS, there is no provision in FERS permitting an employee to redeposit a refund upon reemployment. The FERS provision voiding "all annuity rights" when read in the context of the general structure of FERS (generally barring credit for a period of service unless it is covered by contributions to the system and not allowing redeposit of a FERS refund) requires that no credit be granted for any purpose under FERS basic benefit provisions if a refund of deductions and deposits has been paid under FERS.

Section 843.202(b) of Title 5, Code of Federal Regulations (52 FR 2075, January 16, 1987) states that a refund of deductions and prior deposits under 5 U.S.C. 8424(a) prevents the service involved from ever again becoming creditable for any purpose under FERS. The service cannot be used in computing an annuity nor for meeting the length of service requirements for entitlement to annuity. This bar to credit applies to refunded military service deposits as well as civilian service deposits, except as otherwise provided under title III of Pub. L. 99–335 (concerning employees who elect FERS coverage). Section 842.308 of these interim regulations provides special refund rules for employees who take a refund of deductions and deposits made before becoming subject to FERS. Under these rules, a partial refund can be paid (leaving unrefunded the amount equivalent to a FERS service credit deposit) so as to allow credit under FERS to be retained.

No service credit is allowed for a period of formal separation from service, except for a period of separation of less than 4 days and a period of separation during which an individual was receiving Federal workers' compensation benefits for on-the-job injury or disease, provided the individual returns to duty in the Government. Also, service credit cannot exceed calendar time, even if an employee has more than one Federal appointment.

Any period of time for which service credit under chapter 84 of title 5, United States Code, is specifically allowed by a provision of law may be credited even though the individual does not meet the FERS definition of an employee. This rule does not apply to provisions of law that provide that an individual who does not otherwise meet the definition of an "employee" under FERS (5 U.S.C. 8401(11)) may be covered under subchapter III of chapter 83 of title 5, United States Code. For example, section 205(d)(2) of Pub. L. 98–620 states that employees of the State Justice Institute will be considered employees of the United States "solely" for the purposes of the Federal Employees Compensation Act, the Civil Service Retirement System (subchapter III of chapter 83 of title 5, United States Code), and Federal employees health and life insurance laws. Statutes such as this do not grant coverage under 5 U.S.C. chapter 84; and accordingly, these "non-Federal employees," who are covered by CSRS, cannot be covered under FERS.

Other laws specifically address FERS retirement coverage for non-Federal employees. Employees of the U.S. Postal Service are covered by FERS under section 306 of Pub. L. 99–335. Two recent

provisions of law, title VI of Pub. L. 99–500, the Metropolitan Washington Airports Act of 1986, and section 111 of the same law specifically state that certain non-Federal employees may be covered by FERS. These provisions pertain to certain former Federal employees working for Washington National or Dulles airports at the time the airports are transferred to a newly created Airports Authority (a non-Federal entity) and certain former employees of the House of Representatives who lose their Federal jobs and are employed by a private contractor. Individuals benefiting under these provisions will have the opportunity to become covered by FERS. See § 842.303(b) of these interim regulations concerning another recent statute that provides service credit under FERS for certain service during World War II performed by individuals who were not Federal employees.

**II. Civilian Service**

FERS credit is granted under § 842.304 for the following categories of civilian service with the Federal Government and the U.S. Postal Service:

(1) Service performed after December 31, 1986, subject to FERS salary deductions (5 U.S.C. 8411(b)(1));

(2) Service performed before 1989 (other than service in paragraph (1) above) that would be creditable for an employee subject to CSRS, including service during 1984, 1985, or 1986 that was subject to 1.3 percent salary deductions under the Federal Employees Retirement Contributions Temporary Adjustment Act of 1983 (5 U.S.C. 8411(b)(2) and (3));

(3) Service creditable under the Foreign Service Pension System if the employee waives credit for the service under that System and makes a FERS deposit (5 U.S.C. 8411(b)(4));

(4) Periods of leave without pay, up to 6 months per calendar year. The 6-month limit does not apply to a period of leave without pay while performing military service or while receiving workers' compensation benefits under the Federal Employees Compensation Act (5 U.S.C. 8411(d));

(5) Certain other periods of leave without pay while serving as an officer or employee of an employee organization (5 U.S.C. 8411 (e)); and

(6) Certain periods while an employee is assigned on detail or leave without pay to a State or local government (5 U.S.C. 3373).

Under section 1 of Pub. L. 99–638, certain service performed for the Cadet Nurse Corps during World War II (not previously creditable) is made creditable. Section 842.304(b) of these interim regulations establishes the conditions under which this service may be credited.

**III. Military Service**

Military service is generally creditable under FERS. (See § 842.306 of these regulations.) "Military service" means honorable active service in the armed forces; the commissioned corps of the Public Health Service after June 30, 1960; the commissioned corps of the National Oceanic and Atmospheric Administration, or a predecessor entity in function, after June 30, 1961; and National Guard service when ordered to active duty in the service of the United States. Only service performed before the separation on which title to annuity is based is creditable.

Military service performed after 1956 cannot be credited unless the employee deposits 3 percent of military basic pay paid under 37 U.S.C. 204. The deposit will include interest if paid more than 3 years after the employee first becomes covered by FERS. (See § 842.307.) No deposit is required for military service performed before 1957.

No credit is allowed for any period of military service used in the computation of military retired pay (see exceptions to this rule below) unless the retiree waives receipt of the military retired pay. The retiree does not have to waive military retired pay if it is awarded —

(a) Based on a service-connected disability either (1) incurred in combat with an enemy of the United States; of (2) caused by an instrumentality of war and incurred in line of duty during a period of war as defined by 38 U.S.C. 301; or

(b) Under 10 U.S.C. Chapter 67, relating to reservist service.

Section 502 of Pub. L. 99–556, approved October 27, 1986, amended 5 U.S.C. 8411(c) to allow OPM to credit military service in the computation of survivor annuity even though the employee, a military retiree, had not waived military retired pay. The survivor, however, may elect not to credit the military service. If the survivor's annuity includes military service credit, it is reduced by the amount of the survivor's benefits (other than a child's benefits) payable under the uniformed service retirement system that are based on the military service included in the FERS annuity. This amendment applies only in the event of a death in service. If the death occurs after the date of separation from service, military service that formed the basis for a military retired pay award cannot be included in the computation of a survivor annuity, if any, unless the former employee had waived the military retired pay effective before the date of death.

For cases involving a death in service before the 180th day after enactment of Pub. L. 99–556, subsection (c)(2) of section 502 of that law provides that the "recomputation" of an existing survivor annuity benefit to add military service credit will be delayed until 2 months after OPM receives the survivor's application to have the annuity recomputed. However, these interim regulations make no distinction between cases involving a death in service before the 180th day after enactment of Pub. L. 99–556 and those involving a later death. Because recomputation of an earlier benefit is not an issue for FERS cases, military service will be considered creditable from the date of death in FERS cases, rather than requiring an unintended 2-month delay. The distinction between the earlier and later deaths will be applicable only in CSRS cases.

**IV. Deposits**

Allowable deposits for civilian and military service are addressed in §§ 842.305 and 842.307. Deposits are generally allowed for nondeduction civilian service performed before 1989 (5 U.S.C. 8411(f)(2)) and service previously covered by deductions or deposits if a refund was paid before the employee became subject to FERS, that is, if the refund was paid under CSRS (5 U.S.C. 8342). If the refund is paid after the employee becomes subject to FERS, there is no provision allowing a redeposit because 5 U.S.C. 8411(f)(1), the provision of FERS that permits deposits for a period of service previously covered by CSRS, applies only if the refund was paid under CSRS.

All FERS deposits for civilian service equal 1.3 percent of basic pay, plus interest, and are paid to OPM directly by the employee. FERS deposits for military service performed after 1956 equal 3 percent of military basic pay and include interest if the deposit is not completed within 3 years from the date the employee first became subject to FERS. Military service deposits are paid to the employing agency and forwarded to OPM.

**V. Refunds of CSRS Deductions and Deposits**

Some employees in FERS have past civilian service covered by full (usually 7%) CSRS deductions, deposits, or redeposits. Others have made 7 percent deposits for military service performed after 1956. Unless these employees are eligible for a CSRS component of an eventual FERS annuity (that is, unless

they transfer to FERS having at least 5 years of civilian service, not counting service simultaneous covered by both CSRS and social security), their past civilian and military service is covered under FERS rules. These employees may receive a partial refund of the deductions, deposits, or redeposits paid at the higher CSRS rate.

Section 842.308 of these interim regulations governs the provisions granting refunds of deductions and deposits for civilian and military service that were made under CSRS rules or before the employee became subject to FERS. In the interest of efficiency, the regulations establish that, in the case of a current employee who is eligible to receive the refund, only the difference between the amount to the employee's credit and the amount of a FERS deposit for the service will be paid. Separated employees who apply for a refund of deductions and deposits for this service may elect to receive the full amount to their credit or take only the amount over and above the amount needed to receive FERS credit for the service. If the employee receives the full amount, the effect is to extinguish forever future credit for the service covered by the refund. Either OPM or the employing agency will pay these refunds, depending on the location of the necessary records at the time the refund application is filed.

*Waiver of notice of proposed rulemaking and 30-day Delay of Effective Date*

Under 5 U.S.C. 553(b)(3)(B) and (d)(3), I find that good cause exists for waiving the general notice of proposed rulemaking and for making these regulations effective in less than 30 days. Publication of proposed rulemaking would be impractical. The provisions being implemented were effective January 1, 1987, and retirement and survivor benefits under FERS are already becoming payable. These regulations are needed to specify the amount of service that will be included for entitlement purposes and in the benefit computations.

*E.O. 12991, Federal Regulation*

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

*Regulatory Flexibility Act*

I certify that within the scope of the Regulatory Flexibility Act, these regulations will not have a significant economic impact on a substantial number of small entities because they affect only Federal employees and retirees.

**List of Subjects in 5 CFR Part 842**

Administrative practice and procedure, Air traffic controllers, Claims, Firefighters, Government employees, Law enforcement officers, Pensions, Retirement.

Office of Personnel Management.

**Constance Horner,**

*Director.*

Accordingly, OPM is amending Part 842 of Title 5 of the Code of Federal Regulations to add Subpart C to read as follows:

## PART 842—FEDERAL EMPLOYEES RETIREMENT SYSTEM—BASIC ANNUITY

* * * * *

### Subpart C—Credit for Service

Sec.

842.301 Purpose.
842.302 Definitions.
842.303 General.
842.304 Civilian service.
842.305 Deposits for civilian service.
842.306 Military service.
842.307 Deposits for military service.
842.308 Refunds of deductions and service credit deposits made before becoming subject to FERS.

### Subpart C—Credit for Service

**Authority:** 5 U.S.C. 8461(g).

**§ 842.301 Purpose.**

This subpart sets forth the provisions governing credit for service under the Federal Employees Retirement System (FERS), 5 U.S.C. 8411. Except as provided by section 302 of the Federal Employees' Retirement System Act of 1986, Pub. L. 99–335 (the special provisions for employees who elect to transfer to FERS), service not creditable under this subpart is not creditable either for the purposes of determining eligibility to an annuity or in computing the rate of an annuity benefit under subchapter II (basic annuity), IV (survivor annuity), or V (disability annuity) of chapter 84 of title 5 of the United States Code.

**§ 842.302 Definitions.**

"Cadet Nurse Corps" means any training as a student or graduate nurse under a plan approved under section 2 of the Act of June 15, 1943 (57 Stat. 153).

"Employee" means an employee as defined by 5 U.S.C. 8401(11).

"FERS" means the Federal Employees Retirement System as established under chapter 84 of title 5, United States Code.

"Government" means the Federal Government and Gallaudet College.

"Member" means a Member of Congress as defined by 5 U.S.C. 8401(20).

"Military service" means honorable active service in the armed forces of the United States; in the commissioned corps of the Public Health Service after June 30, 1960; or in the commissioned corps of the National Oceanic and Atmospheric Administration, or a predecessor entity in function, after June 30, 1961. "Military service" does not include service in the National Guard except when ordered to active duty in the service of the United States.

"Survivor" means a current spouse, a child or a former spouse who is entitled to an annuity in accordance with Part 843 of this chapter.

**§ 842.303 General.**

(a)(1) Except as provided in paragraph (a)(2) of this section, no service credit is allowed for a period of separation from service.

(2) Service credit is allowed for a period of separation of less than 4 days and for a period of separation during which an individual was receiving benefits under subchapter I of chapter 81 of title 5, United States Code, provided the individual returns to duty in the Government subject to FERS.

(b) Service credit cannot be granted in excess of actual calendar time from the date of appointment to the date of separation from service.

(c) Any period of time for which service credit under chapter 84 of title 5, United States Code, is specifically allowed by a provision of law is creditable under this subpart subject to any applicable deposit requirements.

**§ 842.304 Civilian service.**

(a) Except as otherwise provided under title III of the Federal Employees' Retirement System Act of 1986, an employee or Member is entitled to credit for all purposes under FERS for a period of civilian service with the Government or the U.S. Postal Service—

(1) Performed after December 31, 1986, which is covered service under Subpart A of this part and for which deductions required under 5 U.S.C. 8422(a) have not been refunded;

(2) That, other than service under paragraph (a)(1) of this section—

(i) Was performed before 1989;

(ii) Would have been creditable under 5 U.S.C. 8332 if the employee or Member were subject to subchapter III of chapter 83 of title 5, United States Code, without regard to any deposit, redeposit, or coverage requirement under that subchapter; and

(iii) Is covered by deductions or a deposit required by § 842.305 and the deductions or deposit have not been refunded after the employee or Member first became subject to FERS;

(3) That was creditable under subchapter II of chapter 8 of title 1 of the Foreign Service Act of 1980 (Foreign Service Pension System), provided—

(i) The employee or Member waives credit for the service under the Foreign Service Pension System; and

(ii) The employee or Member makes the deposit required by § 842.305, and the deposit is not refunded;

(4) While on leave of absence without pay, subject to a limit of 6 months per calendar year, except that the 6-month limit does not apply while—

(i) Performing military service; or

(ii) Receiving benefits under subchapter I of chapter 81 of title 5, United States Code;

(5) While on approved leave without pay granted to serve as a full-time officer or employee of an organization composed primarily of employees, as defined by section 8331(1) or 8401(11) of title 5, United States Code, provided—

(i) The employee elects, within 60 days after the commencing date of leave without pay, to pay to the employing agency the retirement deductions and agency contributions that would be applicable if the employee were in a pay status;

(ii) Payments of the deductions and contributions begin on a regular basis within 60 days after the commencing date of leave without pay; and

(iii) Payments of the required deductions and contributions are completed and not refunded; and

(6) While assigned on detail or leave without pay to a State or local government under 5 U.S.C. 3373, provided—

(i) The normal cost percentage (under Subpart D of Part 841 of this chapter) for the employee (who is deemed to continue in the same normal cost percentage category as applicable on the date of the assignment) is remitted to OPM for each pay period during the assignment; and

(ii) The employee, or, if he or she dies without making an election, his or her survivor, does not elect to receive benefits under any State or local government retirement law or program, which OPM determines to be similar to FERS.

(b) *Cadet Nurse Corps.* (1) Service credit is allowed under Pub. L. 99-638 for a period of service performed with the Cadet Nurse Corps provided—

(i) The service totaled 2 years or more;

(ii) The individual submits an application for service credit to OPM no later than January 10, 1988;

(iii) The individual is employed by the Federal Government in a position subject to subchapter III of chapter 83 of title 5, United States Code (other than 5 U.S.C. 8344) or chapter 84 of that title (other than 5 U.S.C. 8468) at the time he or she applies to OPM for service credit under this provision; and

(iv) The individual makes a deposit for the service in accordance with § 842.305(g) before the date of separation from service on which the individual's entitlement to annuity is based.

**§ 842.305 Deposits for civilian service.**

(a) *Eligibility—current and former employees or Members.* An employee or Member subject to FERS and a former employee or Member who is entitled to an annuity may make a deposit for civilian service described under paragraphs (a)(2) and (a)(3) of section 842.304 upon application to OPM in a form prescribed by OPM. A deposit for civilian service cannot be made after adjudication of the employee's or Member's application for annuity becomes final under § 842.609.

(b) *Eligibility—survivors.* If an employee or Member was, at the time of death, eligible to make a deposit, the employee's survivor may make the deposit for civilian service. A deposit under this paragraph cannot be made after adjudication of the survivor's application for benefits becomes final, which is 30 days after the date of OPM's notice to the survivor of the annuity rates with and without making the deposit.

(c) *Distinct period of service.* A deposit is not considered to have been made for any distinct period of service unless the total amount due for the period is paid in full. A distinct period of civilian service for this purpose is a period of civilian service that is not interrupted by a break in service of more than 3 days.

(d) *Amount of deposits.* The amount of a deposit for a period of service under § 842.304(a)(2) equals 1.3 percent of the basic pay for the service, plus interest. The amount of a deposit for a period of service under § 842.304(a)(3) equals the amount that would have been deducted from pay under 5 U.S.C. 8422(a) had the employee been subject to FERS during the service, plus interest.

(e) *Interest.* (1) Interest is charged at the rate of 4 percent a year through December 31, 1947; 3 percent a year beginning January 1, 1948, through December 31, 1984; and thereafter at a rate as determined by the Secretary of the Treasury for each calendar year that equals the overall average yield to the Civil Service Retirement and Disability Fund (the Fund) during the preceding fiscal year from all obligations purchased by the Secretary during such fiscal year under 5 U.S.C. 8348 (c), (d), and (e).

(2) The computation of interest is on the basis of 30 days to the month. Interest is computed for the actual calendar time involved in each case; but, whenever applicable, the rule of average applies.

(3) Interest is computed from the mid-point of each service period included in the computation or from the date of a refund. The interest accrues annually on the outstanding portion, and is compounded annually, until the portion is deposited. Interest is charged to the date of deposit or commencing date of annuity, whichever is earlier, but is not charged for a period of separation from the service that began before October 1, 1956.

(f) *Forms of deposit.* Deposits may be made in a single lump sum or in installments not smaller than $50 each.

(g) *Cadet Nurse Corps.* (1) Upon receiving an application for service credit with the Cadet Nurse Corps, OPM will determine whether all the conditions for creditability (§ 842.304(b)) have been met; compute the deposit, including interest; and advise the employing agency and the employee of the total amount of the deposit due. The rate of basic pay for this purpose is deemed to be $15 per month for the first 9 months of study; $20 per month for the 10th through the 21st months of study; and $30 per month for any month in excess of 21 months. Interest is computed in accordance with paragraph (e) of this section.

(2) The employing agency must establish a deposit account showing the total amount due and a payment schedule (unless deposit is made in one lump sum) to record the date and amount of each payment.

(3) If the individual cannot make payment in one lump sum, the employing agency must accept installment payments (by allotments or otherwise). The employing agency, however, is not required to accept individual checks in amounts less than $50.

(4) Payments received by the employing agency must be remitted to OPM immediately for deposit to the Civil Service Retirement and Disability Fund.

(5) Once the employee's deposit has been paid in full or closed out, the employing agency must submit the

documentation pertaining to the deposit to OPM in accordance with instructions issued by OPM.

**§ 842.306 Military service.**

(a) Except as provided in paragraph (b), and unless otherwise provided under Title III of the Federal Employees' Retirement System Act of 1986, an employee's or Member's military service is creditable if it was performed—

(1) Before January 1, 1957; or

(2) After December 31, 1956, subject to payment, before separation from service, of the deposit required by § 842.307.

(b) Credit for a period of military service is not allowed if the employee or Member is receiving military retired pay for such period awarded for reasons other than—

(1) Service-connected disability incurred in combat with an enemy of the United States;

(2) Service-connected disability caused by an instrumentality of war and incurred in the line of duty during a period of war (within the meaning of chapter 11 of Title 38, United States Code); or

(3) Retirement under chapter 67 of Title 10, United States Code.

(c) When adjudicating annuity claims, OPM will accept determinations made by the agency that authorized military retired pay concerning—

(1) The effective date of a waiver of military retired pay;

(2) Whether an individual's military retired pay was awarded for any of the reasons mentioned under paragraph (b) of this section; and

(3) Whether a period of military service forms the basis for military retired pay.

(d)(1) Except as provided in paragraphs (d)(2) and (d)(3) of this section, the computation of a survivor's annuity includes credit for any military service allowable under paragraph (a) of this section.

(2) If the separated employee (as defined in § 843.102 of this chapter) was awarded military retired pay, died after the date of separation from civilian service, and did not waive military retired pay effective before the date of death, military service upon which the military retired pay was based is not creditable.

(3) If the survivor of a deceased employee who had been awarded military retired pay files, in a form prescribed by OPM, an election not to have a period of military service included in the computation of survivor benefits, that period of military service is not included in the computation of survivor benefits.

**§ 842.307 Deposits for military service.**

(a) *Eligibility to make a deposit.* (1) An employee or Member subject to FERS may make a deposit for any distinct period of military service by filing an application in a form prescribed by OPM.

(2) An application to make a deposit is filed with the appropriate office in the employing agency, or, for Members and Congressional employees, with the Secretary of the Senate, or the Clerk of the House of Representatives, as appropriate.

(3) An employee's or Member's deposit for military service must be completed before separation from service. If a deceased employee or Member was, at the time of death, eligible to make a deposit, the employee's or Member's survivor may make the deposit in one lump sum to the former employing agency, the Secretary of the Senate or the Clerk of the House of Representatives, before OPM completes adjudication of the survivor annuity application. A person who was eligible to make a deposit for military service but failed to complete the deposit within the time limits provided in this paragraph, may complete the deposit in a lump sum within the time limit set by OPM when it rules that an administrative error has been made.

(b) *Amount of deposit.* (1) The amount of a deposit for military service equals 3 percent of the basic pay for the service under 37 U.S.C. 207, or an estimate of the basic pay (see paragraph (c)(1)(iii) of this section), plus interest, unless interest is not required under paragraph (b)(4) of this section.

(2) Interest is charged at a rate as determined by the Secretary of the Treasury for each calendar year that equals the overall average yield to the Fund during the preceding fiscal year from all obligations purchased by the Secretary during such fiscal year under 5 U.S.C. 8348(c), (d), and (e).

(3) The computation of interest is on the basis of 30 days to the month. Interest is computed for the actual calendar time involved in each case; but whenever applicable, the rule of average applies.

(4) Interest is computed from the mid-point of each full period of service included in the computation. The interest accrues annual on the outstanding portion beginning on the second anniversary of the employee's or Member's beginning date of coverage under FERS, and is compounded annually, until the portion is deposited. Interest is charged to the date of deposit. No interest will be charged if the deposit is completed before the end of the year after interest begins. For example, if an employee becomes subject to FERS on March 1, 1988, interest begins to accrue on March 1, 1990; however, no interest would be included in the deposit due if the deposit is completed by February 28, 1991.

(c) *Processing deposit applications and payments.* (1) The agency, Clerk of the House of Representatives, or Secretary of the Senate will have the employee or Member—

(i) Complete an application to make deposit;

(ii) Provided a copy of his or her DD Form 214 or its equivalent to verify the period(s) of service; and

(iii) Provide copies of all official military pay documents, as identified in instructions issued by OPM, which show the exact basic pay he or she received for full period of service; or, if such evidence is not available, obtain a statement of estimated earnings from the appropriate branch of the military service and submit the statement.

(2) Upon receipt of the application, the DD Form 214, and either the evidence of exact basic pay or the statement of estimated earnings, the agency, Clerk of the House of Representatives, or Secretary of the Senate will establish a deposit account showing—

(i) The total amount due, including interest, if any;

(ii) A payment schedule (unless deposit is made in a lump sum); and

(iii) The date and amount of each payment.

(3) Deposits may be made in a single lump sum or in installments. The agency, Clerk of the House of Representatives, and Secretary of the Senate are not required to accept installment payments in amounts less than $50.

(4) Payments received by the employing agency, the Clerk of the House of Representatives, or the Secretary of the Senate will be remitted to OPM for deposit to the Fund in accordance with payroll office instructions issued by OPM.

(d) *Distinct periods of service.* A deposit is not considered to have been made for any distinct period of service unless the total amount due for the period is paid in full. A "distinct period" for this purpose is the total years, months, and days from the date of entry on active duty (or from January 1, 1957, if later) to the date of final discharge for enlisted military personnel, or to the date of final release from active duty for officers and reservists. A "distinct period" also includes consecutive periods of service where there is no break in service, but does not include any lost time.

**§ 842.309 Refunds of deductions and service credit deposits made before becoming subject to FERS.**

(a) An employee or Member who, while currently employed, is eligible under 5 U.S.C. 8342(a) for a refund of deductions or deposits (relating to civilian service performed before becoming subject to FERS and totaling less than 5 years, not counting service after 1983 that was covered simultaneously by both CSRS and social security) that were previously made for a period of service performed before becoming subject to FERS is eligible for a refund, upon proper application in a form prescribed by OPM. The amount of this refund is the difference between—

(1) The amount of deductions and deposits to his or her credit for such service, plus any interest computed in accordance with 5 U.S.C. 8331(8): and

(2) The amount of the deposit required for such service under § 842.305.

(b) A former employee or Member who is eligible under 5 U.S.C. 8342(a) for a refund of deductions or deposits covering civilian service of the types described in paragraph (a) of this section is eligible for a refund, upon proper application in a form prescribed by OPM. The individual may irrevocably elect a refund, with resepct to this service, of either—

(1) The amount provided under paragraph (a) of this section; or

(2) The full amount of deductions and deposits to his or her credit for such service, plus any interest computed in accordance with 5 U.S.C. 8331(8). If the full amount of deductions and deposits is elected by the former employee or Member, no future deposit for the service may be made.

(c) An employee or Member, who, before becoming subject to FERS, made a deposit for military service is eligible upon proper application in a form prescribed by OPM, while currently employed, for a refund of the amount deposited, excluding interest, to the extent that this amount exceeds the amount of the deposit required for such service under § 842.307.

(d) A former employee or Member who, before becoming subject to FERS, made a deposit for military service is eligible for a refund, upon proper application in a form prescribed by OPM. The former employee or Member may irrevocably elect to receive either—

(1) The amount provided under paragraph (c) of this section; or

(2) The full amount deposited and remaining to the individual's credit. If the full amount of the deposit is elected, no future deposit for the service may be made.

(e) If the current employing agency holds all necessary records pertaining to the amounts in question under paragraph (a) or (c) of this section, the current employing agency will pay the refund in accordance with OPM instructions. Otherwise, OPM will pay the refund.

BILLING CODE 6325-01-M

## DEPARTMENT OF AGRICULTURE

### Food and Nutrition Service

### 7 CFR Part 278

[Amdt. No. 272]

## Food Stamp Program, the Food Security Act of 1985; Fees for Coupon Redemption

**AGENCY:** Food and Nutrition Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** The Food Security Act of 1985 (Pub. L. 99-198) includes numerous provisions which amend the Food Stamp Program. This rule finalizes the interim rule which implemented section 1523 of Pub. L. 99-198 prohibiting financial institutions from imposing fees for redemption of properly submitted food stamp coupons. The provision was enacted to foreclose the possibility that the practice of some financial institutions of charging fees for certain deposits of food stamp coupons could result in retail food stores withdrawing from and thus adversely affecting the Food Stamp Program.

**DATE:** This action is effective retroactive to April 11, 1986, with implementation by financial institutions no later than April 21, 1986.

**FOR FURTHER INFORMATION CONTACT:** Emory Rice, Supervisor, Retailer Participation and Program Litigation Section, Eligibility and Monitoring Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. Phone (703) 756-3427.

**SUPPLEMENTARY INFORMATION:**

### Classification

*Executive Order 12291*

The Department has reviewed this rule under Executive Order 12291 and Secretary's memorandum No. 1512-1. The rule will affect the economy by less than $100 million a year. The rule will not significantly raise costs or prices for consumers, industries, government agencies or geographic regions.

There will not be a significant adverse effect on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprise in domestic or export markets. Therefore, the Department has classified the rule as "nonmajor".

*Executive Order 12372*

The Food Stamp Program is listed in the Catolog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule related notice(s) to 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

*Regulatory Flexibility Act*

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354). S. Anna Kondratas, Acting Administrator of the Food and Nutrition Service, has certified that this proposal will not have a significant negative impact on a substantial number of small entities.

*Paperwork Reduction Act*

This final rulemaking does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) under the Paper Reduction Act of 1980 (44 U.S.C. 3507).

### Background

*Fees for Coupon Redemption—§ 278.5*

The Food Security Act of 1985 (Pub. L. 99-198, section 1523), enacted December 23, 1985, prohibits a financial institution from imposing or collecting a fee or charge for the redemption of food coupons properly presented by a retail grocery.

On April 11, 1986, an interim rule was published at 51 FR 12497 to implement this provision of law. The nondiscretionary of law cannot be affected by public comments. However, since the Department believed that an opportunity for public comment could result in improved and simplified administration of the rule, it was published as an interim rule effective upon publication with financial institutions required to implement its provisions on April 21, 1986. A sixty day comment period was provided.

A total of thirty-eight comment letters were received during the comment period. Two commenters stated that they agreed with the rule as written.

Many of the letters contained more than one comment.

Twenty-seven comments suggested that the rule is unfair to financial institutions. Eight commenters suggested that financial institutions be allowed to charge the same fee for coupon deposits that they charge for cash deposits. Since section 1523 of the Food Security Act specifically prohibits ". . . a fee or other charge . . ." it is the Department's position that such a suggestion cannot be implemented without specific authorizing legislation. Under a variation to this suggestion, a financial institution maintains that it directly exchanges cash for retailers' food stamps. The financial institution then charges the retailer for despositing the cash. The Department believes that the cash that depositors are charged a fee on is directly traceable to food coupons. Without the redemption of coupons there would be no deposit upon which to base a fee. To suggest that redemption by a grocer of coupons is a two stage process, *i.e.*, (1) the conversion of coupons into cash, and (2) the deposit of that cash into an account, is a fiction which ignores the realities of redemption. Financial institutions do not convert coupons presented for deposit by a grocer to cash before the funds are credited to the grocer's account. Rather the value of the coupons are credited directly to grocers' accounts. The practice of charging a fee on deposited food coupons is exactly that which Congress sought to eliminate with the enactment of section 1523 of the Food Security Act. While Congress realized this provision might visit some operational or fiscal hardship on financial institutions, it balanced that hardship against its strong interest in preserving the most widely available retail outlets for coupon recipients. (H.R. Rpt. No. 99–271, 99th Cong., 1st Sess., and S. Rpt. No. 99–145, 99th Cong., 1st Sess.).

Seven commenters noted that coupon cancellation is a nuisance job for financial institutions and could easily be incorporated into the retailers' endorsement function. The law and Congress' statement of intent (S. Rpt. No. 99–145, 99th Cong. 1st Sess. and H.R. Rpt. No. 99–271, 99th Cong. 1st Sess.) make it clear that cancellation of coupons prior to submission to Federal Reserve banks is not the responsibility of the retailers. However, we do wish to note that nothing in the rule is intended to discourage financial institutions and their customers from developing specific, *voluntary* deposit procedures that best meet their mutual needs. For example, financial institutions may arrange, if their customers agree, to have their customers precancel the coupons. Under such an arrangement, the retailer, in lieu of marking or stamping the back of each coupon, may voluntarily cancel the face of each coupon using a rubber stamp. The face of the rubber stamp cannot be larger than 1⅛ inches by 2 inches and must contain the following: (a) The Food Stamp Program Authorization Number or the name of the store; (b) The word "Paid" in letters approximately ¾ inch in height; and (c) The ABA number of the financial institution.

The April 11, 1986 rule was not intended to imply that financial institutions are required to print and distribute to all their customers information on Federal Reserve bank requirements for coupon redemption as two commenters thought. As in relations with any other customer, finanicial institutions are required to inform coupon depositors of the terms and procedures under which deposits are accepted. The financial institution may itself decide how to do this. However, the financial institution may not refuse to advise the retailer of the procedures which must be followed in order to not be charged for coupon deposits.

This Department will comply with two commenters who suggested that Federal Reserve Bank Districts be encouraged to reissue their coupon deposit requirements if there is evidence of confusion over of the appropriate procedures.

One commenter noted that the April 11 rule does not spell out the penalties for noncompliance by financial institutions. While specific penalties are not spelled out, the Food and Nutrition Service believes that avenues exist for obtaining compliance. Willful noncompliance by a financial institution would compel the Food and Nutrition Service to explore all enforcement options, including action to restrict the right of a financial institution to redeem food stamps for cash through the Federal Reserve.

Four commenters state that low volume retailers are not helped by the rule because of the general requirement of Federal Reserve Bank Districts that like denomination coupons be submitted for redemption in stacks of 100. All Federal Reserve Bank Districts require that like denomination coupons be in stacks of 100 although some reserve the right to consider under specific circumstances the acceptance of an occasional deposit of less than 100 coupons in a stack. The Department cannot, therefore, require local financial institutions to accept a stack of less than 100 like denomination coupons without charge. The law allows charges for redeeming a stack of less than 100 like denomination coupons, however, the law does not require such a charge. In situations where a retailer is suffering hardship, a local financial institution may waive its policy of imposing a charge.

Three commenters noted that the April 11 rule could have the unintended effect of causing financial institutions to stop taking food stamps since such institutions may no longer charge for redeeming property submitted coupons. The Department believes this will not prove to be the case and notes that since the provisions was implemented on April 21, 1986, it is aware of no financial institution which has chosen terminate its participation.

One commenter maintained that the rule should have been made effective upon enactment of Pub. L. 99–198 on December 23, 1985. Since the Food Security Act of 1985 states that section 1523 is to be implemented through regulation, we believe that Congress intended implementing regulations to be effective upon publication.

The Department hopes that the clarifications provided concerning this final rule will be helpful. For the reasons stated above, no changes are made in the regulatory language embodied in this final rule.

**Implementation**

For the reasons stated in the preamble to the interim rule published on April 11, 1986, (51 FR 12497) in the section entitled Justification for Publishing as an Interim Rule Effective Upon Publication, this action became effective when the interim rule was published with financial institutions to implement no later than April 21, 1986.

**List of Subjects in 7 CFR Part 278**

Administrative practice and procedure, Banks, Banking, Claims, Food stamps, Groceries-retail, General line-wholesaler, Penalties.

Accordingly, 7 CFR Part 278 is amended as follows:

## PART 278—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS AND FINANCIAL INSTITUTIONS

1. The authority citation for Part 278 continues to read as follows:

**Authority:** (7 U.S.C. 2011–2029).

**§ 278.5 [Amended]**

2. In § 278.5:

a. The amendment to add a new sentence after the first sentence in paragraph (a)(1) is adopted as final without change.

b. The amendment to add a new sentance after the third sentance in paragraph (a)(3) is adopted as final without change.

§ 278.9 [Amended]

3. In § 278.9, the amendment to add a new paragraph (d) is adopted as final without changes.

Dated: May 7, 1987.

S. Anna Kondratas,

## Commodity Credit Corporation

### 7 CFR Part 1477

### Disaster Payment Program for 1986 Crops

**AGENCY:** Commodity Credit Corporation, USDA.

**ACTION:** Final rule.

**SUMMARY:** The purpose of this rule is to adopt, as a final rule, an interim rule which was published in the **Federal Register** on February 10, 1987, (52 FR 4129). The interim rule amended the regulations at 7 CFR Part 1477 with respect to the definition of the eligible acreage for nonprogram crops for purposes of making disaster payments due to low yields as the result of drought, excessive heat, flood, hail or excessive moisture in certain eligible counties. Section 1477.3 was amended to provide that such acreage shall be the acreage planted to the crop for harvest in 1986 without regard to the acreage planted to harvest in prior years. The interim rule is hereby adopted as a final rule without change.

**EFFECTIVE DATES:** This final rule shall become effective on May 13, 1987.

**FOR FURTHER INFORMATION CONTACT:** Jerry W. Newcomb, Director, Emergency Operations and Livestock Programs Division, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, P.O. Box 2415, Washington, DC 20013 Telephone: (202) 447-5621.

**SUPPLEMENTARY INFORMATION:** This final rule has been reviewed under U.S. Department of Agriculture (USDA) procedures established in accordance with provisions of Executive Order 12291 and Departmental Regulation No. 1512-1 and has been classified as "not major." It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of the law to publish a notice of proposed rulemaking with respect to the subject matter of this final rule.

The title and number of the federal assistance program to which this final rule applies are: Title—Commodity Loans and Purchases; Number 10.051, as found in the Catalog of Federal Domestic Assistance.

An Environmental Evaluation with respect to the Disaster Payment Program is being completed. It has been determined that this action is not expected to have a significant impact on the quality of the human environment. In addition, it has been determined that this action will not adversely affect environmental factors such as wildlife habitat, water quality, air quality, and land use and appearance. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

### Interim Rule

An interim rule was published in the **Federal Register** on November 19, 1986 (51 FR 41757) implementing the 1986 disaster payment program authorized by section 633(B) of the Agriculture, Rural Development and Related Agencies Appropriations Act, 1987, as included in Public Laws 99-500 and 99-951. The interim rule provided for a disaster payment program for eligible producers for losses of 1986 crop production due to drought, excessive heat, flood, hail or excessive moisture in 1986. The interim rule also established the criteria for eligibility of individual producers to receive a disaster payment. A final rule, which was published on December 24, 1986 (51 FR 46593), amended the interim rule with respect to provisions for determining the payment rate for sugar beets and sugar cane and the provisions for determining payments for producers of nonprogram crops.

Based upon a review of existing conditions in eligible counties, it was determined that producers of nonprogram crops who had actually incurred the costs and assumed the risk of planting such a crop in 1986 and are otherwise eligible for a 1986 disaster payment under this program should be eligible for disaster payments with respect to losses incurred on the acreage planted to the crop for harvest in 1986 without regard to prior year planting history. Accordingly, an interim rule amending the provisions of 7 CFR 1477.3(e) with respect to the eligible disaster acreage for nonprogram crops involving low yield losses in order to provide that such acreage shall be the 1986 acreage planted to harvest to such a crop, as determined by the county committee in accordance with instructions issued by the Deputy Administrator, State and County Operations, Agricultural Stabilization and Conservation Service (ASCS) was published in the **Federal Register** on February 10, 1987, (52 FR 4129). The interim rule provided for a 10-day period. The Department of Agriculture received no comments with respect to the interim rule. Accordingly, it has been determined that the interim rule should be adopted as a final rule without change.

### List of Subjects in 7 CFR Part 1477

Crop insurance, Indemnity payments.

### Final Rule

Accordingly, the interim rule published at 52 FR 4129, which amended 7 CFR Part 1477 is hereby adopted as a final rule without change.

**Authority:** Section 633(B) of the Agriculture, Rural Development and Related Agencies Appropriations Act, 1987, as included in Pub. L. 99-500 and Pub. L. 99-591.

Signed at Washington, DC, on May 11, 1987.

Milton J. Hertz,

*Executive Vice President, Commodity Credit Corporation.*

BILLING CODE 3410-05-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 87-023]

## Importation of Cattle From Canada; Calfhood Vaccination Requirements

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the animal import regulations to reflect new Canadian calfhood vaccination requirements. Recently, the Canadian government changed its regulations to require a reduced dosage *Brucella* vaccine for calfhood vaccination, to be administered when the cattle (whether dairy or beef) are from 4 to 8 months of age. Our action is necessary to allow certain female cattle that have been given the reduced dosage vaccine to be imported from Canada without being tested for brucellosis.

EFFECTIVE DATE: June 15, 1987.

FOR FURTHER INFORMATION CONTACT: Dr. Harvey A. Kryder, Jr., Import-Export and Emergency Planning Staff, VS, APHIS, USDA, Room 806, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; (301) 436-8695.

SUPPLEMENTARY INFORMATION:

### Background

We published in the Federal Register on December 22, 1986 (51 FR 45778-45779), a proposal to amend the regulations in 9 CFR Part 92 (referred to below as the regulations). We proposed that § 92.20(c)(5) be revised to reflect new Canadian calfhood vaccination requirements. Canada now requires use of a "reduced dosage" *Brucella* vaccine to be administered to cattle (whether dairy or beef) between the ages of 4 and 8 months. Before July 1, 1985, Canada required use of a "standard dosage" *Brucella abortus* Strain 19 vaccine. Test data indicate that cattle given the reduced dosage *Brucella* vaccine develop approximately the same level of resistance to brucellosis as cattle given the standard dosage. Therefore, we believe that the reduced dosage administered to female cattle between the ages of 4 and 8 months, will provide adequate immunization against brucellosis. We also proposed that § 92.20(d) be revised to require that, if cattle are to be imported in accordance with § 92.20(c)(5), the date of vaccination, dosage of vaccine used, and age of each animal on the date of vaccination be stated on the certificate accompanying the animal to the U.S. port of entry.

Our proposal of December 22, 1986, invited the submission of written comments on or before February 20, 1987. We received one comment, which supported the proposed rule. Based on the rationale set forth in the proposal, the proposed rule is adopted as a final rule.

### Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs of prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a signifiant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The effect of this action is to retain a provision in our regulations that allows certain female cattle under 18 months of age to be imported into the United States from Canada without being tested for brucellosis. We have determined that this rule will not have any effect on the number of cattle imported into the United States from Canada.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

### Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V.)

### List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

## PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, 9 CFR Part 92 is amended as follows:

1. The authority citation for Part 92 continues to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 92.20, paragraphs (c)(5) and (d) are revised and the OMB control number is added at the end of the section to read as follows:

### § 92.20 Cattle from Canada.

* * * * *

(c) * * *

(5) Female cattle under 18 months of age may be imported without being tested for brucellosis if they meet all of the following conditions: (i) They were born and remained prior to importation in a herd that meets the requirements of paragraph (c)(1), (c)(2), or (c)(3)(i) of this section; and (ii) They are accompanied by a certificate issued or endorsed by a salaried veterinarian of the Canadian government stating that they were vaccinated against brucellosis, according to Canadian regulations, as follows: (A) After June 30, 1985, while from 4–8 months of age, with a reduced dosage *Brucella* vaccine; or (B) Before January 1, 1986, while from 2–6 months of age if dairy cattle or from 2–10 months of age if beef cattle, with a standard dosage *Brucella* vaccine.

* * * * *

(d) The certificates prescribed in paragraphs (b) and (c) of this section shall state: (1) The names of the consignor and the consignee; (2) a description of the cattle to be imported, including the breed, ages, markings, and tattoo and eartag numbers of each animal; (3) the dates and places of each test required by paragraphs (b) and (c) of this section; and (4) the date of vaccination, dosage of vaccine used, and the age of each animal on the date of vaccination for each vaccination conducted in accordance with paragraph (c)(5) of this section.

## FARM CREDIT ADMINISTRATION

### 12 CFR Part 605

### Information Security

**AGENCY:** Farm Credit Administration.

**ACTION:** Final rule.

**SUMMARY:** As required in Executive Order 12356 and Information Security Oversight Office (ISOO) Directive No. 1, the Farm Credit Administration (FCA) is publishing a revision to Part 605 regarding the handling of classified documents. This regulation is being revised to reflect FCA's current organization, changes which have occurred since 1984, the assignment of new responsibilities pursuant to agency policy and procedures, and the increase of granted access positions.

**EFFECTIVE DATE:** May 14, 1987.

**FOR FURTHER INFORMATION CONTACT:** Jerry L. Barringer, Information Security Officer, Office of Administration, Farm Credit Administration, McLean, Virginia 22102-5090, (703) 883-4007.

**SUPPLEMENTARY INFORMATION:** Part 605 defines the Information Security Program of the FCA for classified documents and outlines the basic requirements for obtaining access to classified documents. This program is under the administrative direction of the Information Security Officer, Records and Projects Division, and applies to those individuals who have been granted access to classified documents of the U.S. Government. The number of FCA officials authorized to have in their possession, to give consideration to, and to transmit classified information in the discharge of their respective official duties has been increased from the prior 4-6 employee limitation to over 30 employees. In preparation for the annual review by the ISOO of the FCA Information Security Program, this regulation has been revised to reflect FCA's current organization, changes which have occurred since 1984, the assignment of new reponsibilities pursuant to agency policy and procedure, and the increase of granted access positions.

**List of Subjects in 12 CFR Part 605**

Classified information.

Chapter VI of Title 12, Part 605 of the Code of Federal Regulations is amended to read as follows:

## PART 605—INFORMATION

1. The authority citation for Part 605 is revised to read as follows:

**Authority:** 12 U.S.C. 2243, 2246, and 2252.

2. Section 605.502 is amended by revising paragraphs (d), (f), and (j) to read as follows:

* * * * *

**§ 605.502 Program and procedures.**

* * * * *

(d) *Handling of classified documents.* All documents bearing the terms "Top Secret," "Secret," and "Confidential" shall be delivered to the Information Security Officer or his/her designee immediately upon receipt. All potential recipients of such documents shall be advised of the names of such designees. In the event that the Information Security Officer or his/her designee is not available to receive such documents, they shall be sent to the FCA mailroom and stored in the combination safe located in the Agency Services Branch and secured unopened until the Information Security Officer is available. Under no cirumstances shall classified materials that cannot be delivered be stored other than in the designated safe. All materials not immediately deliverable or able to be secured in the designated safe shall be returned to the sender, under appropriate cover, for redelivery to the FCA at the next earliest opportunity.

* * * * *

(f) *Storage.* In accordance with 32 CFR 2001.43, all classified documents shall be stored in combination safes located at the primary headquarters and/or Field Division, Office of Examination, Farm Credit Administration. The combinations shall be changed as required by directives issued by ISOO. The combinations shall be known only to the Information Security Officer and his/her designees who have appropriate security clearances.

* * * * *

(j) *Freedom of Information request.* All inquiries regarding requests for classified information under the Freedom of Information Act (5 U.S.C. 552), including those from the news media, shall be referred to the FCA FOI Officer, Office of Congressional and Public Affairs, Farm Credit Administration, and shall be handled in accordance with provisions of that statute and applicable regulations.

William A. Sanders, Jr.,

*Secretary, Farm Credit Administration Board.*

## SECURITIES AND EXCHANGE COMMISSION

### 17 CFR Part 211

**[Release No. SAB 69]**

### Staff Accounting Bulletin No. 69; Registrants' Disclosures Using Article 9 of Regulation S-X and Industry Guide 3, and Casino-Hotel Activities Income Statement Presentation

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Publication of Staff Accounting Bulletin.

**SUMMARY:** The interpretations in this staff accounting bulletin express certain views of the staff regarding: (a) The use of Article 9 of Regulation S-X and Industry Guide 3 as guidance for certain disclosures of registrants which are not bank holding companies, but which are engaged in similar lending and deposit activities; and (b) income statement presentation for casino-hotel activities.

**DATE:** May 8, 1987.

**FOR FURTHER INFORMATION CONTACT:** John M. Riley or John W. Albert, Office of the Chief Accountant (202-272-2130), or Howard P. Hodges, Jr. Division of Corporation Finance (202-272-2553), Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

**SUPPLEMENTARY INFORMATION:** The statements in staff accounting bulletins are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval. They represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal Securities laws.

Jonathan G. Katz,

*Secretary.*

May 8, 1987.

## PART 211—[AMENDED]

Accordingly, Part 211 of Title 17 of the Code of Federal Regulations is amended by adding Staff Accounting Bulletin No. 69 to the table found in Subpart B.

BEST COPY AVAILABLE

**Staff Accounting Bulletin No. 69**

The staff hereby adds Sections K and L to Topic 11 of the staff accounting bulletin series. Section K discusses the staff's views on the use of Article 9 of regulation S–X ("Bank Holding Companies") and Industry Guide 3 ("Statistical disclosure by bank holding companies") as guidance for certain disclosures of registrants which are not bank holding companies, but which are engaged in similar lending and deposit activities. Section L discusses appropriate income statement presentation by casinos with hotel and restaurant operations.

*Topic 11: Miscellaneous Disclosure*

* * * * *

K. Applications of Article 9 and Guide 3

*Facts:* Article 9 of Regulations S–X specifies the form and content of and requirements for financial statements for bank holding companies filing with the Commission. Similarly, bank holding companies disclose supplemental statistical disclosures in filings, pursuant to Industry Guide 3. No specific guidance as to the form and content of financial statements or supplemental disclosures has been promulgated for registrants which are not bank holding companies but which are engaged in similar lending and deposit activities.[1]

*Question*: Should non-bank holding company registrants with material amounts of lending and deposit activities file financial statements and make disclosures called for by Article 9 of Regulation S–X and Industry Guide 3?

*Interpretive Response*: In the staff's view, Article 9 and Guide 3, while applying literally only to bank holding companies, provide useful guidance to certain other registrants, including savings and loan holding companies, on certain disclosures relevant to an understanding of the registrant's operations. Thus, to the extent particular guidance is relevant and material to the operations of an entity, the staff believes the specific information, or comparable data, should be provided.

For example, in accordance with Guide 3, bank holding companies disclose information about yields and costs of various assets and liabilities. Further, bank holding companies provide certain information about maturities and repricing characteristics of various assets and liabilities. Such companies also disclose risk elements, such as nonaccrual and past due items in the lending portfolio. The staff believes that this information and other relevant data would be material to a description of business of other registrants with material lending and deposit activities and accordingly, the specified information and/or comparable data (such as scheduled item disclosure for risk elements) should be provided.

In contrast, other requirements of Article 9 and Guide 3 may not be material or relevant to an understanding of the financial statements of some financial institutions. For example, bank holding companies present average balance sheet information, because period-end statements might not be representative of bank activity throughout the year. Some financial institutions other than bank holding companies may determine that average balance sheet disclosure does not provide significant additional information. Others may determine that assets and liabilities are subject to sufficient volatility that average balance information should be presented.

Pursuant to Article 9, the income statements of bank holding companies use a "net interest income" presentation. Similarly, bank holding companies present the aggregate market value, at the balance sheet date, of investment securities, on the face of the balance sheet. The staff believes that such disclosures and other relevant information should also be provided by other registrants with material lending and deposit activities.

L. Income Statement Presentation of Casino-Hotels

*Facts*: Registrants having casino-hotel operations present separately within the income statement amounts of revenue attributable to casino, hotel and restaurant operations, respectively.

*Question*: What is the appropriate income statement presentation of expenses attributable to casino-hotel activities?

*Interpretive Response*: The staff believes that the expenses attributable to each of the separate revenue producing activities of casino, hotel and restaurant operations should be separately presented on the face of the income statement. Such a presentation is consistent with the general reporting format for income statement presentation under Regulation S–X (Rules 5–03.1 and 5–03.2) which requires presentation of amounts of revenues and related costs and expenses applicable to major revenue providing activities. This detailed presentation affords an analysis of the relative contribution to operating profits of each of the revenue producing activities of a typical casino-hotel operation.

[FR Doc. 87–11063 Filed 5–13–87; 8:45 am]

BILLING CODE 8010–01–M

[1] The Commission staff has been considering the need for more specific guidance in the area but believes that the Financial Accounting Standards Board project on financial instruments, which as an initial step is expected to result in expanded disclosures across industry lines, may make Commission action in this area unnecessary. In the interim, this bulletin provides the staff's views with respect to filings by similar entities such as saving and loan holding companies.

---

**DEPARTMENT OF ENERGY**

**Federal Energy Regulatory Commission**

**18 CFR Part 11**

**[Docket No. RM86–2–000; Order No. 469]**

**Revision of the Billing Procedures for Annual Charges for Administering Part I of the Federal Power Act and to the Methodology for Assessing Federal Land Use Charges**

Issued May 8, 1987.

**AGENCY:** Federal Energy Regulatory Commission, DOE.

**ACTION:** Final rule.

**SUMMARY:** The Federal Energy Regulatory Commission (Commission) is amending Part 11 of its regulations under the Federal Power Act (Act) to revise the billing procedures for annual charges for administering Part I of the Act, the billing procedures for charges for Federal dam and land use, and the methodology for assessing Federal land use charges.

By changing its billing procedures the Commission will bill licensees on a fiscal-year basis for annual charges. The date for filing the information used in assessing these charges will change from February 1 of each year to November 1. In addition, the Commission will bill for Federal land use charges in advance, and the charges will be based on the fee schedule for transmission line rights-of-way, published by the United States Forest Service.

**EFFECTIVE DATE:** July 28, 1987.

**FOR FURTHER INFORMATION CONTACT:** James R. Keegan, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357–8542.

**SUPPLEMENTARY INFORMATION:**

I. Introduction

The Federal Energy Regulatory Commission (Commission) is amending Part 11 of its regulations under the

Federal Power Act (Act) [1] to revise the billing procedures for annual charges for administering Part I of the Act, the billing procedures for charges for Federal dam and land use, and the methodology for assessing Federal land use charges.

By changing its billing procedures the Commission will bill licensees on a fiscal-year basis for annual administrative charges, for charges for the use of government dams, and for charges for the use of Federal lands. In addition, the date for filing the information used in assessing these charges will change from February 1 of each year to November 1.

The Commission will also begin using the published index of United States Forest Service values of transmission line rights-of-way, as the basis for assessing Federal land use charges, and abandon its traditional method of multiplying a national average per-acre land value by a rate of return. The Commission will also bill Federal land use charges in advance. The change in the land use charges and the first year of advanced billing for land use charges will be phased in in order to minimize hardship on the licensees. The rule also makes other minor corrections to the billing procedures.

## II. Background

### *A. Billing Procedures*

The Commission is required by section 10(e) of the Act to collect annual charges for the cost of administering Part I of the Act, and for recompensing the United States for the use of Federal property.[2] Part 11 of the Commission's regulations provides the manner in which licensees are charged for such costs.[3] Prior to the adoption of the current regulations, administrative charges were not based on the actual costs of the government, but were set fees that were billed for a calendar year. Under the Current regulations, reimbursable costs are determined on a fiscal year basis, and licensees are required to submit the generation data used in this determination on a calendar-year basis. Although costs are determined on a fiscal year basis, the billings have continued to state that they cover the calendar year. Annual charges for land use and for Federal dam use are also *assessed* on a calendar-year basis, and the data used in determining all of these charges are required to be filed on the first of February of each year. The land use charges that are *assessed* each year represent compensation for use of the land for the preceeding year.

### *B. Federal Land Charges*

Beginning in 1938, annual charges for government land used by hydropower licensees were based on project-by-project appraisals. This practice often proved uneconomical because of the excessive cost of appraisal in comparison to the value of the land involved. In 1942, the Federal Power Commission developed a national average value of $50 per acre.[4] Because the Commission recognized that this Federal asset, public land, was being used rather than purchased, the Commission atempted to approximate the rental value by selecting an interest rate as a rate of return which could then be multiplied by the value of the land to determine a land use charge. The Commission selected 4 percent as the rate, thereby deriving an annual land use charge of $2.00 per acre. In 1962, when the Commission increased the national average land value to $60 per acre but retained the 4 percent interest rate, the annual land use charge was increased to $2.40 per acre.

When the current regulations were adopted in 1976 in Order No. 560, the national average land value was increased to $150 per acre.[5] In an effort to ensure that the rate of return used would remain current, the Commission adopted the fluctuating rate used by the United States Water Resources Council (WRC) which was based primarily upon the average yield of long-term (15 years or more to maturity) United States interest-bearing securities. Although this rate can be adjusted yearly to reflect changes in yield and the associated changing Federal borrowing costs, that rate is barred by statute form being changed more than one-quarter of a percent in any year. In selecting this index, the Commission concluded that the statutory restraint would ensure that the annual land use charge would remain reasonable year to year.

### *C. The Proposed Changes*

On December 30, 1985, the Commission issued a Notice of Proposed Rulemaking (NOPR) in which it proposed to revise its method of assessing Federal land use charges, and to revise its billing procedures of those charges.[6] By these revisions, the Commission intended to prevent the undercollection of interest by the United States Treasury,[7] by eliminating a delay in data collection. The Commission also intended to better approximate the fair market value of a licensee's use of Federal land.

On December 23, 1986, the Commission issued a notice requesting supplemental comments on issues that were not specifically raised in the original NOPR.[8] In the supplemental notice, the Commission sought comment on the billing for lands charges in advance, and proposed to bill for government dam use and Federal land use on a fiscal year basis in order to provide consistency in the Commission's billing procedures. The supplemental notice also sought comment on the use of the land valuation method of the U.S. Forest Service and the Bureau of Land Management as a method of assessing annual charges for the use of government land.

The Commission received over thirty public comments in response to both the NOPR and the supplemental notice. The Commenters comprise Federal agencies, public utilities, associations, and hydroelectric developers.[9]

## III. Discussion

### *A. Billing Procedure for Administrative Charges*

Licensees who are not states or municipalities, with projects of more than 1.5 megawatts of installed capacity (2000 horsepower), are assessed annual charges for the costs of administration of Part I of the Act on the basis of the amount of power generated and authorized, installed capacity.[10] Generally, state or municipal licensees of projects with capacity greater than 1.5 megawatts are assessed on the basis of authorized installed capacity only. They are not assessed a charge to the extent that they can demonstrate that: (1) The project was primarily designed for

[7] Undercollection results from billing for charges on a calendar-year basis while computing administrative costs on a fiscal-year basis, and from not billing for lands charges in advance. The undercollection was identified by the Inspector General of the Department of Energy. *See* Assessment of Charges Under the Hydroelectric Program, DOE/IG Report No. 0219 (Sept. 3, 1985); and Accounts Receivable, Billings and Collection of FERC, DOE/IG Report No. 0224 (Feb. 3 1986).

navigational purposes; (2) the power produced by the project is used for state or municipal purposes; or (3) the power is sold to the public without profit.[11]

The reimbursable Commission costs are determined on a fiscal-year basis. However, licensees are currently required to submit their generation data [12] on a calendar-year basis.[13]

In recent reports, the Inspector General of the Department of Energy recommended that the Commission require its licensees to compute their generation data on the same fiscal-year basis that the Commission uses to calculate its administrative costs. The NOPR proposed to implement the Inspector General's recommendation by requiring that generation data be based on the fiscal year and be submitted shortly after the close of the fiscal year. This synchronization would provide the government with annual fees three months earlier than under the present system. The Inspector General found that since the Commission's assessments for administrative costs in 1983 were $23.4 million, the government lost approximately $200,000 a month in interest for each month until the Commission sent licensees bills for their annual charges. By requiring generation data to be filed by November 1 of each year, instead of February 1 of the next year, the government would be able to receive compensation for its administrative costs more expeditiously, thereby obtaining more precisely the benefits Congress intended.

The Commission adopts the proposed rule to require that the data used in determining charges for costs of administration [14] and for the use of government dams [15] to be submitted on a fiscal-year basis, with filings of such data due November 1 of each year. The Commission will then bill for all annual charges on a fiscal-year basis. In the first year of application of this rule, this data must be submitted for the first nine months of 1987 (January 1 through September 30). In each subsequent year, the data will cover the period from October 1 through September 30. The Commission will then bill for these charges on a fiscal year basis, with bills going out early the next year for all but land use charges, which will be billed as discussed below.

Most commenters do not anticipate that any significant problems would result from the billing changes proposed in this rulemaking, and in general find the proposals to be reasonable. In particular commenters (Ala.P., Id.P., Minn.) note that, if the Commission changes to fiscal-year billing for administrative charges, changing to fiscal year billing for government dam use charges and Federal land use charges as well will provide for needed consistency and will reduce the administrative burdens of the billings.

Some commenters oppose changing to a fiscal-year billing system for several reasons. Several commenters (EEI, Ala.P., Ga.P.) fear that the rule change would result in double billing for three months in its first year of application. This is not the case. By changing to fiscal year billing, the Commission is not double billing licensees. The Commission has always billed licensees for the Commission's fiscal year's costs.[16] However, it allocated the costs to each licensee on a calendar year basis. Therefore, there is no double billing, but only a change in the date on which bills will be assessed.

The Commission notes that since it used generation data for the last three months of the previous calendar year in order to calculate the annual charges for the last fiscal year, it would be inappropriate to do so in computing the annual charges for this fiscal year. Otherwise the Commission would be considering the same generation data twice for the purpose of allocating the annual charge.

The Commission emphasizes that, since the calendar year data was used solely for allocation purposes, licensees will not be overbilled as a result of the change to a fiscal year billing cycle, and over the course of a fifty-year license, will pay for only fifty years of annual charges.

One commenter (Ala.P.) suggests that, in order to avoid confusion during the transition, the reporting of data be for a nine month period. This rule adopts this suggestion as it will make the transition year data reporting coincide with transition year billing, and will prevent double reporting of data for the three month overlap.

One commenter (Snoho) questions the Inspector General's determination that a correction of the Commission's billing procedures are necessary to correct an undercollection of interest. This commenter claims that by changing to a fiscal-year billing cycle the Commission reaps only a one time benefit of an earlier payment, as interest is not "lost" until a bill is sent out. Therefore, claims the commenter, there is no undercollection and the benefits of one early payment do not justify the bookkeeping and cash flow problems that the commenter alleges the rule will create. There is no reason to believe that fiscal-year billing procedures will create the problems the commenter claims it will.[17] Moreover, there is not only a one time benefit to the Commission from earlier collection of charges. Annual charges are designed to reimburse the government for expenditures it has made during the fiscal year. The Commission is without the use of those funds each year until it is reimbursed by the licensee. Therefore, the Commission saves interest each year by billing for annual charges as soon after the expenditures are made as possible. By converting to a fiscal-year billing system the Commission can provide for uniformity, efficiency and cost effectiveness that outweighs the bookkeeping burdens, if any, to the licensees.

Other commenters (WUG, EEI, PGE) argue that the Commission should not change government dam use charges to a fiscal-year basis if the change would conflict with existing contracts between licensees and other government agencies for the use of such dams. No commenter alleges that any such conflict actually exists, and there is no other evidence of any such conflict.

Several commenters (PGE, WUG, EEI) favor billing on a calendar-year basis because the land value index of the U.S. Forest Service that this order is adopting as a basis for Federal land use charges is prepared on a calendar-year basis. The fact that the Forest Service index will be prepared on a calendar-year basis is not a hinderance to Commission billing on a fiscal-year basis. The information needed to prepare bills for land use charges (i.e. the Forest Service index and inflation adjustment factors) will be available in time to bill on a fiscal year basis. Only if the Forest Service updates their assessments in some future year, and the assessments are not prepared in time for the Commission to use them in the current year, would the Commission have to adjust the bill retroactively in the next year's bills. This reassessment is not

[16] The Commission's records indicate that annual charges bills have historically covered the fiscal year. Annual statements note that the bill is intended to recover fiscal year costs.

[17] Many utilities keep monthly totals of generation data, and can therefore add them just as easily for a fiscal year as for a calendar year.

expected to occur often enough to create an undue administrative burden. Finally, one commenter (Seattle) urges staying on a calendar year basis because other energy data bases (*e.g.*, those of utilities and trade organizations) are compiled on a calendar-year basis. Although it may be true that, by collecting data on a fiscal-year basis while other energy data sources are compiled on a calendar-year basis, the Commission will make analysis of national energy data slightly more complex, any difficulties caused by the Commission's procedures should be insignificant when compared with the economic and administrative efficiency gained by a uniform system of accounting and billing. The Commission has considered the difficulties the commenters allege will result from fiscal-year billing, and find that the benefits of a uniform fiscal year billing system outweighs any such burdens. The Commission calculates its costs on a fiscal-year basis, and the administrative burdens of changing to a calendar-year basis while all other aspects of government accounting are done on a fiscal-year basis is too great to justify such a change. Therefore, the Commission will bill for all annual charges on a fiscal-year basis.

*B. Federal Lands Charges*

1. Overview

In the notices published in this rulemaking, the Commission proposed changing the methodology used in computing charges for the use of Federal lands to correct an under collection of charges, in response to recommendations of the Inspector General. The Inspector General recently concluded that neither the land value nor the interest rate employed by the Commission's current regulations are up to date. According to the Inspector General, the Commission has been undercharging licensees by approximately $15.2 million each year for the use of about 166,000 acres of Federal land. The Inspector General recommended revising the Commission's regulations to base these land use charges on the current fair market value of the land being used and the current long-term government borrowing rate. The Inspector General also recommended replacing the national average land value with state-by-state averages.[18]

The Commission originally proposed in the NOPR to remedy this undercollection of charges by revising the existing methodology to reflect a more current value of lands, and a more precise rate of return. The NOPR proposed to alter the Commission's traditional method of land valuation by abandoning its outdated national average value, and in its place substituting the regional farm values index as prepared by the U.S. Department of Agriculture. The NOPR also requested comment on several other methods of computing land use charges such as individual appraisals, or fees based on the licensed project's gross income or on its power generation. Finally, the Commission requested comment on whether it should continue to assess lands used for transmission line rights-of-way at one half the rate of other Federal lands. In the supplemental request for comments the Commission proposed to base the land use charges on the U.S. Forest Service's recently published index of values of linear rights-of-way.

For the reasons discussed below, the Commission is adopting the Forest Service's linear rights-of-way index as the most accurate representation of the fair market value of transmission line rights-of-way, and will continue to charge twice that value for other lands. The amended regulations also change the minimum lands charge for projects with installed capacity of 500 kW or less from $10 to $25 a year.

2. The Existing Methodology

Several commenters recommend retaining the existing methodology, claiming that it is a reasonable method of calculating land values (EEI, Idaho, Seattle). These commenters claim that the old value was intentionally set low to take into account the various benefits licensed projects provide the public (*e.g.*, recreational facilities), and because the land used for hydro projects is usually of little other value (Seattle). Commenters (EEI, Idaho) also note that in formulating the land use charges regulations now in effect the Commission stated that a national average value provided administrative economies that outweighed "speculative improvement in accuracy" that regional land values would provide.[19] The commenters state that no reasons have been offered for a departure from the national valuation method.

The Commission concludes that ample evidence exists that a departure from the existing method of valuation is warranted. The Inspector General's report of September 3, 1985, claimed that the present method results in an undercollection of over $15 million a year because it uses outdated land values. Also, the wide variation of land values across the country makes the use of the zone index preferable to a national average. Furthermore, when the Commission decided against the use of a regional index when the present rules were enacted in 1976, it considered the administrative burden of having to determine the values of Forest Service lands on its own.[20] An index now exists which relieves the Commission of this administrative duty. The Commission rejects the commenters' claim that land charges should intentionally be set low. The Federal Power Act states that "the licensee shall pay to the United States reasonable annual charges in an amount to be fixed by the Commission for the purpose of * * * recompensing it for the use, occupancy, and enjoyment of its lands * * *."[21] The purpose of this rule is to establish a fair market rate for the use of government land, as this is the must reasonable method of recompensing the government for the use of its lands. The public benefits provided by licensed projects are considered in the licensing decision and these benefits are the *quid pro quo* for the ability to operate the project in a manner consistent with needs of society.[22] Therefore, the existing method is no longer a reasonable method of assessing land use charges and is changed by this order.

3. Alternative Methodologies

a. *The Forest Service-Bureau of Land Management Index.* In the NOPR, the Commission requested comments on a methodology of land value assessment being prepared by the United States Forest Service (USFS) and the Bureau of the Land Management of the United States Department of the Interior (BLM). Most commenters note that, as the USFS methodology was still incomplete, it would be unreasonable to comment on so speculative a methodology. On December 5, 1986, the Forest Service issued a notice of adoption of the rental fee methodology,[23] and the Commission's supplemental notice requested comments on that methodology.

[18] Assessment of Charges Under the Hydroelectric Program, DOE/IG Report No. 0219 (Sept. 3, 1986); *See also* More Effort Needed to Recover Costs and Increase Hydropower Charges, U.S. General Accounting Office Report No. RCED-87-12 (Nov. 1986).

[20] *Id.* at 3864 n. 10.

[21] 16 U.S.C. 803(e) (1982).

[22] Order No. 560, 56 F.P.C. 3860 (1976).

[23] Department of Agriculture, Forest Service, Linear Rights of Way Fees, 51 FR 44014 (Dec. 5, 1986).

In brief, the USFS methodology is based upon a survey of market values for the various types of land that it has allowed to be occupied by linear rights-of-way. The schedule is divided into regional zones and provides per-acre rental fees by state and county. These fees are arrived at by multiplying the raw value of the land in each zone by the rate of return discussed below. The rates were adjusted downward to reflect the value difference between rights-of-way authorization granted by private landowners and those issued by the government. The result is an annual fee per-acre per-year for lands used for electric transmission lines that ranges from $2.24 for land in Nevada, to $44.87 a year for land in some counties in Florida.[24]

Most commenters (e.g. EEI, Minn., PSCC) find that the use of the USFS index would be more representative of the fair market value of the type of land most often used for hydroelectric projects than any of the other proposed methodologies. They find this methodology to be the simplest to administer, and one that produces a reasonable land charge. Some commenters (PGE, Birch, PE) seek assurance that they will not be assessed charges twice for use of the same land or for the same service. It is not the Commission's intent to assess charges twice for any costs or charges, and will ensure that such double billing does not occur.

Other commenters (WUG, Idaho) state that, although easy to use, the index needs to be adjusted downward to account for the relative encumbrances that licensees have for the use of the Federal land. Others (PGE, Idaho) claim an adjustment is needed to avoid what some licensees claim will be a drastic increase in fees in contravention of the statement in the Act that, in fixing such charges, the Commission must seek to avoid increasing the price to the consumers of power.[25]

The difference in level of encumbrance between Federal and private land was taken into account by the Forest Service, and results in the 70 percent of value differential adjustment for public land. The Commission also finds no merit to the claim that charging fair market value for Federal lands is prohibited by the Act.[26] All increases in charges will result in some impact on consumers.[27] The statutory provision bars the Commission from assessing unreasonable charges that would be passed along to consumers. Reasonable annual charges are those that are proportionate to the value of the benefit conferred.[28] Therefore, a fair market value approach is consistent with the dictates of the Act. Furthermore, as land values have not been adjusted in over ten years, an adjustment upwards is warranted and overdue.

The Forest Service comments that its methodology was intended for transmission line rights-of-way, and its market value figures reflect strips of lands used for limited purposes. The Service states that reservoirs, streambeds, and other typical hydropower sites should have a higher value. Other commenters, however, argue that hydropower project land is at times less valuable and that the use of the USFS index will result in charges that are too high. The Commission realizes that the USFS methodology is not precisely fitted to hydroelectric projects, but the zone values established by the Forest Service for linear rights-of-way are the best approximation available of the value of lands used for transmission line rights-of-way. Moreover, the zone rate method allows for differentiation by areas of the county and is thus fairer than a national average. For these reasons, the Commission will use the USFS index as its method of assessing charges for Federal land use for transmission line rights-of-way.

The NOPR proposed to eliminate the fifty percent discount for transmission line rights-of-way. Historically, the Commission has determined that fees for right-of-way usage of Federal lands would be less than those for other project uses, because land so used remained available for multiple uses. Thus, the Commission ruled that annual charges for the use of government lands for transmission line rights-of-way will be one-half the charge for the use of other government lands.[29] However, the NOPR noted that transmission lines and appurtenant structures may have a number of detrimental effects, such as damage to the aesthetic quality of land to the extent that market values would be lowered. Since these detriments may preclude a full range of multiple uses and may decrease the value of the adjacent land, the Commission proposed to eliminate the discount since the fair market value of all adjacent land was lowered for the purposes of calculating annual charges.

Commenters unanimously opposed the elimination of the practice of charging for lands used for transmission line rights-of-way one half of the charge for other project lands. The commenters (PE, EEI, NCWCD, Idaho) note that the detriments cited above were discussed in the Commission's revision of these regulations in 1970,[30] and that no evidence has been presented to justify a departure from the present rule. The commenters (Seattle, EEI) also claim that the limited use of rights-of-way allows for public access, resource sharing, and aids firefighting in remote areas. The commenters (e.g. Idaho) add that any detrimental effect is limited and offset by the benefits of limited use. Finally, the commenters (Idaho, EEI) note that, historically, appraisers have determined that the market value of transmission line rights-of-way is roughly half of the market value of other land.

The Commission agrees with the above statements and will continue to assess transmission line charges at one-half of the value of other Federal lands. This will be accomplished by using the USFS index as its methodology of assessing charges for transmission line rights-of-ways, and charging twice that amount for other lands. The USFS index was designed specifically for transmission line rights-of-way, and is the best available method for assessing those charges. As the commenters acknowledge, other project lands are worth twice as much as transmission line rights-of-way. For that reason, transmission line rights-of-way will be assessed at the Forest Service index rate and other project land will be assessed at twice that rate.

b. *Agricultural land values.* In the NOPR, the Commission outlined a new method of assessing land use charges which retained the existing formula of land value times a rate of return, but proposed to substitute a new land value and a new rate of return. The NOPR

---

[24] Currently there are no licensed projects in the higher-rates zones. The highest rate for a currently-licensed project is $20.92. For projects located in zones for which the Forest Service has provided no fees (*e.g.*, Alaska) the Commission will continue to bill in accordance with the old regulations and will change to the new method after the Forest Service has set the fee in that zone. Licensees that have projects in more than one zone must provide a breakdown of the number of acres in each zone. Failure to do this will result in being billed according to the project's highest zone value.

[25] 16 U.S.C. 803(a) (1982).

[26] Staff has calculated the per acre land charge under the old Commission methodology ($150 × .06878) and found that licensees would pay $13.31 per acre in 1987 without the proposed rule change. The per-acre charge under the USFS–BLM methodology range from $2.24 to $20.92. Therefore, not only will any increase be within a zone of reasonableness, but in some cases the charges will decrease.

[27] Order 280, 56 F.P.C. 2080, 2082 (1976).

[28] *See* City of Vanceburg v. FERC, 571 F.2d 630 (D.C. Cir. 1977), *cert. denied*, 439 U.S. 818 (1978).

[29] Order 280, 56 F.P.C. 2080, 2080 (1976).

[30] *Id.*

proposed to substitute state-by-state average value per-acre of farm land and buildings as set out in the U.S. Department of Agriculture's annual publication "Agricultural Land Values and Markets Outlook and Situation Report." The proposal would also remove the limitation on adjustments of the rate of return of one quarter percent a year.

Commenters almost unanimously object to the use of the agricultural land value index, arguing that the use of farm land values would result in a drastic increase in charges related to the benefits of the projects. Farm land values vary greatly from state to state, the commenters argue, and are usually much higher than the values of the type of land involved in hydroelectric development. Many commenters suggest the Forest Service index be used as a index that is more representative of typical project land. The farm land index, they argue, will have to be adjusted to account for farm buildings, for the cleared, arable, level land it represents, and for the fact that it represents private and not Federal lands. The Commission agrees with these arguments. The agricultural index would require such major adjustments that it is not an efficient measure of land value for hydropower projects. Therefore, the agricultural land values index will not be used.

c. *The percentage of sales or rate per kW hour fee methodologies.* The NOPR also suggested, as an alternative basis for Federal land use charges, the use of a fee based upon a percentage of the project's gross sales or on a flat rate per kilowatt hour. Commenters unanimously find that these methods would be unsatisfactory. The commenters (EEI, Ga.P) note that the determination of gross income of a project would be difficult, since, for many projects, power is intermingled and sold through a multifaceted rate structure to various customers, making identification of an individual project's gross income speculative unless burdensome paperwork procedures are adopted. Furthermore, most argue, land use charges must be related to the value of the land, not the output of the projects, or projects with similar lands could pay greatly different rates. Such a fee system would be a royalty or tax rather than rent for the use of the land, and several commenters question whether such a system would be legal under section 10(e) of the Federal Power Act.

Only the Forest Service finds some value in the use of this type of a fee system, and then only for run-of-river projects (those using no reservoirs). The Forest Service suggested a three-tiered system where the type of land use charges would be based upon whether the land is used for run-of-river projects, non-run-of-river projects, or transmission lines. The Forest Service claims that the Commission must charge for the real value of the land, and that this value is the land's ability to produce power. Therefore, the Forest Service claims, a fee schedule as described above is appropriate for run-of-river projects.

The Commission agrees with most of the commenters that a percentage of gross sales fee or a flat rate per kilowatt hour fee is not a reasonable method of assessing land use charges. The tiered system suggested by the Forest Service is also unreasonable, as it would charge a royalty for run-of-river projects as though the Federal land being used was producing the power. This overlooks the fact that many projects use a combination of Federal and private lands, and that the power output is a result of many factors (water rights, head, project structure) and not just the acreage of Federal land involved. For these reasons the Commission decides not to adopt the above fee methodologies as a means of assessing land charges.

d. *Individual appraisals.* The NOPR also requested comments on the advisability of permitting licensees to submit independent appraisals to contest the accuracy of an annual land use charge, and whether an appraisal system could be the sole basis for determining fair market value of Federal land use. Commenters were also asked to identify the standards and criteria that should be used to make appraisals. Although no commenter submitted useful standards and criteria, other than the Department of Interior's recommendation that certified private appraisers be used, and that private appraisals be verified by a separate Federal appraisal, most express the opinion that appraisals are of some value. Several commenters (Grant, Eugene, Birch) claim that independent appraisals were the best method of land valuation, but most believe that appraisals should only be used to support an appeal to the use of the index of land values on the ground that it produces an unreasonable annual charge. The Forest Service advocates the use of an appraisal system (as did the Department of the Interior) claiming that appraisal techniques have improved since this method was abandoned as unworkable in the 1940s. Further, it argues, the costs were too burdensome when land values were $50 per acre, but when some Federal lands are worth $15,000 per acre the cost of appraisals would be insignificant. However, the Forest Service concedes that ongoing appraisals are often the subject of appeals and, in its experience, can become complex, controversial, and costly. Another commenter (Ala.P) supports this statement noting that the administrative burden of independent appraisals would be so overwhelming as to make any such approach administratively infeasible.

The Commission abandoned the appraisal method in 1942 because the cost of individual project appraisals was often excessive compared to the value of the Federal land and because, unless constantly updated, appraisals did not keep up with changes in land values. This method was reevaluated in 1976 and again rejected on the ground that it would lead to costly and time consuming litigation over values computed in individual cases. This decision is supported by the views of some commenters and by the experience of the Forest Service with its appraisal programs. The Commission still believes that independent appraisals would be too administratively burdensome and costly (costs which licensees would be responsible to reimburse under section 10(e) of the Act).

f. *Advanced billing for Federal land use charges.* In the supplemental notice the Commission requested comments on the Inspector General's recommendation that the Commission bill in advance for Federal land use charges. The Inspector General claimed that the Federal Land Policy and Management Act of 1976 (FLPMA),[31] requires the Commission to bill for land charges in advance, and not doing so is costing the Commission $270,000 a year.[32]

Most commenters objected to advance billing for land charges for various reasons. One (Seattle) claimed the change was unreasonable, as no other of the commenter's contracts, including its income tax, require advance payment. The commenter overlooks that most rent, and all charges under FLPMA, are paid in advance. Other commenters (Idaho, Ala.P) noted that the savings to the government would result in increased costs to the rate payers if the local public utility commission would allow it, and costs to the shareholder if it would not.[33] The Commission realizes

[31] 43 U.S.C. 1761(b)(1) (1982).

[32] *See* Report No. DOE/IG-0224 (Feb. 3, 1986).

[33] One commenter (Idaho) claims that its yearly charge, paid in advance in the transition year would be lost forever. This is not the case, as licenses are issued for set periods, and at the expiration of the

Continued

that the savings to the Commission will be borne by the licensees, but the savings outlined by the Inspector General and conformity with other agency practice under FLPMA dictate a change to advance billing. Another commenter (Seattle) claimed that the USFS index will not be adjusted for inflation for each year until after the Commission's land use charges have gone out, and that the subsequent year's charges would need adjusting to prevent billing based on stale data. As noted above, the Forest Service index is the best approximation of reasonable land charges. Although not exact, the land charges index that is available at the time of billing, even if several months old, is the best available basis for assessing land use charges. Moreover, since the Forest Service index will be adopted and published each year by the Commission, the delay will provide the Commission with time to review and issue its own schedule of fees based on the most recent USFS index. For these reasons the Commission finds that using the last available USFS index will not cause a discrepancy in the assessment substantial enough to render the charges unreasonable.[34]

Other commenters (PGE, Idaho) argued that FLPMA does not specifically require advance billing for land charges for projects governed by licenses under the Federal Power Act. On its face FLPMA is directed at the Secretary of the Interior rather than the Commission, and requires that the Secretary bill for land use charges in advance.[35] Whether or not the Commission is required under FLPMA to bill in advance for land charges, it does so because of the savings involved, and also to be consistent with the intent of Congress in its passage of FLPMA which requires the billing of charges for the use of Federal land in advance.

Most commenters objected to the burden of being billed for two years in the transition year, and requested that the rule be phased in, as were the Forest Service charges. The Commission agrees that the burden of the first year will be onerous unless phased in. Therefore advanced billing will begin in fiscal year 1988 with bills for land use charges issued early in the fiscal year, and with payments due in January 1988. A nine month land charge for ¾ of 1987 will be calculated at that time. One third of this 1987 charge will be due with the land charge for each year from 1988 to 1990. This phase-in will prevent the advance charges from being due entirely in one year.

*C. Other Comments*

1. Administrative Costs of Other Federal Agencies

Several commenters (e.g. EEI, PE, PGE) noted that in 1986 the Commission began including in its annual charge bills the costs that other Federal agencies incur in administering Part 1 of the Act. Some commenters (WUG, EEI, PGE) complain that the collections for other agency costs began without notice, and continues without sufficient guidelines, standards, or regulations. The commenters request that the Commission institute a rulemaking in order to allow affected parties an opportunity to comment, and to allow the Commission to formalize the new procedures. The commenters ask that, in the alternative, the Commission enter into Memoranda of Understanding with those agencies to ensure the veracity of their claims for reimbursal. The Federal agencies that commented on this rule (USFS, Interior) supported the Commission's practice and asked that it be recognized in the final rule.

The Commission began this practice on the advice of the Inspector General, after it was noted that section 10(e) of the Federal Power Act required reimbursal of costs to the United States for administration on Part 1 of the Act, and not just costs to the Commission.[36] The practice, however, is not the subject of this rulemaking, and no provisions will be made here to change it until the Commission decides if the present implementation of the program requires more formal guidelines.

2. Municipal Exemptions

One commenter (PE) cited a Commission and Congressional policy against collecting fees from municipalities for services to the general public,[37] and claimed that by not exempting municipalities, the annual charges regulations were inconsistent with the rest of the Commission fee policies.

In the orders cited by this commenter, the Commission exempted states and municipalities from the payment of fees because of the administrative burdens of trying to sort out which services rendered to states and municipalities could be subject to fees. The Commission does agree that when a state or municipality uses a Commission service to serve the general public it may be exempted from all fees.[38] In addition, the Commission's regulations for annual charges already provide procedures for determining when a state or municipality should be exempt from annual charges. Furthermore, the statutes and regulations cited by the commenter, under which municipalities were exempted from the payment of fees, are not related to the Federal Power Act, and therefore are not directly applicable to the case at hand. Therefore, in cases other than those specified in 18 CFR 11.06, states and municipalities merit no further exclusion.

3. Rising Rates

Several commenters noted that annual charges are rising rapidly because of the large number of applications for small hydropower projects submitted in recent years. Many of these applications are for preliminary permits and exemptions, yet the Act places the burden of administrative costs solely on licensees. Existing licensees had little to do with the large increase in applications, argue the commenters, yet are now faced with subsidizing the boom in small hydropower development. The commenters note that the Commission has alluded to imposing filing fees on applicants for several years, and asks that the Commission act on those proposals.

The Commission is aware of the problems cited by the commenters, and is considering action to remedy the situation. However, the issue of filing fees lies outside the scope of this rulemaking.

*D. Other Changes*

The final rule also makes two minor technical corrections to the annual charges regulations. The NOPR stated that § 11.01(b) would be revised to refer to "state or municipal licensees of projects of more than 1.5 megawatts of installed capacity", in order to make the section consistent with changes made by the Commission previously. Specifically, in 1958 the Commission issued regulations whereby annual charges were assessed to licensees of projects of more than 100 horsepower of installed capacity.[39]

---

license the charges for the last year would have already been paid.

[34] Similarly, municipalities seeking exemptions for advanced land charges under 18 CFR 11.06 will base their applications on the last available generation data.

[39] 18 CFR 11.01(b) (1986).

In 1963, the Commission, pursuant to section 10(i) of the Act,[40] amended § 11.01(a) (then 11.20(a)), but made no similar change with respect to state or municipal licensees.[41] This section should be changed from 100 to 2000 horsepower in order to be consistent with the rest of the section. The regulations are also amended by deleting § 11.01(b)(6),[42] which is a provision of the regulations that was intended to implement a transition to new rules promulgated in 1958. This provision expired 60 days after it was issued, and is therefore obsolete. While § 11.01(b)(6)(ii) has not expired, it merely codifies a right already set forth in the Act which does not need repetition. No comments were received on these proposed changes, and they are adopted by this final rule.

## VI. Regulatory Flexibility Act Certification

The Regulatory Flexibility Act of 1980 (RFA) requires a description and analysis of final rules that will have a "significant economic impact on a substantial number of small entities."[43] An agency is not required to make an RFA analysis, however, if it certifies that a rule will not have such an impact.

This final rule will change Commission procedure in that annual charges will be based on data for the government fiscal year, rather than the calendar year, in order to synchronize the data used, and to eliminate the interest lost as a result of the three-month lag between the time the reimbursable. The rule also requires that the data used in assessing annual charges be submitted on a fiscal-year basis. The final rule also changes the methodology for computing the annual charges for the use of Federal property by licensees. These annual charges will be assessed based upon the fee index for linear rights-of-way prepared by the United States Forest Service. Finally, the rule increases the minimum annual charge for Federal land use by licensed projects of 500 kw or less from $10 to $25.

In the NOPR, the Commission certified, pursuant to section 605(b) of the RFA, that the revisions to the billing procedures for annual charges and to the methodology of computing land use charges would not, if adopted, have significant economic impact on a substantial number of small entities.

The Commission received no comments or rebuttals to the Commission's certification that a regulatory flexibility analysis was not required. The Commission has reviewed the final rule, and continues to find, for the reason expressed in the RFA certification in the NOPR, that the rule will not have an impact that will require the preparation of a RFA analysis. In particular, the Commission notes that few of the projects that would be affected by the increase in land use charges are small entities. Most small entities are usually licensees of small projects, and only 24 small projects (1.5 megawatts or less) are assessed Federal land use charges. These charges, as amended by this final rule, are not expected to significantly increase the total costs of these projects. The change to fiscal-year billing for all annual charges is not an increase, but a change in timing, and is not expected to have a significant impact. Finally, any impact will be minimized by being phased in. For these reasons, the Commission certifies under section 605(b) of the RFA that this rule will not have a significant economic effect on a substantial number of small entities.

## VII. Paperwork Reduction Act

The Paperwork Reduction Act (PRA)[44] and the Office of Management and Budget's (OMB) regulations[45] require that OMB approve certain information collection requirements imposed by agency rule. The information collection provisions in this final rule are being submitted to the Office of Management and Budget (OMB) for its approval. Interested persons can obtain information on the information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 (Attention: Ellen Brown (202) 357-8272). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

## VIII. Effective Date

The amendments of this final rule will be effective July 28, 1987. If OMB's approval and control number have not been received by this effective date, the Commission will issue a notice temporarily suspending the effective date.

## List of Subjects in 18 CFR Part 11

Electric power, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends Part 11 of Chapter I, Title 18, Code of Federal Regulations, as set forth below.

By the Commission.

Kenneth F. Plumb,

*Secretary.*

## PART 11—[AMENDED]

1. The authority citation for Part 11 continues to read as follows:

Authority: Federal Power Act, 16 U.S.C. 791a-825r (1982); Department of Energy Organization Act, 42 U.S.C. 7101-7352 (1982); Exec. Order No. 12,009, 3 CFR 142 (1978), unless otherwise noted.

2. In § 11.1, paragraphs (a)(2), (a)(4), (b)(2), (b)(3), and (b)(4) are revised to read as follows:

**§ 11.1 Costs of administration.**

* * * * *

(a) For a licensee, other than State or municipal, of a project of more than 2,000 horsepower of installed capacity.

* * * * *

(2) For each fiscal year the costs of administration determined under paragraph (a)(1) of this section will be assessed against such licensee in the proportion that the annual charge factor for each such project bears to the total of the annual charge factors under all such outstanding licenses.

* * * * *

(4) To enable the Commission to determine such charges annually, each licensee must file with the Commission, on or before November 1 of each year, a statement under oath showing the gross amount of power generated (or produced by nonelectrical equipment) and the amount of power used for pumped storage pumping by the project during the preceding fiscal year, expressed in kilowatt hours. If any licensee does not report the gross energy output of its project within the time specified above, the Commission's staff will estimate the energy output and this estimate may be used in lieu of the filings required by this section made by such licensee after November 1.

* * * * *

(b) For a State or municipal licensee of a project of more than 2,000 horsepower of installed capacity.

* * * * *

(2) For each fiscal year such total actual cost of administration as determined under paragraph (b)(1) of this section will be assessed against each such licensee in the proportion that the authorized horsepower installed capacity of each such project bears to the total such capacity under all such outstanding licenses.

(3) After such assessment each fiscal year, an exemption will be granted to a licensee to the extent, if any, to which they may be entitled under section 10(e) of the Act provided the data is submitted as requested in paragraphs (b)(4) and (5) of this section.

(4) To enable the Commission to compute on the bill for annual charges the exemption to which such licensee is entitled because of the use of power by the licensee for State or municipal purposes, each such licensee must file with the Commission, on or before November 1 of each year, a statement under oath showing the following information with respect to the power generated by the project and the disposition thereof during the preceding fiscal year, expressed in kilowatt-hours:

* * * * *

3. Section 11.1(b)(6) is removed.

4. In § 11.2 paragraphs (b), (c), and (d) are revised to read as follows:

**§ 11.2 Use of Government Lands.**

* * * * *

(b) Pending further order of the Commission and subject to adjustments as conditions may warrant, annual charges for the use of government lands will be payable in advance, and will be set on the basis of the schedule of rental fees for linear rights-of-way as set out in Schedule A of this part. Annual charges for transmission line rights-of-way will be equal to the per-acre charges established by the above schedule. Annual charges for other project lands will be equal to twice the charges established by the schedule. The Commission, by its designee the Executive Director, will update its fees schedule to reflect changes in land values established by the Forest Service. The Executive Director will publish the updated fee schedule in the Federal Register.

(c)(1) The annual land use charge payable for the nine month transition year of the implementation of this rule (1987) will be payable in three equal installments, with an installment included in the land use charges bills for 1988, 1989, and 1990.

(2) The charge for one year will equal an amount as computed under the procedures outlined in this section, or twice the previous full normal year's bill (not including the installments described in paragraph (c)(1) of this section), whichever is less.

(d) The minimum annual charge for use of Government lands under any license will be $25.

* * * * *

5. Section 11.3(c) is revised to read as follows:

**§ 11.3 Use of Government dams, excluding pumped storage projects.**

* * * * *

(c) *Information reporting.* (1) Except as provided in paragraph (c)(2) of this section, each licensee must file with the Commission, on or before November 1 of each year, a sworn statement showing the gross amount of energy generated during the preceding fiscal year and the amount of energy provided free of charge to the Government. The determination of the annual charge will be based on the gross energy production less the energy provided free of charge to the Government.

(2) A licensee who has filed these data under another section of Part 11 or who has submitted identical data with FERC or the Energy Information Administration for the same fiscal year is not required to file the information described in paragraph (c)(1) of this section. Referenced filings should be identified by company name, date filed, docket or project number, and form, number.

* * * * *

6. Section 11.4(b) is revised to read as follows:

**§ 11.4 Use of Government dams for pumped storage projects, and use of tribal lands.**

* * * * *

(b) *Information reporting.* (1) Except as provided in paragraph (b)(2) of this section a Licensee whose project includes pumped storage facilities must file with the Commission, on or before November 1 of each year, a sworn statement showing the gross amount of energy generated during the preceding fiscal year, and the amount of energy provided free of charge to the Government, and the amount of energy used for pumped storage pumping.

(2) A licensee who has filed these data under another section of Part 11 or who has submitted identical data with FERC or the Energy Information Administration for the same fiscal year is not required to file the information required in paragraph (b)(1) of this section. Referenced filings should be identified by company name, date filed, docket or project number, and form number.

7. Part 11 is amended by adding Schedule A at the end of this part to read as follows:

* * * * *

[Docket No. RM87-7-000]

## Information To Be Made Available by Hydroelectric Licensees Under Section 4(a) of the Electric Consumers Protection Act of 1986

Issued: May 7, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Interim Rule and Suspension of Effective Date.

SUMMARY: On March 30, 1987, the Federal Energy Regulatory Commission (Commission) issued an interim rule in Docket No. RM87-7-000, 52 FR 11035 (April 7, 1987), amending its regulations governing information to be made available by hydroelectric licensees under section 4(a) of the Electric Consumers Protection Act of 1986. The interim rule promulgated certain information collection provisions that were submitted to the Office of Management and Budget for its approval pursuant to the Paperwork Reduction Act, 44 U.S.C. 33 3501-3520 (1982). This interim rule (1) states the OMB control number for §§ 16.1, 16.14, 16.15, and 16.16 of Chapter 18 promulgated in this docket, (2) amends 18 CFR 16.16(c)(1) to remove the word "compile" and substitute the words "make available" and (3) stays the effective date of 18 CFR 16.16(d)(1) promulgated in the interim rule issued March 30, 1987.

EFFECTIVE DATE: May 7, 1987.

FOR FURTHER INFORMATION CONTACT: Robert C. Fallon, Rulemaking and Legislative Analysis Division, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, (202) 357-8540.

SUPPLEMENTARY INFORMATION:

### Interim Rule and Stay

Issued: May 7, 1987.

Before Commission: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

Information to be made Available by Hydroelectric Licensees Under Section 4(a) of Electric Consumers Protection Act of 1986; Docket No. RM87-7-000; Order No. 487-A.

### *I. Introduction*

The Federal Energy Regulatory Commission (Commission) is amending § 16.16(c)(1) of its regulations and suspending the effective date of § 16.16(d)(1) of its regulations, implementing section 4(a) of Electric Consumers Protection Act of 1986, Pub. L. No. 99-495. This amendment and stay are in response to a review by the Office of Management and Budget of the information collection requirements required by 18 CFR 16.16 (c)(1) and (d)(1).

### *II. Background*

The Commission promulgated §§ 16.16 (c)(1) and (d)(1) of its regulations by an interim rule issued on March 30, 1987,[1] to be effective on May 7, 1987. The interim rule prescribed the information that an existing hydroelectric licensee must make available to the public upon notifying the Commission of the intention to file for a new license. It also established new filing requirements in §§ 16.1, 16.14, 16.15, and 16.16. Comments on the interim rule are due on May 22, 1987. The revisions in this interim rule do not affect the date on which the comments are due.

The Paperwork Reduction Act, 44 U.S.C. 3501-3520 (1982) and the Office of Management and Budget's (OMB) Regulations, 5 CFR Part 1320 (1986) require that OMB approve certain information collection requirements imposed by agency rule. On April 29, 1987, OMB approved all the information collection requirements except §§ 16.16 (c)(1) and (d)(1), and issued Control Numbers 19020050 and 19020115 for the sections approved.

### *III. Discussion*

#### A. Section 16.16(c)(1)

Section 16.16(c)(1) provides that a licensee must *compile* the information required to be available by the interim rule in a form that is readily accessible, reviewable and reproducible.

In disapproving this provision, OMB read the word "compile" to mean a licensee would be required to (1) review all of its files, (2) determine whether the information exists and is covered by the regulations, and (3) then catalog it in advance of any request by the public.

The Commission is clarifying that it did not intend that a licensee catalog the information to be made available in advance of any request by the public. The Commission only intended to require the licensee to organize the information so that it could be made available within a reasonable period of time after a request by a member of the public. Therefore, the Commission is amending § 16.16(c)(1) by replacing the word "compile" with the words "make available."

#### B. Section 16.16(d)(1)

Section 16.16(d)(1) requires an existing licensee to file with the Commission a statement on the information concerning the licensed project that is unavailable for public inspection and copying. This statement must describe the items that are unavailable and, to the extent known, why the items are unavailable.

In disapproving this provision, OMB said that the statutory intent of providing public access is satisfied by requiring licensees to provide information when requested. At that time, the licensee can determine the existence and availability of the document, within a reasonable period of time and provide it to the public. OMB said that if a member of the public believes the information is available but is being withheld, it can petition the Commission for assistance, as provided under § 16.16(d)(2) of the Commission's regulations.

The Commission said, in the interim rule, that it would suspend the effective date of the information collection requirements in the rule if the OMB did not approve those requirements. Therefore, the Commission suspends the effective date of § 16.16(d)(1), subject to further consideration.

### *Effective Date*

The effective date of § 16.16(d)(1) is suspended, subject to further consideration. This interim rule will become effective immediately, without prior notice and comment. Notice and comment procedures are not required under the Administrative Procedure Act when an agency for good cause finds that notice and comment is impracticable, unnecessary, or contrary to the public interest.[2] The Commission finds that public notice and comment before the issuance of this interim rule is unnecessary since it interprets and clarifies the existing interim rule.

### List of Subjects

*18 CFR Part 16*

Electric power.

*18 CFR Part 389*

Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission amends Parts 16 and 389,

[1] "Information to be Made Available by Hydroelectric Licensees Under section 4(a) of Electric Consumers Protection Act of 1986," 52 FR 11035 (April 7, 1987), Docket No. RM87-7-000.

[2] 5 U.S.C. 553(b)(B) (1982).

Title 16, Code of Federal Regulations, as set forth below.

By the Commission.

Kenneth F. Plumb,

*Secretary.*

**PART 16—[AMENDED]**

1. The authority citation for Part 16 continues to read as follows:

**Authority:** Federal Power Act, 16 U.S.C. 791a–825r, as amended by the Electric Consumers Protection Act of 1986, Pub. L. No. 99–495; Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); Executive Order No. 12,009, 3 CFR 142 (1978).

2. Part 16 is amended by revising § 16.16(c)(1) to read as follows:

**§ 16.16 Information to be made available to the public under ECPA.**

* * * * *

(c) *Form, place of availability, hours of availability, and cost of reproduction.* (1) An existing licensee must make available the information specified in paragraph (b) of this section in a form that is readily accessible, reviewable, and reproducible.

* * * * *

3. Section 16.16(d)(1) is suspended.

**PART 389—[AMENDED]**

4. The authority citation for Part 389 continues to read as follows:

**Authority:** Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520 (1982).

**§ 389.101 [Amended]**

5. The table of OMB Control Numbers in § 389.101(b) is amended by inserting "§ 16.1," "§ 16.14," "§ 16.15" and "§ 16.16" in numerical order in the Section column, and "0058, 0115" in the corresponding position in the OMB Control Number column.

**DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**

**Office of the Assistant Secretary for Housing—Federal Housing Commissioner**

**24 CFR Parts 232 and 235**

**[Docket No. R–87–1336; FR–2361]**

**Mortgage Insurance; Changes in Interest Rates**

**AGENCY:** Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

**ACTION:** Final rule.

**SUMMARY:** This change in the regulations increases the maximum allowable interest rate on certain section 232 (Mortgage Insurance for Nursing Homes) loans and on all section 235 (Homeownership for Lower Income Families) insured loans. This final rule is intended to bring the maximum permissible financing charges for these programs into line with competitive market rates.

**EFFECTIVE DATE:** May 11, 1987.

**FOR FURTHER INFORMATION CONTACT:** John N. Dickie, Chief Mortgage and Capital Market Analysis Branch, Office of Financial Management, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410. Telephone (202) 755–7270. (This is not a toll-free number.)

**SUPPLEMENTARY INFORMATION:** The following amendments to 24 CFR Chapter II have been made to increase the maximum interest rate which may be charged on loans insured by this Department under section 232 (fire safety equipment) and section 235 of the National Housing Act. The maximum interest rate on the HUD/FHA section 232 (fire safety equipment) and section 235 insurance programs has been raised from 9.50 percent to 10.00 percent.

The Secretary has determined that this change is immediately necessary to meet the needs of the market and to prevent speculation in anticipation of a change.

As a matter of policy, the Department submits most of its rulemaking to public comment, either before or after effectiveness of the action. In this instance, however, the Secretary has determined that advance notice and public comment procedures are unnecessary and that good cause exists for making this final rule effective immediately.

HUD regulations published at 47 FR 56266 (1982), amending 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the amendments made by this rule fall within the categorical exclusions set forth in paragraph (*l*) of § 50.20, the preparation of an Environmental Impact Statement of Finding of No Significant Impact is not required for this rule.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local governmental agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule provides for a small increase in the mortgage interest rate in programs of limited applicability, and thus of minimal effect on small entities.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on April 27, 1987 (52 FR 14362) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

(The Catalog of Federal Domestic Assistance program numbers are 14.108, 14.117, and 14.120)

**List of Subjects**

*24 CFR Part 235*

Condominiums, Cooperatives, Low and moderate income housing, Mortgage insurance, Homeownership, Grant programs: housing and community development.

*24 CFR Part 232*

Fire prevention, Health facilities, Loan programs: Health, Loan programs: Housing and community development, Mortgage insurance, Nursing homes, Intermediate care facilities.

Accordingly, the Department amends 24 CFR Parts 232 and 235 as follows:

**PART 232—MORTGAGE INSURANCE FOR NURSING HOMES, INTERMEDIATE CARE FACILITIES, AND BOARD AND CARE HOMES**

1. The authority citation for 24 CFR Part 232 continues to read as follows:

**Authority:** Sections 211, 232, National Housing Act (12 U.S.C. 1715b, 1715w); Section 7(d), Department of Housing and Urban Development (42 U.S.C. 3535(d)).

2. In § 232.560, paragraph (a) is revised to read as follows:

**§ 232.560 Maximum interest rate.**

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 10 percent per annum with respect to

mortgages insured on or after May 11, 1987.

* * * * *

## PART 235—MORTGAGE INSURANCE AND ASSISTANCE PAYMENTS FOR HOME OWNERSHIP AND PROJECT REHABILITATION

3. The authority citation for 24 CFR Part 235 continues to read as follows:

**Authority:** Sections 211, 235, National Housing Act (12 U.S.C. 1715b. 1715z); Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

4. In § 235.9, paragraph (a) is revised to read as follows:

**§ 235.9 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 10 percent per annum with respect to mortgages insured on or after May 11, 1987.

* * * * *

5. In § 235.540, paragraph (a) is revised to read as follows:

**§ 235.540 Maximum interest rate.**

(a) The mortgage shall bear interest at the rate agreed on by the mortgagee and the mortgagor, which rate shall not exceed 10 percent per annum with respect to mortgages insured after May 11, 1987.

* * * * *

Dated: May 8, 1987.

**Thomas T. Demery,**

*Assistant Secretary for Housing—Federal Housing Commissioner.*

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

### 33 CFR Part 117

**[CGD5-87-013]**

### Drawbridge Operation Regulations; Kent Island Narrows, MD

**AGENCY:** Coast Guard, DOT.

**ACTION:** Temporary final rule.

**SUMMARY:** In order to evaluate a suggested change to the drawbridge opening requirements for the U.S. Route 50/301 bridge across Kent Island Narrows, Maryland, contained in CGD5-87-012 (52 FR 17413) dated May 8, 1987.

Temporary deviations from the regulations in 33 CFR 117.561 will be in effect on May 23, 24, and 25, 1987, May 30, 1987, June 13 and 14, 1987, and June 20, 1987. The results of the temporary deviations on the flow of vehicular traffic across the bridge and the impact on marine traffic through the bridge on those weekend days will be evaluated to determine whether the current regulations should be amended.

**EFFECTIVE DATE:** These regulations become effective on May 23, 24, and 25, 1987, May 30, 1987, June 13 and 14, 1987, and June 20, 1987.

**FOR FURTHER INFORMATION CONTACT:** Ann B. Deaton, Bridge Administrator, at Commander (oan), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704-5004, or telephone number (804) 398-6222.

*Drafting Information:* The drafters of these regulations are Ann B. Deaton, project officer, and CDR Robert J. Reining, project attorney.

*Discussion of Temporary Regulations:* The Maryland Congressional Delegation, the Governor of Maryland, and the Maryland Department of Transportation have petitioned the Coast Guard to amend the regulations for this drawbridge by eliminating the 9 a.m. and 12 noon openings on Saturdays and the 8 p.m. opening on Sundays during the summer months to help ease highway congestion on U.S. Route 50/301.

In order to evaluate this suggested change, temporary deviations from the regulations contained in 33 CFR 117.561 will be in effect on May 23, 24, and 25, 1987, May 30, 1987, June 13 and 14, 1987, and June 20, 1987. These deviations will test the effectiveness of the requested change by eliminating the 9 a.m. and 12 noon openings on May 23 and June 13, 1987, and the 8 p.m. opening on May 24 and May 25, Memorial Day, and June 14, 1987.

On May 30 and June 20, only the 9 a.m. openings will be eliminated, and the other provisions of the current schedule will remain in effect.

On May 31 and June 6, 7, 21, 27, and 28 the current schedule will be in effect.

The results of these tests will be evaluated, and the impacts on highway and marine traffic on these four weekends will be weighed to determine if the requested change will result in a substantial improvement in vehicular traffic flow without unreasonably restricting marine traffic. This information will also be compared to vehicle and marine traffic counts from 1986.

During these test periods, the Maryland Department of Transportation will compile data on vehicle counts, boat counts, time of drawbridge openings, duration of openings, length of vehicle backups, and the reasons for the backups along U.S. Route 50/301 within fifteen miles of the bridge to determine whether the backups are, in fact, as a direct result of drawbridge openings or can be attributed to other causes.

**List of Subjects in 33 CFR Part 117**

Bridges.

**Temporary Regulations**

In consideration of the foregoing, the Coast Guard is temporarily amending Part 117 of Title 33, Code of Federal Regulations, as follows:

## PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 is revised to read as follows:

**Authority:** 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g), 33 CFR 117.43.

2. Section 117.561 is temporarily amended by revising paragraphs (b)(3), (b)(4) and (c) to read as follows:

**§ 117.561 Kent Island Narrows.**

The draw of the U.S. Route 50/301 bridge, mile 1.0, at Kent Island Narrows, operates as follows:

(a) * * *

(b) From May 1 through October 31:

(1) * * *

(2) * * *

(3)(i) On Saturday, May 23, and Saturday, June 13, 1987, the draw shall open on signal at 6 a.m., and on the hour from 3 p.m. to 8 p.m., but need not be opened at any other time.

(ii) On Saturday, May 30, and Saturday, June 20, 1987, the draw shall open on signal at 6 a.m., 12 noon, and on the hour from 3 p.m. to 8 p.m., but need not be opened at any other time.

(4) On Sunday, May 24, Memorial Day, May 25, and Sunday, June 14, 1987, the draw shall open on signal on the hour from 6 a.m. to 1 p.m., but need not be opened at any other time.

(5) * * *

(6) * * *

(c) The draw shall open on signal for public vessels of the United States, State, or local government vessels used for public safety purposes, commercial vessels, and vessels in distress.

Dated: April 27, 1987.

**B.F. Hollingsworth,**

*Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.*

BILLING CODE 4910-14-M

33 CFR Part 165

[COTP San Diego Reg. 87-04]

## Security Zone Regulations; San Clemente Island, CA, Pacific Ocean

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a security zone in the vicinity of Wilson Cove, San Clemente Island, California, consisting generally of the water area within 1.5 nautical miles (1.73 statute miles, 2.8 kilometers) of the shoreline of San Clemente Island from Wilson Cove North End Light (LLNR 2565) to Spruce Pier, approximately 4.1 nautical miles (4.7 statute miles, 7.65 kilometers) southeast of Wilson Cove North End Light. This action is taken at the request of the United States Navy and is needed to safeguard U.S. naval vessels and property from sabotage or other subversive acts, accidents, criminal actions, or other causes of a similar nature. Entry into this zone is prohibited unless authorized by the Captain of the Port, San Diego.

EFFECTIVE DATE: June 15, 1987.

FOR FURTHER INFORMATION CONTACT: LCDR Steven P. Mojonnier, USCG, C/O U.S. Coast Guard Captain of the Port, 2710 N. Harbor Drive, San Diego, CA 92101-1064, telephone (619) 293-5860.

SUPPLEMENTARY INFORMATION: On 19 March 1987, the Coast Guard published a Notice of Proposed Rulemaking in the Federal Register for these regulations (52 FR 8622). Interested persons were requested to submit comments, and no comments were received.

*Drafting Information.* The drafters of this notice are LCDR Steven P. Mojonnier, project officer for the Captain of the Port, and LCDR Joseph R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

*Discussion of Comments:* No comments were received on the Notice of Proposed Rulemaking.

This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

*Economic Assessment and Certification:* These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; 26 February 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The area within the zone is a small area outside the normal shipping channels. The only vessels normally using these waters are U.S. Naval vessels. There will be minimal effect on routine navigation.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

### List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

### Final Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

### PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6, and 33 CFR 160.5.

2. In Part 165, a new § 165.1111 is added, to read as follows:

### § 165.1111 Security Zone: Wilson Cove, San Clemente Island, California.

(a) *Location.* The following area is a security zone: The water area adjacent to San Clemente Island, California within 1.5 nautical miles (1.73 statute miles, 2.8 kilometers) of the shoreline of San Clemente Island from Wilson Cove North End Light (LLNR 2565) to Spruce Pier, approximately 4.1 nautical miles (4.7 statute miles, 7.65 kilometers) southeast of Wilson Cove North End Light, described as follows:

Starting at a point on the shoreline of San Clemente Island, California, in position 33°01'25.0" N, 118°33'43.0" W, for a place of beginning (point A), thence northeasterly to 33°02'11.0" N, 118°32'13.5" W (point B), thence southeasterly to 32°58'40.5" N, 118°29'15.5" W (point C), thence southwesterly to 32°57'54.0" N, 118°31'17.2" W (point D), thence northwesterly along the shoreline of San Clemente Island to the place of beginning.

(b) *Regulations.* In accordance with the general regulations in § 165.33 of this Part, entry into the area of this zone is prohibited unless authorized by the Captain of the Port, San Diego, California. Section 165.33 also contains other general requirements.

Dated: May 5, 1987.

[COTP San Diego Reg. 87-05]

## Safety Zone Regulations; San Clemente Island, CA, Pacific Ocean

May 11, 1987.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a safety zone in the vicinity of West Cove, San Clemente Island, California, consisting of the water area bounded by the following coordinates and the shoreline of San Clemente Island:

Point A—33°01'38.0" N, 118°36'18.0" W
Point B—33°01'11.0" N, 118°37'25.0" W
Point C—33°00'00.0" N, 118°36'51.0" W
Point D—33°00'00.0" N, 118°34'56.5" W

This action is taken at the request of the United States Navy and is needed to protect persons, vessels and property from hazards associated with naval equipment and operations located or conducted within the zone. Entry into this zone is authorized, but anchoring, fishing, or other similar activities is prohibited unless authorized by the Captain of the Port, San Diego. At certain times, entry into the zone will be prohibited unless authorized by the Captain of the Port, San Diego. Notice of these times will be provided by Coast Guard personnel in the zone.

EFFECTIVE DATE: June 15, 1987.

FOR FURTHER INFORMATION CONTACT: LCDR Steven P. Mojonnier, USCG, C/O U.S. Coast Guard Captain of the Port, 2710 N. Harbor Drive, San Diego, CA 92101-1064, telephone (619) 293-5860.

SUPPLEMENTARY INFORMATION: On 19 March 1987, the Coast Guard published a Notice of Proposed Rulemaking in the Federal Register for these regulations (52 FR 8623). Interested persons were requested to submit comments, and no comments were received.

*Drafting Information:* The drafters of this notice are LCDR Steven P. Mojonnier, project officer for the Captain of the Port, and LCDR Joseph R. McFaul, project attorney, Eleventh Coast Guard District Legal Office.

*Discussion of Comments:* No comments were received on the Notice of Proposed Rulemaking.

This regulation is issued pursuant to 33 U.S.C. 1225 and 1231 as set out in the authority citation for all of Part 165.

*Economic Assessment and Certification:* These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; 26 February 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The area within the zone is a small area outside the normal shipping channels. A small number of private vessels use these waters occasionally. Entry to the zone will be prohibited infrequently. There will be minimal effect on routine navigation.

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

**List of Subjects in 33 CFR Part 165**

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

**Final Regulation**

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended as follows:

**PART 165—[AMENDED]**

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C 1225 and 1231: 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 33 CFR 160.5.

2. In Part 165, a new § 165.1112 is added, to read as follows:

**§ 165.1112 Safety Zone: West Cove, San Clemente Island, California.**

(a) *Location.* The following area is a safety zone: The water area adjacent to San Clemente Island, California bounded by the following coordinates and the shoreline of San Clemente Island:

Point A—33°01'38.0" N, 118°36'18.0" W
Point B—33°01'11.0" N, 118°37'25.0" W
Point C—33°00'00.0" N, 118°36'51.0" W
Point D—33°00'00.0" N, 118°34'56.5" W.

(b) *Regulations.* (1) In accordance with the general regulations in § 165.33 of this Part, entry into the area of this zone is permitted, but anchoring, fishing, and other similar activities are prohibited unless authorized by the Captain of the Port, San Diego, California.

(2) Entry into the area of this zone will be prohibited at certain times. U.S. Coast Guard personnel in the zone will provide notification to the public of the times when entry into the zone is prohibited.

(3) Section 165.33 also contains other general requirements.

Dated: May 5, 1987.

## Shipping Safety Fairways; Gulf of Mexico

**AGENCY:** Coast Guard, DOT.

**ACTION:** Final rule.

**SUMMARY:** This rule establishes a new shipping safety fairway in the vicinity of Heald Bank in the approach to Galveston, Texas. This action is necessary to permit deep draft vessels to navigate safely around the area off Heald Bank Shoals in the approach to Galveston, Texas. The intended effect of this rule is to enhance navigation safety by providing a corridor free from fixed offshore structures. This final rule implements the results of the port access route study as reported in the Federal Register on March 11, 1985 (50 FR 9682).

**EFFECTIVE DATE:** June 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Lieutenant (j.g.) Daphne Reese, Project Manager, Office of Navigation (G–NSS–2), room 1606, U.S. Coast Guard Headquarters, 2100 Second St. SW., Washington, DC 20593, (202) 267–0364.

**SUPPLEMENTARY INFORMATION:** A notice of proposed rulemaking (NPRM) concerning the shipping safety fairway in this final rule was published on March 6, 1986 (51 FR 7814). Interested parties were given until May 5, 1986, to submit comments. A public hearing was not held.

*Drafting Information:* The principal persons involved in drafting this rulemaking are: Lieutenant (j.g.) Daphne Reese, Project Manager, and Lieutenant Sandra Sylvester, Project Attorney, Office of Chief Counsel.

**Background**

The Ports and Waterways Safety Act (PWSA) (33 U.S.C. 1223) authorizes the Coast Guard to designate fairways to allow vessels an area free of fixed structures for safe access to U.S. ports. The regulations governing shipping safety fairways (33 CFR Part 166) provide that fixed offshore structures, temporary or permanent, are not permitted within designated safety fairways, and are only permitted within fairway anchorages if the structures are two miles apart. The Coast Guard has the authority, in accordance with the PWSA, to modify or relocate existing safety fairways to improve navigation safety or to accommodate offshore mineral exploitation and exploration.

The authority to create a fairway may be exercised by the Coast Guard only after a study of potential traffic density and use conflicts has been conducted to determine the need for designated safe access routes for vessels proceeding to and from U.S. ports. One such conflict can occur when vessels navigate in an area which is subject to offshore development. Shipping safety fairways can interfere with the direct exploration for and production of oil and gas on the Outer Continental Shelf (OCS). In conducting a port access route study, the Coast Guard attempts to recognize the minimize each identifiable cost impact as balanced against the needs of safe navigation. The studies which identified the need for this rulemaking were initiated by a notice in the Federal Register on March 19, 1984 (49 FR 10127, corrected on April 12, 1984 at 49 FR 14538) and on July 10, 1984 (49 FR 28074). The study results were published in the Federal Register on March 11, 1985 (50 FR 9682). The Coast Guard found vessels which would usually be expected to use the Northwest-Southeast leg of the Galveston Entrance Fairway deviated away from the fairway because of shoaling. As a result of this finding, a new deeper draft fairway through Heald Bank was recommended. On March 6, 1985, the Coast Guard published a notice of proposed rulemaking (51 FR 7814), with the specific proposal to establish the Heald Bank Cutoff Fairway.

This rulemaking establishes a new fairway around the area of the Heald Bank Shoals in the approach to Galveston. The fairway connects the Northwest-Southeast leg of the Galveston Entrance Fairway (33 CFR 166.200(d)(10)) with the North-South leg of the fairway. The new fairway will provide a corridor free from fixed structures for deep draft vessel traffic over 30 feet which cannot use the Northwest-Southeast leg of the fairway in the approach to Galveston. The Heald Bank Cutoff Fairway is approximately two miles wide, 125 miles long, approximately 40 miles offshore, and runs generally east-west. The fairway

totally or partially includes the following blocks as described by the Minerals Management Service (MMS): High Island Area Blocks A–40, to A–43, A–51 to A–59, A–61, A–67 to A–68, A–70 to A–80, A–212 to A–216, and A–219 to A–223.

When the NPRM for this rulemaking was drafted only one-eighth of one *leased* block (High Island Area Block A–45) was indentified as being directly affected by the fairway. High Island Area Block A–45 was leased after the notice of study (49 FR 10127) for this rulemaking was published on March 19, 1984. Subsequent to the publishing or the NPRM, the Coast Guard was notified of five additional *leased* blocks (High Island Blocks A–51, A–52, A–53, A–74, A–75) directly affected by the fairway. The five blocks were leased after the notice of study and also after the notice of study results (50 FR 9682) for this rulemaking were published on March 11, 1955.

The PWSA stipulates development of tracts leased after the announcement of a study be in accordance with future fairway restrictions (33 U.S.C. 1223(c)(2)).

## Discussion of Comments

Four comments were received in response to the NPRM. Two of the comments were strongly in favor of the proposal in the NPRM; one comment suggested changes in the geographical positions for the fairway as published in the NPRM; and one comment was strongly opposed to the fairway being established. The two comments in favor of the proposal in the NPRM were from maritime trade associations. Their comments stated, "The Heald Bank Cutoff Fairway would provide an access route free from fixed offshore structures, provide an increased level of navigation safety for deep draft vessels, and preserve future safe access into Galveston, Houston, and Texas City."

The comment suggesting changes in the geographical positions was from a land surveyor who furnishes lease developers with maps and plots for the actual physical location of rigs, platforms, and pipelines. The comment suggested changes in the positions given in the NPRM for the new fairway in order to give a more exact match up of where the new fairway meets the two existing fairways. Therefore, any future plotting of lease sites, pipeline, etc, would show the most precise boundaries of the fairway possible. The geographical positions suggested in the comments were in degrees and minutes, with the seconds expressed to the third decimal place.

Presently, all fairways in 33 CFR Part 166 are described only in degrees, minutes, and seconds. While the Coast Guard recognizes the values of a greater degree of refinement for the siting of structures and pipelelines, present descriptions have proved adequate for the charting of fairways by the National Ocean Service and for use by vessels. The Coast Guard is not aware of any significant conflicts resulting from the degree, minutes, seconds description. In situations where a potential conflict exists (fairway junctions), the Coast Guard has made an effort to use identical positions of latitude and longitude at the point where fairways join. Therefore, the Coast Guard will not change the geographical positions contained in the notice of proposed rulemaking.

The comment strongly opposed to the NPRM was from Mobile Producing Texas and New Mexico Inc., (MPTM). MPTM objected because they have five blocks, leased after the notice of study results for this rulemaking, which would be adversely affected by the Heald Bank Cutoff Fairway. MPTM comments state they have identified an exploration prospect on their leases which "would not be amenable to development by directional drilling." MPTM considers the economic impact of the rulemaking too great and the navigation safety interest too small to implement the proposed fairway. MPTM raised several questions with regard to projections for expected vessel use of the fairway. The questions include: (1) How many deep-draft vessels visit the Port of Houston/Galveston? (2) How many of the above deep-draft vessels use the Northwest-Southeast leg of the Galveston Entrance Fairway? (3) How much average time would be added to a ship's voyage using the North-South leg of the fairway instead of the Northwest-Southeast leg of the fairway and what would be the appropriate cost? (4) Who owns the vessels using the area? (5) What has been the forecast of the expected number of vessels that would require a deep-draft fairway? (6) Has the forecast been accurate, or has the recent recession caused a falloff in the number of such vessels using the Port of Galveston? (7) Should the estimate of ship visits be re-estimated in light of experience since the first study was made in 1984?

The Coast Guard considered the comments by MPTM and completely evaluated all issues and questions raised. The Coast Guard and the Minerals Management Service (MMS) issued adequate notices of the proposed fairway prior to lease sale 82, from which the MPTM's blocks were purchased. Under the PWSA (33 U.S.C. 1223) the Coast Guard cannot interfere with the effective exercise of a lease right granted prior to the time a part access route study is announced. MPTM obtained their blocks not only after the date of the study notice (49 FR 10127, March 1984 and 49 FR 28074, July 10, 1984), but also after the date of the notice of study results (50 FR 9682, March 11, 1985) which gave full disclosure of Coast Guard intentions to pursue rulemaking on the Heald Bank Cutoff Fairway. MPTM, as well as other potential bidders, were also given notice of the proposed fairway, its implications, and the specific blocks affected by it, in the MMS Notice of Sale and information to Bidders for lease sale 82 (50 FR 27798, July 5, 1985).

Based on the above sequence of events, MPTM would be presumed to have known of the proposed fairway at the time of the lease sale. Indeed, it is presumed that the amounts bid on the blocks were affected by the limited occupancy rights of the proposed fairway. It would therefore be unfair to others who bid under the presumption of possible fairway restrictions and limited occupancy rights to shift the fairway at this time. Given the lengthy and complex process involved in establishing a new fairway or fairway anchorage, it would be very difficult to complete the process if it was halted every time a lessee so requested. Such uncertainty in the rulemaking process would also affect future lease sales in areas in which the Coast Guard would be obligated to announce a study into the need for an alternate fairway. For the Coast Guard to operate in accordance with the PWSA and rulemaking process fairly without confusing the public and without making the process interminable, it must be able to rely on a status quo in leasing activity at the time a proposal is published. Reliance on the status quo and fairness also precludes the Coast Guard from shifting or altering a fairway so as to deprive other leaseholders of their rights. The Coast Guard must also rely on comments submitted during the study by the public and affected government agencies. Indeed, MPTM's comments on alternate configurations for a deep draft fairway during the initial study were influential in the development of the fairway proposal now being implemented.

The following are answers to MPTM's questions on expected vessel use of the fairway.

*a. How many deep-draft vessels visit the Port of Houston or Galveston?*

Selected 1985/1986 deep draft figures:

| | Over 30 feet | |
|---|---|---|
| | Inbound | Outbound |
| March 1985 | 115 | 130 |
| June 1985 | 92 | 112 |
| Sept 1985 | 89 | 108 |
| Dec 1985 | 110 | 126 |
| March 1986 | 96 | 114 |
| June 1986 | 112 | 110 |

Percentages were used in the notice of study results (50 FR 9683, March 11, 1985) for inbound/outbound vessels having a draft greater than 30 feet. The records of the Houston/Galveston Vessel Traffic Service (VTS) for years 1983 and 1984 reported 27% of the traffic to be deep draft inbound and 34% of the traffic to be deep draft outbound. In 1985 and in the first half of 1986, 30% of the inbound vessels and 39% of the outbound vessels in the approach to Galveston had drafts greater than 30 feet.

*b. How many of the above deep draft vessels use the Northwest-Southeast leg of the Galveston Entrance Fairway?*

Although no accurate number of deep-draft vessels using the fairway could be determined, Exxon and West Gulf Maritime report regular use the Northwest-Southeast leg of the fairway for their deep-draft and other vessels because it is the most direct route. In fact, some deep-draft, outbound vessels use the North-South leg of the fairway until they pass the Heald Bank Shoals and then cut across open water to continue their voyage using the Northwest-Southeast leg of the fairway. This substantiates earlier study results concluding the Heald Bank Cutoff Fairway is needed "to decrease the risk of environmental damage and provide deep-draft vessels with an established route where structures will not be permitted, allowing for safer maritime navigation."

*c. How much average time would be added to a ship's voyage using the North-South leg of the Galveston Entrance Fairway instead of the Northwest-Southeast leg of the fairway and what would be the approximate cost?*

Using the North-South leg of the fairway in lieu of the Northwest-Southeast leg of the fairway adds approximately 47 nautical miles, or about three hours to a voyage. Considering there are numerous variances to vessel operating costs including the vessel's size, draft, type of propulsion, whether operator owned or chartered, and tidal constraints (that is, a deep-draft vessel may only be able to moor at a dock during high tide), this cost difference could be anywhere between $1,250 and $7,500 per voyage. (Based on an estimated operating cost variance between $10,000 and $16,000 per day.)

*d. Who owns the vessels using the area?*

Ownership of these vessels and benefits derived are not a consideration of the study or the proposed rules. Ownership is of little consequence to the Houston/Galveston communities who are the ultimate benefactors of both vessel commerce and offshore mineral exploration and exploitation. What is at issue is the safe, unobstructed passage of vessels in the approach to Galveston.

*e. What has been the forecast of the expected number of vessels requiring a deep-draft fairway?*

Have such forecasts been accurate, or has the recent recession caused a falloff in the number of such vessels using the Post of Galveston? Should the estimate of ship visits be re-estimated in light of experience since the first study publication was made in 1984?

The forecast had been for an increase in the expected number and percentage of deep draft vessel traffic. The current trend of vessel owners and operators in and out of the Houston and Galveston complex is to continue to use the most direct and safest route. For statistical purposes the *total* number of inbound/outbound vessels decreased 9% and 18%, respectively, between the periods of survey in 1983/1984 and 1985/1986. The decline in the total number of deep draft vessels reflects the current depressed state of the oil/shipping industry. Yet, as noted in paragraph (a.) above, the percentage of deep-draft vessels increased. In keeping with the trend of an increase in the percentage of deep draft shipping and the economies it provides and based on VTS recent estimates, the forecast continues to be an increased percentage of deep-draft vessels through the Houston/Galveston complex. The Heald Bank Cutoff Fairway will, therefore, ensure an area free from fixed offshore structures for the safe passage of vessel traffic in anticipation of increased development as mandated by the PWSA.

The Heald Bank Cutoff Fairway is necessary to ensure safety of navigation. The Coast Guard examined the existing fairway in the approach to Galveston on the advice of the Houston/Galveston Navigation Safety Advisory Committee. In 1983, the Committee advised the Coast Guard there was a shoaling problem in the vicinity of Heald Bank, and the Eighth Coast Guard District conducted a study of the situation in 1984. The study included the four fairway approaches to Galveston. The northwest-southeast leg of the Galveston Entrance Fairway (33 CFR 166.200(d)(10)) is the most direct route for the majority of traffic using the Houston/Galveston port complex. Within this fairway there is an area of shallow water (approximately 34 feet). The Coast Guard estimates 27% of the inbound vessels and 34% of the outbound vessels on this route have drafts greater than 30 feet. Many of these vessels leave the fairway to avoid the shallow water and navigate where they have greater under-keel clearance. Upon leaving the fairway to avoid shoal water, vessels face the risk of collision with structures. Since the announcement of the study, MPTM and other companies have leased blocks in the area with the intent of development. As the area around Heald Bank is leased, explored, and developed, maneuvering among structures will become increasingly difficult. Therefore, the Heald Bank Cutoff Fairway is necessary to provide deep draft vessels with an established route where structures will not be permitted and to decrease the risk of environmental damage and to provide for safer maritime navigation.

Finally, MPTM stated in their comments, "the five affected leased blocks would not be amenable to development by directional drilling." MPTM also provided information in their comment on the potential value of the natural gas reserves, if they exist, and the expected royalty over the life of the leased blocks. The Coast Guard examined several alternative configurations during the study of the area involved and made every attempt to lessen the impact on lease blocks in the area and to anticipate areas of future development. Neither MMS nor MPTM indicated during the study any area which was particularly desirable for mineral exploitation; any mineral resources which would be inaccessible if the fairway was established; or any expected loss of revenue. MMS has not identified any area which could not be technically or financially exploited by directional drilling. MPTM's comment indicated their leases "would not be amenable to directional drilling." The Coast Guard is unable to substantially evaluate or verify MPTM's claim based solely on their comment or the information presently offered by MMS.

If MPTM determines resources exist within their leased blocks and are convinced their needs cannot be reasonably accommodated because of fairway restrictions, they may request the Coast Guard to consider an adjustment to the fairway after it has been established. Another port access

route study may be performed to determine whether the fairway is effectively fulfilling its purpose, and whether a modification to accommodate another use of the area is warranted. Further guidance and information on this situation was discussed in detail in the study results supporting this rulemaking (March 11, 1985, 50 FR 9682). Based on a thorough review of the need for our original proposal and an evaluation of all the comments to the NPRM, the Coast Guard believes the shipping safety fairway in the vicinity of Heald Bank is necessary and should be established as originally proposed.

**Regulatory Evaluation**

This rulemaking will not have adverse environmental impact. To the contrary, the risk of environmental damage will decrease if the rule is implemented because deep draft vessels will have an established access route where structures will not be permitted, allowing for safer maritime navigation. While there is potential energy impact for this rulemaking little verifiable impact can be determined from the available information.

The fairway was designed to have the least adverse impact upon future blocks and present leaseholders, as compared to several other alternatives considered during the study. The impact on future blocks leased was lessened by limiting the width of the fairway to two miles and by giving timely information to notify bidders of lease restrictions which would apply to blocks leased within the fairway. As indicated above, there is one leased block in the fairway which was leased after the date of the study notice and five leased blocks leased after the date of the study results. The new fairway may interfere with direct exploration and production of oil and gas in those portions of the leased blocks within the designated fairway area.

In circumstances where the Coast Guard is convinced fixed structures must be placed in an area designated as a fairway to gain access to significant quantities of oil or gas, and navigation safety would not be jeopardized by a modification of that fairway, a request for adjustment would be given appropriate consideration in accordance with the PWSA and rulemaking procedures. In most cases, a fairway modification will require a PWSA port access study before rulemaking can be commenced.

This regulation is considered to be non-major under Executive Order 12291 and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). This designation will contribute to navigation safety without significantly interfering with development of the OCS. The economic impact of this regulation has been found to be minimal and further evaluation is unnecessary. Since the impact of this rulemaking has been found to be minimal, the Coast Guard certifies it will not have a significant economic impact on a substantial number of small entities.

## DEPARTMENT OF DEFENSE

### Corps of Engineers, Department of the Army

### 33 CFR Part 207

### Ouachita and Black Rivers, Arkansas, and Louisiana

**AGENCY:** U.S. Army Corps of Engineers, DOD.

**ACTION:** Final rule.

**SUMMARY:** The U.S. Army Corps of Engineers is amending the regulations in 33 CFR 207.249 and 207.250, which governs the use, administration, and navigation of the Ouachita and Black Rivers, Arkansas, and Louisiana. These revisions are necessary to:

a. Advise the waterway users that the 9-foot draft navigation channel is extended to Mile 338.0, Ouachita River;

b. Correct description of visual signals on lock structures;

c. Delete § 207.250 which is no longer applicable to the upper Ouachita River.

**EFFECTIVE DATE:** May 14, 1987.

**ADDRESS:** Hqusace (DAEN–CWO–M), Washington, DC 20314–1000.

**FOR FURTHER INFORMATION CONTACT:** Mr. Harold Tohlen, phone number (202) 272–0245.

**SUPPLEMENTARY INFORMATION:** The Corps of Engineers Vicksburg District has recently completed impoundment of a 9-foot draft navigation project from Mile 237.0 to Mile 338.0, Ouachita River. This project involved replacement of the remaining wicket-type navigation structures on the river with modern high-lift locks and dams. The provisions of § 207.250 pertain to the use and operation of the wicket-type structures. The provisions of § 207.249 apply to the high-lift locks and dams. Since the Black-Ouachita River System now contains only the high-lift structures, the regulations within 33 CFR Part 207 should be consolidated by expanding the limits of § 207.249 through Ouachita River Mile 338.0 (Camden, Arkansas) and by deleting § 207.250. The Corps of Engineers Vicksburg District, by issuing written navigation notices, has informed waterway users that the wicket-type structures have been removed and the high-lift facilities have been placed into operation. Reference § 207.249, paragraph (b) (3) (iii). This paragraph indicates that the visual signals contain an amber light to indicate when the lock chamber is being made ready for use. Since the visual signals on the Black-Ouachita River System contain only red and green lights, subparagraph (b) (3) (iii) should be deleted. No other revisions are necessary regarding visual signals. Pursuant to the administration procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest because this amendment is nonsubstantive and imposes no new requirements. It merely removes obsolete regulations from 33

CFR Part 207. Through various navigation notices, the user public has been informed of the new navigation structures on the Ouachita River.

Note.—The Secretary of the Army has determined that this document does not contain a major rule requiring a regulatory impact analysis under Executive Order 12291 because it will not result in an annual effect on the economy of $100 million or more and it will not result in a major increase in costs or prices. The SA certifies that this rule will not have a significant economic impact on a substantial number of entities and thus does not require the preparation of a regulatory flexibility analysis.

**Lists of Subjects in 33 CFR Part 207**

Navigation, Navigable waters, Waterways.

Dated: May 4, 1987.

John O. Roach, II,

*Army Liaison Officer with the Federal Register.*

33 CFR Part 207 is amended as follows:

**PART 207—[AMENDED]**

1. The authority citation for Part 207 continues to read as follows:

Authority: 40 Stat. 266; 3 U.S.C. 1.

2. In part 207, § 207.260 is amended by revising the heading to read as set out below and by removing (b) (3) (iii) and redesignating (b) (3) (iv) as (b) (3) (iii):

**§ 207.260 Ouachita and Black Rivers, Arkansas and Louisiana, Mile 0.0 to Mile 336.0 (Camden, Arkansas) above the mouth of the Black River; use, administration, and navigation.**

* * * * *

**§ 207.250 [Removed]**

3. Section 207.250 is removed.

# Proposed Rules

Federal Register
Vol. 52, No. 93
Thursday, May 14, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF JUSTICE

### 8 CFR Part 204

[INS Number: 1012–87]

### Petition To Classify Alien as Immediate Relative of a United States Citizen or as a Preference Immigrant; Filing of Occupational Preference Petitions

**AGENCY:** Immigration and Naturalization Service, Justice.

**ACTION:** Proposed Rule.

**SUMMARY:** This rulemaking proposes to change the method by which a third preference or sixth preference priority date is established. Under regulations which have been in effect since June 20, 1986, a priority date established by the submission of a request for labor certification is lost if the immigrant visa petition seeking third or sixth preference classification is not filed within 60 days of the date of issuance of the certification, or if the petition is not resubmitted within 60 days of being returned to the petitioner for additional information. The current regulations were promulgated in order to prevent certain abuses which existed under the prior regulations. However, the enactment of the Immigration Reform and Control Act of 1986 (IRCA) on November 6, 1986 made the June 20 changes superfluous, since IRCA more effectively prevents the same abuses.

**DATE:** Written comments must be submitted on or before June 15, 1987.

**ADDRESS:** Please submit comments in duplicate to the Director, Office of Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, NW., Room 2011, Washington, DC 20536.

**FOR FURTHER INFORMATION CONTACT:** Michael L. Shaul, Senior Immigration Examiner, Immigration and Naturalization Service, 425 I Street, NW., Washington, D.C. 20536, Telephone: (202) 633–3946.

**SUPPLEMENTARY INFORMATION:** Under section 212(a)(14) of the Immigration and Nationality Act ("the Act"), 8 U.S.C. 1182(a)(14), certain aliens may not obtain an immigrant visa for entry into the United States to engage in permanent employment unless the Secretary of Labor has issued a labor certification stating that there are not sufficient workers who are able, willing, qualified, and available at the time of application for a visa and admission to the United States and at the place where the alien is to perform the skilled or unskilled labor, and that the employment of these aliens will not adversely affect the wages and working conditions of similarly employed workers in the United States.

There are three alien immigrant classifications which require a labor certification. These are the third and sixth preference, and under various circumstances, nonpreference classifications (sections 203(a)(3), 203(a)(6) and 203(a)(7) of the Act, 8 U.S.C. 1153)). For third and sixth preference applicants, labor certification applications are filed by employers with a state employment service office unless the alien's occupation is a Schedule A occupation (already certified by the Secretary of Labor as in short supply in the United States). If a labor certification is issued or the beneficiary's occupation is on Schedule A, the employer (prospective or current) submits an immigrant visa petition to a district office of the Service. Section 203(c) of the Act (8 U.S.C. 1153(c)) provides that visas will be issued under section 203(a) (1) through (6) to eligible immigrants in the order in which a petition is filed on behalf of each of these immigrants with the Attorney General as provided in section 204 of the Act, (8 U.S.C. 1154). If a preference immigrant visa number is immediately available when the petition is approved, the alien beneficiary may be issued an immigrant visa with which to enter the United States for permanent residence or, under certain circumstances, may be permitted to adjust status to that of a permanent resident. If a preference immigrant visa number is not available at the time the petition is approved, the alien's name is instead placed on a waiting list. Petitions are then processed for permanent residence status by date filed. Thus, the filing date has come to be known as the "priority date".

Over the years, the priority date has been computed in different ways at different times. Originally the priority date was based strictly on the date the visa petition was filed with the Service after issuance of the certification by the Department of Labor (DOL). However, because there were varying backlogs and processing times among the offices of the DOL's employment service system, some individuals were able to file the petition earlier than others. Accordingly, in order to eliminate what was seen as an unfair advantage enjoyed by some, the method of computation was changed so that the date that a labor certification request was filed with the local office of the state employment service became the priority date. This method created an opportunity for abuse by those employers and aliens who would obtain a labor certification but not file the I–140 petition until a visa number became available, thereby hiding the illegal alien from the attention of the Service. Accordingly, on June 20, 1986, the regulation was again changed to require that the petitioner file the petition within 60 days of the issuance of the labor certificate, or resubmit the petition within 60 days of the date it was returned for additional information or documentation, in order to retain the priority date. If the petition were not submitted or resubmitted within the allotted period, the date of submission or resubmission would be the new priority date.

On November 6, 1986 the Immigration Reform and Control Act of 1986 (IRCA) became law. By providing for sanctions to be imposed against employers who hire aliens who are not authorized to accept employment in the United States, IRCA removes the incentives for abuse which necessitated the regulatory change of June 20, 1986. With these incentives removed, requiring that petitions be submitted or resubmitted within 60 days becomes disadvantageous to both the Service and the public. Accordingly, the Service now proposes to restore the procedure which was in effect prior to June 20, 1986.

Additionally, the proposed rulemaking provides that a priority date shall only be established in the case of a third or sixth preference petition for an occupation listed in Schedule A (20 CFR 656.10) if the petition is approved. If the petition is denied, no priority date is established. The proposed rule thereby clarifies an issue which has caused

considerable confusion in the past as to whether a Schedule A labor certification could be established if the petition is denied. Because no separate adjudication is performed on the request for labor certification, and no separate notification is made to the petitioner or the beneficiary as to the decision on the request for labor certification, the certification cannot be considered to have been issued unless and until the petition is approved.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule would not, if promulgated, have a significant adverse economic impact on a substantial number of small entities.

This rule is not a major rule within the meaning of section 1(b) of E.O. 12291.

**List of Subjects in 8 CFR Part 204**

Administrative practice and procedure, Aliens, Petitions.

Accordingly, Chapter I of Title 8, Code of Federal Regulations, is amended as follows:

**PART 204—[AMENDED]**

The authority citation for Part 204 continues to read as follows:

Authority: Secs. 101, 103, 201, 203, 204, 212, 245;; 66 Stat. 166, 173, 175, 178, 179, 182, 217; 8 U.S.C. 1101, 1103, 1151, 1153, 1154, 1182, 1255.

2. In § 204.1, paragraph (d)(2) is revised to read as follows:

**§ 204.1 Petition.**

* * * * *

(d) * * *

(2) *Filing date.* In the case of a third or sixth preference petition (except for an occupation listed in Schedule A), the filing date of the petition within the meaning of section 203(c) of the Act will be the date the request for certification was accepted for processing by any office within the employment service system of the Department of Labor. If a third or sixth preference petition for an occupation listed in Schedule A is approved, the filing date of the petition shall be the date it is properly filed with the appropriate Service office. If a third or sixth preference petition for an occupation listed in Schedule A is not approved, no priority date shall be established.

BILLING CODE 4410-10-M

**SECURITIES AND EXCHANGE COMMISSION**

**17 CFR Part 240**

**[Release No. 34-24428; File No. S7-16-87]**

**Exemption of Certain Foreign Government Securities Under the Securities Exchange Act of 1934 for Purposes of Futures Trading**

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Proposed rule amendments and solicitation of public comments.

**SUMMARY:** The Commission proposes for comment a rule amendment that would designate securities issued by any country with outstanding long-term sovereign debt rated in one of the two highest rating categories by at least two nationally recognized statistical rating organizations as "exempted securities" for purposes of the marketing and trading in the United States of futures contracts on that government's securities. The release also proposes for comment an alternative amendment under which the government securities of Australia, France and New Zealand would be added to the list of exempted securities for purposes of futures trading.

**DATE:** Comments should be submitted by June 15, 1987.

**ADDRESSES:** All comments should be submitted in triplicate and addressed to Jonathan G. Katz, Security, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549 All comments should refer to File No. S7-16, and will be available for public inspection at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** David L. Underhill, Esq., 202/272-2375, Division of Market Regulation, Securities and Exchange Commission, Room 5186 (Mail Stop 5-1), 450 Fifth Street, NW., Washington, DC. 20549.

**SUPPLEMENTARY INFORMATION:**

**I. Introduction**

Under the Commodity Exchange Act ("CEA"), futures trading on individual securities is prohibited unless the underlying security is an exempted security under the Securities Act of 1933 ("Securities Act") or the Securities Exchange Act of 1934 ("Exchange Act"). The Securities and Exchange Commission ("SEC" or "Commission"), however, adopted and later amended Rule 3a12-8 ("Rule") under the Exchange Act to designate British, Canadian and Japanese government debt obligations as exempted securities under the Exchange Act solely for purposes of marketing and trading futures on those securities in the United States.[1] In effect, the designation of those securities as "exempted securities" removes the CEA's prohibition against marketing or trading futures on those securities in the United States, so long as the other terms of the Rule are satisifed. The commission today purposes two amendments to the Rule.

The first purposed amendment would extend the class of securities exempted under the Rule, for purposes of permitting the sale and trading of futures contracts on those securities in this country, to securities issued by any country with outstanding long-term sovereign debt rated in one of the two highest rating categories by at least two nationally recognized statistical rating organizations ("NRSROs").[2] An alternative amendment would add the debt securities of Australia, France and New Zealand to the list of those countries the debt obligations of which are exempted by the Rule. Under either proposal, to quality for the exemption, futures contracts on a country's securities would have to meet all the other existing requirements of the Rule.

**II. Background**

The CEA, as amended by the Futures and Trading Act of 1982,[3] prohibits the trading of futures contracts on individual securities unless those securities qualify as exempted securities under section 3 of the Securities Act or section 3(a)(12) of the Exchange Act.[4]

---

[1] Under the Rule, trading in the U.S. of futures on government securities exempted by the Rule is permitted only on a board of trade.

[2] An NRSRO is a professional rating service that specializes in analyzing and assigning ratings from an established scale or range to a variety of corporate and sovereign debt issues. Those ratings are based on the rating organization's assessment of the issuer's capacity to pay interest and repay principal in accordance with the rated debt instrument's terms. The following organizations presently are considered NRSROs, as that term is used in the Exchange Act's net capital rule [17 CFR 240.15c3-1(c)(2)(vi)(F)]: Duff and Phelps, Inc.; Fitch Investors Services, Inc.; Moody's Investors Services, Inc. ("Moody's"); McCarthy, Crisanti & Maffei; and Standard and Poor's Corporation ("S&P").

[3] Pub. L. No. 97-444, 96 Stat. 2294, 7 U.S.C. 1 et seq (1984).

[4] Section 2(a)(1)(B)(v) of the CEA, 7 U.S.C. 2a(v) (1984), provides that "[n]o person shall offer to enter into, or confirm the execution of any contract of sale (or option on such contract) for future delivery of any security, or interest therein or based on the value thereof, except an exempted security under section 3 of the Securities Act . . . or section 3(a)(12) of the . . . Exchange Act. . . ."

Because foreign government securities are not exempted securities under either of these sections, the CEA prohibition against trading futures on individual securities prevents the marketing and trading of futures on such foreign government securities in this country. Section 3(a)(12) of the Exchange Act, however, provides that the term "exempted security" includes

> such other securities . . . as the Commission may, by such rules and regulations as it deems consistent with the public interest and the protection of investors, either unconditionally or upon specified terms and conditions or for stated periods, exempt from the operation of any one or more provisions of this title which by their terms do not apply to an "exempted security" or to "exempted securities."

In March 1984 pursuant to section 3(a)(12) under the Exchange Act, the Commission promulgated Rule 3a12–8.[5] The Rule currently designates British, Canadian and Japanese government securities that meet certain conditions as "exempted securities" under the Exchange Act.[6] The purpose of the Rule is to permit certain foreign, exchange-traded futures contracts on the designated securities to be marketed and traded in the United States.[7] Under the Rule, British, Canadian Japanese government debt securities are considered exempted securities under the Exchange Act only with respect to futures trading on those securities and provided that: (1) The securities are not registered in the United States; (2) the futures contracts require delivery outside the United States; and (3) the futures contracts are traded on a board of trade.[8]

## III. Discussion

Rule 3a12–8 was promulgated in response to Congress' understanding, in approving the 1982 amendments to the CEA, that neither the SEC nor the Commodity Futures Trading Commission had intended to bar United States marketing of British gilt futures [9] and that administrative action would be taken to allow the sale of these futures contracts in this country.[10] By promulgating the Rule, the Commission implemented Congress' intent without abandoning the longstanding policy of subjecting foreign government securities marketed and traded in the United States, for most purposes, to the requirements of the federal securities laws. Accordingly, the conditions set forth in the Rule are designed to ensure that a domestic market in unregistered foreign government securities does not develop and that futures markets in these instruments are not used to avoid the registration requirements and other provisions of the federal securities laws.

At the time the Commission originally proposed Rule 3a12–8, it recognized that, should the securities of additional governments become subject to futures trading, it could become necessary to amend the Rule to include those securities.[11] Subsequently, the Commission amended the Rule to include Japanese government debt. Currently, the Sydney Futures Exchange is trading futures on Australian bonds, the Marche a Terme d'Instruments Financiers [12] is trading futures on French bond contracts, and New Zeland bond futures are being traded on the New Zealand Futures Exchange. The Commission has been informed that United States citizens, especially institutional investors, are interested in trading these new products and has received requests that Rule 3a12–8 be amended.[13]

As the world's securities markets become increasingly internationalized, the Commission expects to receive additional petitions for exemptive relief. As an alternative to continuing to amend the Rule on a country by country basis, the Commission today is proposing to amend subsection (a)(1) of Rule 3a12–8 by adding to the list of designated foreign government securities under the Rule the unregistered debt obligations of any government with outstanding long-term sovereign debt rated in one of the two highest rating categories (within which they may be sub-categories or gradations indicating relative standing) by at least two NRSROs.[14]

The two U.S. entities that currently rate foreign sovereign debt, Moody's and S&P, currently rate only "external" debt, *i.e.*, debt that is sold outside the issuing country and typically is denominated in a currency other than that of the issuing country. The Rule, as proposed, would exempt all debt issued by a country that meets the rating category test, whether internal or external and whether long- or short-term.

In proposing to extend to the debt securities of additional countries the exemption afforded by the Rule, the Commission believes initially that there are no major differences between the government securities of countries issuing sovereign debt rated in one of the two highest rating categories [15] by at least two NRSROs (including Australia, France and New Zealand) and the securities of Great Britain, Canada and Japan so as to justify a different regulatory response. Like the sovereign debt of Great Britain, Canada and Japan, debt securities of countries with debt rated in one of the two highest rating categories are more likely to have an active and liquid secondary trading market. Restricting the Rule to the two highest rating categories would ensure that futures on thinly-traded sovereign debt would not be used as a subterfuge to market or trade the unregistered foreign debt in the United States.[16]

---

[5] *See* Securities Exchange Act Release Nos. 20708 ("Adopting Release"), March 2, 1984, 49 FR 8595 and 19611 ("Proposal Release"), May 25, 1983, 48 FR 24725.

[6] As originally adopted, the Rule applied only to British and Canadian government securities. *See* Adopting Release, *supra* note 5. The Rule was amended to include Japanese government securities. Securities Exchange Act Release No. 23423, July 11, 1986, 51 FR 25666.

[7] As discussed above, without this designation the trading of futures on these securities in the United States would be prohibited by section 2(a)(1)(B)(v) of the CEA.

[8] A requirement that the board of trade be located in the country that issued the underlying securities was eliminated. *See* Securities Exchange Act Release No. 24308, March 11, 1987, 52 FR 8575.

[9] *See* Proposal Release, *supra* note 5, 48 FR at 24725 (citing 128 Cong. Rec. H7492 (daily ed. September 23, 1982) (statements of Representatives Daschle and Wirth)).

[10] In extending the exemption to futures on Canadian government bonds and bills and then to futures on Japanese yen bonds, the Commission noted that there did not appear to be any legal or regulatory reason for treating them differently from British gilt futures contracts.

[11] *See* Proposal Release, *supra* note 5, 48 FR at 24726–27.

[12] The Marche a Terme d'Instruments Financiers is a financial futures exchange established in Paris in February 1986.

[13] *See* letters from Philip McBride Johnson, Skadden, Arps, Slate, Meagher & Flom, to Richard G. Ketchum, Director, Division of Market Regulation, SEC, dated August 20, 1986 (Australia), October 1, 1986 (New Zealand), and February 20, 1987 (France); and letter from Eugene W. Buehrieger, Managing Director, First Boston Corporation, to Richard G. Ketchum, Director, Division of Market Regulation, SEC, dated October 1, 1986 (France).

[14] The Commission believes preliminarily that it is more appropriate to rely on long-term (*i.e.*, more than 365 days to maturity) sovereign debt ratings, because they are broken down into a greater range of rating categories and cover more debt issues. In addition, most of the foreign futures contracts that would be covered by the Rule amendment overlie long-term debt obligations.

[15] The two highest rating categories of Moody's (Aaa and Aa) and S&P (AAA and AA) comprise what generally are known as "high grade" bonds. S&P asserts that its two highest rating categories differ only to a small degree and that both categories represent debt with a very strong capacity to pay interest and repay principal. *See, e.g., S&P International Credit Week*, December 1986, at 55. According to Moody's, debt rated in its third highest category (A) is considered "upper-medium-grade." Such debt has a strong capacity to pay interest and repay principal, but factors may be present which suggest a susceptibility to impairment some time in the future. *See, e.g.*, Moody's, *Sovereign Ratings*, August 22, 1986.

[16] The use of a debt rating standard would not preclude countries other than those coming under

Continued

According to the most recent Moody's and S&P ratings, the countries that come under the two highest rating categories are Australia, Austria, Denmark, Finland, France, the Netherlands, New Zealand, Norway, Sweden, Switzerland, and West Germany, as well as Great Britain, Canada, and Japan.[17]

The Commission further proposes, however, an alternative amendment that would simply add the securities of Australia, France and New Zealand to the list of debt obligations exempted by the Rule. As noted above, the Commission has received requests on behalf of futures exchanges located in these countries to allow sales to U.S. investors of futures based on each country's sovereign debt. Again, the Commission believes that futures on debt obligations issued by these countries should be accorded the same regulatory treatment accorded futures on the government securities of Canada, Great Britain and Japan.

Under either proposal, the existing conditions set forth in the Rule (*i.e.*, that the underlying securities not be registered in the U.S., that the futures contracts require delivery outside the U.S., and that the contracts be traded on a board of trade) would continue to apply. This should ensure that a domestic market in unregistered foreign sovereign debt of newly-designated countries does not develop.

The Commission seeks comments on a number of issues related to its proposal. First, the Commission encourages comments on the feasibility of a rule based on sovereign debt ratings. In particular, the Commission requests comments on the proper functioning of the Rule in the event that a qualified government issuer's rating falls below the two highest rating categories.[18] In this connection, commentators are asked to consider whether all or just a portion of a government's rated debt issues should be required to meet the rating standard in order for that country to qualify under the Rule.[19] In addition, commentators should consider whether a standard other than sovereign debt ratings would be appropriate as a basis for designation as an exempted security. For example, would a standard based on the volume and depth of trading in the sovereign debt be an easier or more accurate standard to use than debt ratings? If so, what sources of information are readily available to obtain reliable measurements of such trading activity?

The Commission also solicits comments on the desirability of an alternative amendment adding Australia, France and New Zealand to the Rule's list of eligible countries. In addition, the Commission requests comments on whether, under either proposal, the information available in English regarding the newly-eligible futures contracts and underlying sovereign debt would be adequate to permit U.S. investors to make informed investment decisions.[20] Finally, commentators may wish to discuss whether there are any legal or policy reasons for determining that the sovereign debt futures that would qualify under the proposed amendments should not be accorded the same treatment in the United States as British, Canadian and Japanese sovereign debt futures under Rule 3a12–8.

## IV. Cost/Benefit Analysis

There are virtually no costs associated with the proposed amendment, which imposes no record-keeping or compliance burden in itself and merely provides an exemption under the federal securities laws. The principal benefit associated with the amendment is that it would allow U.S. boards of trade and investors to trade a greater range of futures contracts on foreign government debt. The Commission solicits comments on the costs and benefits of the proposed amendment to Rule 3a12–8.

## V. Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman of the Commission has certified that the amendment proposed herein would not, if adopted, have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release.

## List of Subjects in 17 CFR Part 240

Reporting and recordkeeping requirements, Securities.

## VI. Text of the Proposed Amendment

The Commission is proposing to amend Part 240 of Chapter II, Title 17 of the Code of Federal Regulations as follows:

## PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 is amended by adding the following citation:

**Authority:** Sec. 23, 49 Stat. 901, as amended; 5 U.S.C. 78w. * * * Section 240.3a12–8 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12) and 23(a), 15 U.S.C. 78w(a). * * *

2. Alternative A:

Section 240.3a12–8 is amended by removing the word "or" from (a)(1)(ii), replacing the peirod with a semi-colon and adding the word "or" to (a)(1)(iii), and adding paragraph (a)(1)(iv) as follows:

**§ 240.3a12–8 Exemption for designated foreign government securities for purposes of futures trading.**

(a) * * *

(1) * * *

(iv) Any country with outstanding long-term sovereign debt rated in one of the two highest rating categories (within which there may be sub-categories or gradations indicating relative standing) by at least two nationally recognized statistical rating organizations, so long as such debt remains so rated. For the purposes of this paragraph, the phrase "long-term" is defined as having an original maturity date more than 365 days from the date of issuance.

* * * * *

---

the two highest rating categories from having their debt designated as an exempted security. If the Commission receives an application from an entity desiring to market or trade futures on the debt of a country that does not meet the rating standard, the Commission would consider that application in light of the regulatory concerns underlying the Rule and, if appropriate, publish a proposal to amend the Rule to include that country's debt.

[17] Portugal and South Korea are the only sovereign issuers rated in the third highest category (A). Italy's long-term debt is rated Aaa by Moody's, but is not rated by S&P.

[18] For example, at such time the marketing and trading in the U.S. of futures on any debt issues of the relevant government issuer not already the subject of futures trading could be prohibited or, in addition, any further increases in the open interest in futures on that country's debt could be prohibited.

[19] S&P recently adopted guidelines whereby it will issue a single, uniform rating for all long-term debt issues of a given foreign government. *S&P International CreditWeek*, December 1986, at 18. Moody's has no such policy.

[20] In adopting Rule 3a12–8 the Commission decided not to require, as a condition to the exemption, that such information be available. *See* Adopting Release, *supra* note 5, 49 FR at 8597–98. At the time Rule 3a12–8 was adopted both the United Kingdom and Canada had government debt issues registered in the United States. As a result, although those particular issues were not the subject of futures trading, United States investors had relevant disclosure materials concerning the issuers, *i.e.*, the governments of Canada and the United Kingdom. The Japanese government, however, had not registered any securities in the United States when it was added to the Rule's list of eligible issuers. Of the new countries that would become eligible under the rating standard proposal, only Australia, Denmark, Finland, New Zealand and Sweden currently have government debt issues registered in the U.S.

**Alternative B:**

Section 240.3a12–8 is amended by removing the word "or" from (a)(1)(ii), replacing the period with a semi-colon at (a)(1)(iii), and adding paragraphs (a)(1)(iv) through (vi) as follows:

**§ 240.3a12–8 Exemption for designated foreign government securities for purposes of futures trading.**

(a) * * *

(1) * * *

(iv) Australia;

(v) France; or

(vi) New Zealand.

* * * * *

Dated: May 5, 1987.

By the Commission.

Jonathan G. Katz,

*Secretary.*

**Regulatory Flexibility Act Certification**

I, John Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that the proposed amendment to Rule 3a12–8 set forth in Securities Exchange Act Release No. 24428, which would define government securities of (1) any country with outstanding long-term sovereign debt rated in one of the two highest rating categories by at least two nationally recognized statistical rating organizations or (2) Australia, France and New Zealand as exempted securities under the Securities Exchange Act of 1934 for purposes of futures trading on such securities, will not have a significant economic impact on a substantial number of small entities for the following reasons. First, the proposed amendment imposes no record-keeping or compliance burden in itself and merely allows, in effect, the marketing and trading in the United States of foreign futures contracts on government securities described above. Second, because futures contracts on British, Canadian and Japanese debt, which already can be traded and marketed in the U.S., still will be eligible for trading under the proposed amendment, the proposal will not affect any entity currently engaged in trading such futures contracts. Third, because the level of interest presently evident in this country in the futures trading covered by the proposed rule amendment is modest and those primarily interested are large, institutional investors, neither the availability nor the unavailability of these futures products will have a significant economic impact on a substantial number of small entities, as that term is defined for broker-dealers in 17 CFR 240.0–10 and to the extent that it is defined for futures market participants at 47 FR 18618.

Dated: May 5, 1987.

John Shad,

*Chairman.*

**Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision—Tehama and Six Other Districts in California**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to approve revisions to the California State Implementation Plan (SIP) for the Bay Area, the South Coast, and Butte, Monterey, Placer, San Diego, and Tehama Counties. The revisions were submitted to EPA by the California Air Resources Board (CARB) on February 10, 1986. The submitted rules control emissions of nitrogen oxides, sulfur oxides, volatile organic compounds, and total suspended particulate matter. EPA has determined that the revisions are consistent with the Clean Air Act and EPA requirements, and is proposing that the rules be approved.

**DATE:** Comments may be submitted to EPA at the address below up to June 15, 1987.

**ADDRESSES:** Comments on this proposal should be sent to: Regional Administrator, Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105. Attn: Air Management Division, State Implementation Plan Section (A–2–3).

Copies of the submitted rules are available during normal working hours at EPA's Region 9 office in San Francisco and at CARB's office in Sacramento. Rules of specific districts can also be found at the district offices. EPA's detailed evaluations of the rules are available at its Region 9 office. Below are listed the applicable addresses.

**SUPPLEMENTARY INFORMATION:**

**Background**

This notice proposes to approve rules which were submitted as SIP revisions by the State of California on February 10, 1986. The amended rules control the emissions of volatile organic compounds (VOC), nitrogen oxides (NOx), sulfur oxides (SOx), and total suspended particulate matter (TSP). Below is a list of these rules, with the primary pollutants affected by each rule in parentheses. EPA's evaluation of these revisions, as well as EPA's intended action, follow the list of rules.

**Description of Rules and Regulations**

*Bay Area AQMD*

Regulation 8, Rule 5—Storage of Organic Liquids (VOC)

*Butte County APCD*

Rule 2A–3—Finding by County Health Officer [deletion] (TSP)
Rule 202—Visible Emissions (TSP)
Rule 203—Particulate Matter Concentration (TSP)
Rule 204—Exemptions to Rules 201, 202, and 203 (TSP)
Rule 205—Process Weight Limitation (TSP)
Rule 210—Gasoline Transfer into Stationary Storage Containers (VOC)
Rule 211—Exemptions to Rule 210 (VOC)
Rule 212—Gasoline Storage (VOC)
Rule 213—Bulk Facilities, Petition for Annual Exemption (VOC)
Rule 214—Vapor Collection and Disposal System at Loading Facilities (VOC)
Rule 215—Storage of Gasoline Products at Bulk Facilities (VOC)
Rule 220—Dry Cleaning (VOC)
Rule 225—Solvent Storage (VOC)
Rule 231—Sulfur Oxides Emission Standard (SOx)

BEST COPY AVAILABLE

*Monterey Bay Unified APCD*

Rule 416—Organic Solvents (VOC)
Rule 418—Transfer of Gasoline Into Stationary Storage Containers (VOC)

*Placer County APCD*

Rule 213—Gasoline Transfer into Stationary Storage Containers (VOC)
Rule 307—Agricultural Burning Reports (TSP)
Rule 324—Residential Rubbish Burning (TSP)

*San Diego County APCD*

Rule 66—Organic Solvents (VOC)
Rule 67.8—Dry Cleaning Facilities using Halogenated Organic Solvents (VOC)
Rule 68—Fuel Burning Equipment (NOx)

*South Coast County AQMD*

Rule 1159—Nitric Acid Units—Oxides of Nitrogen (NOx)

*Tehama County APCD*

Rule 4.3—Particulate Matter (TSP)
Rule 4.8—Dust and Condensed Fumes (TSP)
Rule 4.9—Specific Contaminants (SOx)
Rule 4.10—Sulfur Content of Fuels (SOx)
Rule 4.13—Fuel Burning Equipment [deletion] (SOx, NOx)
Rule 4.14—Fuel Burning Equipment (NOx)

**EPA Evaluation**

EPA has evaluated these rules for consistency with the Clean Air Act, 40 CFR Part 51, and EPA policy. There are four revisions which represent relaxations of the current SIP. Three of the revisions pertain to agricultural burning rules and the fourth revision exempts turbine engines from NOx controls during certain modes of operation. All of the counties with these relaxed rules are in attainment with the standards for the applicable pollutants.

The first of these agricultural burn relaxations is a proposal to delete Butte County Rule 2A–2. Currently, both the Air Pollution Control Officer (APCO) and a health officer must approve all wood waste burning in Butte County. The deletion of Rule 2A–2 would remove the requirement that a health officer approve wood waste burning and would give the APCO total discretion. EPA is proposing approval of this deletion because the current rule is unnecessary, unenforceable, and not required by neighboring counties.

There are two rules for Placer County regarding agricultural burns which relax the current, federally-approved rules. Placer Rule 307 allows the APCO to determine reporting requirements during peak burn months. The approval of this rule would give the APCO increased flexibility during the agricultural burn season, and would not lead to an increase in TSP emissions.

The revision to Placer Rule 324 deletes the stacking requirements for residential burns. The current rule has not been enforced for residential burns. Further, Rule 308, which is applicable to residential burns, specifies that the burns must be prepared to minimize smoke; this implicitly regulates the stacking of materials. The Placer agricultural burn revisions are consistent with the federal rules for other California counties and EPA believes such revisions will not increase TSP emissions.

The fourth revision which is less stringent than the current SIP is San Diego Rule 68. This revision would exempt turbine engines from NOx requirements for thirty minutes each during start-up, shut down, and fuel switching. The current regulation is an unreasonable standard that cannot be complied with. EPA believes an emissions increase, if any, would be insignificant and would not adversely affect attainment status.

Of the remaining revisions, there are fourteen governing the emission of VOC's, two of which will reduce VOC emissions. These two revisions are: Bay Area Regulation 8, Rule 5, and San Diego Rule 66.

Bay Area Regulation 8, Rule 5, presents a new measure of vapor pressure, requires controls for certain smaller tanks, and provides more details on floating roofs and seals. The proposed revision will reduce VOC emissions and help the Bay Area achieve the ozone standard.

The second revision which would decrease VOC emissions is San Diego Rule 66. This rule would encourage the use of low VOC paints and clean-up compounds. Instead of reducing the amount of highly reactive compounds, revised Rule 66 reduces total VOC, and should aid in attainment of the ozone standard. All of the VOC revisions are approvable under Part D and section 110 of the Clean Air Act.

There are four revisions in this package which govern SOx emissions. Butte Rule 231, Sulfur Oxides Emission Standard, has been recodified. Tehama Rule 4.9 has changed the form of emissions limitations for sulfur compounds from .2% to 250 parts per million. Tehama Rule 4.10 eliminates all exemptions for sources burning natural gas. The rule has no effect on restrictions for sulfur content in liquid and solid fuel. Finally, Tehama Rule 4.13 was deleted since its requirements are included in the new portions of Rule 4.9.

EPA's review indicates that the deletion of Tehama Rule 4.13 and its replacement by Rules 4.9 and 4.14 should not impact emissions. With the exception of Tehama Rule 4.3, the rest of the rules do not have a net effect on emissions and do not impact the Air Quality Plan. The rest of the rules make minor administrative corrections, clarify procedures, and delete obsolete compliance schedules. Tehama Rule 4.3 reduces the particulate matter emission limit from 0.3 grains per cubic foot at standard conditions to 0.15 grains per cubic foot. It thus sets more stringent controls on particulate matter emissions, and is approvable under section 110 of the Clean Air Act.

EPA's detailed evaluation of the submitted rules is available at the EPA Region 9 office.

**EPA Proposed Actica**

These rules are consistent with the Clean Air Act, 40 CFR Part 51, and EPA policy. EPA thus proposes to approve all of these rules under section 110 and to approve the VOC rules under both section 110 and Part D of the Clean Air Act.

**Regulatory Process**

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (see 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

**Approval and Promulgation of Implementation Plans, Florida; Waste Pesticide Container Burning Rule**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** On September 6, 1985, the State of Florida submitted a waste pesticide container burning rule for EPA review. The rule was adopted by the Florida Department of Environmental Regulation on July 10, 1985, and became State-effective on July 30, 1986. The rule allows for the supervised burning of certain waste pesticide containers on the site of application under supervision.

**DATE:** To be considered, comments must reach us on or before June 15, 1987.

**ADDRESSES:** Written comments should be addressed to Rosalyn Hughes of EPA Region IV's Air Programs Branch (see EPA Region IV address below). Copies of the State's submittal are available for review during normal business hours at the following locations:

Bureau of Air Quality Management, Florida Department of Environmental Regulation, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32301

Environmental Protection Agency, Air Programs Branch—Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365.

**FOR FURTHER INFORMATION CONTACT:** Rosalyn Hughes, EPA Region IV, Air Programs Branch, at the address listed above, and phone (404) 347–2864 or FTS 257–2864.

**SUPPLEMENTARY INFORMATION:** The Florida Department of Environmental Regulation (DER), acting in response to the concerns of farmers, pesticide applicators, and other agricultural related parties regarding the disposal of waste pesticide containers, adopted a rule to allow controlled, limited open burning of specified groups of containers. The concerns about disposal of pesticide containers arose because many sanitary landfill operators either were reluctant or refused to accept the waste containers. The landfill operators associated the waste containers with hazardous waste. Problems also occurred in transporting waste containers from isolated fields to the often distant rural sanitary landfills. Essentially no practical alternative disposal method was available.

The DER investigated four possible alternative disposal methods other than sanitary landfilling. They were: (1) On-site burial of containers, (2) incineration, (3) recycling of used containers, and (4) open burning of limited quantities of containers. Three of the four methods were found to be impractical or unsound environmentally. Indiscriminately burying the containers could threaten the water table. No incinerators were in operation for the disposal of pesticide wastes. Recycling was not practical or economical under the present circumstances. After a thorough assessment of the impact of allowing open burning, the DER found that the open burning of properly cleaned waste pesticide containers could be accomplished in an environmentally sound manner.

The impact analysis was done through modelling and a general assessment of the background of the affected areas, which are rural and not heavily, if at all, industrialized.

**Proposed Action**

EPA has reviewed the submitted material and found it to meet present EPA requirements. Therefore, EPA is today proposing to approve Florida's rule for the open burning of waste pesticide containers and is soliciting public comment on it.

For further information on EPA's analysis, the reader may consult a Technical Support Document which contains a detailed review of the technical justification, including modelling analysis, legal impact and the economic impact. This is available at the EPA address given above. Interested persons are invited to submit comments on this proposed approval. EPA will consider all comments received within thirty days of the publication of this notice.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

## Approval and Promulgation of State Implementation Plans, Montana; Butte TSP Plan

**AGENCY:** Environmental Protection Agency.

**ACTION:** Proposed rule.

**SUMMARY:** This notice proposes to modify the March 4, 1980 conditions in the Montana State Implementation Plan (SIP) for attainment of the primary particulate standard in the Butte nonattainment area. EPA is proposing approval of the measures that were developed to reduce emissions from unpaved roads and an open cooper mine owned by Washington Construction. These were the primary sources of the particulate emissions in the Butte nonattainment area at the time of the nonattainment designation. However, studies indicate that wood smoke is the probable cause of the recent violations. EPA is, therefore, requiring the State to address residential wood combusion as part of the Butte TSP Control Plan.

**DATE:** Comments due July 13, 1987.

**ADDRESSES:** Written comments should be addressed to: Douglas M. Skie, Chief, Air Programs Branch, Environmental Protection Agency, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202–2405.

Copies of the submittals are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the follwing offices: Environmental Protection Agency, Region VIII, Air Programs Branch, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202–2405.

**FOR FURTHER INFORMATION CONTACT:** Lee Hanley, Air Programs Branch, Environmental Protection Agency, Denver Place, Suite 500, 999 18th Street, Denver, Colorado 80202–2405, (303) 293–1765.

**SUPPLEMENTARY INFORMATION:** In 1977, the Montana Air Quality Bureau (AQB) divided the State into various control regions and classified the air quality of each region as required by the 1977 Clean Air Act Amendments. One such region was the east portion of Butte which was classified nonattainment of the National Ambient Air Quality Stnadard (NAAQS) secondary particulate standard. (See 43 FR 8962, March 3, 1978.) Classification was made using October 1976 to September 1977 particulate data collected Greeley School which showed a geometric mean of 79 $\mu g/m^3$ as well as exceedances of the 24-hour secondary standard. The Butte nonattainment boundary was drawn by the AQB using air quality modeling information provided by the EPA and PEDCO (1977) and knowledge of the various sources of dust in Butte.

The AQB submitted the control region information to EPA on January 6, 1978. EPA reviewed the information and changed the designation from nonattainment of the secondary standard to nonattainment of both secondary and primary NAAQS

particulate standards based on data collected through the end of 1977. (See 44 FR 45420, August 2, 1979, and 45 FR 14036, March 3, 1980.

On April 24, 1979, the Butte SIP for attainment of the primary standard was submitted to EPA and included a request for delay in submission of the secondary standard plan for 18 months. The SIP identified fugitive emissions from paved roads and the open pit copper mine owned by the Anaconda Copper Company as the cause of the TSP problem. An analysis using the 1977 emission inventory and an acceptable diffusion model demonstrated that a strategy to control fugitive dust emissions would attain the annual primary standard by 1982. The State was proceeding to develop a regulation to control re-entrained dust from pave streets for an estimated reduction of 8 $\mu g/m^3$.

EPA gave conditional approval of the Arpil 24 submittal on March 4, 1980, 45 FR 14068, contingent upon the development and adoption of a revised airborne particulate rule and submission of a demonstration that the estimated reductions will be achieved. That rule was to be submitted to EPA by February 15, 1981; it was to be implemented so as to achieve the standard by December 1982.

In a separate action on March 4, 1980, 45 FR 14072, proposed approval of the 18 month extension for the submission of a revised particulate rule. That action was finalized on September 23, 1980, 45 FR 62982, in which EPA approved a schedule calling for the adoption and submission of an airborne particulate rule by February 15, 1981.

Studies which followed indicated that the airborne particulate rule was inappropriate. Therefore, the State proposed a new schedule specifying submittal of an effective plan by September 30, 1982. A plan was submitted on February 10, 1983, accompanied by a request for redesignation of the Butte TSP (primary and secondary) nonattainment area. The submittal included (1) a schedule for street sweeping and paving committed to by the Butte-Silver Bow local government and, (2) a commitment by the State to issue a permit to Anaconda limiting emissions from their mining operation. Internal EPA review of this submittal led to a requirement that the actual permit become part of the Plan.

On April 15, 1983, a permit was issued to Anaconda which specified emission controls and operating limits predicted to maintain compliance with the primary standard under all foreseen mining scenarios. A copy of the permit was submitted to EPA on April 18, 1983, and is part of the Butte TSP Plan. On June 7, 1983, the State submitted a document clarifying their authority to enforce conditions of the permit.

Mining operations at Anaconda ceased in April 1982. The mine (Berkeley Pit) was flooded with minimal plans for additional mining. The deterioration of the access roads and the poor economics of the mining industry made reopening of the mine highly improbable. Indefinite curtailment of all mining activities took place in June 1983. Anaconda continued to maintain the facility.

In addition to the conditions of the permit on the Anaconda operations, other parts of the February 1983 submittal were reviewed to determine the adequacy of the attainment demonstration. The review centered primarily on the State's choice to demonstrate compliance using the Industrial Source Complex Long Term (ISCLT) dispersion model. The model assumed mining would continue and included the conditions contained in the Anaconda air quality permit. Also, the model used meteorological data, temperature and wind data, from the Alpine site which is close to the mine.

Various future mining and control strategy scenarios were modeled. Two city activity levels (based on population) were evaluated and controls on the anticipated emissions defined as Level I and Level II. Level I is with no controls, and Level II is with 10% TSP controls achieved by street sweeping in the nonattainment area. The mine scenario evaluated three levels of controls on the mining activity: one consisted of 50% control on the active storage and crusher dump; the second assumed 70% control on haul roads; and the third assumed both controlling strategies together. Stripping ratio and total mining output were also varied so as to develop various options. (Stripping ratio is the volume of overburden to the volume of ore.)

Other permanent changes in mining activity include mining only in the East Pit and waste dumping only in the Hillcrest site. The East Pit is northeast of the nonattainment area. The change in the mining location from the previous site which was northwest of the Greeley site will have a significant effect on the nonattainment area. The wind direction in the Butte area is northwest to southeast. Mining originally was northwest of the Greeley School. Moving the mining activity to the east reduces the fugitive emission impact on the nonattainment area.

The result of the modeling analysis demonstrated that with the implementation of all permit conditions, the Butte nonattainment area would achieve the primary annual NAAQS for particulates.

The State concentrated its modeling efforts on the primary annual standard since it was the initial cause of the nonattainment designation. The primary 24-hour standard had not appeared to be a problem in the studies conducted or in the monitoring data.

After extensive study on the modeling analysis, the monitoring data and the Anaconda permit, EPA advised the State on May 30, 1985 of its conclusion that an attainment demonstration had only provided for the primary standards. The State responded on June 21, 1985, that it wished to revise its February 10, 1983 submittal by requesting approval of the primary TSP Plan and redesignation for attainment of the primary standards.

As EPA proceeded to process the State's request, EPA was informed that violations of the primary 24-hour standard had occurred for the first time. (The violation occurred in December 1985.)

The Anaconda permit, that is one of the primary control strategies to the Butte TSP Plan, had also undergone some changes. In October 1985, Washington Construction of Missoula, Montana purchased the Butte mining interest of Anaconda's partner company, Atlantic Richfield Corporation and announced intentions to resume mining activity. In December 1985, the Anaconda permit was transferred to Washington Construction, therefore binding them to the same operating permit conditions which were imposed on Anaconda. In July 1986, Washington Construction resumed mining operations in Butte.

At a meeting on May 20, 1986, EPA and the State agreed that the request for redesignation of the Butte nonattainment area could not be approved because of the violations in 1985.

On May 7, 1986, the State submitted a letter and a study indicating that the sources of the particulate emission have changed since the February 10, 1983 plan was developed. The 1986 study demonstrated that the violations occurred in the winter months, and that the primary source of the remaining particulate problem is from residential wood combustion. Based on the State's statistical analysis, EPA agrees that wood smoke is the most probable source of the winter violations. Since the violations that occurred were of the 24-hour primary TSP standard, the State is now required to do short-term modeling.

**EPA Action**

EPA is proposing approval of the control strategy submitted to meet the conditions in the March 4, 1980 conditional approval, as well as modifying the conditional approval to require the State to address the wood smoke problem. The controls that are being approved include sweeping and flushing of Continental Drive, paving and partial paving of 18 streets, and the permit to Washington construction Company (formally the Anaconda Minerals Company permit).

EPA is modifying the March 4, 1980 conditional approval by requiring the State to conclusively determine whether the recent violations are due to wood smoke emissions. Once a determination is made, a new control strategy will have to be incorporated into the Butte TSP Plan.

Under 5 U.S.C. 605(b), I certify that this SIP approval will not have a singnificant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

## Approval and Promulgation of Implementation Plans; Revision to the State of New Jersey Implementation Plan for Lead

**AGENCY:** Environmental Protection Agency.

**ACTION:** Proposed rule.

**SUMMARY:** This notice announces that the Environmental Protection Agency is proposing approval of a revision to the New Jersey State Implementation Plan (SIP) for lead. This revision consists of material prepared by the New Jersey Department of Environmental Protection (NJDEP) pursuant to a SIP commitment to conduct studies and implement appropriate actions to maintain the ambient air quality standard for lead in the vicinity of two facilities: Delco Remy in New Brunswick and Heubach Inc. in Newark. Among the actions proposed are specific emission limitations for Delco Remy and Heubach.

**DATES:** Comments must be received by June 15, 1987. Public comments on this document are requested and will be considered before taking final actions on this SIP revision.

**ADDRESSES:** All comments should be addressed to: Christopher J. Daggett, Regional Administrator, Envornmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

Copies of the SIP revision are available at the following addresses for inspection during normal business hours:

Environmental Protection Agency, Region II Office, Air Programs Branch, Room 1005, 26 Federal Plaza, New York, New York 10278

New Jersey Department of Environmental Protection, Division of Environmetal Quality, 401 East State Street, Trenton, New Jersey 08625.

**FOR FURTHER INFORMATION CONTACT:** Raymond Werner, Acting Chief, Air Programs Branch, Environmental Protection Agency, Room 1005, 26 Federal Plaza, New York, New York 10278, (212) 264–2517.

**SUPPLEMENTARY INFORMATION:**

### Background

On November 25, 1986 (51 FR 42565) the Environmental Protection Agency (EPA) approved the New Jersey State Implementation Plan (SIP) for the attainment and maintenance of the national ambient air quality standards for lead. As a part of its control strategy, the State committed in its SIP to conduct studies of lead emissions in the vicinity of the Delco Remy (New Brunswick) and Heubach (Newark) facilities and to implement appropriate actions to maintain the standard in both areas. These studies, known as reasonably available control technology (RACT)-plus, were to determine what control measures in addition to RACT, if any, were needed to attain and maintain the ambient standard for lead.

### The State Submittal

On December 1, 1986 the State of New Jersey sent EPA a draft SIP revision for Delco Remy and Heubach. The primary purpose of this submittal was to fulfill requirements necessary to complete the State's lead SIP. Today's action only discusses the adequacy and approvability of revisions to the New Jersey lead SIP as they relate to commitments made in the SIP with respect to the Delco Remy and Heubach facilities. A public announcement requesting comments on this SIP submittal was made in the *New Jersey Register* on March 2, 1987. EPA is proposing this SIP revision in parallel with New Jersey and will only take our final action after New Jersey completes its review and adoption process.

The specific revision and the results of EPA's review of it are discussed as follows.

NJDEP submitted to EPA its "RACT-plus" study report on Heubach in February, 1986 and on Delco Remy in June, 1986. The reports conclude that stack test emission rates were less than the allowable emission rate under existing emission limitations, predicted concentrations from dispersion modeling of actual stack and fugitive emissions were below the lead standard, and monitored ambient lead concentrations near the facilities are below the ambient lead standard. However, for maintenance of the ambient standard for lead, NJDEP has revised the facilities' operating permits to reflect only the lower, current actual lead emission rates at these facilities. For the Delco Remy facility, the permits were revised to specify an overall allowable emission reduction of sixty percent, and, for the Heubach facility, and overall reduction of eighty percent, as follows:

TABLE I.—REVISED ALLOWABLE EMISSION LIMITS CONTAINED IN PERMITS

| Delco Remy | | Heubach | |
|---|---|---|---|
| NJ stack No. | Allowable lead emission rate (pounds per hour) | NJ stack No. | Allowable lead emission rate (pounds per hour) |
| 005 | 0.050 | 004 | 0.520 |
| 006 | .150 | 012 | .033 |
| 009 | .160 | 013 | .003 |
| 014 | .150 | 014 | .003 |
| 020 | .850 | 015 | .048 |
| 026 | .120 | 016 | .050 |
| 031 | .099 | 017 | .084 |
| 042 | .250 | 018 | .048 |
| 043 | .350 | 023 | .006 |
| 050 | .110 | 025 | .030 |
| 052 | .240 | 026 | .008 |
| 053 | .110 | 035 | .002 |
| 054 | .120 | 036 | .006 |
| 055 | .120 | | |
| 056 | .120 | | |
| 057 | .120 | | |
| 058 | .120 | | |
| 060 | .200 | | |
| 065/062 | .305 | | |

These permits are already in effect and both Delco Remy and Heubach are in compliance with the revised emission limits.

NJDEP will continue to monitor in the vicinity of the two facilities at least until the end of September 1988, or until such time that NJDEP and EPA mutually agree that ambient monitoring is no longer necessary.

### Finding

EPA finds that the lower allowable emissions limits for these two facilities will insure continued maintenance of the lead standard at these locations.

EPA is soliciting public comments on this notice and on issues relevant to EPA's proposed action. Comments will be considered before taking final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments to the address above.

The revisions are being proposed under a procedure called "parallel processing" (47 FR 27073). If the proposed revisions are substantially changed, except as may be specified herein, EPA may request additional public comment. Otherwise, EPA proposes to take final rulemaking action as specified herein.

The final rulemaking action by EPA will occur only after the SIP revisions have been adopted by New Jersey and submitted to EPA for incorporation into the SIP. Parallel processing will reduce the time necessary for final approval of these SIP revisions by 3 to 4 months.

### Conclusion

EPA is proposing to approve the revision pertaining to the Delco Remy and Heubach facilities as a part of the New Jersey SIP. EPA is proposing to incorporate expressly the emission limitations for lead in the state permits for Delco Remy and Heubach into the SIP for the State New Jersey at 40 CFR Part 52, Subpart FF, at which time such limitations shall be effective and may only be revised by appropriate procedures under the Clean Air Act. This revision has been found to fulfill the commitment made by New Jersey in its lead SIP to study the facilities and implement additional control measures, if necessary.

This notice is issued as required by section 110 of the Clean Air Act, as amended. The Administrator's decision regarding the approval of this plan revision is based on its meeting the requirements of section 110 of the Clean Air Act and 40 CFR Part 51.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

## 40 CFR Parts 712 and 716

**[OPTS–84024; FRL–3200–4]**

## Addition of Chemicals to Information Rules; Certain Pesticide Inert Ingredients

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA proposes to require the reporting of information on chemical substances listed in this proposed rule. Both the Office of Toxic Substances and the Office of Pesticide Programs are concerned about the potential adverse human and environmental effects of these substances, because they may have uses in industrial/commercial formulations, and are used as inert ingredients in pesticide formulations. These substance would be added to the lists of chemical substances and mixtures in the Preliminary Assessment Information Rule (PAIR) (40 CFR Part 712), and the Health and Safety Data Reporting Rule (40 CFR Part 716). Under these rules, EPA would require manufacturers, importers, and processors of these substances to provide the Agency with production, end use, and exposure data, plus lists and copies of unpublished health and safety studies on the substances.

**DATE:** Written comments should be submitted to EPA by June 15, 1987.

**ADDRESS:** All comments should be sent in triplicate to: TSCA Public Information Office (TS–793), Office of Toxic Substances, Environmental Protection Agency, Rm. NE–G004, 401 M St., SW., Washington, DC 20460.

Comments should include the docket control number OPTS–84024. Comments received on this proposed rule will be available for reviewing and copying from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays, in Rm. NE–G004, at the address given above.

**FOR FURTHER INFORMATION CONTACT:** Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Rm. E–543, 401 M St., SW., Washington, DC 20460, Telephone: (202) (554–1404).

**SUPPLEMENTARY INFORMATION:**

### I. Statutory Authority

This rule is proposed under the authority of sections 8 (a) and (d) of the Toxic Substances Control Act (TSCA) (15 U.S.C. 2607 (a) and (d)).

### II. Regulatory Background

Under authority of section 8(a) of the TSCA, EPA promulgated PAIR (40 CFR Part 712). This model section 8(a) rule established standard reporting requirements for manufacturers and importers of the chemicals that the Agency lists in the rule. These manufacturers and importers are required to submit a one-time report on general volume, end use, and exposure information using the Preliminary Assessment Information Manufacturer's Report (EPA Form 7710–35). EPA uses this model section 8(a) rule to quickly gather current information on substances of concern.

Under the authority of section 8(d) of the TSCA, EPA issued the model Health and Safety Data Reporting Rule in 1982 (40 CFR Part 716, hereinafter referred to as the section 8(d) model rule). An amendment to the section 8(d) model rule was published in the Federal Register of September 15, 1986 (51 FR 32720). The amendment lengthened the rule's sunset provision, added a provision for biennial review, limited three reporting exemptions, clarified the rule's confidentiality provisions, and made technical revisions. The model rule contains standard reporting requirements for persons who manufacture, import, or process (or propose to manufacture, import, or process) chemical substances and mixtures that are listed in the rule. The model rule requires these persons to provide EPA with copies and lists of health and safety studies pertaining to the listed substances and mixtures. EPA has the authority to amend the list of substances and mixtures in the section 8(d) model rule. Generally, the Agency may add substances and mixtures to the model rule listing by means of a chemical-specific amendment to the model rule, as EPA is doing with this proposed rule.

The reporting requirements of the model rule are applicable as of the date a substance or mixture is listed in the rule, and remain in effect after the listing date. The model rule also is applicable to persons who manufactured, imported, or processed a listed substance or mixture (or proposed to do so) during the 10 years prior to the listing date. Most persons subject to the rule are required to submit two types of data to EPA:

1. Copies of unpublished health and safety studies pertaining to substances and mixtures listed in the rule, provided that such studies are in the possession of the manufacturer, importer, or processor.

2. Lists of unpublished health and safety studies which are being conducted by (or for) the manufacturer, importer, or processor, or which are known to but not in the possession of the manufacturer, importer, or processor.

Potential respondents to this proposed rule should refer to 40 CFR Part 716 and its amendments (51 FR 32720) for complete information on section 8(d) reporting requirements.

## III. Summary of This Proposed Rule

EPA is proposing to add certain chemical substances suspected of having adverse effects on human health and the environment to the lists of chemical substances and mixtures in PAIR and the section 8(d) model rule. Through these amendments, EPA would trigger reporting of production, end use, exposure, and unpublished health and safety data.

Manufacturers and importers of the substances are subject to reporting under PAIR. Reporting under PAIR involves a one-time submission of the rule's reporting form for each listed chemical produced at a particular plant site. Complete details of the reporting requirements, including exemptions and a facsimile of the reporting form, are fully described in 40 CFR Part 712. Under the section 8(d) model rule, manufacturers, importers, and processors of the listed substances are subject to reporting. The section 8(d) reporting requirements for a substance remain in effect for 10 years after adding such substances to the rule. Detailed guidance for reporting unpublished health and safety data is provided in 40 CFR Part 716 and its amendments (51 FR 32720). Reporting exemptions are also found in these references.

SUBSTANCES PROPOSED FOR ADDITION TO BOTH PAIR AND 8(d)

| CAS No. | Trivial/common chemical name | TSCA chemical substance inventory name |
|---|---|---|
| 68-12-2 | Dimethyl formamide | Formamide, *N,N*-dimethyl- |
| 75-37-6 | 1,1-Difluoroethane | Ethane, 1,1-difluoro- |
| 75-43-4 | Dichlorofluoromethane | Methane, dichlorofluoro- |
| 75-45-6 | Chlorodifluoromethane | Methane, chlorodifluoro- |

SUBSTANCES PROPOSED FOR ADDITION TO 8(d) ONLY

| CAS No. | Trivial/common chemical name | TSCA chemical substance inventory name |
|---|---|---|
| 76-13-1 | 1,1,2-Trichloro-1,2,2-trifluoroethane | Ethane, 1,1,2-trichloro-1,2,2-trifluoro- |
| 80-62-6 | Methyl methacrylate | 2-Propenoic acid, 2-methyl-, methyl ester |
| 97-86-1 | Butyl methacrylate | 2-Propenoic acid, 2-methyl-, butyl ester |
| 100-41-4 | Ethylbenzene | Benzene, ethyl- |
| 140-88-5 | Ethyl acrylate | 2-Propenoic acid, ethyl ester |

## IV. Background, Objectives, and Rationale For This Proposed Rule

EPA's Office of Toxic Substances (OTS) is conducting an evaluation of the potential hazards associated with certain chemical substances.

This proposed rule applies to certain suspect toxic substances used as "inert" pesticide ingredients. These substances are covered by TSCA because of various TSCA identified uses, and have not previously been added to PAIR and/or the section 8(d) model health and safety data rule.

A review of "inert" ingredients in pesticide formulations by the Office of Pesticide Programs (OPP) and OTS revealed that certain of these substances have similar chemical structures to other TSCA regulated substances that are known to demonstrate carcinogenicity.

teratogenicity, neurotoxic effects or reproductive effects in laboratory studies. Other TSCA regulated substances structurally similar to the substances used as pesticide inerts have demonstrated effects on humans, are known to bioaccumulate, or have other known adverse ecological effects such as toxicity to fish.

One major problem the Agency faced in attempting to evaluate these selected substances is that there was little or no available toxicity, use, production, or exposure data. The substances have not been extensively studied by the scientific community, and the Agency has limited data on their potential for adverse health and environmental effects. OTS is concerned that these TSCA-covered substances may have significant industrial/commercial applications in addition to their use in pesticide formulations.

Although EPA has conducted preliminary evaluations of the health and environmental risks posed by these substances, the Agency wants to ensure that it has all reasonably ascertainable production, end use, exposure, and unpublished health and safety data on the substances before undertaking in-depth risk assessment or further regulatory action. Therefore, OTS is proposing to gather current data under sections 8(a) and (d) of TSCA in order to perform risk identification and assessment activities to support EPA's decisionmaking under TSCA sections 4, 5, 6, 8, and 9. Information to be gathered by this proposed rule would also prove useful to OPP, especially any significant new unpublished health and safety data.

## V. Economic Analysis

EPA's analysis of the reporting requirements of this proposed rule is contained in two documents, both of which are in the public record for this proposed rule (OPTS–84024).

Based on EPA's experience with section 8(a) and (d) reporting rules, the Agency estimates that the total reporting costs for establishing reporting requirements for the listed substances would be $291,087. In addition, the cost of this proposed rule would be low in comparison with its potential benefits. Production, end use, and exposure data and unpublished health and safety studies concerning these substances would substantially improve EPA's ability to identify and assess potential public health and environmental problems with regard to the substances.

The estimated reporting costs (for the chemical industry as a whole) are broken down as follows:

| | |
|---|---|
| *For PAIR* | |
| Initial corporate review to determine if subject to the rule and file search to identify manufacture and importation sites | $72,352 |
| Form completion photocopying, and managerial review | 86,688 |
| Subtotal | 159,040 |
| *For 8(d)* | |
| Cost of file search: | |
| Initial review | 45,900 |
| Site identification | 14,688 |
| File search at site | 28,512 |
| Listing ongoing studies | 1,824 |
| Copying studies | 5,933 |
| Managerial reveiw | 29,376 |
| Ongoing reporting | 5,814 |
| Subtotal | 132,047 |
| Total for both reporting activities | 291,087 |

## VI. Rulemaking Record

EPA has established a record for this rulemaking (docket control number OPTS–84024). The record includes basic information considered by the Agency in developing this proposed rule. EPA will supplement the record with additional information as it is received. The record now includes the following:

1. *USEPA. 1978.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP) for Chloroethane (09/29/78). Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

2. *USEPA. 1980.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP). August 1978–August 1978. Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

3. *USEPA. 1981a.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP) for Chloroethane (03/02/81). Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

4. *USEPA. 1981b.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP) for Dichloropropane (05/08/81). Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

5. *USEPA. 1981c.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP) for Ethyl Acrylate (08/06/81). Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

6. *USEPA. 1981d.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP) for Dimethylformamide (09/18/81). Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

7. *USEPA. 1984.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP) for Diallyl Phthalate (09/04/84). Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

8. *USEPA. 1985.* U.S. Environmental Protection Agency. Chemical Hazard Information Profile (CHIP) for Methyl Bromide (02/20/85). Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

9. *USEPA. 1987.* U.S. Environmental Protection Agency. Economic Impact Analysis for adding Thirty-one Inert Pesticide Ingredients to the Preliminary Assessment Information Rule. Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

10. *USEPA. 1987.* U.S. Environmental Protection Agency. Cost of Amending the Health and Safety Data Reporting Rule for 32 Inert Pesticide Ingredients. Washington, DC: U.S. Environmental Protection Agency, Office of Pesticides and Toxic Substances.

The Agency will accept additional materials for inclusion in the record at any time between the date of this proposed rule and EPA's designation of the complete record. EPA will identify the complete rulemaking record by the date of promulgation. A public version of this record, containing sanitized copies of documents from which confidential business information has been removed, is available to the public in the OTS Public Information Office from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. The OTS Public Information Office is located in Rm. NE–G004, 401 M. St., SW., Washington, DC.

## VII. Regulatory Assessment Requirements

### *A. Executive Order 12291*

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this proposed rule is not a "major" rule because it does not have an effect on the ecomomy of $100 mill[illegible] or more. The Agency also anticipate[illegible] that this proposed rule would not h[illegible]

significant effect on competition, costs, or prices.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

*B. Regulatory Flexibility Act*

Under the Regulatory Flexibility Act, 5 U.S.C. 605(b), EPA has determined that this proposed rule would not have a significant impact on a substantial number of small businesses. The section 8(a) PAIR exempts "small" manufacturers and importers (as defined in 40 CFR 712.25) from reporting section 8(a) data on these substances. In a study of respondents to the section 8(d) model rule, EPA found that only 1 of 69 respondents had less than $100 million in sales. EPA does not expect this proposed amendment of the model rule to affect that distribution of burden within the chemical industry.

*C. Paperwork Reduction Act*

OMB has approved the information collection requirements contained in this proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control number 2070–0054 to the section 8(a) PAIR and OMB control number 2070–0004 to the 8(d) model rule and to subsequent amendments to these rules. Comments on these requirements should be submitted to the OMB Office of Information and Regulatory Affairs, marked Attention: Desk Officer for EPA. The final rule package will respond to any OMB or public comments on the information collection requirements.

**List of Subjects in 40 CFR Parts 712 and 716**

Chemicals, Environmental protection, Hazardous substances, Health and safety, Recordkeeping and reporting requirements.

Dated: May 4, 1987.

**John A. Moore,**

*Assistant Administrator for Pesticides and Toxic Substances.*

Therefore, it is proposed that 40 CFR Parts 712 and 716 be amended as follows:

## PART 712—[AMENDED]

1. In Part 712.

a. The authority citation for Part 712 would continue to read as follows:

**Authority: 15 U.S.C. 2607(a).**

b. Section 712.30 would be amended by adding paragraph (v) to read as follows:

**§ 712.30 Chemical lists and reporting periods.**

* * * * *

(v) Manufacturers and importers of the substances listed below must submit a Preliminary Assessment Information Manufacturer's Report for each site at which they manufacture or import each substance by the reporting date shown in the table below. The substances are listed in Chemical Abstract Service Registry Number order. Typically EPA lists the trivial or common name first, then following the symbol "—", EPA lists the substance by its TSCA Substance Inventory name. Whenever EPA lists a single name, the name may be either a trivial name, a common name, or the TSCA Substance Inventory name.

| CAS No. | Substance | Effective date | Reporting date |
|---|---|---|---|
| 68-12-2 | Dimethyl formamide—Formamide, *N,N*-dimethyl- | ( / / ) | ( / / ) |
| 74-83-9 | Methyl bromide—Methane, bromo- | ( / / ) | ( / / ) |
| 75-00-3 | Chloroethane—Ethane, chloro- | ( / / ) | ( / / ) |
| 75-37-6 | 1,1-Difluoroethane—Ethane, 1,1-difluoro- | ( / / ) | ( / / ) |
| 75-43-4 | Dichloromonofluoromethane—Methane, dichlorofluoro- | ( / / ) | ( / / ) |
| 75-45-6 | Chlorodifluoromethane—Methane, chlorodifluoro- | ( / / ) | ( / / ) |
| 75-52-5 | Nitromethane—Ethane, nitro- | ( / / ) | ( / / ) |
| 75-68-3 | 1-Chloro-1,1-difluoroethane—Ethane, 1-chloro-1,1-difluoro- | ( / / ) | ( / / ) |
| 79-00-5 | 1,1-2-Trichloroethane—Ethane, 1,1,2-trichloro- | ( / / ) | ( / / ) |
| 79-24-3 | Nitroethane-Ethane, nitro- | ( / / ) | ( / / ) |
| 88-04-0 | *p*-Chloro-*m*-xylenol—Phenol 4-chloro-3,5-dimethyl- | ( / / ) | ( / / ) |
| 95-14-7 | 1,2,3-Benzotriazole—1*H*-Benzotriazole | ( / / ) | ( / / ) |
| 96-48-0 | Butyrolactone—2(3*H*)-Furanone, dihydro- | ( / / ) | ( / / ) |
| 100-02-7 | *p*-Nitrophenol—Phenol, 4-nitro- | ( / / ) | ( / / ) |
| 101-84-8 | Diphenyl oxide—Benzene, 1,1'-oxybis- | ( / / ) | ( / / ) |
| 102-71-6 | Triethanolamine—Ethanol, 2,2',2''-nitrilotris- | ( / / ) | ( / / ) |
| 107-98-2 | 1-Methoxy-2-propanol—2-Propanol, 1-methoxy- | ( / / ) | ( / / ) |
| 111-42-2 | Diethanolamine—Ethanol, 2,2'-iminobis- | ( / / ) | ( / / ) |
| 111-76-2 | 2-Butoxyethanol—Ethanol, 2-butoxy- | ( / / ) | ( / / ) |
| 111-77-3 | Diethylene glycol monomethyl ether—Ethanol, 2-(2-methoxyethoxy)- | ( / / ) | ( / / ) |
| 111-90-0 | Diethylene glycol monoethyl ether—Ethanol, 2-(2-ethoxy ethoxy)- | ( / / ) | ( / / ) |
| 120-32-1 | 2-Benzyl-4-chlorophenol—Phenol, 4-chloro-2-(phenylmethyl)- | ( / / ) | ( / / ) |
| 124-16-3 | Butoxyethoxy-2-propanol—2-Propanol, 1-(2-butoxyethoxy)- | ( / / ) | ( / / ) |
| 131-17-9 | Diallyl phthalate—1,2-Benzenedicarboxylicacid, di-2-propenylester | ( / / ) | ( / / ) |
| 142-28-9 | 1,3-Dichloropropane—Propene, 1,3-dichloro- | ( / / ) | ( / / ) |
| 577-11-7 | Dioctyl sodium sulfosuccinate—Butanedioic acid, sulfo-, 1,4-bis(2-ethylhexyl)ester, sodium salt | ( / / ) | ( / / ) |
| 5131-66-8 | 1-Butoxy-2-propanol—2-Propanol, 1-butoxy- | ( / / ) | ( / / ) |
| 25168-06-3 | Isopropyl phenol—Phenol, (1-methylethyl)- | ( / / ) | ( / / ) |
| 25498-49-1 | Tripropylene glycol monomethyl ether—Propanol, [2-(2-methoxymethylethoxy)methylethoxy]- | ( / / ) | ( / / ) |
| 29385-43-1 | Tolyl triazole—1*H*-Benzotriazole, methyl- | ( / / ) | ( / / ) |
| 34590-94-8 | Dipropylene glycol monomethyl ether—Propanol, (2-methoxymethylethoxy)- | ( / / ) | ( / / ) |

## PART 716—[AMENDED]

2. In Part 716:

a. The authority citation for Part 716 would continue to read as follows:

**Authority: 15 U.S.C. 2607(d).**

b. By adding substances to paragraph (a)(1) numerically by CAS Number and alphabetically to paragraph (a)(2) of § 716.120 to read as follows:

**§ 716.120 Substances and listed mixtures to which this subpart applies.**

BILLING CODE 6560-50-M

## 40 CFR Part 712

[OPTS-82030; FRL-3200-1]

## Chemical Information Rules; Addition of Chemicals

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is proposing to add 24 chemical substances to the list of substances identified in the Preliminary Assessment Information Rule (PAIR). Once EPA lists these substances in the PAIR, persons who manufacture or import the listed substances would be required to submit production volume, end use, and exposure data to EPA. The agency will use the reported data to evaluate risks associated with these substances.

**DATE:** Written comments on this proposed rule should be submitted by June 15, 1987.

**ADDRESS:** Comments, in triplicate, should bear the docket control number OPTS-82030 and should be submitted to: TSCA Public Information Office (TS-793), Office of Toxic Substances, Environmental Protection Agency, Rm. NE-G004, 401 M St., SW., Washington, DC 20460.

All written comments on this proposed rule will be available for public inspection in Rm. NE-G004 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, DC 20460, Telephone: (202) 554-1404.

**SUPPLEMENTARY INFORMATION:** EPA is proposing to add 24 chemical substances to the list of chemicals identified in PAIR. Once these substances are added to PAIR, manufacturers and importers of these substances would be required to provide EPA with a Preliminary Assessment Information Report for each plant site at which these substances are manufactured or imported.

### I. Authority

Pursuant to section 8(a) of the Toxic Substances Control Act (TSCA, 15 U.S.C. 2607(a)), EPA promulgated PAIR (40 CFR Part 712). This model section 8(a) rule established standard reporting requirements for manufacturers and importers of the chemical substances listed in the rule. These manufacturers and importers are required to submit a one-time report on production volume, end use, and exposure using the Preliminary Assessment Information Manufacturer's Report (EPA Form 7710-35). EPA uses this model section 8(a) rule to quickly gather current information on substances of concern.

### II. Summary of Proposed Reporting Requirements

Complete details of the reporting requirements, including exemptions and a facsimile of the reporting form, are fully described in 40 CFR Part 712.

TSCA section 8(a) reports must be sent to: Document Processing Center (TS-790), Office of Toxic Substances, Environmental Protection Agency, Rm. L-100, 401 M St., SW., Washington, DC 20460, ATTN: PAIR Reporting

SUBSTANCES PROPOSED FOR ADDITION TO PAIR

[Listed alphabetically by TSCA inventory name]

| Substance | CAS number |
|---|---|
| Acetic acid, 2-phenylethyl ester | 103-45-7 |
| Barium chloride | 10361-37-2 |
| Benzeneethanol | 60-12-8 |
| Bromine | 7726-95-6 |
| Cyclohexene, 4-ethenyl- | 100-40-3 |
| Ferromanganese | 12604-53-4 |
| Hydrocyanic acid | 74-90-8 |
| Hydrofluoric acid | 7664-39-3 |
| Magnesium hydroxide | 1309-42-8 |
| Manganese oxide | 1313-13-9 |
| Mercury chloride | 7487-94-7 |
| Molybdenum oxide | 1313-27-5 |
| Nitric acid, silver (1+) salt | 7761-88-8 |
| Palladium chloride | 7647-10-1 |
| Phosphorus | 7723-14-0 |
| Selenium | 7782-49-2 |
| Silver | 7440-22-4 |
| Sodium fluoride | 7681-49-4 |
| Sodium hydroxide | 1310-73-2 |
| Sulfuric acid, cobalt (2+) salt (1:1) | 10124-43-3 |
| Sulfuric acid, manganese (2+) salt (1:1) | 7785-87-7 |
| Titanium dioxide | 13463-67-7 |
| Tungsten carbide | 12070-12-1 |
| Vanadium oxide | 1314-62-1 |

As part of an ongoing effort to coordinate information gathering requests from different offices in EPA, this proposed rule includes chemical substances nominated by the Office of Air Quality Planning and Standards (OAQPS), and the Office of Toxic Substances. This coordination will lead to efficient use of resources for both industry and the government by avoiding duplicative information

requests by multiple offices in EPA. This savings will be reflected in reduced Agency implementation costs and industry reporting costs.

The nominating office and the particular reasons for each office's information requests on the substances listed in this proposed rule are discussed in Unit III of this proposed rule.

## III. Agency Rationale and Objectives

### *A. Office of Air Quality Planning and Standards*

EPA's Office of Air Quality Planning and Standards (OAQPS) needs basic data on the production and emissions of 21 chemical substances and has requested that this information be gathered through adding these substances to the list of substances identified in the PAIR. Once EPA lists these substances in the PAIR, persons who manufacture or import the listed substances would be required to submit production volume, end use, and exposure data to EPA.

A necessary step in the regulatory program for addressing toxic air pollutants is a preliminary ranking and screening of substances that have been identified as potential air pollutants. The purpose of ranking and screening is to be able to select, from a large number of candidates, those substances most deserving of closer attention and further analysis by EPA. Ideally, a full range of toxicological and epidemiological information, coupled with detailed estimates of current emissions and human exposure, would be utilized to rank and screen the identified substances. However, such complete information is seldom, if ever, available. Furthermore, the number of candidates is potentially very large and the resources required to develop complete information prohibitive. For these reasons, early prioritization and screening must be based on limited, readily available data and an evaluation process subsequently used that provides opportunity for further refinement of the list of candidates.

Fourteen of the 21 chemical substances nominated by OAQPS are currently included in the prioritization and screening effort to determine which chemicals are to receive regulatory assessment. Several types of readily available information are used in making this determination. These include health effects information and estimates of the potential for population exposure. The potential for population exposure may be estimated for volatility information and from production volume such as that obtained under this rule. The 14 substances (listed here by the common name) which are being added to the PAIR are: Barium Chloride, Cobaltous Sulfate, Ferromanganese, Magnesium Hydroxide, Manganese Dioxide, Manganese (II) Sulfate (1:1), Molybdenum Trioxide, Palladium (II) Chloride, Silver, Silver Nitrate, Sodium Fluoride, Titanium Dioxide, Tungsten Carbide, and Vanadium Pentoxide.

The extent of the information need is similar to the data gathered through the TSCA Inventory Update Rule, published in the Federal Register of June 12, 1986 (51 FR 21438). However, the Inventory Update rule specifically exempts manufacturers and importers of most inorganic substances (including those substances nominated by OAQPS for this proposal rule) from reporting. This exemption was included to avoid unnecessary reporting on the many inorganic substances not currently of interest to EPA for risk assessment review. By using PAIR to selectively obtain needed production, end use, and exposure data on those inorganic substances identified by Agency programs for possible review, EPA can efficiently obtain the data it needs on those specific substances while minimizing overall reporting burdens.

The remaining seven chemical substances nominated by OAQPS have already been selected for regulatory assessment. These substances (again, listed by common name) are: Bromine, Hydrocyanic Acid, Hydrogen Fluoride, Mercuric Chloride, Phosphorus, Selenium, and Sodium Hydroxide. The information gathered on these substances will serve as part of the basis for decisions on the need to further assess the substances as toxic air pollutants under the Clean Air Act (42 U.S.C. 7401–7626.) Listing these substances under PAIR does not indicate that they are going to be regulated under the Clean Air Act, only that they are undergoing regulatory assessment.

### *B. Office of Toxic Substances*

The Office of Toxic Substances (OTS) needs up-to-date information on the manufacture and import of three chemical substances whose common names are: 2-phenylethanol, 2-phenylethyl acetate, and 4-vinylcyclohexene. The information obtained on these substances will be used by OTS in risk analysis. These substances are discussed in the paragraphs below.

#### 1. 2-Phenylethanol and 2-Phenylethyl Acetate

EPA is proposing to add 2-phenylethanol, CAS No. 60–12–8, and 2-phenylethyl acetate, CAS No. 103–45–7, to the PAIR list. EPA's primary concern for both 2-phenylethanol and 2-phenylethyl acetate is their use as a fragrance in detergents, and in air fresheners that are used in airplanes and in various public places. The chemical substance 2-phenylethanol imparts a rose odor, while 2-phenylethyl acetate has a peach-like fragrance. 2-Phenylethanol is also used as an intermediate in organic synthesis and has been patented recently for use as a solvent in gelled, nonpigmented wood stains and in hard surface cleaners.

Worker exposure to 2-phenylethanol during the chemical manufacturing process may be limited by the use of closed batch production processes. Consumers can be exposed to 2-phenylethanol and 2-phenylethyl acetate as a result of the use of detergents and air-fresheners. Consequently, consumer exposure can occur by inhalation and dermal contact. Since 2-phenylethanol has reported teratogenic activity, these exposures are of particular concern.

There is no up-to-date information on the import and manufacture volumes of 2-phenylethanol and 2-phenylethyl acetate. Because these data would be important for risk analysis on these two substances, EPA is proposing to add 2-phenylethanol and 2-phenylethyl acetate to the PAIR list.

#### 2. 4-Vinylcyclohexene

EPA is proposing to add 4-vinylcyclohexene, CAS No. 100–40–3, to the list of chemical substances identified in the PAIR. The primary use of 4-vinylcyclohexene is as a site-limited intermediate in the production of 4-vinylcyclohexene diepoxide, which is then used to make epoxy resins. 4-Vinylcyclohexene is also a byproduct of synthetic rubber production. Exposure could occur dermally or through inhalation. Studies on 4-vinylcyclohexene showed limited evidence of carcinogenicity. No data are available on worker exposure during manufacture and use in the United States. This information is necessary to determine if a risk assessment is required.

## IV. Release of Aggregate Data

The Agency may release aggregate statistics according to the procedures prescribed in a rule related notice published in the Federal Register of June 13, 1983 (48 FR 27041). Included in the notice are procedures for requesting exemptions from the release of aggregate data. Exemption requests concerning the release of aggregate data on any chemical substance must be

received by EPA no later than 60 days after the effective date of the final rule.

## V. Economic Analysis

EPA estimates the total reporting cost of this proposed rule would be $596,400. To calculate this figure EPA used the non-CBI TSCA Inventory plus current information from other published sources to generate a list of manufacturers and importers of these chemical substances. After excluding firms which reported no production or importation, 324 companies were identified as possible manufacturers or importers of the substances. Since 45 of these companies may qualify as a small business as defined in 40 CFR 712.25(c), EPA expects 279 firms to report a total of 420 reports.

The estimated total reporting costs are as follows:

| | |
|---|---|
| 420 reports at $774/report | $325,080 |
| Plus 420 familiarization cases at $646 case | 271,320 |
| Total | 596,400 |
| Average cost per site equals | 1,420 |
| Average cost per firm equals | 2,138 |

## VI. Rulemaking Record

The following documents constitute the rulemaking record for this proposed rule (docket control number OPTS–82030). All of these documents are available to the public in the OTS Public Reading Room from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The OTS Reading Room is located at EPA Headquarters, Rm. NE–G004, 401 M St., SW., Washington, DC.

1. Preliminary Assessment Information Rule (40 CFR Part 712).

2. Economic analysis of this proposed rule.

3. A chemical hazard informaton profile for 4-Vinylcyclohexene.

4. A chemical hazard information profile for 2-Phenylethanol and 2-Phenylethyl Acetate.

5. Health effects and use information on the OAQPS chemical substances nominated for this rule.

EPA will identify the complete rulemaking record on or before the date of promulgation of the final rule, as prescribed by section 19(a)(3) of TSCA, and will accept additional material for inclusion in the record at any time between the date of this document and the designation of the complete record for this rule.

## VII. Regulatory Assessment Requirements

### *A. Executive Order 12291*

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore requires a regulatory impact analysis. The Agency has determined that this proposed rule is not "major" because it would not have an effect of $100 million or more on the economy. EPA also anticipates that this proposed rule would not have a significant effect on competition, costs, or prices.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

### *B. Regulatory Flexibility Act*

Since this proposed rule would exempt "small" manufacturers and importers (as defined in 40 CFR 712.25(c)) from reporting on these substances, EPA has determined that this proposed rule would not have a significant economic impact on a substantial number of small entities.

### *C. Paperwork Reduction Act*

OMB has approved the information collection requirements contained in this proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. and has assigned OMB Control Number 2070–0054. Comments on these requirements should be submitted to OMB's Office of Information and Regulatory Affairs, marked "Attention: Desk Officer for EPA." The final rule package will respond to any OMB or public comments on the information collection requirements.

## List of Subjects in 40 CFR Part 712

Chemicals, Environmental protection, Recordkeeping and reporting requirements.

Dated: May 4, 1987.

**John A. Moore,**

*Assistant Administrator for Pesticides and Toxic Substances.*

Therefore, it is proposed that 40 CFR Part 712 be amended as follows:

## PART 712—[AMENDED]

1. The authority citation for Part 712 would continue to read as follows:

**Authority:** 15 U.S.C. 2607(a).

2. In § 712.30(v) by adding in CAS No. sequence certain chemical substances to read as follows:

**§ 712.30 Chemical lists and reporting periods.**

* * * * *

(v) * * *

| CAS No. | TSCA chemical substance inventory name | Effective date | Reporting date |
|---|---|---|---|
| * | * | * | * |
| 60-12-8 | Benzeneethanol | ( / /87) | ( / /87) |
| * | * | * | * |

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 73

[MM Docket No. 87-6]

## Amendment of Part 73 To Authorize the Use of Multiple Synchronous Transmitters by AM Broadcast Stations

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of inquiry; extension of comment period.

**SUMMARY:** This order extends the time for filing comments in MM Docket No. 87-6, concerning use of multiple synchronous transmitters by AM broadcast stations (52 FR 8065, March 16, 1987), in response to a Motion for Extension of Time filed by the Association for Broadcast Engineering Standards, Inc.

**DATES:** Comments must be filed on or before July 7, 1987, and reply comments on or before August 6, 1987.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Bernard Gorden, Policy and Rules Division, Mass Media Bureau, (202) 632-9660.

**SUPPLEMENTARY INFORMATION:**

### Order Granting Motion for Extension of Time for Filing Comments

In the matter of amendment of Part 73 to authorize the use of Multiple Synchronous Transmitters by AM Broadcast Stations; MM Docket No. 87-6.

Adopted: April 30, 1987.
Released: May 5, 1987.
By the Chief, Mass Media Bureau.

1. On January 15, 1987, the Commission adopted a *Notice of Inquiry* in MM Docket No. 87-6 to consider provision of standards for the use of multiple synchronous transmitters by AM broadcast stations. The *Inquiry* was released on March 3, 1987, with comments due by May 4, 1987 and reply comments due by June 3, 1987.

2. On April 28, 1987, the Association For Broadcast Engineering Standards, Inc. ("ABES"), by its attorneys, submitted a motion for extension of time for filing comments and reply comments to July 7, 1987 and August 7, 1987, respectively. ABES argues that the requested extension is necessary in order to allow for the filing by station KROL, Laughlin, Nevada of the first test data and reports from its developmental AM synchronous transmitter operations. ABES states that it has been anxiously awaiting this filing, particularly because the measurements and data from the KROL tests would enhance the record in the captioned proceeding and could form the basis of very useful comments. ABES anticipates that the initial reports from KROL would be filed very soon and that a 60 day extension would allow parties sufficient time to comment on these reports.

3. Keeping in mind that § 1.46(a) of the Commission's rules provides that extensions of time should not be routinely granted, we believe that the circumstances in this case warrant grant of an extension of 60 days for submission of comments. In granting the experimental (developmental) authorizations for station KROL and others, we set as a condition of those grants that licensees file comments to the *Inquiry* and make detailed progress reports on their operations. None of these licensees, however, have yet to commence operational testing. Therefore, in light of their delay in initiating these experimental operations and the critical role the results of these tests were to have played in this proceeding, an extension of time is appropriate. It will provide commenters to this proceeding an opportunity to prepare and present their views on data from actual operations of synchronous transmitters. The critical importance of these results to the ultimate success of this docket outweighs any resultant delay.

4. Accordingly, it is ordered that the Motion To Extend Comments filed by the Association For Broadcast Engineering Standards, Inc. is granted and that the dates for filing comments and reply comments are extended to July 7, 1987 and August 6, 1987, respectively.

5. This action is taken pursuant to authority found in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and §§ 0.204(b), 0.283, 1.46 and 1.45 of the Commission's rules.

Federal Communications Commission.

**James C. McKinney,**
*Chief, Mass Media Bureau.*

# Notices

Federal Register
Vol. 52, No. 93
Thursday, May 14, 1987

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## ACTION

### VISTA Region 6 Literacy Corps Project; Availability of Funds

**AGENCY:** ACTION.

**ACTION:** Notice of Availability of Funds; VISTA Region 6 Literacy Corps Project.

ACTION Region 6 (Arkansas, Louisiana, New Mexico, Oklahoma, Texas, Kansas, Missouri) announces the availability of funds for fiscal year 1987 for a new VISTA Literacy Corps grant authorized by section 109 of the Domestic Volunteer Service Act Amendments of 1986 (Pub. L. 99–551). The VISTA Literacy Corps grant will be awarded for up to a twelve month period. No requests for renewals or continuations may be sought by the grantee under this announcement.

Application packages and technical assistance on grant preparation are available from: Region 6—Willard Labrie, ACTION, 626 Main Street, Suite 102, Baton Rouge, Louisiana 70801, 504–383–0471.

#### A. Background and Purpose

Congress created Volunteers In Service To America (VISTA) in 1964 to alleviate and eliminate poverty and its related problems in the United States. VISTA is a full-time, year-long volunteer program which encourages and enables men and women 18 years and older from all backgrounds to perform meaningful and constructive volunteer service. The Volunteers live among, and at the economic level of, the low-income people served. The VISTA program has served poor individuals most effectively by assisting low-income communities and residents to develop the facility, skills, and resources needed for achieving self-sufficiency. VISTA also enlists the commitment and support of the private sector toward attainment of this goal. Literacy training and education represent a longstanding and integral part of the VISTA mission. VISTA Volunteers have been involved in the mobilization of community efforts to combat illiteracy among disadvantaged populations since the inception of the VISTA program.

The Domestic Volunteer Service Act Amendments of 1986 directed the VISTA program to commit additional volunteers to the literacy challenge through the formation of the VISTA Literacy Corps.

The statutory purpose of the VISTA Literacy Corps is to use VISTA Volunteers in developing, strengthening, supplementing and expanding the literacy efforts of both public and private nonprofit organizations at the local, State, and Federal levels to mobilize local, State, Federal and private sector financial and volunteer resources in attacking the problem of illiteracy particularly within low-income areas throughout the United States. In addition, the VISTA Literacy Corps will encourage public/private partnerships; promote voluntarism; heighten the visibility of the literacy issue; and increase the capacity of low-income communities to address their respective literacy needs.

*Objectives*

ACTION will be awarding a grant for the placement of ten (10) VISTA Literacy Corps Volunteers in Region 6 in the following emphasis area:

Literacy projects that address the needs of low-income people who read below the fourth grade level. Priority consideration will be given to literacy programs affiliated with libraries; and to projects that focus on the overall concerns of low-income families in need.

#### B. Eligible Applicants

Eligible applicants for the VISTA Literacy Corps grant include: Public or private nonprofit agencies; local, State and national literacy councils and organizations; community-based nonprofit organizations; local and State education agencies; local and State agencies administering adult basic education programs; educational institutions; libraries, anti-poverty organizations; and local, municipal and State governmental entities designated to administer job training plans under the Job Training Partnership Act.

#### C. Scope of Grant

The amount of the grant includes the monthly subsistence and readjustment allowance for VISTA Volunteers. This support is commensurate to the cost-of-living of the assignment area and covers the cost of food, housing and incidentals, and a monthly stipend paid to VISTA Literacy Corps Volunteer upon completion of his/her service.

Applicants should demonstrate their commitment for matching the Federal contribution toward the operation of the VISTA Literacy Corps grant in the areas of transportation, supervision, and/or training. This support can be achieved through cash or allowable in-kind contributions.

Publication of this announcement does not obligate ACTION to award any specific number of grants or to obligate the entire amount of funds available, or any part thereof, for grants under the VISTA Literacy Corps Program.

#### D. General Criteria for Grant Selection

The general criteria for the VISTA Literacy Corps projects are consistent with those established for the selection of VISTA sponsors and projects. All of the following elements must be incorporated in the applicant's submission.

The project must:

- Be poverty-related in scope and otherwise comply with the provisions of the Domestic Volunteer Service Act of 1973 as amended (42 U.S.C. 4951, *et seq.*) applicable published regulations, guidelines and ACTION policies
- Comply with applicable financial and fiscal requirements established by ACTION or other elements of the Federal Government
- Show that the goals, objectives, and volunteer tasks are attainable within the time frame during which the volunteers will be working on the project and will produce a measurable and verifiable result
- Provide for reasonable efforts to recruit and involve low-income community residents in the planning, development and implementation of the VISTA project
- Outline specific plans for the continuation of program activities upon the termination of ACTION funds
- Have evidence of local public and private sector support (in the form of endorsement letters limited to those

organizations, government entities,and institutions that are aware of and will be involved in supporting the VISTA projects efforts.

- Have a permanent mechanism for self-evaluation
- Provide frequent and effective supervision of the volunteers
- Identify resources needed and make them available to volunteers to perfrom their tasks
- To have the management and technical capability to implement the project successfully.

In addition to the general criteria, the authorizing statute stipulates that priority consideration will be given to the following literacy programs and projects that apply for funding:

- Those that assist individuals in greatest need of literacy training who reside in unserved or underserved areas with the highest concentration of illiteracy and of low-income individuals and families;
- Those that serve individuals reading at the zero to fourth grade levels;
- Those that focus on providing services to high risk populations, e.g., school dropouts and minority youth
- Those that operate in areas with the highest concentration of individuals and families living at or below the poverty level;
- Those providing literacy services to parents of disadvantaged children between the ages of two and eight who may be educationally at risk, and
- Statewide progarms and projects that support the creation of new literacy efforts, encourage coordination of intrastate literacy efforts and provide technical assistance to local literacy efforts.

**E. Application Review Process**

ACTION Region 6 will review and evaluate all eligible applcations prior to sumbission to the Director of VISTA and Service-Learning Program, ACTION, for the final selections. ACTION reserves the right to ask for evidence of any claims of past performance or future capability.

**F. Application Submission and Deadline**

One signed original and two copies of all completed applications must be submitted to the appropriate Regional Director as noted in paragraph 2 of this announcement. The deadline for receipt of applications in 5 pm local time July 15, 1987. Applications post-marked 5 days before the deadline date will also be accepted for consideration.

All grant applications must consist of:

a. Application for Federal Assistance (A–1017, Pages 1–9) and VISTA Project Application (Form A–1421) with a detailed budget justification and a narrative of project goals and objectives.

b. CPA certification of accounting capability.

c. Copy of recent Articles of Incorporation, or a letter of good standing from the Governor's Office.

d. Proof of non-profit status or an application for non-profit status, and related documentation.

e. Resume of potential VISTA Supervisor, if available, or the resume of the director of applicant agency or project.

f. Organizational chart illustrating the relationship of the VISTA project to the overall objectives of the sponsor organization.

g. The professional affiliations and/or literacy-related activities of Board of Director Members should be specified.

Signed at Washington, DC, this 8th day of May, 1987.

**Donna M. Alvarado,**

*Director.*

## DEPARTMENT OF AGRICULTURE

### Agricultural Stabilization and Conservation Service

### Commodity Credit Corporation

### 1987–88 National Marketing Quota and Price Support Level for Burley Tobacco

**AGENCY:** Agricultural Stabilization and Conservation Service (ASCS) and Commodity Credit Corporation (CCC), United States Department of Agriculture (USDA).

**ACTION:** Notice of determinations of 1987–88 marketing quota.

**SUMMARY:** The purpose of this notice is to affirm determination made by the Secretary of Agriculture with respect to the 1987 crop of burley tobacco in accordance with the Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended. In addition to other determinations, the Secretary of Agriculture determined the 1987 marketing quota for burley tobacco to be 464 million pounds, 6 percent below last year's quota, and that the price support level would be $1.488 per pound.

**EFFECTIVE DATE:** February 2, 1987.

**FOR FURTHER INFORMATION CONTACT:** Robert L. Tarczy, Agricultual Economist, Commodity Analysis Division, ASCS, Room 3736-South Building, P.O. Box 2415, Washington, DC 20013, (202) 447–5187. The Final Regulatory Impact Analysis describing the options considered in developing this notice and the impact of implementing each option is available on request from Robert L. Tarczy.

**SUPPLEMENTARY INFORMATION:** This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512–1 and has been classified "not major." This action has been classified "not major" since implementation of these determinations will not result in: (1) An annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographical region, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this notice applies are: Title—Commodity Loan and Purchases; Number 10.051, as set forth in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since neither the Agricultural Stabilization and Conservation Service (ASCS) nor the Commodity Credit Corporation (CCC) are required by 5 U.S.C. 553 or any provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

This notice of determination is issued in accordance with the Agricultural Adjustment Act of 1938, as amended (the "1938 Act"), and the Agricultural Act of 1949, as amended (the "1949 Act"), in order to announce for the 1987 marketing year for burley tobacco the following:

1. The amount of domestic manufacturers' intentions;
2. The amount of the average exports for the 1984, 1985, and 1986 crop years;
3. The amount of the reserve stock level;
4. The amount of adjustment needed to maintain loan stocks at the reserve stock level;
5. The amount of the national marketing quota;
6. The national acreage reserve:

A. For establishing acreage allotments for new farms, and

B. For making corrections and adjusting inequities in old farms;

7. The national factor; and

8. The price support level.

The determinations set forth in this notice have been made on the basis of the latest available statistics of the Federal Government and after due consideration of data, views, and recommendations received from burley tobacco producers and others pursuant to a proposed Notice of Determination (52 FR 693) which was published on January 8, 1987.

**Discussion**

Thirteen written comments were received during the comment period. Most commentors requested that the 1987 burley tobacco marketing quota be maintained at the 1986 level. Reasons cited were prospects for an upswing in cigarette exports, particularly to the Far East, as well as the modest inventory of 1985 and 1986 crops held by the loan associations, the need to avoid a shortage that would prompt further imports, and the need to protect the livelihood of individual producers. The 1938 Act provides that the marketing quota must equal the sum of:

(1) Domestic manufacturers' intentions to purchase; (2) the 3-year average (1984–86) exports; and (3) an adjustment to maintain loan stocks at the reserve stock level—subject to a maximum reduction of 6 percent below the previous year's quota. Since the sum of these 3 components is significantly less than 94 percent of the previous year's quota, the use of the discretionary element in this determination would not affect the size of the 1987 burley tobacco marketing quota.

Six commentors were concerned that the quota formula did not project sufficient export sales and the cost estimates did not reflect certain cost increases experienced in the 1986 season. The formula for establishing the national marketing quota is set by statute and can only be estimated for the third year of the trailing three-year average rather than for the year for which the quota is being determined. The cost index has been revised to reflect these additional costs.

Six commentors emphasized the need to have the export estimate high enough to cover increased export sales in markets experiencing substantial sales growth. Due to under production in 1986, the final 1987 burley tobacco marketing quota results in a 6 percent increase in the effective marketing quota for 1987, which will provide an ample supply for increased export sales.

**Marketing Quotas**

Section 319 of the 1938 Act (7 U.S.C. 1314e) provides, in part, that the national marketing quota for a marketing year for burley tobacco is the quantity of such tobacco that is not more than 103 percent and not less than 97 percent of the total of: (1) The amount of burley tobacco that domestic manufacturers of cigarettes estimate they intend to purchase on U.S. auction markets or from producers, (2) the average quantity exported annually from the U.S. during the three marketing years immediately preceding the marketing year for which the determination is being made, and (3) the quantity, if any, necessary to adjust loan stocks to the reserve stock level. Section 319(a)(3)(B) further provides that, with respect to the 1986 through 1989 marketing years, any reduction in the national marketing quota being determined shall not exceed six percent of the previous year's national marketing quota. The "reserve stock level" is defined in section 301(b)(14)(D) of the 1938 Act as the greater of 50 million pounds or 15 percent of the national marketing quota for burley tobacco for the marketing year immediately preceding the marketing year for which the level is being determined.

Section 320A of the 1983 Act provides that all domestic manufacturers of cigarettes with more than 1 percent of U.S. cigarette production and sales shall submit to the Secretary a statement of purchase intentions for the 1987 crop of burley by January 15, 1987. Six such manufacturers were required to submit such a statement for the 1987 crop and the total of their intended purchases for the 1987 crop was 293.7 million pounds.

Burley tobacco exports, as recorded by the Bureau of Census, were 153.6 million pounds for the 1984–85 marketing year (October-September) and 150.6 million pounds for the 1985–86 year. World Agricultural Outlook Board, USDA, estimates the Census-recorded exports will total 150.0 million pounds for the 1986–87 marketing year, making the projected 3-year average 151.4 million pounds.

However, domestic cigarette manufacturers export a certain amount of processed tobacco (blends) declared as unmanufactured tobacco exports, but which are included in the domestic manufacturers' purchase intentions. Also, some leaf exporters may declare as burley tobacco certain blends containing foreign-grown tobaccos. Because of these conditions, the Secretary adjusted burley exports to more accurately reflect actual exports. Accordingly, the revised export totals are: 1984, 141.3 million pounds; 1985, 164.6 million pounds; and 1986, 150.8 million pounds. The 3-year average is 152.2 million pounds. This is the same as given in the proposed notice.

In accordance with section 301(b)(14)(D) of the 1938 Act, the reserve stock level is the greater of 50 million pounds or 15 percent of the 1986 marketing quota for burley tobacco. The national marketing quota for the 1986 crop year was 493.5 million pounds (51 FR 28849). Accordingly, the reserve stock level for use in determining the 1987 marketing quota for burley tobacco is 74 million pounds.

As of January 23, 1987 the two associations which hold loan tobacco had in their inventory 107.7 million pounds (excluding pre-1985 stocks committed to be purchased by manufacturers and covered by deferred sales). Accordingly, the adjustment in the quota to maintain loan stocks at the reserve supply level is a decrease of 33.7 million pounds.

The total of the three marketing quota components for the 1987–88 marketing year is 412.2 million pounds. This is over 16 percent below the previous year's quota. Since the 1938 Act further provides that the 1987 marketing quota cannot be reduced by more than 6 percent in a year the marketing quota for 1987 is 463.9 million pounds, 94 percent of 1986's national marketing quota.

In accordance with section 319(c) of the 1938 Act (7 U.S.C. 1314(e)), the Secretary is authorized to establish a national reserve from the national acreage allotment in an amount equivalent to not more than 3 percent of the national acreage allotment for the purpose of making corrections in farm acreage allotments, adjusting for inequities, and for establishing allotments for new farms. The Secretary has determined that a national reserve for the 1987 crop of burley tobacco of 250,000 pounds is adequate for these purposes.

**Price Support**

Price support is required to be made available for each crop of a kind of tobacco for which quotas are in effect, or for which marketing quotas have not been disapproved by producers, at a level which is determined in accordance with a formula prescribed in section 106 of the 1949 Act. With respect to the 1987 crop of burley tobacco, the level of support is determined in accordance with sections 106 (d) and (f) of the 1949 Act.

Section 106(f)(4) of the 1949 Act provides that the level of support for the 1987 crop of burley tobacco shall be: (1) The level in cents per pound at which the 1986 crop of burley tobacco was

supported, plus or minus, respectively, (2) an adjustment of not less than 65 percent nor more than 100 percent of the total, as determined by the Secretary after taking into consideration the supply of the kind of tobacco involved in relation to demand, of:

(A) 66.7 percent of the amount by which:

(I) The average price received by producers for burley tobacco on the United States auction markets, as determined by the Secretary, during the 5 marketing years immediately preceding the marketing year for which the determination is being made, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, is greater or less than

(II) The average price received by producers for burley tobacco on the United States auction markets, as determined by the Secretary, during the 5 marketing years immediately preceding the marketing year prior to the marketing year for which the determination is being made, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period; and

(B) 33.3 percent of the change, expressed as a cost per pound of tobacco, in the index of prices paid by burley tobacco producers from January 1 to December 31 of the calendar year immediately preceding the year in which the determination is made.

For the purpose of calculating the market-price component of the support level, the 1949 Act provides that the average market price be reduced 3.9 cents per pound for the 1985 marketing year and 30 cents per pound for prior marketing years.

The difference between the two 5-year averages (between (A)(I) and (A)(II)) is 2.0 cents per pound, down 0.1 cent from what was estimated in the proposed notice. The difference in the cost index from January 1 to December 31, 1986 is −3.9 cents per pound, which is an increase from −4.4 cents per pound that was set forth in the proposed notice. The revised data are as follow:

*1. Prices Paid Adjustment.*

| Crop | Average auction prices (cents per pound) | | 5 year average (excluding high and low) | Change |
|---|---|---|---|---|
| | Actual | Adjusted | | |
| 1981 | 180.7 | 150.7 | | |
| 1982 | 181.0 | 151.0 | | |
| 1983 | 177.3 | 147.3 | | |
| 1984 | 187.6 | 157.6 | | |
| 1985 | 159.4 | 155.4 | 152.4 | |
| 1986 | 156.6 | 156.6 | 154.4 | +2.0 |

*2. Cost Index.**

| Cost item | Cost per acre | |
|---|---|---|
| | 1985 | 1986 |
| Variable: | | |
| Labor [1] | $1,167.42 | $1,125.01 |
| Plant bed materials [2] | 78.56 | 77.01 |
| Fertilizer and lime | 145.12 | 131.01 |
| Chemicals [3] | 82.08 | 80.76 |
| Fuel and lubrication [4] | 36.38 | 25.05 |
| Curing fuel and heating fuel [5] | 4.84 | 4.35 |
| Repairs [6] | 27.77 | 27.45 |
| Marketing fee | 179.10 | 168.33 |
| Inspection and grading fee | 12.96 | 10.99 |
| Other [7] | 15.30 | 15.30 |
| Interest | 26.34 | 24.13 |
| Total variable | 1,775.27 | 1,687.39 |
| Machinery and barn ownership [8] | 519.00 | 521.74 |
| Total, variable and ownership | 2,294.27 | 2,209.13 |
| Yield (pounds) | 2,247 | 1,998 |
| 10-year average yield (pounds) | 2,170 | 2,170 |
| Cost per pound (cents) | 105.7 | 101.8 |

[1] Includes operator, family, exchange, and hired labor value at prevailing wage rates.
[2] Includes seed, fertilizer, pesticides, and custom fumigation and canvas.
[3] Includes insecticides, herbicides, fungicides, and sucker control chemicals.
[4] Includes tractor and machinery fuel and lubrication.
[5] Supplemental heat and heat for stripping room.
[6] Includes machinery, equipment, and barn repairs.
[7] Includes cover crop seed and other miscellaneous expenses.
[8] Includes a reserve for replacement, interest, taxes and insurance for tractors, machinery, barns, and stripping room.

Applying these components to the price support formula (2.0 cents per pound, two-thirds weight; −3.9 cents per pound, one-third weight) result in no change in the level of price support from the previous year. Accordingly, the 1987 crop of burley tobacco will be supported at 148.8 cents per pound.

---

*Costs are based on a 1985 survey of burley tobacco growers' 1984 operation. These estimates replace previous estimates that used 1976 data as a base.

**Determinations 1987–88 Marketing Year**

Accordingly, the following determinations have been made for burley tobacco for the marketing year beginning October 1, 1987;

(a) *Domestic manufacturers' intentions.* Manufacturers' intentions to puchase for the 1987 year totaled 293.7 million pounds.

(b) *3-year average exports.* The 3-year average of exports is 152.2 million pounds, based on exports of 141.3 million pounds, 164.6 million pounds and 150.8 million pounds for the 1984, 1985, and 1986 crop years, respectively.

(c) *Reserve stock level.* The reserve stock is 74 million pounds, based on 15 percent of 1988's national marketing quota of 493.5 million pounds.

(d) *Adjustment for the reserve stock level.* The adjustment for the reserve stock level is 33.7 million pounds, based on a reserve stock level of 74 million pounds and anticipated loan holdings of 107.7 million pounds.

(e) *National marketing quota.* The national marketing quota is 463.9 million pounds.

(f) *National reserve.* The national reserve for making corrections and adjusting inequities in old farm acreage allotments and for establishing allotments for new farms has been determined to 250,000 pounds.

(g) *National acreage factor.* The national factor is determined to be 0.94.

(h) *Price support level.* The level of support is 148.8 cents per pound based on a 1986 support level of 148.8 cents per pound with no adjustment. This is based on 2.0 cents per pound increase in the market price component (⅔ weight) and 3.9 cents per pound decrease in the cost component (⅓) weight.

(Secs. 301, 313, 317, 375, 52 Stat. 38, as amended 47, as amended, 79 Stat. 66, as amended, 52 Stat. 66, as amended (7 U.S.C. 1301, 1313, 1314c, 1375); Secs. 106, 401, 74 Stat. 6, as amended, 63 Stat. 1054, as amended (7 U.S.C. 1445, 1421))

Signed at Washington, DC on May 8, 1987.

**Milton J. Hertz,**

*Administrator, Agricultural Stabilization and Conservation Service and Executive Vice President, Commodity Credit Corporation.*

## Soil Conservation Service

**Tensed/Lolo Watershed, ID; Finding of No Significant Impact**

**AGENCY:** Soil Conservation Service, Agriculture.

**ACTION:** Notice of a finding of no significant impact.

**SUMMARY:** Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Tensed/Lolo Watershed, Benewah Country, Idaho.

**FOR FURTHER INFORMATION CONTACT:** Stanley N. Hobson, State Conservationist, Soil Conservation Service, 304 North 8th Street, Rm. 345 Boise, Idaho 83702, telephone (208) 334–1601.

**SUPPLEMENTARY INFORMATION:** The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Stanley N. Hobson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns land treatment measures to be applied on critically eroding cropland to control sheet, rill and gully erosion and the subsequent off-site sedimentation problems.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the address on the previous page. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Stanley N. Hobson.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: May 5, 1987.

**Rodney M. Alt,**

*Deputy State Conservationist.*

## DEPARTMENT OF COMMERCE

## International Trade Administration

**[A–583–607]**

**Fabric and Expanded Neoprene Laminate From Taiwan; Preliminary Determination of Sales at Less Than Fair Value**

**AGENCY:** International Trade Administration, Import Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We have preliminarily determined that fabric and expanded neoprene laminate (FENL) from Taiwan is being, or is likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to suspend the liquidation of all entries of FENL from Taiwan that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice, and to require a cash deposit or bond for each entry in an amount equal to the estimate dumping margins as described in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make our final determination by July 22, 1987.

**EFFECTIVE DATE:** May 14, 1987.

**FOR FURTHER INFORMATION CONTACT:** Paul Tambakis or Charles Wilson, Office of Investigations, Import Administration, International Trade Administration, U.S.. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377–4136 or 377–5288.

SUPPLEMENTARY INFORMATION:

**Preliminary Determination**

We have preliminarily determined that FENL from Taiwan is being, or is likely to be, sold in the United States at less than fair value, as provided in section 733(b) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b(b)). The weighted-average margins are shown in the "Suspension of Liquidation" section of this notice.

**Case History**

On December 23, 1986, we received a petition filed in proper form from Rubatex Corporation of Bedford, Virginia, on behalf of domestic manufacturers of FENL. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of the subject merchandise from Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports are materially injuring, or threaten material injury to, a United States industry.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We initiated such an investigation on January 12, 1987 (52 FR 2133, January 20, 1987), and notified the ITC of our action. On February 6, 1987, the ITC determined that there is reasonable indication that imports of fabric and expanded neoprene laminate from Taiwan are materially injuring a U.S. industry (US ITC Pub. No. 19445).

On January 26, 1987, we presented an antidumping duty questionnaire to Shei Chung Hsin Industrial Co., Ltd. (SHEICO) and requested a response in 30 days. On February 11, 1987, respondent requested an extension of the due date for the questionnaire response. We granted the respondent at two-week extension. We received a response to the sales questionnaire on March 11, 1987. Between March 20 and April 8, 1987, the Department requested supplemental information. Supplemental responses were received on March 27 and April 15, 1987.

**Scope of Investigation**

The product covered by this investigation is fabric and expanded neoprene laminate, as provided for in items 355.8100, 355.8210, 355.8220, 359.50900 and 359.6000 of the *Tariff Schedules of the United States Annotated* (TSUSA). This material is used primarily in the manufacture of wet suits and similar products for the scuba diving and recreational markets.

**Fair Value Comparisons**

We made Comparisons on approximately 99 percent of the sales of FENL to the United States during the period of investigation, July 1 through December 31, 1986. Because SHEICO accounted for over 70 percent of all sales of this merchandise from Taiwan, we limited our investigation to this company.

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value for the company under investigation using data provided in the responses.

**United States Price**

For certain sales by SHEICO, we based United States price on exporter's sales price (ESP), in accordance with section 772(c) of the Act, since the sale to the first unrelated purchaser took place in the United States. For those sales by SHEICO made directly to unrelated parties in the United States prior to importation, we based the United States price on purchase price in accordance with section 772(b) of the Act.

For sales which were made through a related sales agent in the United States to an unrelated purchaser prior to the date of importation, we used purchase price as the basis for determinig United States price. For these sales, the Department determined that purchase price was the most appropriate indicator of United States price based on the following elements:

1. The merchanise in question was shipped directly from the manufacturer to the unrelated buyer, without being introduced into the inventory of the related selling agent;
2. This was the customary commercial channel for sales of this merchandise between the parties involved; and
3. The related selling agent located in the United States acted only as the processor of sales-related documentation and a communication link with the unrelated U.S. buyer.

Where all the above elements are met we regard the routine selling functions of the exporter as having been merely relocated geographically from the county of exportation to the United States, where the sales agency performs them. Whether these functions are done in the United States or abroad does not change the substance of the transactions of the functions themselves.

In instances where merchandise is ordinarily diverted into the related U.S. selling agent's inventory, we regard this factor as an important distinction because it is associated with a materially different type of selling activity than the mere facilitation of a transaction such as occurs of a direct shipment to an unrelated U.S. purchaser. In situations where the related party places the merchandise into inventory, he commonly incurs substantial storage and financial carrying costs and has added flexibility in this marketing. We also use the inventory test because it can be readily understood and applied by respondents who must respond to Department questionnaires in a short period of time. It is objective in nature, as the final destination of the goods can be established from normal commercial documents associated with the sale and verified with certainty.

We calculated purchase price and exporter's sales price based on the packed, f.o.b., c.&i., c.&f. duty unpaid, or c.i.f. duty paid prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, brokerage and handling charges, ocean, freight, marine insurance, U.S. duty and U.S. inland freight. Where we used exporter's sales price, we made additional deductions for credit expenses, other U.S. selling expenses, and commissions. We made additions to both purchase price and exporter's sales price for duty drawback (i.e., import duties which were rebated, or not collected, by reason of the exportation of the merchandise to the United States) pursuant to section 772(d)(1)(B) of the Act.

**Foreign Market Value**

In accordance with section 773(a)(1)(B) of the Act, we calculated foreign market value based on sales for export to a country other than the United States (a "third country"), since SHEICO had insufficient home market sales of FENL. We calculated foreign market value based on the packed, c.i.f., f.o.b., c.&f., or c.&i., duty unpaid prices to unrelated purchasers in Australia. We made deductions where appropriate for brokerage and handling, foreign inland freight marine insurance, and ocean freight.

When we compared foreign market value to purchase price sales, we made adjustments for differences in credit and warranty expenses, in accordance with § 353.15 of the regulations (19 CFR 353.15).

When we compared foreign market value with exporter's sales price, we treated credit and warranty expenses as deductiions, pursuant to section 772(e)(2) of the Act, instead of adjusting foreign market value for the differences. We made an additional deduction to

foreign market value for commissions. We also used indirect selling expenses in the Australian market to offset United States selling expenses, in accordance with § 353.15(c) of our regulations.

In order to adjust for differences in packing between the two markets, we deducted Australian packing costs from foreign market value and added U.S. packing costs.

We established separate categories of "such or similar" merchandise, pursuant to section 771(16) of the Act, on the basis of thickness fabric type and foam type. Where there were no identical products in the Australian market with which to compare product sold to the United States, we made adjustments to similar merchandise to account for differences in the physical characteristics of the merchandise, in accordance with section 773(a)(4)(C) of the Act. These adjustments were based of differences in the costs of materials, labor and directly related factory overhead.

**Currency Conversion**

We made currency conversions from new Taiwan dollars to U.S. dollars in accordance with § 353.56(a) of our regulations, using the certified daily exchange rates furnished by the Federal Reserve Bank of New York. For exporter's sales price Comparisiona, we used the official exchange rate on the date of sale, since using the exchange rate as of the date of sale is consistent with section 615 of the Trade and Tariff Act of 1984 (the 1984 Act.) We followed section section 615 of the 1984 Act rather than § 353.56(a)(2) of our regulations, because the later law supersedes that section of the regulatons.

**Verification**

We will verify all information used in making our final determination in accordance with section 776(a) of the Act. We will use standard verification procedures, including examination of relevant sales and financial records of the company under investigation.

**Suspension of Liquidation**

In accordance with section 733(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of FENL from Taiwan that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amounts by which the foreign market of the merchandise subject to this investigation exceeds the United States price as shown in the table below. The suspension of liquidation will remain in effect until further notice.

| Manufacturer/producer/exporter | Margin percentage |
|---|---|
| SHEICO | 1.02 |
| All Others | 1.02 |

**ITC Notification**

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information either publicly or under administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or thereaten material injury to, a United States industry, before the later of 120 days after our preliminary affirmative determination or 45 days after our final determination.

**Public Comment**

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties and opportunity to comment on this preliminary determination at 1:00 p.m. on June 4, 1987, at the U.S. Department of Commerce, Room 1414, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary, Import Administration, Room B-099, at the above address within 10 days of this notice's publication. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by May 21, 1987. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, not less than 30 days before the final determination, or, if a hearing is held, within 7 days after the hearing transcript is available, at the above address in at least 10 copies.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)).

**Gilbert B. Kaplan,**

*Deputy Assistant Secretary for Import Administration*

May 8, 1987.

**[Docket Nos. 6875-01, 6875-02]**

**Actions Affecting Export Privileges; Edward King et al.**

**Order**

On March 19, 1987, I issued and order in the above captioned proceeding. I hereby clarify that order as follows: Edward F. King, individually and doing business as Printemps Corporation, formely with an address at 5122 Grandview Avenue, Yorba Linda, California 92686, and presently with an address at 1613 Old Fashion Way, Anaheim, California 92804 is denied for a period of 10 years from the date of the original order dated March 19, 1987.

Dated: May 11, 1987.

**Paul Freedenberg,**

*Assistant Secretary for Trade Adminsitration.*

**Applications for Duty-Free Entry of Scientific Instruments; Lawrence Berkeley Laboratory et al.**

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washignton, DC.

Docket Number: 86-304R. Applicant: Lawrence Berkeley Laboratory, Division of Biology and Medicine, 1 Cyclotron Road, Berkeley, CA 94720. Instrument: Circular Dichroism Spectropolarimeter, Model J-600A. Manufacturer: JASCO,

BEST COPY AVAILABLE

Japan. Original notice of this resubmitted application was published in the Federal Register of September 19, 1986.

Docket Number: 86-319R. Applicant: Yale University School of Medicine, 333 Cedar Street, New Haven CT 06510. Instrument: Inverted Microscope with Attachments. Manufacturer: Zeiss Optical, West Germany. Original notice of this resubmitted application was published in the Federal Register of October 5, 1986.

Docket Number: 87-023R. Applicant: University of Alaska, Geophysical Institute, Fairbanks, AK 99775-0800. Instrument: Image Photon Detector with Dual Ported Memory. Manufacturer: Hovemere Ltd., United Kingdom. Intended Use: Original notice of this resubmitted application was published in the Federal Register November 21, 1986.

Docket Number: 87-040. Applicant: St. John's Mercy Medical Center, 615 So. New Ballas, St. Louis, MO 63141. Instrument: Electron Microscope with Accessory, Model H-600-3 Manufacturer: Hitachi, Ltd., Japan. Intended Use: The instrument will be used for clinical pathologic correlation studies of human diseased tissue and training residents in electron microscopy for medical diagnosis. Application Received by Commissioner of Customs: November 14, 1986.

Docket Number: 87-041. Applicant: La Crosse Lutheran Hospital, Inc., 1910 South Avenue, La Crosse, WI 54601. Instrument: Electron Microscopy, Model JEM-100SX. Manufacturer: JEOL Ltd., Japan. Intended Use: The instrument will be used for differential diagnosis of disease and the determination of appropriate treatment and identification of viral agents which cannot be identified by other methods. The instrument will also provide photographs of cellular ultrastructure which will be valuable teaching tools in a medical education program. Application Received by Commissioner of Customs: December 8, 1986.

Docket Number: 87-153. Applicant: University of California, Davis Department of Mechanical Engineering, Davis, CA 95616. Instrument: Electron Microscope, Model CM 12 with Accessories. Manufacturer: N.V. Philips, The Netherlands. Intended Use: Studies of ceramics and metals to evaluate structure property relationships in materials. In addition, the instrument will be used to teach structure properties, relationships and other evaluation materials in graduate courses in Electron Microscopy and undergraduate courses in Properties of Materials and Structure. Application Received by Commissioner of Customs: April 2, 1987.

Docket Number: 87-154. Applicant: University of Miami School of Medicine, The Miami Project, 1600 NW., 10th Avenue (R-48), Miami, FL 33136. Instrument: Electron Microscope, Model EM 10CA. Manufacturer: Carl Zeiss, West Germany. Intended Use: Studies of central nervous system tissue (the brain and spinal cord) of rats, cats, guinea pigs, mice and humans. The objectives of these studies is to examine normal spinal cord tissue and then compare these observations on the morpholoy, chemical distribution and synapse distribution to what is observed in spinal cord tissue following an injury in order to gain a better understanding of the mechanisms involved in spinal cord injury and paralysis, with the goal of discovering a cure for paralysis. These studies may also benefit those patients suffering from Parkinson's Disease, Alzheimer's Disease, head injury and other neurological disorders. The insturment will also be used to teach electron microscopy techniques. Application Received by Commissioner of Customs: April 2, 1987.

Docket Number: 87-155. Applicant: Rutgers University, Procurement and Contracting, P. O. Box 1089, Piscataway, NJ 08854. Electromechanical (Piezoelectric) Measurement Device. Manufacturer: Toyo Seiki Seisaku-Sho Ltd., Japan. Intended Use: Studies of high molecular weight materials such as polymers and rubbers to identify to useful materials with desirable properties. The instrument will also be used for educational purposes in a course in polymer science and materials. Application received by Commissioner of Customs: April 6, 1987.

Docket Number: 87-157. Applicant: Thomas Jefferson University, Jefferson Medical College, 1025 Walnut Street, Philadelphia, PA 19107. Instrument: Electron Microscope, Model JEM 100 CX. JEOL Co., Ltd., Japan. Intended Use: The instrument will be used for studies of biological materials and graduate training in cell physiology. Application Received by Commissioner of Customs: April 6, 1987.

Docket Number: 87-160. Applicant: EPA, EMSL-Las Vegas, 994 E. Harmon Avenue, Las Vegas, NV 89114. Instrument: Mass Spectrometer, Model VG 7070-EQ. Manufacturer: VG Analytical, United Kingdom. Intended Use: The instrument is intended to be used for studies of non-volatile compounds in experiments designed to fully characterize such compoumds in a variety of sample media. Application Received by Commissioner of Customs: April 9, 1987.

Docket Number: 87-162. Applicant: State University of New York, Stony Brook, NY 11794. Instrument: Stem System for Electron Microscope. Manufacturer: N.V Philips, The Netherlands. Intended Use: The instrument will be used to study metallic and ceramic materials, as well as light metal hydrides. Particular emphasis will be on hcp metals, refractory metals and binary alloys. Microscopic imaging and diffraction studies will be performed, in addition to in situ straining experiments These studies will be conducted to further the understanding of materials behavior and the development of new materials. In addition, the instrument will be used in the teaching of the following courses:

(1) ESM302 Techniques in Materials Science
(2) ESM605 Diffraction Techniques
(3) ESM607 Imperfections in Crystals
(4) ESM696 Problems in Materials Science
(5) ESM599 and 699 Research in Materials Science.

Application Received by Commissioner of Customs: April 10, 1987.

Docket Number: 87-165. Applicant: University of Virginia Medical School, Box 441 Jordan Hall, Charlottesville, VA 22908. Instrument: Spectropolarimeter, Model J-600. Manufacturer: JASCO, Japan. Intended Use: The article is intended to be used for studies of the structure and interaction of biomolecules with other biomolecules to better understand the nature of protein-protein and protein-DNA interactions. Application Received by Commissioner of Customs: April 13, 1987.

Docket Number: 87-166. Applicant: Miami University, Department of Purchasing, 213 Roudebush Hall, Oxford, OH 45056. Instrument: Micromanipulator, Canberra Type, Model EM-7. Manufacturer: Narishige Scientific Instrument Laboratory, Japan. Intended Use: Research associated with the examination of the properties of neuromuscular transmission. The broad objective of this research is to elucidate the factors that influence transmitter release from the motor nerve terminal. It is hoped that the project will lead to a better understanding of neuromuscular transmission and possibly a means of controlling the processes involved. Application Received by Commissioner of Customs: April 14, 1987.

Docket Number: 87-00167. Applicant: Miami University, Department of Purchasing, 213 Roudebush Hall, Oxford, OH 45056. Instrument: Portable Ultraviolet Radiometer, Model UV 103.

Manufacturer: Macam Photometrics, United Kingdom. Intended Use: Research on the photo-induced toxicity of polycyclic aromatic hydrocarbons to aquatic organisms. Experiments to be conducted include a variety of tests to examine the environmental significance of photo-induced toxicity in aquatic ecosystems. In addition, the instrument will be used for educational purposes in the course Limnology (Z00 463). Application Received by Commissioner of Customs: April 14, 1987.

Docket Number: 87–168.Applicant: University of Montana, Purchasing Department, Lodge 113, Missoula, MT 59812. Instrument: Portable Rock magnetometer and Rock Demagnitizer. Manufacturer: Molspin Ltd., United Kingdom. Intended Use: Studies of samples of rock from various regions in the western United States. The rock property being investigated is paleomagnetic directions and its changes with heating of the sample and alternating field demagnetization. These are general paleomagnetic techniques to determine the stability of measured magnetic moments over geologic time. The instrument will also be used to teach students the fundamentals of paleomagnetism, get them to a level where they can read the professional literature in paleomagnetism, and to teach them how to design scientific experiments. Application Received by Commissioner of Customs: April 15, 1987.

Docket Number: 87–169. Applicant: Wright State University, Department of Physiology and Biophysics, P.O. Box 927, Dayton, OH 45401–0927. Instrument: Multiparameter Fluvo II Flow Cytometric Transducer. Manufacturer: HEKA Elektronic, West Germany. Intended Use: The instrument is intended to be used for studies of biological cells, in suspension, such as red blood cells of various animal and human origin and cultured cells of vascular origin, such as endothelial cells. Investigations will be conducted to correlate the analysis of cellular steady state and out-of-steady state volume with the response of intracellular bivalent ions, cell pH and membrane potential in order to explain ion transport mechanisms initiated and work to maintain at or return the cell to steady state. Application Received by Commissioner of Customs: April 16, 1987.

Docket Number: 87–170. Applicant: University of Chicago, 5801 S. Ellis Avenue, Chicago IL 60637. Instrument: FTI Spectrometer, Model DA2. Manufacturer: Bomem, Canada. Intended Use: The instrument will be used for far-infrared, infrared and visible spectroscopy of molecular ions in gaseous liquid and solid plasma and mid infrared and near infrared astronomical observations. Application Received by Commissioner of Customs: April 21, 1987.

Docket Number: 87–171. Henry Ford Hospital, 2799 West Grand Boulevard, Detroit MI 48202. Instrument: Microcomputer Controlled Voltage/Current Clamp System. Manufacturer: F&P Datensysteme, GmbH, West Germany. Intended Use: The instrument is to be used for the study of electrolyte and water transport in epithelia. Voltage clamp techniques will be used to investigate short circuit current changes in potential difference and tissue permeability. These investigations will be conducted in order to define the mechanisms by which bile acids and fatty acids induce intestinal electrolyte and water secretion and thereby cause diarrhea in man. Application Received by Commissioner of Customs: April 21, 1987.

Docket Number: 87–172. Applicant: The Pennsylvania State University, 276 Materials Research Laboratory, University Park, PA 16802. Instrument: Spectroscopic Ellipsometer with Optical Multichannel Detection, Model ES2G. Manufacturer: SOPRA, France. Intended Use: The instrument will be used to carry out in situ spectroscopic ellipsometry measurements on the diamond films and diamond related films, in the UV-visible-IR spectral region and analyze the data using modeling procedures and regression analysis techniques with the help of computers. Application Received by Commissioner of Customs: April 22, 1987.

BILLING CODE 3510-DS-M

## Applications for Duty-Free Entry of Scientific Instruments; University of Nebraska et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 87–163. Applicant: University of Nebraska—Lincoln, Lincoln NE 68588. Instrument: Circular Dichroism Spectropolarimeter, Model J–600C. Manufacturer: JASCO, Japan. Intended Use: The instrument is intended to be used in experiments which include light-induced conformational changes of both phytochrome and stentorin to elucidate the structural basis of the biological function, i.e. gene regulation and photoreception of these proteins. Educational purposes include training graduate students as competent scientists and educators in courses in graduate research in chemistry, physical biochemistry, molecular photochemistry and photobiology and doctoral dissertation. Application Received by Commissioner of Customs: April 10, 1987.

Docket Number: 87–164. Applicant: Mercy Hospital and Medical Center, Stevenson Expressway at King Drive, Chicago, IL 60616. Instrument: Electron Microscope, Model H–300. Manufacturer: Nissei Sangyo America, Ltd., Japan. Intended Use: Study of the abnormality of cellular structure of tumor cells. Educational purposes involving student and resident training in pathology. Application Received by Commissioner of Customs: April 13, 1987.

Docket Number: 87–173. Applicant: University of California, Santa Barbara, Purchasing Department, Building 451, Santa Barbara, CA 93106. Instrument: Electron Microscope, Model JEM 100CX. Manufacturer: Jeol, Ltd., Japan. Intended Use: Investigations of complex fluid and polymer systems. Specifically direct examination of microstructure of aqueous polyacrylamide gels, rod-coil transitions of polydiacetylene solutions, and the morphology of surfactant-oil-water emulsions using transmission electron microscopy. Application Received by Commissioner of Customs: April 27, 1987.

Docket Number: 87–174. Applicant: The Pennsylvania State University, Department of Chemistry, 152 Davey Laboratory, University Park, PA 16802. Instrument: Accessories for FT Spectrometer, Bomem, Inc., Canada. Intended Use: The instruments are accessories to an existing spectrometer which will be used for initial studies on a number of polyatomic molecules such as benzene, cyclopropane and

monosilane. Other projects will include studies of states which are both infrared and Raman inactive, expanded interest in high resolution spectroscopy and molecular physics of large molecules, the study of energy transfer processes in optically pumped far infrared lasers. Application Received by Commissioner of Customs: April 28, 1987.

Docket Number: 87–175. Applicant: Carnegie Mellon University, 4400 Fifth Avenue, Pittsburgh, PA 15213. Instrument: Interferometric Spectrometer, Model DA3.16 with Accessories. Manufacturer: Bomem, Canada. Intended Use: Detailed spectroscopic studies on the electronic structures of inorganic lattices and complexes. Far infrared applications will include development of a direct spectral probe of exchange interactions in transition ion cluster complexes, studies of the low lying spin-orbit components of the ground state in isolated ions, and electronic structure studies of shallow impurity sites in small band gap photodetectors. Spectoscipic studies in the mid IR region will relate to observation of ligand field excited states and development of virbrational MCD of inorganic complexes as a sensitive probe of metal-ligand covalency. Application Received by Commissioner of Customs: April 28, 1987.

Docket Number: 87–176. Applicant: University of Michigan, 503 Thompson Street, Ann Arbor, MI 48109. Instrument: Electron Microscope, Model JEM–400EX, JEOL Ltd., Japan. Intended Use: The instrument is intended to be used in varied research including but not limited to the following:

1. Mechanistic studies of pressure-assisted plasticity in ceramics
2. Phase equilibria studies in silicon nitride-metal oxide systems
3. Studies of ductility enchancement in materials with limited dislocation mobility
4. Investigation of MBE grown InGaAs on GaAs superlattices
5. Studies of magnesium oxide surfaces
6. Ultra-small electronic research
7. MBE growth of incommensurate heterostructures.

Application Received by Commissioner of Customs: April 28, 1987.

Docket Number: 87–178. Applicant: University of California, Irvine, CA 92717. Instrument: Langmuir-Blodgett System, Model KSV2200. Manufacturer: KSV Chemicals, Finland. Intended Use: The instrument is intended to be used for studies of biological membranes, monolayers, and bilayers during scientific research of the following:

1. Peptide-lipid bilayer interaction
2. Neurotransmitter receptor function
3. Structural relationship between bilayer systems
4. Chloride binding sites in halorhodospin
5. Pulmonary surfactant.

Application Received by Commissioner of Cutoms: April 29, 1987.

## National Oceanic and Atmospheric Administration

[P161]

### Marine Mammals; Application for Permit: Gerald L. Kooyman

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as autorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. *Applicant:* Gerald L. Kooyman, Physiological Research Laboratory A–004, Scripps Institution of Oceanography, University of California, La Jolla, California 92093.

2. *Type of Permit:* Scientific Research.

3. *Name and Number of Marine Mammals: Weddell seals Leptonychotes weddelli*) 20.

4. *Type of Take:* Animals will be surgically radio tagged and blood samples will be taken.

5. *Location of Activity:* McMurdo Sound, Antarctica.

6. *Period of Activity:* 3 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue, NW., Rm. 805, Washington, DC; and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731–7415.

Dated: May 7, 1987.

**Dr. Nancy Foster,**

*Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.*

BILLING CODE 3510-22-M

### National Marine Fisheries Service; Marine Fisheries Advisory Committee; Meeting That is Partially Closed to the Public

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

Time and Date: The meeting will convene at 8:30 a.m., June 3, 1987, and adjourn at approximately 4:00 p.m., June 4, 1987.

Place: Lord Baltimore Clarion Hotel, Baltimore and Hanover Streets, Baltimore, Maryland.

Status: As required by section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1982), notice is hereby given of a meeting of the Marine Fisheries Advisory Committee (MAFAC). Parts of this meeting will be open to the public. The remainder of the meeting will be closed to the public. MAFAC was established by the Secretary of Commerce on February 17, 1971, to advise the Secretary on all living marine resource matters which are the responsibility of the Department of Commerce. This Committee ensures that the living marine resource policies and programs of this Nation are adequate to meet the needs of commercial and recreational fishermen, environmental, State, consumer, academia, and other national interests.

**Matters To Be Considered**

Portions Open to the Public: June 3, 1987, 8:45 a.m.–4:30 p.m., habitat research and management programs, marine recreational fisheries, Americanization of EEZ fisheries and fisheries trade issues. June 4, 1987, 8:30–

11:30 a.m., interjurisdictional fisheries management and fishery highlights.

Portion Closed to the Public: June 4, 1987, 1:15–4:30 p.m. (Executive Session), budget and program planning priorities.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration of the Department of Commerce, with concurrence of the General Counsel, formally determined on May 7, 1987, pursuant to section 10(d) of the Federal Advisory Committee Act, that the agenda item to be covered during the Executive Session may be exempt from the provisions of the Act relating to open meetings and public participation therein, because the item will be concerned with matters that are within the purview of 5 U.S.C. 552b(c)(9)(B) as information the premature disclosure of which will be likely to significantly frustrate the implementation of proposed agency action. (A copy of the determination is available for public inspection and duplication in the Central Reference and Records Inspection Facility, Room 6628, Department of Commerce.) All other portions of the meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT: Ann Smith, Executive Secretary, Marine Fisheries Advisory Committee, Constituent Affairs Staff, Office of Legislative Affairs, NOAA, Washington, DC 20235. Telephone: (202) 673–5429.

Dated: May 8, 1987.

James E. Douglas, Jr.,

*Acting Deputy Assistant Administrator, NMFS.*

[FR Doc. 87–11023 Filed 5–13–87; 8:45 am]

BILLING CODE 3510-08-M

## International Trade Administration

### President's Export Council, Executive Committee Meeting; Closed

A meeting of the President's Export Council Executive Committee will be held June 2, 1987, Noon-3:30 p.m. in Room 4830 of the Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC. The Council's purpose is to advise the President on matters relating to United States export trade.

*Agenda:* Discussion of negotiating strategies with our trade partners, Japan, and pending trade legislation.

A Notice of Determination to close meetings or portions of meetings of the Council to the public on the basis of 5 U.S.C. 552b(c)(1) was approved on October 17, 1985, in accordance with the Federal Advisory Committee Act. A copy of the notice is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 4102, U.S. Department of Commerce, (202) 377–3031.

For further information, or copies of the minutes, contact Laureen Daly (202) 377–1125, Room 3213, U.S. Department of Commerce, Washington, DC 20230.

Dated: May 11, 1987.

Wendy H. Smith,

*Director, President's Export Council.*

BILLING CODE 3510-DR-M

## COMMISSION ON THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

### Meeting

AGENCY: Commission on the Bicentennial of the United States Constitution.

ACTION: Notice of meeting.

SUMMARY: This Notice announces a forthcoming meeting of the Commission on the Bicentennial of the United States Constitution, to be held in Washington, DC, and chaired by the Commission's Chairman, Chief Justice (Retired) Warren E. Burger.

Time and date: Friday, May 15, 1987 at 2:00 p.m.; Saturday, May 16, 1987 at 10:15 a.m.

Place: On May 15, from 2:00 p.m. to 4:00 p.m., in the State Room of the Grand Promenade of the Mayflower Hotel, 1127 Connecticut Avenue NW., Washington DC, and on May 16, from 10:15 a.m. to 4:30 p.m., in the South Carolina Room of the Mayflower Hotel. On May 15, the meeting will be a public hearing in open session; on May 16, the meeting will be an executive session.

### Matters to be Considered

*Open Session.* The Commission will hear presentations from state and local officials regarding commemorative plans and programs for the bicentennial; there will also be testimony on regional, national and international bicentennial programs.

*Executive Session.* Evaluation of proposed bicentennial projects and programs; review of annual report and budget; status of personnel, employment and office space; pending appropriations, legislation and regulations; private funding proposals; and, negotiations involving Commission plans and programs.

### Statements

The Commission is interested in hearing from all persons and organizations with proposed plans, projects or programs which would enhance the bicentennial commemoration of the U.S. Constitution, the Bill of Rights or the founding of the Federal Government. Statements prepared should be filed on or before May 15, 1987, at 736 Jackson Place NW., Washington, DC 20503, and will be reviewed by the Commission and its staff.

### Presentations

At the public hearing on May 15, available time will permit only a few oral presentations. The Commission will notify in advance those witnesses who have been asked to appear and will limit oral presentations to those selected.

FOR FURTHER INFORMATION CONTACT: William Buckingham, Director, Planning and Review; Tel. (202) 653–5335.

SUPPLEMENTARY INFORMATION: This meeting is to give the Commission an opportunity to review the current status of its operations. It also provides an opportunity for witnesses to advise the Commission about proposed bicentennial plans and programs.

Dated: May 11, 1987.

Mark W. Cannon,

*Staff Director.*

## DEPARTMENT OF DEFENSE

### Office of the Secretary

### Agency Information Activities Under OMB Review

ACTION: Public information collection requirement submitted to OMB for review.

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number, if applicable; (3) Abstract statement of the need for the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; and (8) The point of contact from whom a copy of the information proposal may be obtained.

New

DoD FAR Supplement Part 205 and 252.205–7000.

Part 5 of the DoD FAR Supplement and the clause at 252.205–700, Release of Information to Cooperative Agreement Holders, requires defense contractors awarded a contract in excess of $500,000 to provide entities holding Cooperative Agreements with the Defense Logistics Agency (DLA), upon their request, a list of appropriate employees, their business address, telephone number, and area of responsibility, who have responsibility for awarding subcontracts under defense contracts. This coverage implements section 957 of Pub. L. 99–500.

Businesses or others for profit/small business or organizations.

Responses: 82,500.

Burden hours: 16,250.

**ADDRESS:** Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Washington, DC 20503 and Mr. Daniel J. Vitiello, DoD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202–4302, telephone (202) 746–0933.

**SUPPLEMENTARY INFORMATION:** A copy of the information collection proposal may be obtained from Mr. Owen Green, DAR Council, ODASD(P)DARS, c/o OASD(A&L) (MRS), Room 3C841, The Pentagon, Washington, DC 20301–3062, telephone (202) 697–7266.

BILLING CODE 3810–01–M

## DEPARTMENT OF ENERGY

### Economic Regulatory Administration

**[Docket No. ERA C&E–87–53; OFP Case No. 61072–9370–20, 21–22]**

### Powerplant and Industrial Fuel Use; Acceptance of Petition for Exemption and Availability of Certification by Caterpillar Capital, Ltd.

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Notice of acceptance.

**SUMMARY:** On April 27, 1987, Caterpillar Capital, Ltd. (Caterpillar or petitioner) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption from the provisions of the Powerplant and Industrial Fuel Use Act of 1978 ("FUA" of "the Act") (42 U.S.C. 8301 *et seq.*) for its proposed York, Pennsylvania, cogeneration facility.

Title II of the Act prohibits the use of petroleum or natural gas as a primary energy source in a new powerplant and prohibits the construction of any such facility without the capability to use an alternate fuel as a primary energy source. The exemption petition was based on lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rule containing the criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules setting forth criteria and procedures for petitioning for this type exemption are found at 10 CFR 503.32.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington, DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register**.

**DATE:** Written comments are due on or before June 29, 1987. A request for a public hearing must be made within the same 45-day period.

**ADDRESS:** Fifteen copies of written comments or a request for a public hearing shall be submited to: Case Control Unit, Office of Fuels Programs, Room GA–093, Forrestal Building, 1000 Independence Ave, SW., Washington, DC 20585.

Docket No. ERA C&E–87–53 should be printed on the outside of the envelope and the document contained therein.

**FOR FURTHER INFORMATION CONTACT:**

Ellen Russell, Coal and Electricity Division, Office of Fuels Progams, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA–093, Washington DC 20585, Telephone (202) 586–9624.

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Room 6A–113, 1000 Independence Avenue, SW., Washington,. DC 20585, Telephone (202) 586–6947.

**SUPPLEMENTARY INFORMATION:** The proposed facility will be a 67 MW cogeneration facility consisting of six 8.6 MW gas-fired turbine generators with hear recovery steam generators, and two 7.5 MW steam turbine generators. The facility will supply approximately 50,000 lbs/hr steam to the Caterpillar Tractor Plant in York, Pennsylvania. In addition it will supply the entire electrical requirement of the plant with excess electricity being sold to Metropolitan Edison for resale.

Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum.

To qualify, the petitioner, pursuant to 120 CFR 503.32(a), must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to confrom with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of the regulations;

(3) No alternate power supply exists, as required under § 503.8 of the regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of the regulations; and

(5) Alternate sites are not available, as required under § 503.11 of the regulations.

In accordance with the evidentiary requirements of §503.32(b) (and in addition to the certifications discussed above), the petitioner has included as part of its petition:

1. Exhibits containing the basis for the certifications descibed above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the request exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the **Federal Register** as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that the petitioner is entitled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comment received during the public comment period provided for in this notice.

Issued in Washington, DC, on May 7, 1987.

**Robert L. Davies,**

*Director, Office of Fuels Programs, Economic Regulatory Administration.*

[Docket No. ERA C&E-87-52; OFP Case No. 52026-5363-20, 21, 22, 23-24]

## Powerplant and Industrial Fuel Use; Acceptance of Petition for Exemption and Availability of Certification by Eagle Point Cogeneration Partnership

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Notice of acceptance.

**SUMMARY:** On April 15, 1987, Eagle Point Cogeneration Partnership (Eagle Point or petitioner) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption from the provisions of the Powerplant and Industrial Fuel Use Act of 1978 ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) for its proposed Eagle Point Cogeneration facility to be located in Westville, New Jersey on the site of the Coastal Eagle Point Oil Company refinery.

Title II of the Act prohibits the use of petroleum or natural gas as a primary energy source in a new powerplant and prohibits the construction of any such facility without the capability to use an alternate fuel as a primary energy source. The exemption petition was based on or lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rule containing the criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules setting forth criteria and procedures for petitioning for this type exemption are found at 10 CFR 503.32.

ERA had determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTAL INFORMATION** section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

A public file containing a copy of this Notice of Acceptence and availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Readig Room, 1000 Independence Avenue, SW, Room 1E-190, Washington DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

EPA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register**.

**DATE:** Written comments are due on or before June 29, 1987. A request for a public hearing must be made within the same 45-day period.

**ADDRESS:** Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA-093, Forrestal Building, 1000 Independence Ave, SW., Washington, DC 20585.

Docket No. ERA C&E-87-52 should be printed on the outside of the envelope and the document contained therein.

**FOR FURTHER INFORMATION CONTACT:**

Xavier Puslowski, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-093, Washington DC 20585, Telephone (202) 586-4706.

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Room 6A-113, 1000 Independence Avenue, SW., Washington DC 20585, Telephone (202) 586-6947.

**SUPPLEMENTARY INFORMATION:** The proposed facility will be a combined topping cycle cogeneration facility consisting of four gas turbines with electric generators and four waste heat boilers.

The facility will produce 170 average net mw of electrical power which will be sold to Jersey Central Power and Light Company and Atlantic Power Company for distribution. The facility will also produce process steam which will be sold to the Coastal Refinery together with 15 MW of electrical power.

Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum.

To qualify, the petitioner, pursuant to 10 CFR 503.32(a), must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of the regulations;

(3) No alternate power supply exists, as required under § 503.8 of the regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of the regulations; and

(5) Alternate sites are not available, as required under § 503.11 of the regulations.

In accordance with the evidentiary requirements of § 503.32(b) (and in addition to the certifications discussed above), the petitioner has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR 1500 *et seq.*; and DOE guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the Federal Register as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that the petitioner is entitled to the exemption requested. That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, DC, on May 5, 1987.

**Robert L. Davies,**

*Director, Office of Fuels Programs, Economic Regulatory Administration.*

**[Docket No. ERA C&E-87-20; OFP Case No. 55119-8044-01, 03-12]**

## Powerplant and Industrial Fuel Use; Order Granting an Exemption Pursuant to the Powerplant and Industrial Fuel Use Act of 1978 to General Motors Corp.

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Order granting exemption.

**SUMMARY:** On January 21, 1987, General Motors Corporation (General Motors or petitioner) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption from the provisions of the Powerplant and Industrial Fuel Use Act of 1978 ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) for two major fuel-burning installation (MFBI) boilers located at its Oklahoma City plant in Oklahoma City, Oklahoma.

Title II of the Act prohibits the use of petroleum or natural gas as a primary energy source in a new powerplant, and prohibits the construction of any such facility without the capability to use an alternate fuel as a primary energy source. The exemption petition was based on lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rules containing the criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules setting forth criteria and procedures for petitioning for this type exemption are found at 10 CFR 503.32.

Pursuant to section 212(g) of the Act and 10 CFR 503.32, ERA hereby issues this order granting a permanent exemption from the prohibitions of FUA for the proposed powerplant at the aforementioned installation.

The basis for ERA's order is provided in the SUPPLEMENTARY INFORMATION section below.

**DATE:** In accordance with section 702(a) of FUA, this order and its provisions shall take effect on July 13, 1987.

**FOR FURTHER INFORMATION CONTACT:**

Xavier Puslowski, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-093, Washington, DC 20585, Telephone (202) 586-4708.

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Room 6A-113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 586-6947.

The public file containing a copy of this order and other documents and supporting materials on this proceeding is available on request from DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E-190, Washington, DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

**SUPPLEMENTARY INFORMATION:** FUA prohibits the use of natural gas or petroleum in certain new MFBIs unless an exemption for such use has been granted by ERA. This petitioner has filed a petition for a permanent exemption to use natural gas or oil as a primary energy source in its facility located in Oklahoma City, Oklahoma.

### NEPA Compliance

After a review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

### Procedural Requirements

In accordance with the procedural requirements of FUA and 10 CFR 501.3(d), ERA published its Notice of Acceptance of Petition for Exemption and Availability of Certification relating to this petition in the Federal Register on March 6, 1987 (52 FR 7009), commencing a 45-day public comment period pursuant to section 701(c) of FUA.

A copy of the petition was provided to the Environmental Protection Agency as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on April 20, 1987; no comments were received and no hearing was requested.

### Order Granting Permanent Exemption

Based upon the entire record of this proceeding, ERA has determined that the petitioner has satisfied all of the eligibility requirements for the requested exemption as set forth in 10 CFR 503.32, and pursuant to section 212(g) of FUA, ERA hereby grants the petitioner's permanent exemption for the unit to be installed at its facility in Oklahoma City, Oklahoma permitting the use of natural gas or oil as a primary energy source in each unit identified in this order.

Pursuant to section 702(c) of the Act and 10 CFR 501.69 any person aggrieved by this order may petition for judicial review at any time before the 60th day following the publication of this order in the Federal Register.

Issued in Washington, DC, on May 5, 1987.

**Robert L. Davies,**

*Director, Office of Fuels Programs, Economic Regulatory Administration.*

**[Docket No. ERA C&E-87-51; OFP Case No. 55047-8388-20, 21, 22-24]**

## Powerplant and Industrial Fuel Use; Acceptance of Petition for Exemption and Availability of Certification by Midway-Sunset Cogeneration Co.

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Notice of Acceptance.

**SUMMARY:** On April 13, 1987, Midway-Sunset Cogeneration Company (Midway or petitioner) filed a petition with the Economic Regulatory Administration

(ERA) of the Department of Energy (DOE) requesting a permanent exemption from the provisions of the Powerplant and Industrial Fuel Use Act of 1978 ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) for Midway to be located in Kern County, California.

Title II of the Act prohibits the use of petroleum or natural gas as a primary energy source in a new powerplant and prohibits the construction of any such facility without the capability to use an alternate fuel as a primary energy source. The exemption petition was based on cogeneration. Final rules containing the criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules setting forth criteria and procedures were revised on June 25, 1982 (47 FR 29209, July 6, 1982), and are found at 10 CFR 503.37.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the SUPPLEMENTARY INFORMATION section below.

As provided for in sections 701 (c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition any any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW, Room 1E-190, Washington DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register.**

**DATES:** Written comments are due on or before June 29, 1987. A request for a public hearing must be made within this same 45-day period.

**ADDRESSES:** Fifteen copies of written commens or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA-093, Forrestal Building, 1000 Independence Ave, SW., Washington, DC 20585. Docket No. ERA C&E-87-51 should be printed on the outside of the envelope and the document contained therein.

**FOR FURTHER INFORMATION CONTACT:**

Xavier Puslowski, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW. Room GA-093, Washington DC 20585, Telephone (202) 586-4708.

Steven E Ferguson, Esq., Office of General Counsel, Department of Energy, Room 6A-113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202 586-6947.

**SUPPLEMENTARY INFORMATION:** The proposed Midway project is a 225 MW combined cycle unit consisting of three gas fired turbine generators and three heat recovery steam generators to generate steam and electricity. The electricity will be sold to Southern California Edison and the steam will be used in Sun EXP.'s enchanced oil recovery operation.

Section 212(c) of the Act and 10 CFR 503.37 provides for a permanent cogeneration exemption from the prohibitions of Title II of FUA. In accordance with the requirements of § 503.37(a)(1), the petitioner has certified to ERA that:

1. The oil or gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the proposed powerplant, where the calculation of savings is in accordance with 10 CFR 503.37(b); and

2. The use of a mixture of petroleum or natural gas and an alternate fuel in the cogeneration facility, for which an exemption under 10 CFR 503.38 would be available, would not be economically or technically feasible.

On May 22, 1986, DOE published in the **Federal Register** (51 FR 18866) a notice of the amendment to its guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA). Pursuant to the amended guidelines, the grant or denial of a permanent cogeneration exemption from FUA is among the classes of actions that DOE has categorically excluded from the requirement to prepare an Environmental Impact Statement or an Environmental Assessment pursuant to NEPA (categorical exclusion).

This classification raises a rebuttable presumption that the grant or denial of the exemption will not significantly affect the quality of the human environment. The petitioner has certified that it will secure all applicable permits and approvals prior to commencement of operation of the new unit under exemption.

DOE's Office of Environment, in consultation with the Office of General Counsel, will review the completed environmental checklist submitted by the petitioner pursuant to 10 CFR 503.13, together with other relevant information. Unless it appears during the proceeding on the petitioner's petition that the grant or denial of exemption will significantly affect the quality of the human environment, it is expected that no additional environmental review will be required.

The acceptance of the petition by ERA does not constitute a determination that the petitioner is entitled to the exemption requested. The determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, DC, on May 5, 1987.

**Robert L. Davies,**

*Director, Office of Fuels Programs, Economic Regulatory Administration.*

**[Docket No. ERA C&E-87-50; OFP Case No. 50135-9353-20, 21-22]**

## Powerplant and Industrial Fuel Use; Acceptance of Petition for Exemption and Availability of Certification by the City of Austin, TX

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Notice of acceptance.

**SUMMARY:** On March 31, 1987, the City of Austin, Texas (Austin or petitioner) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption from the provisions of the Powerplant and Industrial Fuel Use Act of 1978 ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) for its proposed combined cycle baseload gas-fueled powerplant to be located in Travis County, Texas.

Title II of the Act prohibits the use of petroleum or natural gas as a primary energy source in a new powerplant and prohibits the construction of any such facility without the capability to use an alternate fuel as a primary energy source. The exemption petition was based on lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rule containing the criteria and procedures for petitioning

for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules setting forth criteria and procedures for petitioning for this type exemption are found at 10 CFR 503.32.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701 (c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington DC 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register**.

**DATES:** Written comments are due on or before June 29, 1987. A request for a public hearing must be made within this same 45-day period.

**ADDRESSES:** Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA–093, Forrestal Building, 1000 Independence Ave., SW., Washington, DC 20585.

Docket No. ERA C&E–87–50 should be printed on the outside of the envelope and the document contained therein.

**FOR FURTHER INFORMATION CONTACT:**

John Boyd, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA–093, Washington, DC 20585, Telephone (202) 586–4523.

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Room 6A–113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 586–6947.

**SUPPLEMENTARY INFORMATION:** The proposed facility will be a 215 MW combined cycle base-load powerplant using natural gas. It will be located at Austin's existing Decker powerplant facility about 7.5 miles northeast of downtown Austin.

Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum.

To qualify, the petitioner, pursuant to 10 CFR 503.32(a), must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in § 503.6 (cost calculation) of the regulations;

(3) No alternate power supply exists, as required under § 503.8 of the regulations;

(4) Use of mixtures is not feasible, as required under § 503.9 of the regulations; and

(5) Alternate sites are not available, as required under § 503.11 of the regulations.

In accordance with the evidentiary requirements of § 503.32(b) (and in addition to the certifications discussed above), the petitioner has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the **Federal Register** as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that the petitioner is entitled to the exemption requested. That determination will be based on the entire record of ths proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, DC, on May 5, 1987.

**Robert L. Davies,**

## Powerplant and Industrial Fuel Use; Order Granting an Exemption to Virginia Electric and Power Company

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Order granting exemption.

**SUMMARY:** On September 25, 1986, Virginia Electric and Power Company (VEPCO or petitioner) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption from the provisions of the Powerplant and Industrial Fuel Act of 1978 ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) for two proposed 210 megawatt gas-fired combined cycle electric generating units at its Chesterfield Generating Station in Chesterfield County, Virginia.

Title II of the Act prohibits the use of petroleum or natural gas as a primary energy source in a new powerplant, and prohibits the construction of any such facility without the capability to use an altenate fuel as a primary energy source. The exemption petition was based on lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. Final rules containing the criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules setting forth criteria and procedures for petitioning for this type exemption are found at 10 CFR 503.32.

Pursuant to section 212(a) of the Act and 10 CFR 503.32, ERA hereby issues this order granting a permanent exemption from the prohibitions of FUA for the proposed powerplant at the aforementioned installation.

The basis for ERA's order is provided in the SUPPLEMENTARY INFORMATION section below.

**DATE:** In accordance with section 702(a) of FUA, this order and its provisions shall take effect on July 13, 1987.

**FOR FURTHER INFORMATION CONTACT:**

Frank Duchaine, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA–093, Washington DC 20585, Telephone (202) 586–8233.

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Room 6A–113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 586–6947.

The public file containing a copy of this order and other documents and supporting materials on this proceeding is available on request from DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m. except Federal holidays.

**SUPPLEMENTARY INFORMATION:** FUA prohibits the use of natural gas or petroleum in certain new powerplant unless an exemption for such use has been granted by ERA. The petitioner has filed a petition for a permanent exemption to use natural gas or oil as a primary energy source in its facilities located in Chesterfield County, Virginia.

**NEPA Compliance**

After a review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemptions does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

**Procedural Requirements**

In accordance with the procedural requirements of FUA and 10 CFR 501.3(d), ERA published its Notice of Acceptance of Petition for Exemption and Availability of Certification relating to this petition in the **Federal Register** on November 12, 1986 (51 FR 40999), commencing a 45-day public comment period pursuant to section 701(c) of FUA.

Copies of the petition were provided to the Federal Energy Regulatory Commission and the Environmental Protection Agency as required by sections 312(c) and 701(f). During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on December 29, 1986. On December 29, 1986, a public hearing was requested by the National Coal Association (NCA) and was held on February 17, 1987. NCA asserted that certain factors in the calculation of the cost comparisons required by the rules were outdated and inaccurate and that reliance on the comparisons would be arbitrary.

With respect to matters concerning the rules, 10 CFR 503.6, Appendix II, provides that the parameters for a specific petition for exemption will be the set in effect at the time the petition is submitted or the set in effect at the time the decision is rendered, whichever is more favorable to the petitioner. ERA has reviewed all relevant data contained in the petition and provided as a result of the hearing and comment period and concluded that VEPCO's petition satisfied the requirement of rules in existence at the time of the filing of the petition.

On March 21, 1987 NCA withdraw its opposition to the granting of the exemption sought by VEPCO but reserved its request that ERA review its regulations in a rulemaking proceeding. ERA has initiated a review of the pertinent rules and will determine whether the regulations should be revised.

**Order granting Permanent Exemption**

Based upon the entire record of this proceeding, ERA has determined that the petitioner has satisfied all of the eligibility requirements for the requested exemption as set forth in 10 CFR 503.32, and pursuant to section 212(a) of FUA, ERA hereby grants the petitioner's permanent exemption for the units to be installed at its facility in Chesterfield County Virginia permitting the use of natural gas or oil as a primary energy source in the units.

Pursuant to section 702(c) of the Act and 10 CFR 501.69 any person aggrieved by this order may petition for judicial review at any time before the 60th day following the publication of this order in the **Federal Register**.

Issued in Washington, DC on May 6, 1987.

**Robert L. Davies,**

*Director, Office of Fuels Programs, Economic Regulatory Administration.*

## Proposed Remedial Order to Kern Oil & Refining Co.

**AGENCY:** U.S. Department of Energy, Economic Regulatory Administration.

**ACTION:** Notice of proposed remedial order to Kern Oil & Refining Co.

**SUMMARY:** Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Kern Oil & Refining Company (Kern), Rt. 6, Box 336, Bakersfield, California 93307. This Proposed Remedial Order alleges violations in the amount of $32,055,191.09 resulting from Kern's circumvention of its obligations under the Department of Energy's Entitlements Program during the time period October 1979 through December 1980. The effect of the alleged violations is nationwide.

A copy of the Proposed Remedial Order, with confidential information (if any) deleted, may be obtained from: Office of Freedom of Information Reading Room, United States Department of Energy, Forrestal Building, Room 1E–190, 1000 Independence Avenue, SW., Washington, DC 20585.

Within fifteen (15) days of publication of this Notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, United States Department of Energy, Forrestal Building, Room 6F–078, 1000 Independence Avenue, SW., Washington, DC 20585, in accordance with 10 CFR 205.193. The Notice shall be filed in duplicate, shall briefly describe how the person would be aggrieved by issuance of the Proposed Remedial Order as a final order and shall state the person's intention to file a Statement of Objections. A person who fails to file a Notice of Objection shall be deemed to have admitted the findings of fact and conclusions of law stated in the PRO. If a Notice of Objection is not filed in accordance with § 205.193, the PRO may be issued as a final Remedial Order by the Office of Hearings and Appeals.

Issued in Washington, DC, on the 4th day of May 1987.

**Marshall Staunton,**

*Administrator, Economic Regulatory Administration.*

## Office of Energy Research

**[Special Research Grant Program Notice 87–3]**

## Complex Carbohydrates; Extension of Receipt Date for Applications

**AGENCY:** Department of Energy.

**ACTION:** Extension of Receipt Date for Applications.

**SUMMARY:** The Office of Energy Research of the Department of Energy has determined that the originally published receipt date for submission of applications for Special Research Grants supporting a multi-disciplinary research, training and service program for characterization of chemical structures of complex carbohydrates did not provide adequate time for respondents to complete the required submission documentation. The original notice was published in the **Federal Register** dated January 26, 1987, Volume 52, No. 16, page 2762. Therefore, the submission date is now extended to June 1, 1987, and all applications for the activity must be received by the Acquisition and Assistance Management Division, ER–64, Washington, DC 20545, by that date.

Issued in Washington, DC, on April 20, 1987

**Ira M. Adler,**

*Deputy Director for Management, Office of Energy Research.*

## Federal Energy Regulatory Commission

**[Docket Nos. ER87–214–000 et al.]**

### Electric Rate and Corporate Regulation Filings; The Washington Water Power Co. et al.

Take notice that the following filings have been made with the Commission:

**1. The Washington Water Power Co.**

[Docket No. ER87–214–000]

Take notice that no March 6, 1987, the Washington Water Power Company (Washington) tendered for filing copies of an Amendment to Filing relating to Docket No. ER87–214–000. This Amendment to Filing clarifies deficiencies in that filing.

A copy of the Amendment to Filing has been sent to Pacific Power & Light Company.

*Comment date:* May 19, 1987 in accordance with Standard Paragraph E at the end of this notice.

**2. United Illuminating Co.**

[Docket No. ER87–136–001]

Take notice that on April 20, 1987, the United Illuminating Company ("UI"), pursuant to a letter dated March 20, 1987 from Jerry R. Milbourn, Director, Division of Electric Power Application Review, tendered for filing its Second Amendment to its rate filing in Docket No. ER87–136–000.

*Comment date:* May 26, 1987, in accordance with Standard Paragraph E at the end of this document.

**3. Monongahela Power Co. et al.**

[Docket No. ER87–330–001]

May 7, 1987.

Take notice that on May 1, Allegheny Power Service Corporation submitted for filing additional data requested by the Commission's staff.

*Comment date:* May 26, 1987, in accordance with Standard Paragraph E at the end of this notice.

**4. Northern States Power Co. (Minnesota)**

[Docket No. ER87–407–000]

May 6, 1987.

Take notice that Northern States Power Company (Minnesota) (NSP) tendered for filing on April 29, 1987, settlement changes in FERC wholesale rates. On April 20, 1987, NSP and Municipals agreed to a rate reduction. NSP tendered for filing wholesale rate schedule revisions agreed to by the parties.

The ten affected firm power total requirements wholesale customers and their current FERC rate schedule designations of their contracts are as follows:

| Customer | FERC rate schedule No. |
|---|---|
| Firm Power Service | |
| Primary Distribution Voltage | |
| Arlington | 421 |
| Brownton | 422 |
| Chaska | 424 |
| Kasota | 426 |
| Kasson | 427 |
| North St. Paul | 429 |
| Shakopee | 431 |
| Winthrop | 433 |
| Firm Power Service | |
| Transmission Service | |
| Anoka | 420 |
| Buffalo | 423 |

The ten affected load pattern partial requirement wholesale customers and their current FERC rate schedule designation of their contracts are as follows:

| Customer | FERC rate Schedule No. |
|---|---|
| Load Pattern Service | |
| Primary Distribution Voltage | |
| Sauk Centre | [illegible] |
| Load Pattern Service | |
| Transmission Voltage | |
| ADa | 390 |
| East Grand Forks | 387 |
| Fairfax | 400 |
| Kenyon | 394 |
| LeSueur | 392 |
| Madelia | 397 |
| Melrose | [illegible] |
| Olivia | 388 |
| Sioux Falls | 412 |

Copies of the rate schedule change and comparative billing data were served upon NSP's customers affected by this filing. In addition, copies of the filing have been mailed to the Minnesota Public Utilities Commission, the North Dakota Public Service Commission and the South Dakota Public Utilities Commission. Additional copies are available from the Company.

*Comment date:* May 19, 1987, in accordance with Standard Paragraph E at the end of this notice.

**Standard Paragraphs**

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to beecome a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**[Docket Nos. QF87–357–000 et al.]**

### Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, etc.; BASF Corporation et al.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

Take notice that the following filings have been made with the Commission.

**1. BASF Corporation**

[Docket No. QF87–357–000]

May 7, 1987.

On April 7, 1987, BASF Corporation (Applicant), of 100 Cherry Hill Road, P.O. Box 181, Parsippany, New Jersey

07054, submittted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. On April 29, 1987, Applicant filed an amendment to the above application and requsted certification of the same facility as a qualifying small power production facility pursuant to §292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Kearny, New Jersey. The facility will consist of a condensing steam turbine generating unit. Excess steam produced (due to highly exothermic reaction of the mixture of air and o-xylene) in a phthalic anhydride production plant will be used to generate electric power for on-site use. The primary energy source will be excess (waste) steam from the phthalic anhydride process. The electric power production capacity of the facility will be 2.4 MW. Installation of the facility began on December 1, 1986.

**2. Baylor University c/o Stone & Webster Engineering Corporation**

[Docket No., QF87-481-000]

May 7, 1987.

On April 29, 1987, Baylor University, c/o Stone & Webster Engineering Corporation (Applicant), of P.O. Box 5200, Cherry Hill New Jersey submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Waco, Texas. The facility will consist of one combustion turbine generator and one heat recovery steam generator. Steam recovered from the facility will be used for production of domestic hot water, and space heating and cooling. The net electric power production facility will be 3,626 kilowatts. The primary energy source will be natural gas. Construction of the facility is expected to begin in the third quarter of 1987.

**3. O'Connell Engineering & Financial, Inc.**

[Docket No. QF87-381-000]

May 6, 1987.

On April 20, 1987, O'Connell Engineering & Financial, Inc. (Applicant), of P.O. Box 867, Holyoke, Massachusetts 01041-0867 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at Morton Thiokol Inc.'s Ventron Division, in Danvers, Massachusetts. The facility will consist of a combustion turbine generator, a heat recovery steam generator equipped for supplementary firing, and an extraction/condensing steam turbine generator. Thermal energy recovered from the facility will be utilized for process by the Ventron Division. The net electric power production capacity of the facility will be 26,022 kW. The primary energy source for the facility will be natural gas and No. 2 fuel oil. Installation of the facility is expected to be completed by July 1989.

**4. Sun Refining and Marketing Company**

[Docket No. QF87-398-000]

May 7, 1987.

On April 28, 1987, Sun Refining and Marketing Company of 1801 Market Street, Philadelphia, Pennsylvania 19103-1699 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed cogeneration facility will be located at the Marcus Hook Refinery, in Marcus Hook, Pennsylvania. The facility will consist of a combustion turbine generator and a heat recovery steam generator (HRSG). The steam from the HRSG will be used for thermal process applications in the refinery. The electric power production capacity of the facility will be 51.8 MW. The primary energy source will be natural gas. The installation of the facility commenced in April, 1987.

**Standard Paragraphs**

e. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules and practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

---

[Docket No. EL87-19-000]

## Florida Power & Light Co.; Granting Extension of Time

May 8, 1987.

On May 5, 1987, the National Association of Regulatory Utility Commissioners (NARUC) filed a petition for reconsideration of the notice of April 14, 1987, denying a request for additional time to file comments on the Petition for Declaratory Order filed in this proceeding. NARUC states that additional time is necessary because of the importance of the issues, NARUC's strong interest in the proceeding and the difficulty of filing substantive comments within the time period of the notice of the filing (published at 52 FR 9531, March 25, 1987).

Upon consideration, notice is hereby given that the date for filing interventions, protests and comments is extended to and including June 2, 1987.

Kenneth F. Plumb,

*Secretary.*

## Office of Hearings and Appeals

[Case No. KCF-0047]

## Implementation of Special Refund Procedures

**AGENCY:** Office of Hearings and Appeals, Department of Energy.

**ACTION:** Notice of implementation of special refund procedures.

**SUMMARY:** The Office of Hearings and Appeals of the Department of Energy has adopted final procedures to be followed in disbursing the remaining funds being held in escrow following the settlement of enforcement proceedings involving Pennzoil Company (Case No. KCF-0047).

**FOR FURTHER INFORMATION CONTACT:** Virginia A. Lipton, Assistant Director, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-2400.

**SUPPLEMENTARY INFORMATION:** In accordance with the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Decision and

Order set out below. The Decision relates to a July 9, 1981 consent order between the Pennzoil Company and the Department of Energy. That consent order settled certain disputes between the firm and the DOE concerning Pennzoil's possible violations of DOE regulations in its sales of crude oil and refined petroleum products.

The Decision effectuates a remand order of the United States District Court for the Eastern District of Michigan. The remand order directed the OHA to either (1) evaluate whether Pennzoil refund recipients merited additional refunds based on six equitable factors set forth in the original Pennzoil implementation order or (2) establish, through appropriate procedures, new standards for evaluating additional claims for Pennzoil refunds. In the Order, the OHA elected the second option and decided that no additional refunds should be granted to Pennzoil refund claimants. Accordingly, as set forth in the Order, upon proper application the remaining Pennzoil escrow funds will be disbursed to the States in order to effect indirect restitution.

Dated: May 7, 1987.

George Breznay,

*Director, Office of Hearings and Appeals.*

May 7, 1987.

**Decision and Order of the Department of Energy**

*Special Refund Procudures*

Name of Case: Pennzoil Company
Date of Filing: July 17, 1986
Case Number: KCF-0047

This proceeding is before the Office of Hearings and Appeals (OHA) on remand from the United States District Court for the Eastern District of Michigan. The proceeding involves an appeal filed with that court by Oerther Brothers Sales and Service and Maybee Gas and Oil (Oerther and Maybee). Oerther and Maybee appealed refunds issued to them by the OHA from a consent order fund made available by Pennzoil Company. The facts leading to this remand are as follows.

On March 10, 1982, the OHA issued a Decision and Order instituting special refund proceedings for distribution of the Pennzoil consent order fund. *Office of Special Counsel*, 9 DOE ¶ 82,545 (1982) (hereinafter referred to as *Pennzoil*). The procedures under which this type of special refund proceeding is conducted are set forth at 10 CFR Part 205, Subpart V. Under the terms of the consent order, Pennzoil placed $3,000,000 into an escrow account to be distributed, together with interest, in accordance with the directives of the OHA pursuant to the Subpart V regulations governing special refund proceedings. In Pennzoil we decided to generally allocate refunds to claimants on a volumetric basis. That is, an applicant's allocable share of the total consent order fund would be calculated by multiplying the number of eligible gallons pruchased by the applicant by a factor using the consent order fund as the numerator and the total gallons of product covered by the consent order as the denominator. We also stated that we would consider at a future date granting refunds to successful claimants beyond the volumetric level, based upon our evaluation of six equitable factors.[1] Subsequently, in *Pennzoil Company/Paul L. Strycula*, 12 DOE ¶ 85,211 (1985) (*Strycula*) we found no justification for any additional *Pennzoil* refunds based on the equitable factors approach.

Oerther and Maybee, two claimants to which refunds were granted in the Pennzoil proceeding under the volumetric approach, appealed to the United States District Court for the Eastern District of Michigan our determination not to grant further refunds based on a consideration of the equitable factors.[2] *Oerther v. DOE*, No. 84-CV-7240-DT (E.D. Mich. 1986). By Order of June 30, 1986, the court remanded the Oerther proceeding to the OHA. The court stated that we may either evaluate the Plaintiffs' refund claims pursuant to the six equitable factors enumerated in *Pennzoil*, or, through appropriate proceedings, establish new standards for evaluating additional claims for Pennzoil refunds pursuant to our Subpart V regulations.

After reviewing the court's memorandum opinion, we decided to fulfill its directive by electing the latter option. Accordingly, on March 4, 1987, we issued a Proposed Decision and Order setting forth new standards for evaluation those additional claims.[3]

In the Proposed Order, we tentatively decided that no additional refunds should be issued to successful Pennzoil claimants based on the equitable factors approach. We pointed out that *Pennzoil* was one of our earliest Subpart V refund implementation orders. At the time *Pennzoil* was issued, we believed that it might be appropriate to grant classes of successful claimants refunds beyond volumetric levels, based on the six equitable factors. We gained considerable experience in formulating Subpart V procedures during the six-year period since *Pennzoil* was issued. We now believe that augmenting refunds to classes of applicants in that manner is not justified, is administratively difficult to implement and could well confer unwarranted benefits. As we indicated in the Proposed Order, we found no justification for providing additional disbursements from the contents of an escrow account on a class basis. In fact, in no Subpart V proceeding has the DOE made this kind of incremental distribution. Furthermore, as we have stated in the past, as a general rule, we are reluctant to distribute refunds beyond volumetric amounts to those applicants that simply happened to have filed applications. *E.g., Office of Special Counsel for Compliance, Economic Regulatory Administration: In the Matter of Standard Oil Company (Indiana) (Amoco)*, 10 DOE ¶ 85,048 (1982). We therefore tentatively decided that a general distribution above volumetric levels should not be made to claimants in the Pennzoil proceeding.

As we also pointed out in the Proposed Order, we have always been willing to consider claims of individual applicants that they were disproportionately overcharged and should therefore receive a refund greater than the volumetric amount. *E.g., Strycula*, 12 DOE at 88,669; *Amoco*, 10 DOE at 88,199. We specifically considered such a claim in the Pennzoil proceeding itself. *Pennzoil Co./Gulf Oil*

---

[1] The equitable factors set forth in *Pennzoil* are (i) the amount of interest accumulated in the Pennzoil escrow account; (ii) the number of qualified applicants and their aggregate purchase volumes compared to the amount of Pennzoil product sales during the consent order period; (iii) the impact of the alleged violations on the claimant's business; (iv) market conditions during the consent order period; (v) the claimant's position in the distribution chain (reseller, retailer, consumer) and (vi) the manner in which the claimant's business is governed by regulatory agencies or contractual agreements, such as those affecting cooperatives. *Pennzoil*, 9 DOE at 85,248.

[2] In a memorandum opinion of November 21, 1984, the court granted Oerther and Maybee's Motion for Class Certification. The certified class included all those that had received refunds in our Pennzoil refund proceeding. In the appeal, Oerther and Maybee also argued that the volumetric approach was improper and that the entire Pennzoil fund must be distributed on a pro rata basis among all successful Pennzoil claimants. In this regard the firms maintained that the mere showing of banks of unrecouped product costs was a showing of injury sufficient to warrant such a distribution. The court rejected this aspect of the firms' appeal.

[3] Pursuant to 10 CFR 205.282(a), the OHA issues a Proposed Decision and Order setting forth standards and procedures that it intends to apply in evaluating refund claims. The Proposed Decision is to be published in the Federal Register and there must be at least a 30 day period in which any member of the public may file comments with respect to that tentative determination. 10 CFR 205.282(b). Pursuant to 10 CFR 205.282(c) the OHA considers comments received and issues a final Decision and Order governing the disposition of refunds. It is this process that governs the Pennzoil remand proceeding.

*Corp.*, 12 DOE ¶ 85,057 (1984).[4] Pennzoil applicants should therefore have been well aware that in order to receive a refund beyond the volumetric amount, they would have had to show that they experienced a disproportionate Pennzoil overcharge. No Pennzoil applicant made this type of showing, and refunds were approved in this proceeding on a volumetric, pro-rata basis. In view of these considerations, we tentatively determined in the Proposed Order that all Pennzoil consent order funds that the DOE has not disbursed to purchasers of Pennzoil products for purposes of direct restitution should be distributed to State governments in order to effect indirect restitution.[5]

As required by 10 CFR 205–282(b) we published in the Federal Register a Notice of the Proposed Decision and Order and provided a 30 day period for the public to provide comments on our tentative determination. That Notice was published on March 12, 1987. 52 FR 7685. The 30 day comment period has now elapsed. We are ready to consider the comments received on the Proposed Order and issue a final Decision and Order with respect to the Pennzoil refund procedures.

We received two comments regarding our Pennzoil Proposed Order. One comment was filed by Lyon Oil Company, a Pennzoil reseller. Lyon received a refund of $7,303 plus interest in the first stage of our Pennzoil refund proceeding. *Pennzoil Company/B & L Motor Freight, Inc., et al.*, 10 DOE ¶ 85,037 (1982). That refund was based on the volumetric approach discussed above. In its comments regarding our Proposed Order, Lyon claims that Pennzoil raised its prices by two cents per gallon in 1975 and that, as a result, Pennzoil's prices were higher than those of other product distributors in Lyon's market area. Lyon asserts that it was not able to recover that two-cent per gallon price increase on any Pennzoil product it sold during the four-month period from November 1975 through February 1976. The firm therefore requests a refund of $80,000 based on that alleged two-cent per gallon overcharge. Although Lyon alleges that it was overcharged by two cents per gallon by Pennzoil, it has failed to show that it was disproportionately overcharged as compared to other Pennzoil resellers. Therefore, we cannot find any basis for granting it a refund in an amount greater than the volumetric amount. As we stated above, Lyon has already received a refund in that amount. Accordingly, we see no basis for increasing Lyon's refund. The second comment was filed by the Attorneys General for the States of Alabama, Indiana and Ohio. In *Pennzoil Company* we determined that remaining Pennzoil funds should be disbursed to those three States, among others, to effect indirect restitution. Not surprisingly, these States support the procedures set forth in the Proposed Order.

We have received no comments recommending that we revise the procedures set forth in our Proposed Order and since we see no reason to alter any of those procedures, we shall adopt the proposed procedures as final procedures for disbursing the balance of the Pennzoil escrow account. Therefore, the remaining Pennzoil funds shall be disbursed to State governments as described in *Pennzoil Company* in order to effect indirect restitution.

It is therefore ordered that:

(1) The funds remaining in the Pennzoil Company escrow account shall be disbursed pursuant to the procedures set forth in *Pennzoil Company* on February 12, 1985 in Case Number HQF–0024.

(2) This is a final Order of the Department of Energy.

Dated: May 7, 1987.

George B. Breznay,

*Director Office of Hearings and Appeals.*

BILLING CODE [illegible]

## Cases Filed; Week of April 17 Through April 24, 1987

During the Week of April 17 through April 24, 1987, the applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the applications within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,

*Director, Office of Hearings and Appeals.*

May 8, 1987

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of April 17 through April 24, 1987]

| Date | Name and Location of Applicant | Case No. | Type of Submission |
|---|---|---|---|
| Apr. 13, 1987 | South Dakota, Pierre, SD | KER-0023 | Request for modification/rescission. If granted: The February 27, 1987 Decision and Order issued to South Dakota (Case No. KEG-2004) would be modified regarding the state's plan for use of monies obtained through the Stripper Well Settlement Agreement. |
| Apr. 16, 1987 | Palo Pinto, Belridge & Amoco/ Kansas, Topeka, KS. | RM5-63, RM8-64, RM21-65 | Request for modification/rescission in the Palo Pinto Belridge & Amoco Second Stage Refund Proceedings. If granted: The December 10, 1986 Decision and Order (Case Nos. RM 5-54 RM8-53 & RM21-52) issued to Kansas would be modified regarding the state's application for refund submitted in the Palo Pinto, Belridge & Amoco Second Stage Refund Proceedings. |
| Apr. 17, 1987 | Aminoil/Wilhelm Enterprises, St. Louis, MO. | RF139-9 | Request for modification/rescission in the Aminoil Refund Proceeding. If granted: The March 9, 1987 Decision and Order (Case No. RF139-33) issued to Wilhelm Enterprises would be modified regarding the firm's application for refund submitted in the Aminoil refund proceeding. |

[4] In that proceeding, Gulf alleged that it was overcharged in its purchases of crude oil from Pennzoil. The measure of the overcharges alleged by Gulf was the difference between the price it paid Pennzoil and the correct ceiling price for the crude oil. After fully considering this claim of an overcharge in an amount greater than the volumetric amount, we rejected the application, finding that Gulf had not adequately established that the prices it paid Pennzoil exceed the correct ceiling prices.

[5] In order to effect this indirect restitution, a division of the remaining Pennzoil funds among eleven affected States (including the Commonwealth of Puerto Rico) was made pursuant to *Pennzoil Company*, 12 DOE ¶ 85,183 (1985) (*Pennzoil Company*). The States' rights to those funds were preserved under section 3003(c)(5) of the Petroleum Overcharge Distribution and Restitution Act of 1986. No funds have yet actually been disbursed to the States pending the outcome of the Oerther appeal. In order to receive its allotted funds, a State will be required to file with OHA an appropriate plan for use of the monies.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of April 17 through April 24, 1987]

| Date | Name and Location of Applicant | Case No. | Type of Submission |
|---|---|---|---|
| Apr. 17, 1987 | Texaco, Inc., Washington, DC | RCX-0052 | Federal Energy Regulatory Commission Remand. If granted: The September 5, 1986 Decision and Order (Case No. HRO-0273) issued to Texaco, Inc. by the Office of Hearings and Appeals would be modified in connection with April 15, 1987 order issued by Federal Energy Regulatory Commission. |
| Apr. 21, 1987 | Oil Marketing Co., Inc., Stilwell, OK. | KEE-0135 | Exception to the Reporting Requirements If granted: Oil Marketing Co., Inc. would not be required to file Form EIA-782B, Reseller/Retailer Monthly Petroleum Product Sales Report. |

BILLING CODE 6450-01-M

## Issuance of Decisions and Orders; Week of March 9 Through March 13, 1987

During the week of March 9 through March 13, 1987, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

### Appeal

*Imhoff & Lynch, 3/12/87; KFA-0079*

Imhoff & Lynch filed an Appeal from a partial denial by the Idaho Operations Office of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the material requested was correctly withheld under Exemptions 5 and 6. Important issues that were considered in the Decision and Order were: (i) Whether, under Exemption 6, death of an individual extinguishes all privacy rights in personal information contained in agency files; and (ii) whether the notes of DOE officials recording information supplied by non-agency personnel are intra-agency communications within the meaning of Exemption 5

### Motion for Discovery

*Bayport Refining Company, Olene Crumpton, Malcolm Turner, Robert Houser, Harry Mason, 3/13/87; HRD-0270, HRH-0270, KRZ-0031, KRZ-0053, KRZ-0054, KRZ-0055, and KRZ-0058*

Bayport Refining Company, and four Bayport officers/employees filed a Motion for Discovery and Motion for Evidentiary Hearing in support of their objections to a Proposed Remedial Order issued to them. The PRO alleged that the Respondents engaged in the practice of layering. The DOE denied the Motion for Discovery, on the grounds that the Respondents had failed to provide a legal or factual basis for any of their requests. However, the DOE granted the Motion for Evidentiary Hearing, so that the Respondents could conform their position in the case to recent developments in agency law regarding: (i) The services they claim to have performed in connection with the sales cited in the PRO; and (ii) the extent to which they had control over and benefited from the firm's business activities. Each of the individual Respondents also filed a motion requesting dismissal from the proceeding. The DOE denied all but one of those motions, noting that if the ERA succeeded in proving its allegations, there was a sufficient legal basis for holding three of the four individual Respondents liable. In regard to the one individual which it did dismiss the DOE determined that the party in question had no authority at the company and had received only a salary for performance of secretarial duties.

### Interlocutory Order

*Leonard D. Rice d/b/a Rice Oil Company, Rice-Lindquist, Inc., 3/10/87; HRZ-0235, HRR-0069*

Leonard D. Rice d/b/a Rice Oil Company and Rice-Lindquist, Inc. (Rice) filed a Motion to Dismiss and Request for Reconsideration of a prior Decision denying a Motion for Discovery and Evidentiary Hearing. The submissions were filed in connection with a Proposed Remedial Order (PRO) issued to Rice. In the Motion to Dismiss, Rice argued that portions of the PRO alleging violations of the price regulations promulgated pursuant to the Economic Stabilization Act of 1970 (ESA) must be vacated, since the DOE is without statutory authority to allege violations under that Act. The DOE found that the legislative history clearly indicates that the DOE is authorized to issue remedial orders pursuant to the ESA. In considering Rice's Request for Reconsideration, the DOE determined that Rice had not demonstrated the existence of any factual dispute that would warrant discovery or an evidentiary hearing. Accordingly, the Motion to Dismiss and the Request for Reconsideration were denied.

### Refund Applications

*Aminoil U.S.A., Inc./Miller's LP Gas Service, Inc., et al., 3/9/87; RF139-6, et al.*

The DOE issued a Decision and Order granting refunds from the Aminoil U.S.A., Inc. consent order fund to 12 reseller-retailers of Aminoil natural gas liquid products (NGLPs). One applicant received its full volumetric share of the consent order fund based on the small claims presumption of injury. The remaining 11 firms were all eligible for refunds in excess of the $5,000 threshold, but were unable to provide the demonstration of injury necessary to receive such refunds. Therefore, each of the remaining firms' refunds was limited to the $5,000 small claims threshold amount. The refunds to these firms total $97,482, representing $58,025 in principal and $39,457 in interest.

*C.K. Smith & Company, Inc./Fairlawn Oil Service, Inc., 3/12/87; RF264-7*

The DOE issued a Decision and Order concerning an Application for Refund filed by Fairlawn Oil Service, Inc. from a consent order fund made available by C.K. Smith & Company, Inc. The DOE found that Fairlawn was a reseller of No. 2 heating oil purchased from Smith during the consent order period. Since the amount of the refund for which Fairlawn applied was less than the $5,000 small claims amount provided for in the Order implementing procedures for disbursing the Smith fund, the claimant was

not required to submit a detailed proof of injury. Accordingly, Fairlawn was granted a refund in the amount of its full volumetric share, $3,989, plus $3,355 in accrued interest.

*Cloyce K. Box/Conoco, Inc., 3/11/87; RF291–1*

The DOE issued a Decision and Order concerning an Application for Refund filed by Conoco, Inc., seeking a portion of the settlement fund obtained by the DOE through a consent order entered into with Cloyce K. Box. The Box consent order covered sales of OKC Corporation motor gasoline at illegal prices by J.R. Adams Oil Co. and Ritco, Inc., two brokers acting on Box's behalf. Using the standards established for disbursing the Box consent order fund, the DOE determined that Conoco was injured by Adams' pricing practices during the consent order period and was therefore eligible for a refund of $458,532 ($233,979 in principal and $224,553 in interest).

*Farstad Oil Company/Ahmann's Service Center Conrad Ziegler, 3/10/87; RF261–2, RF261–12*

The DOE issued a Decision and Order concerning two Applications for Refund filed by purchasers of motor gasoline from Farstad Oil Company. Each firm applied for a refund based on the procedures established for the disbursement of settlement funds received from Farstad pursuant to a Consent Order. Since both of the applicants claimed refunds of $5,000 or less, they were presumed to have been injured by Farstad's alleged overcharges. After examining the applications and supporting documentation submitted by the applicants, the DOE concluded that they should receive refunds totaling $713, representing $563 in principal and $150 in accrued interest.

*Florida Furniture Industries, Inc., Van de Kamp's Holland Dutch Bakers, Inc., 3/9/87; RF270–1106, RF270–1111*

The Department of Energy (DOE) issued a Decision and Order approving a manufacturing company and a bakery for refunds from the Surface Transporters Escrow, established as the result of the Stripper Well Settlement Agreement. Each company operates a private fleet of trucks and based its claim on purchases of diesel fuel between August 19, 1973 and January 27, 1981. The DOE's Decision approved each company's purchase volumes. The DOE will determine a per gallon refund amount and establish the amount of each company's refund after it completes its analysis of all Surface Transporter claims.

*GCO Minerals Co./Enterprise Products Company, Inc., 3/13/87; RF254–1*

The DOE issued a Decision and Order concerning an Application for Refund filed by Enterprise Products Company, seeking a portion of the funds remitted by GCO Minerals Company pursuant to a consent order that GCO entered into with the DOE. Enterprise purchased 85,553,683 gallons of natural gas liquid products from GCO during the consent order period. The DOE found that in each quarter in which it purchased normal butane and isobutane from GCO, Enterprise experienced a competitive disadvantage. In addition, the DOE found that Enterprise suffered injury in its purchases of commercial butane and natural gasoline. Accordingly, DOE granted refunds equal to the volumetric refund amount for these four products. The DOE also found that for a portion of the propane that it purchased, Enterprise was charged prices below the average market price levels. As a result, Enterprise obtained a substantial cost benefit. Considering the competitive advantage that Enterprise enjoyed from purchases of propane from GCO, the DOE limited the propane refund to Enterprise to an amount equal to the gallons of propane that Enterprise purchased at above market prices multiplied by the per gallon refund rate. The refund granted totals $349,172, representing $295,698 in principal and $53,474 in interest.

*Getty Oil Company, All-American, Inc., et al., 3/11/87; RF265–123, et al.*

The DOE issued a Decision and Order concerning six Applications for Refund filed by end-users of products covered by a consent order that the agency entered into with Getty Oil Company. The Applications were evaluated in accordance with the procedures set forth in *Getty Oil Co.*, 15 DOE ¶ 85,034 (1986). The sum of the refunds approved in this Decision is $9,587, representing $4,994 in principal and $4,653 in interest.

*Getty Oil Company/Big River Oil Company, et al., 3/12/87; RF265–174, et al.*

The DOE issued a Decision and Order granting 74 Applications for Refunds from the Getty Oil Company consent order fund. The refund applicants, who were reseller-retailers of Getty refined petroleum products, documented purchases of Getty products for the consent order period and were eligible for 100 percent of their volumetric share, based upon the small claims presumption of injury. The refunds to these firms total $210,625, representing $108,515 in principal and $102,110 in accrued interest.

*Gulf Oil Corporation/City Gulf Service, et al., 3/12/87; RF40–2267, et al.*

The DOE issued a Decision granting seven Applications for Refund from the Gulf Oil Corporation consent order fund filed by retailers and resellers of Gulf refined products. In considering the applications, the DOE found that each of the claimants had demonstrated that it would not have been required to pass through to its customers a cost reduction equal to the refund claimed. Accordingly, the firms were granted refunds totaling $9,285, representing $7,501 in principal and $1,784 in interest.

*Gulf Oil Corporation, Hank's Service Center, Inc., et al., 3/10/87; RF40–3633, et al.*

The DOE issued a Decision and Order concerning eight Applications for Refund filed by resellers and retailers of Gulf Oil Corporation petroleum products. In accordance with procedures established for disbursing the Gulf consent order fund, each applicant demonstrated that it would not have been required to pass through to customers a cost reduction equal to the amount of refund claimed. Accordingly, refunds were approved that totaled $25,249, representing $20,400 in principal and $4,849 in interest.

*Gulf Oil Corporation/Saunders Leasing System, 3/12/87; RF40–706*

The DOE denied a refund from the Gulf Oil Corporation deposit fund escrow account to Saunders Leasing System. Saunders was a truck leasing company that bought Gulf diesel fuel and resold it to its leasing customers. For this reason, Saunders was considered a reseller of petroleum products for the purposes of this proceeding and must provide evidence that it would not have been required to pass through to its customers a cost reduction equal to the refund amount claimed. Since Saunders could not make this showing, the DOE denied its refund application.

*Gull Industries, Inc./Al Bolser Tire Stores, Paramount Oil Co., 3/13/87; RF260–15, RF260–19*

The DOE issued a Decision and Order granting two Applications for Refund from the Gull Industries, Inc. consent order fund. Since each applicant was a reseller whose claim was for less than the $5,000 small claims refund amount, no further proof of injury was required. The refunds approved in the Decision totaled $8,419.45, representing $5,566.13 in principal and $2,853.32 in interest.

*Gull Industries, Inc./John M. Taylor, et al., 3/13/87; RF258–12, et al.*

The DOE issued a Decision and Order granting three Applications for Refund from the Gull Industries, Inc. consent order fund. Since each applicant was a reseller whose claim was for $5,000 or less, no further proof of injury was required. The refunds approved in the Decision totaled $16,524.84, representing $10,005.35 in principal and $6,519.49 in interest.

*Gull Industries, Inc./Perovich & Son Fuel, et al., 3/12/87; RF259–4, et al.*

The DOE issued a Decision and Order granting seven Applications for Refund from the Gull Industries, Inc. consent order fund. Each applicant was either a reseller of Gull product whose claim was for $5,000 or less or an end-user. Therefore, no further proof of injury was required. The refunds approved in the Decision totaled $33,046, representing $21,684 in principal and $11,362 in interest.

*Hanover Transfer Co., et al., 3/12/87; RF270–972, et al.*

The DOE issued a Decision and Order concerning four Applications for Refund from the $10.75 million Surface Transporters Escrow fund established pursuant to the settlement agreement in the DOE stripper well exemption litigation. None of the applicants purchased more than the 250,000 gallon minimum set forth in the Order establishing the Surface Transporters Escrow. Accordingly, all four Applications were denied.

*Heartland Express, Inc. of Iowa, Momsen Trucking, Inc., James Fleming Trucking, Inc., Sullivan's Trucking Co., Inc., 3/12/87; RF270–749, RF270–758, RF270–762, and RF270–780*

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the

settlement agreement in the DOE stripper well exemption litigation. The DOE approved the gallonages of refined petroleum products claimed by four trucking companies and will use those gallonages as a basis for the refund that will ultimately be issued to each of the four firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the four firms' refunds will be determined at a later date.

*La Gloria Oil & Gas Co./Toliver Oil Products, et al., 3/12/87; RF263-18, et al.*

The DOE issued a Decision and Order granting Applications for Refund filed by three resellers of refined petroleum products covered by a consent order which the agency entered into with La Gloria Oil & Gas Co. Each of the applicants presented evidence that it purchased refined petroleum products from La Gloria during the consent order period, and claimed refunds at or below the $5,000 small claims threshold for resellers. According to the methodology set forth in the order implementing procedures for disbursing the La Gloria fund, each applicant was found eligible for a refund based on the volume of its purchases times the volumetric refund amount. The refunds approved in this Decision totaled $10,325, including $5,729 in principal and $4,596 in interest.

*Marathon Petroleum Company/Acme Fuel Company, et al., 3/9/87; RF250-2329, et al.*

The DOE issued a Decision and Order concerning 83 Applications for Refund filed by purchasers of products covered by a consent order that the agency entered into with Marathon Petroleum Company. Each applicant submitted information indicating the volume of its Marathon purchases, and none requested a refund greater than the $5,000 small claims refund amount. The sum of the refunds approved in this Decision is $93,269, representing $86,287 in principal and $6,982 in interest.

*Marathon Petroleum Company/Amoco Oil Company, 3/9/87; RF250-2216, RF250-2217, RF250-2218, and RF250-2219*

The DOE issued a Decision and Order concerning four Applications for Refund from the Marathon Petroleum Company consent order fund filed by Amoco Oil Company. Amoco, a reseller of Marathon propane, residual fuel oil, naphtha and middle distillates, elected to file its refund applications based upon the 35 percent presumption of injury set forth in the order implementing procedures for disbursing the Marathon consent order fund. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Amoco should receive a refund of $12,655.66 in principal and $816.91 in accrued interest for a total refund of $13,472.57.

*Marathon Petroleum Company/Cannon Oil Corporation, 3/11/87; RF250-2296, RF250-2297*

The DOE issued a Decision and Order concerning two Applications for Refund from the Marathon Petroleum Company consent order fund filed by Cannon Oil Corporation. Cannon, a reseller of Marathon middle distillates and motor gasoline, elected to file its refund applications based upon the 35 percent presumption of injury set forth in the order implementing procedures for disbursing the Marathon consent order fund. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Cannon should receive a refund of $15,592.22 in principal and $1,007.52 in accrued interest for a total refund of $16,599.74.

*Marathon Petroleum Company/ Ingram Corporation, 3/13/87; RF250-2300*

The DOE issued a Decision and Order concerning an Application for Refund from the Marathon Petroleum Company consent order fund filed by Ingram Corporation. Ingram, a reseller of Marathon covered products, elected to file its refund application based upon the 35 percent presumption of injury outlined in the Marathon decision. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Ingram should receive a refund of $17,496.19 in principal and $1,191.07 in accrued interest for a total refund of $18,687.26.

*Marathon Petroleum Company/ Park Oil Company, 3/9/87; RF250-1907*

The DOE issued a Decision and Order concerning an Application for Refund from the Marathon Petroleum Company consent order fund filed by Park Oil Company. Park, a reseller of Marathon motor gasoline elected to limit its refund claim to $5,000, the small claims injury presumption set forth in the decision implementing procedures for disbursing the Marathon consent order fund. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Park should receive a refund of $5,000 in principal and $322.68 in accrued interest for a total refund of $5,322.68.

*Marathon Petroleum Company/ Publix Oil Company, Inc., 3/11/87; RF250-2305, RF250-2306*

The DOE issued a Decision and Order concerning two Applications for Refund from the Marathon Petroleum Company consent order fund filed by Publix Oil Company, Inc. Publix, a reseller of Marathon diesel fuel and motor gasoline, elected to file its refund applications based upon the 35 percent presumption of injury outlined in the decision implementing procedures for disbursing the Marathon consent order fund. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Publix should receive a refund of $31,323.38 in principal and $2,023.22 in accrued interest for a total refund of $33,346.60.

*Marathon Petroleum Company/ Stauder Oil Sales Co., Inc./ Erickson Petroleum Corp., 3/13/87; RF250-2345*

The DOE issued a Decision and Order concerning an Application for Refund from the Marathon Petroleum Company consent order fund filed by Stauder Oil Sales Co., Inc./Erickson Petroleum Corp. Stauder/ Erickson, a reseller of Marathon diesel fuel and motor gasoline, elected to file its refund applications based upon the 35 percent presumption of injury outlined in the decision implementing procedures for disbursing the Marathon consent order fund. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Stauder/Erickson should receive a refund of $6,700.47 in principal and $562.31 in accrued interest for a total refund of $6,262.78.

*Marathon Petroleum Company/Star Service and Petroleum Company, 3/11/87; RF250-2303, RF250-2304*

The DOE issued a Decision and Order concerning two Applications for Refund from the Marathon Petroleum Company consent order fund filed by Star Service and Petroleum Company. Star, a reseller of Marathon middle distillates and motor gasoline, elected to file its refund applications in accordance with the procedures for filing claims under the 35 percent presumption method outlined in the decision implementing procedures for disbursing the Marathon consent order fund. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Star should receive a refund of $48,989.99 in principal and $3,229.52 in accrued interest for a total refund of $53,229.51.

*Mobil Oil Corporation/A-1 Service, et al., 3/11/87; RF225-6530, et al.*

The DOE issued a Decision granting 49 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $21,134, representing $17,406 in principal and $3,728 in interest.

*Mobil Oil Corporation/Abolhassan S. Razavi, et al., 3/12/87; RF225-1828, et al.*

The DOE issued a Decision granting 46 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $39,771, representing $32,765 in principal and $7,006 in interest.

*Mobil Oil Corporation/Bel-Pre Mobil, 3/10/87; RF225-10522*

The DOE issued a Decision in which it determined that the owner of Bel-Pre Mobil, Mr. Robert Headlee, had inadvertently been granted a refund for Bel-Pre Mobil's purchases from Mobil prior to the date on which the corporation he owns acquired the station. Accordingly, the DOE ordered Mr. Headlee to remit $598 to the Mobil consent order escrow account.

*Perta Oil Marketing Corporation/ Atlantic Richfield Company, Commonwealth Oil Refining Company Inc., 3/12/87; RF289-1, RF289-2*

The DOE issued a Decision and Order concerning two Applications for Refund filed by purchasers of refined petroleum products from Perta Oil Marketing Corporation (Perta).

Each firm applied for a refund based on the procedures outlined in *Perta Oil Marketing Corporation*, 15 DOE ¶ 85,106 (1986), governing the disbursement of settlement funds received from Perta pursuant to an August 31, 1981 Consent Order. Since both of the applicants claimed refunds of $5,000 or less, they were presumed to have been injured by Perta's alleged overcharges. After examining the applications and supporting documentation submitted by the applicants, the DOE concluded that they should receive refunds totaling $9,966, representing $6,197 in principal and $3,783 in accrued interest.

*Red Bird Cab, Inc., 55th Street Taxi Garage, Inc., Capitol Cab, 3/13/87, RF270-786, RF270-848, RF270-850*

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE stripper well exemption litigation. The DOE approved the gallonages of refined petroleum products claimed by three taxicab companies and will use those gallonages as a basis for the refund that will ultimately be issued to the three firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the three firms' refunds will be determined at a later date.

*Union Texas Petroleum Corporation/ Blu-Gas of S.C. Inc., 3/10/87, RF140-50*

The DOE issued a Decision and Order concerning an Application for Refund filed by Blu-Gas of S.C. Inc., a reseller of propane purchased from Union Texas Petroleum Corporation. The firm elected to apply under the presumption of injury for small refund claims and the volumetric presumption, as set forth in *Union Texas Petroleum Corp.*, 12 DOE ¶ 85,166 (1985). The refund granted in this proceeding totals $6,559, representing $4,522 in principal and $2,037 in interest.

*Vickers Energy Corporation/ Wisconsin, 3/11/87; RQ1-360*

The Department of Energy issued a Supplemental Order to the State of Wisconsin correcting an error in the amount of a refund previously granted to the State. Wisconsin's refund was stated as $1,085,192 when it should have been $1,085,010. The Order also clarified the manner in which Wisconsin may utilize interest earned on the funds received.

## Issuance of Decisions and Orders; Week of April 6 Through April 10, 1987

During the week of April 6 through April 10, 1987, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

**Requests for Exception**

*J. M. Sweeney Co., 4/9/87; KEE-0095*

J. M. Sweeney Company (Sweeney) filed an Application for Exception from the requirment that it file Form EIA-811, entitled "Monthly Bulk Terminal Reports." In considering the request, the DOE found that Sweeney's reporting burden was not significantly different from that of other firms participating in the EIA-811 survey. Accordingly, exception relief was denied.

*Spreeman Oil Co., 4/9/87; KEE-0080*

Spreeman Oil Company filed an Application for Exception from the requirement that it file Form EIA-782B. In considering the request, the DOE found that the firm was not experiencing any hardship, inequity or unfair distribution of burdens as a result of the reporting requirement. Accordingly, exception relief was denied.

*Torch Oil Co., 4/10/87; KEE-0079*

Torch Oil Company filed an Application for Exception from the requirement that it file Form EIA-782B. In considering the request, the DOE found that the firm was not experiencing any hardship, inequity or unfair distribution of burdens as a result of the reporting requirement. Accordingly, exception relief was denied.

**Interlocutory Order**

*Ball Marketing, Inc.; KRZ-0057; Economic Regulatory Administration, 4/7/87; KRZ-0002*

On June 25, 1986, the Economic Regulatory Administration (ERA) filed a Motion to join Charles Goss, Baker R. Littlefield and Robert L. McAdams as parties to the Proposed Remedial Order (PRO) issued to Ball Marketing, Inc. (Ball) on November 24, 1984. The Office of Hearings and Appeals (OHA) granted this motion, finding that the ERA had established a *prima facie* case of personal liability against the respondents. This finding was based upon a showing of the parties' involvement as partners in the joint venture, Ball Marketing Enterprise (BMI), which performed the violations alleged in the PRO. The OHA further concluded that joinder of these parties was not unduly prejudicial since the respondents would be afforded their full procedural rights and since the public interest in ensuring full restitution of any overcharges outweighs any inconvenience caused by the delay in the proceeding. In addition, a Motion to Dismiss the PRO which Ball filed on May 1, 1985, was denied. The OHA rejected Ball's argument that the PRO failed to establish a *prima facie* case for Ball's liability as BMI's successor in interest for the regulatory violations allegedly performed by BMI. The OHA also found that joinder of the partners of BMI did not constitute grounds for dismissing Ball as a party to the proceeding.

**Supplemental Order**

*Stoel, Rives, Boley, Fraser & Wyse, 4/10/87; KFX-0090*

The DOE issued a Supplemental Order to the law firm of Stoel, Rives, Boley, Fraser & Wyse (Stoel, Rives) regarding the DOE's January 28, 1987 determination that Stoel, Rives has submitted inaccurate information in a refund application filed on behalf of Moore Oil Company in the Wisconsin

Industrial Fuel Oil refund proceeding. *Wisconsin Industrial Fuel Oil, Inc./Moore Oil Co.*, 15 DOE ¶85,272 (1987) (*Moore Oil*). Specifically, the supplemental Order considered whether to impose sanctions on Stoel, Rives for the submission of false or misleading information, including suspension of Stoel, Rives' privilege of participating in the proceedings before the Office of Hearings and Appeals, pursuant to 10 CFR 206.3(b). After reviewing Stoel, Rives' comments in response to the *Moore Oil* Decision and other evidence in the proceeding, the OHA concluded that Stoel, Rives should retain the privilege of participating in proceedings before the OHA because Stoel, Rives had made some effort to insure that the information it submitted was accurate and because the erroneous information had been supplied to Stoel, Rives by Moore Oil Company.

**Refund Applications**

*Babbitt Bus Line, Inc., et al., 4/8/87; RF270–444 et al.*

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the Settlement Agreement in the DOE Stripper Well Exemption litigation. The DOE approved the purchase volumes of refined products claimed by six bus companies and will use those volumes as a basis for the refund that will ultimately be issued to the six firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the six firms' refunds will be determined at a later date.

*Beacon Oil Co./The Customer Co., 4/9/87; RF238–32*

The DOE issued a Decision and Order concerning an Application for Refund filed on behalf of the Customer Company (Customer), a retailer of Beacon Oil Company motor gasoline. Customer applied for a refund based on the procedures outlined in *Beacon Oil Co.*, 14 DOE ¶85,011 (1986), as modified by *Beacon Oil Co.*, 14 DOE ¶85,509 (1986), governing the disbursement of settlement funds received from Beacon pursuant to a December 17, 1979 Consent Order. Based on the principles established for evaluating refund applications in the Beacon special refund proceeding, the DOE concluded that Customer had been injured with respect to the 3,957,998 gallons of regular gasoline that it purchased from Beacon during the periods, August 19, 1973 through October 31, 1973, and September 1, 1974 through March 31, 1975. Accordingly, Customer was granted a refund of $116,314, representing $60,466 in principal and $55,848 in accrued interest.

*Cecio Bros. Inc., et al., 4/6/87; RF270–775 et al.*

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE Stripper Well Exemption litigation. The DOE approved the purchase volumes of refined petroleum products claimed by four companies which operated private fleets of trucks and will use those volumes as a basis for the refund that will ultimately be issued to the four firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the four firms' refunds will be determined at a later date.

*Gary Energy Corp./R.M.T. Properties, Inc., 4/6/87; RF47–4*

The DOE issued a Decision and Order concerning an Application for Refund filed by R.M.T. Properties, Inc. (RMT) in connection with the Gary Energy Corporation special refund proceeding. RMT filed as the successor in interest to a firm which purchased product from Gary Energy Corporation for use in its refining operations. In support of its claim, RMT showed evidence that its predecessor maintained sizable cost banks. From price data submitted by RMT, the DOE applied the three-step competitive disadvantage methodology, and determined that the applicant was entitled to a refund of $14,309 in principal and $3,705 in interest from the Gary deposit escrow account.

*Getty Oil Co. Marathon Oil Co., RF265–897; Walker Oil Co., 4/7/87; RF265–898*

The DOE issued a Supplemental Order concering two Applications for Refunds from the Getty Oil Company deposit escrow fund filed by Marathon Oil Company (Marathon) and Walker Oil Company (Walker). Both applicant had previously received refunds as specified in *Getty Oil Co./Big River Oil Co.*, 15 DOE ¶——— (RF265–174, *et al.*) (March 12, 1987). After issuing the March 12 determination, it appeared that the purchase volume figures upon which the refunds had been calculated were less than those documented in the firms' applications. The Supplemental Order provided additional refunds of $343 to Marathon and $64 to Walker to correct the miscalculation.

*Getty Oil Co./Barone Bros. Auto Service, Inc., et al., 4/8/87; RF265–209 et al.*

The DOE issued a Decision and Order granting 56 Applications for Refunds from the Getty Oil Company deposit escrow fund filed by reseller-retailers of Getty refined petroleum products. All of the refund applicants documented purchases of Getty products for the period August 19, 1973 through December 31, 1978, and were eligible for 100 percent of their volumetric share based upon the small claims presumption of injury. The refunds to these firms total $168,640, representing $96,762 in principal and $91,878 in accrued interest.

*Gull Industries, Inc./Franko Oil Co., Inc., et al., 4/6/87; RF259–16 et al.*

The DOE issued a Decision and Order granting four Applications for Refund from the Gull Industries, Inc. escrow account under the provisions outlined in *Gull Industries, Inc.*, 14 DOE ¶ 85,381 (1986). Each applicant was listed in the Appendix to that Decision as being eligible for a specified refund amount from the Gull consent order fund based upon the volume of petroleum products purchased from Gull during the consent order period. Each applicant was a reseller whose claim was for $5,000 or less; therefore no further proof of injury was required. The refunds approved in the Decision totaled $24,245, representing $25,880 in principal and $8,365 in interest.

*H.G. Toys; RF270–17; Blu-Gas Service Inc.; RF270–27; White Star Bus Line, 04/06/87; RF270–35*

The Department of Energy (DOE) issued a Decision and Order concerning three Applications for Refund from the Surface Transporters Escrow, established as the result of the Stripper Well Settlement Agreement. All three applicants applied for refunds based on purchases of less than 250,000 gallons of petroleum products. The DOE determined the companies' applications should be denied because applicants which purchased less than 250,000 gallons of petroleum products are ineligible for Surface Transporters refunds under the terms of the Order Establishing Surface Transporters Escrow.

*Marathon Petroleum Co./Adee Butler, et al., 4/7/86; FR250–2845 et al.*

The DOE issued a Decision and Order concerning 31 Applications for Refund filed by resellers of products covered by a consent order that the agency entered into with Marathon Petroleum Company. Each applicant documented the volume of its Marathon purchases, and none requested a refund greater than the $5,000 small claims refund amount. The sum of the refunds approved in this Decision is $24,910, representing $22,942 in principal and $1,968 in interest.

*Marathon Petroleum Co./Four Star Service Stations, Inc., 4/7/87; RF250–2396, RF250–2397*

The DOE issued a Decision and Order concerning two Applications for Refund filed by Four Star Service Stations, Inc. (Four Star), a reseller of Marathon covered products. Although the firm's purchase of middle distillates and motor gasoline from Marathon during the consent order period exceeded the threshold refund level established in *Marathon Petroleum Co.*, Four Star elected to file its refund applications in accordance with procedures for filing claims based upon the 35 percent presumption of injury outlined in the Marathon decision. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Four Star should receive a total refund of $17,765.48, representing $16,633.24 in principal and $1,132.24 in accrued interest.

*Marathon Petroleum Co./Growmark, Inc., 4/7/87; RF250–2367, RF250–2370*

Growmark, Inc. filed Applications for Refund seeking a portion of the consent order funds remitted to the DOE by Marathon Petroleum Company. The DOE found that since Growmark is an agricultural cooperative that indicated that it would pass through any refund received to its members, Growmark would not be required to establish that it absorbed alleged Marathon overcharges. Therefore, Growmark was granted a refund in the full amount of its claim for Marathon product sold to cooperative members. However, the DOE did

not grant Grassmark a refund for those volumes of Marathon product that were resold to members of the public. The total refund granted in this proceeding was $169,957, representing $156,197 in principal and $13,760 in accrued interest.

*Marathon Petroleum Co./Little Champ Oil Co.; Fleet Supplies, Inc., 4/7/87; RF250-1650, RF250-1651, RD250-0402*

The DOE issued a Decision and Order concerning Applications for Refund filed by two purchasers of products covered by a consent order that the agency entered into with Marathon Petroleum Company. Each applicant documented the volume of its Marathon purchases, and none requested a refund greater than the $5,000 small claims refund amount. The sum of the refunds approved in this Decision is $2,347 in principal and $290 in interest.

*Marathon Petroleum Co./Ohio Fuel & Supply Co., Inc., 4/8/87; RF250-2630, RF250-2631*

The DOE issued a Decision and Order concerning Applications for Refund filed by Ohio Fuel & Supply Co., Inc. (Ohio Fuel), a reseller of Marathon covered products. Although the firm's purchase of middle distillates and motor gasoline from Marathon during the consent order period exceeded the threshold refund level established in *Marathon Petroleum Co.*, Ohio Fuel elected to file its refund applications in accordance with procedures for filing claims based upon the 35 percent presumption of injury outlined in the Marathon decision. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Ohio Fuel should receive a refund of $8,043.28, representing $7,468.40 in principal and $524.88 in accrued interest.

*Marathon Petroleum Co./Robinson's Service Station, et al., 4/7/87; RF250-1602 et al.*

The DOE issued a Decision and Order concerning Applications for Refund filed by 11 purchasers of products covered by a consent order that the agency entered into with Marathon Petroleum Company. Each applicant documented the volume of its Marathon purchases, and none requested a refund greater than the $5,000 small claims refund amount. The sum of the refunds approved in this Decision is $55,000 in principal and $6,840 in interest.

*Mobil Oil Corp./Almoden Service Center, et al., 4/9/87; RF225-6538 et al.*

The DOE issued a Decision granting 49 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in the *Mobil* decision. *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $21,600, representing $17,799 in principal and $3,801 in interest.

*Mobil Oil Corp./Chenango Valley, Central School, et al., 4/9/87; RF225-6940 et al.*

The DOE issued a Decision granting 26 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers, resellers, and end-users of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in the *Mobil* decision. *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $8,365, representing $8,730 in principal and $1,635 in interest.

*Mombi's Trucking, et al., 4/8/87; RF270-631 et al.*

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE Stripper Well Exemption litigation. The DOE approved the purchase volumes of refined petroleum products claimed by nine trucking companies and will use those volumes as a basis for the refund that will ultimately be issued to the nine firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the nine firms' refunds will be determined at a later date.

*Warren Trucking Co., Inc., et al., 4/8/87; RF270-51 et al.*

The Department of Energy (DOE) issued a Decision and Order approving five Applications for Refund from the Surface Transporters Escrow, established as the result of the Stripper Well Settlement Agreement. The applicants, five "for hire" trucking companies, applied for refunds based on purchases of diesel fuel and motor gasoline between August 19, 1973 and January 27, 1981. The DOE's Decision approved four of the company's purchase volumes. However, the DOE found that one company overestimated its diesel fuel purchases. Since there was enough information in the record of the case for the DOE to arrive at a reasonably supported estimate, the DOE adjusted the company's volumes and approved it for a refund based on a smaller number of gallons. The DOE will determine a per gallon refund amount and establish the amount of each company's refund after it completes its analysis of all Surface Transporter claims.

## ENVIRONMENTAL PROTECTION AGENCY

[PF-481; FRL-3208-4]

**Abbott Laboratories; Pesticide Tolerance Petition**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the filing of a pesticide petition by Abbott Laboratories proposing an exemption from the requirement of a tolerance for thuringiensin or Beta-exotoxin [2-O-(4'-O-5-L-deoxyadenosine-5'-yl-beta-O-glucopyranosyl)-4-O-phospho-D-allaric acid]. The exemption from the requirement of a tolerance will be for all raw agricultural commodities.

ADDRESS:

By mail, submit written comments to: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all

BEST COPY AVAILABLE

of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

**FOR FURTHER INFORMATION CONTACT:**

By mail: Art Castillo (PM) 17, Registration Division (TS–767C), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460,

Office location and telephone number: Rm. 207, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2690.

**SUPPLEMENTARY INFORMATION:** EPA gives notice that the Abbott Laboratories, 14th & Sheridan Rd., North Chicago, IL 60064, has submitted an initial filing of a pesticide petition (PP 6F3382) proposing to amend 40 CFR Part 180 by establishing an exemption from the requirement of a tolerance for thuringiensin (Beta-exotoxin) in or on all raw agricultural commodities. The proposed analytical method is liquid gas chromatography.

Dated: May 7, 1987.

## Science Advisory Board, Environmental Engineering Committee; Open Meeting

Under Pub. L. 92–463, notice is hereby given that a subcommittee of the Environmental Engineering Committee of the Science Advisory Board will hold a two-day meeting on June 4–5, 1987 at the Environmental Protection Agency's Hazardous Waste Environmental Research Lab in Cincinnati, Ohio. The meeting will be held in Room 107 of the Andrew W. Briedenbach Research Center at 26 West St. Clair, Cincinnati, Ohio. The meeting will begin at 9:00 a.m. and last until 5:00 p.m. on June 4, and begin at 9:00 a.m. and last until 3:00 p.m. on June 5.

The purpose of the meeting is to review EPA's Land Disposal Research Program. This program is described in a "Briefing Document for Science Advisory Board Review of the Land Disposal Research Program." Copies of this document and further information on the research program are available from Mr. Bob Stenburg, HWERL, U.S. EPA, 26 West St. Clair, Cincinnati, OH 45268 (513/569–7490).

Anyone wishing to attend the meeting must contact Mr. Eric Males or Ms. Brenda Browne (202/382–2552) prior to close of business on May 29, 1987.

Dated: May 7, 1987.

## FEDERAL COMMUNICATIONS COMMISSION

**[General Docket No. 80–741; FCC 87–151]**

## World Administrative Radio Conference on the Use of the Geostationary-Satellite Orbit (Space-WARC), Second Session; Geneva, 1988

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of inquiry

**SUMMARY:** The Commission seeks comments on preliminary views for policy positions to be considered by the United States concerning its participation in the Second Session of the International Telecommunication Union (ITU) World Administrative Radio Conference on the Use of the Geostationary-Satellite Orbit and the Planning of Space Services Utilizing It (Space-WARC) to be held in Geneva in 1988. Issues to be addressed at the Second Session concern primarily the Fixed-Satellite Service (FSS) and the Broadcasting Satellite Service (BSS). Comments submitted in this proceeding will be part of the record upon which the Commission will rely in making recommendations to the Department of State for United States proposals for the Conference.

**DATES:** Comments must be filed on or before June 22, 1987 and reply comments on or before July 8, 1987.

**ADDRESS:** Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Thomas S. Tycz, Common Carrier Bureau, Domestic Facilities Division, (202) 634–1860; Steven D. Selwyn (Broadcasting Issues), Mass Media Bureau, (202) 254–3394.

**SUPPLEMENTARY INFORMATION:** This is a summary of the the Commission's *Fifth Notice of Inquiry* in General Docket No. 80–741, FCC 87–151, adopted April 27, 1987 and released May 4, 1987.

The full text of this document is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

### Summary of the Fifth Notice of Inquiry

The World Administrative Radio Conference on the Use of the Geostationary-Satellite Orbit and the Planning of Space Services Using It (Space-WARC) is being conducted in two sessions. The First Session of the Space-WARC was held in 1985 (WARC–ORB–85). It resulted in the adoption of the Final Acts incorporating the Region 2 Broadcasting Satellite Service (BSS) Plan into the international Radio Regulations and a Report to the Second Session that concerned planning of the Fixed-Satellite Service in certain frequency bands and several Broadcasting Satellite Service issues. The Second Session of the Conference will be held in Geneva in 1988 (WARC–ORB–88) and will attempt to conclude the work of the Space-WARC. The agenda for WARC–ORB–88 is comprised primarily of issues relating to the Fixed-Satellite Service (FSS) and the Broadcasting Satellite Service (BSS). This *Fifth Notice* seeks comments on Commission preliminary views concerning the various agenda issues.

The primary FSS issues concern planning methods for designated portions of the 6/4 GHz, 14/11–12 GHz and 30/20 GHz bands. WARC–ORB–85 adopted basic principles and methods for a dual planning approach comprised of: (1) An *a priori* allotment plan for the expansion frequency bands, and (2) improved regulatory procedures, possibly including a multilateral planning meeting (MPM) mechanism, for the currently operational frequency bands. The Conference objective of these planning methods is to guarantee in practice equitable access to the geostationary-satellite orbit and spectrum. WARC–ORB–88 is to establish the allotment plan and associated regulatory procedures and to establish improved regulatory procedures, possibly with an MPM mechanism. This *Fifth Notice* includes preliminary views on both FSS planning methods.

Several different broadcasting satellite issues will be addressed at WARC–ORB–88. One issue concerns action taken at WARC–ORB–85, whereby the BSS Region 2 Plan and Feeder Link Plan were incorporated into the international Radio Regulations, and involves possible correction of text and procedures dealing with interim systems. At WARC–ORB–88, the Regions 1 and 3 Feeder Link Plan is to be established and incorporated into the Radio Regulations. Toward that end, the U.S. is required to submit to the International Frequency Registration Board (IFRB) its feeder link requirements in connection with the Regions 1 and 3 plan by June 30, 1987. The Commission seeks comments on its proposed requirements submission within the 17.3–18.1 GHz band.

Additional broadcasting issues to be considered at WARC–ORB–88 relate to spectrum allocations for Satellite Sound Broadcasting (Sound BSS) and High Definition Television (HDTV). The Commission seeks suggestions for allocation proposals for a new Sound BSS service for portable and vehicle receivers within and also outside but near the range 0.5–2 GHz and also seeks comments on the compatibility of advanced digital technologies with existing services. Regarding HDTV, the Commission requests comments on the appropriateness of a worldwide allocation for HDTV and on the suitability of the 12 and/or 22 GHz bands for BSS accommodation of the service.

Another issue addressed by this *Fifth Notice* includes the simplification of regulatory procedures for other non–FSS satellite services. The Commission is recommending certain changes to Articles 11, 13 and 14 of the International Radio Regulations to address specific problems.

Finally, in this *Fifth Notice of Inquiry* the Commission presents its preliminary views on all additional issues comprising the agenda for the Second Session of Space-WARC. Also presented for comment are draft modifications to the International Radio Regulations that would be needed in order to implement the Commission's preliminary views on the various agenda items.

### Ordering Clause

Pursuant to sections 4(i), 303 and 404 of the Communications Act of 1934, as amended, this Notice of Inquiry is hereby adopted.

### List of Subjects in 47 CFR Part 1

Inquiries.

Federal Communications Commission.

## National Security and Emergency Preparedness Advisory Committee; Meeting

Pursuant to the provisions of Pub. L. 92–463, announcement is made of a public meeting of the National Security and Emergency Preparedness Advisory Committee (NSEPAC) on May 27, 1987 from 9:30 a.m. until 4:00 p.m. The meeting will be held at AT&T, 1120 20th Street, NW., Washington, DC, 10th Floor, Conference Rooms D&E.

### Purpose

—To convene the Committee and introduce its mission

—To obtain comments and recommendations on the Telecommunications Service Priority (TSP) petition for rulemaking filed with the Commission by the Executive Agent for the National Communications System.

### Agenda

1. Welcome
2. Presentation on Committee Charter and Mission
3. Briefing on the TSP Petition
4. Discussion of the Petition
5. Recommendations for action
6. New Business
7. Adjournment

The public may attend the meeting or file a written statement with the Committee at any time. Anyone wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring additional information about the meeting may contact the NSEPAC Executive Secretariat, Claudette Pride, on (202) 632–3900.

Federal Communications Commission.

## FEDERAL DEPOSIT INSURANCE CORPORATION

## Information Collection Submitted to OMB for Review

**AGENCY:** Federal Deposit Insurance Corporation.

**ACTION:** Notice of Information Collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

Title of Information Collection: Foreign Branch Report of Condition (OMB No. 3064–0011).

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review for the information collection system identified above.

**ADDRESS:** Written comments regarding the submission should be addressed to Robert Fishman, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to John Keiper, Assistant Executive Secretary (Administration), Federal Deposit Insurance Corporation, Washington, DC 20429.

Comments: Comments on this collection of information should be submitted on or before May 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** Requests for a copy of the submission should be sent to John Keiper, Assistant Executive Secretary (Administration), Federal Deposit Insurance Corporation, Washington, DC 20429, telephone (202) 898–3810.

**SUMMARY:** The FDIC is requesting OMB approval to extend, for a three-year period, the expiration of the Foreign Branch Report of Condition, Form FFIEC 030, which is submitted annually by each overseas banking office of an insured state nonmember bank. The report contains asset and liability information for foreign branches of U.S. banks. The information is used by the FDIC to monitor the level of activity and growth of the overseas banking offices and for planning the examination of these offices. The report is required by FDIC regulation 12 CFR 347.6(b). The aggregate annual reporting burden for the thirty respondent banking offices is estimated to be 90 hours.

Dated: May 8, 1987.

Federal Deposit Insurance Corporation.

Margaret M. Olsen,

*Deputy Executive Secretary.*

## FEDERAL MARITIME COMMISSION

### Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC. Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203-009735-017.

Title: Steamship Operators Intermodal Committee.

Parties:

Associated Container Transportation (Australia Ltd.)
Barber Blue Sea Line
Companhia de Navegacao Maritime Netumar
Coordinated Caribbean Transport, Inc.
Evergreen Marine Corp., Ltd.
Farrell Lines, Inc.
Flota Mercante Grancolombiana
Hamburg-Suedamerikknische-Dampfschiffahrts-Gesellschaft
Japan Line, Ltd.
Kawasaki Kisen Kaisha, Ltd.
Lykes Bros. Steamship Co., Inc.
A.P. Moller-Maersk Line
Neptune Orient Lines Ltd.
Nippon Yusen Kaisha, Ltd.
Sea-Land Service, Inc.
South African Marine Corp.
United States Lines, Inc.
Venezuelan Line
Yamashita-Shinnihon Steamship Co. Ltd.
Yang Ming Line
Zim Israel Navigation Co. Ltd.
American President Lines, Ltd.
Mitsui O.S.K. Lines, Ltd.
Seapac Services, Inc.
Showa Line, Ltd.

Synopsis: The proposed amendment would admit Trans Freight Lines as a party to the agreement.

By Order of the Federal Maritime Commission.

Dated: May 11, 1987.

Joseph C. Polking,

*Secretary.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Health Resources and Services Administration

### Acquired Immune Deficiency Syndrome; Regional Education and Training Centers (ETCs) Program

**AGENCY:** Health Resources and Services Administration, Public Health Service, Department of Health and Human Services.

**ACTION:** Notice of three ETCs technical assistance workshops.

**SUMMARY:** This notice announces three technical assistance workshops scheduled by the Acquired Immune Deficiency Syndrome (AIDS) regional Education and Training Centers Program staff for applicants who may have technical or program questions regarding preparation of applications for grants. These workshops are intended to provide technical assistance in relation to the Notice of Availability of Funds for the subject program which appeared in the **Federal Register** April 20, 1987, (52 FR 12979).

**DATES:** The workshops are scheduled as follows:

1. May 18, 1987, 1:00 p.m. to 4:00 p.m., San Francisco, California
2. May 20, 1987, 1:00 p.m. to 4:00 p.m., New Orleans, Louisiana
3. May 27, 1987, 8:30 a.m. to 11:30 a.m., Rockville, Maryland

**ADDRESSES:** The workshops will be held at the following locations:

1. California—United States Public Health Service Region IX, (Room 406), 50 United Nations Plaza, San Francisco, California 94102
2. New Orleans—Xavier University of Louisiana, College of Pharmacy (Auditorium), 7325 Palmetto, New Orleans 70125
3. Maryland—Parklawn Building (Conference Room G), 5600 Fishers Lane, Rockville, Maryland 20857

Applicants who plan to attend one of the technical assistance workshops should indicate the location of the workshop they will be attending and the names of the individuals in their party. This information is being requested because of security procedures in San Francisco and to provide program staff with some idea of room size requirements at all three locations. Notification should be made prior to the workshop date to: Mrs. June Horner, Chief, Education and Training Centers Program, Office of AIDS Services Program, (310) 443-6745.

Applicants should be aware that the due date for receipt of applications has been extended to July 6, 1987, because of a delay in receiving some application materials.

Dated: May 12, 1987.

David N. Sundwall,

*Administrator, Assistant Surgeon General.*

BILLING CODE 4160-15-M

### Office of Refugee Resettlement

### Refugee Resettlement Program; Allocations to States of FY 1987 Funds for Social Services for Refugees and Cuban/Haitian Entrants

**AGENCY:** Office of Refugee Resettlement (ORR), Family Support Administration (FSA), HHS.

**ACTION:** Final notice.

**SUMMARY:** This notice establishes the allocations to States of FY 1987 funds for social services under the Refugee Resettlement Program (RRP).

**EFFECTIVE DATE:** May 14, 1987.

**FOR FURTHER INFORMATION CONTACT:** Ellen M. McGovern (202) 245-1957.

**SUPPLEMENTARY INFORMATION:** Notice of the proposed allocations to States of FY 1987 social service funds was published in the **Federal Register** on January 12, 1987 (52 FR 1244). As a result of the comments received, the following changes have been made: (1) Refugees resettled under the matching grant program have been included in the population base for the formula; (2) a floor of $75,00 has been established for States with small refugee populations;

and (3) adjustments have been made in the estimated refugee populations of six States as a result of evidence submitted by those States.

**I. Amounts Available for Allocation**

The Office of Refugee Resettlement (ORR) expects to have available $68,617,000 in FY 1987 refugee/entrant social service funds. This determination is based upon the Continuing Resolution for FY 1987 (Pub. L. 99–591) which provides for funding for social services to be at the same level as in FY 1986.

Of the total of $68,617,000, the Director of ORR will make available to States during FY 1987 approximately $58,000,000 (85%) under the allocation formulas set out in this notice. These funds will be made available for the purpose of providing social services to refugees and entrants.

All allocation figures include both refugees and Cuban/Haitian entrants since both populations may be served through funds addressed in this notice. (A State must, however, have an approved State plan for the Cuban/Haitian Entrant Program in order to use funds on behalf of entrants as well as refugees.)

Of the $58,224,410 covered by this notice, the Director will allocate funds directly to States in the following manner:

- $55,000,000, the same amount as in FY 1986, will be allocated on the basis of each State's proportion of the national population of refugees and entrants who had been in the U.S. less than 3 years as of October 1, 1986.
- $327,418 will be allocated in order to provide a floor of $75,000 for States which have small refugee/entrant populations.
- $2,896,992 will be allocated to each State on the basis of its proportion of the 3-year refugee/entrant population (including a floor amount of $5,000 to States with small refugee/entrant populations) in order to provide an incentive for States to fund refugee/entrant mutual assistance associations (MAAs). The amount being allocated to MAAs, exclusive of the floor, is $2,871,000, the same amount as in FY 1986. A written assurance that these optional funds will be used for MAAs is required in order for a State to receive the funds. Guidance to States regarding this assurance is provided below.

The use of the 3-year population base in the allocation formula is required by section 6(a)(3) the Refugee Assistance Extension Act of 1986 (Pub. L. 99–605) which amended section 412(c) of the Immigration and Nationality Act to require that the "funds available for a fiscal year for grants and contracts [for social services] . . . shall be allocated among the States based on the total number of refugees (including children and adults) who arrived in the United States not more than 36 months before the beginning of such fiscal year and who are actually residing in each State (taking into account secondary migration) as of the beginning of the fiscal year."

The $10,392,590 in remaining social service funds is expected to be used by ORR on a discretionaly basis to provide funds for individual projects intended to contribute to the effectiveness and efficiency of the refugee resettlement program.

The discretionary funds will support specific program activities designed to improve the delivery of services to refugees. Announcements of the availability of funding and grant application procedures for some projects have been issued: Availability of Funding for Grants to States to Implement Favorable Alternate Sites Demonstration Projects, Memorandum to State Refugee Coordinators issued October 1, 1984; Availability of Funding for Planned Secondary Resettlement of Refugees, 50 FR 20038, May 13, 1985; and Availability of FY 1987 Discretionary Social Services Grants to States to Implement Community Stability Projects for Refugees, Memorandum to State Refugee Coordinators issued March 26, 1987. ORR has also advised States which have a high rate of dependence of refugees on cash assistance of a discretionary Key States Initiative to develop projects to increase employment and self-support.

Although the allocation formula is based on the 3-year refugee population, social service programs are not limited to refugees who have been in the U.S. only 3 years. States may provide services without regard to an individual refugee's or entrant's length of residence.

ORR funds may not be used to provide services to United States citizens since they are not covered under the refugee and entrant legislation (except that services may be provided to a U.S.-born minor child in a family in which both parents are refugees or entrants or, if only one parent is present, in which that parent is a refugee or entrant).

In accordance with ORR's "Statement of Program Goals, Priorities and Standards for State-Administered Refugee Resettlement Program" issued March 1, 1984, funds awarded under this notice for the basic and MAA incentive allocations are subject (as were FY 1985 and FY 1986 funds) to a requirement that at least 85% of a State's award be used for employment services, English language training, and case management services, reflecting the Congressional objective that "employable refugees should be placed in jobs as soon as possible after their arrival in the United States" and that social service funds be focused on these types of services. (Immigration and Nationality Act, section 412(a)(1)(B).) As in previous years, ORR will consider granting, under specific circumstances, a waiver of this provision. In order to receive a waiver, a State must meet either of the following two conditions:

1. The State demonstrates to the satisfaction of the Director of ORR that two of the following three circumstances exist: The cash assistance rate for time-eligible/entrants in the State is below the national average for all time-eligible refugees/entrants in the U.S.; less than 85% of the State's social allocation is sufficient to meet all employment-related needs of the State's refugees/entrants; and/or there are non-employment-related service needs which are so extreme as to justify an allowance above the basic 15%. *Or*

2. In accordance with section 412(c)(1)(B) of the Immigration and Nationality Act, as amended by the Refugee Assistance Extension Act of 1986 (Pub. L. 99–605), the State submits to the Director a plan (established by or in consultation with local governments) which the Director determines provides for the maximum appropriate provision of employment-related services for, and the maximum placement of, employable refugees consistent with performance standards established under section 106 of the Job Training Partnership Act.

States should also expect to use funds available under this notice to pay for social service which are provided to refugees/entrants who participate in alternative projects. The Continuing Resolution for FY 1985 (Pub. L. 98–473) amended the Immigration and Nationality Act to provide that:

> The Secretary [of HHS] shall develop and implement alternative projects for refugees who have been in the United States less than thirty-six months, under which refugees are provided interim support, medical services, support [social] services, and case management, as needed, in a manner that encourages self-sufficiency, reduces welfare dependency, and fosters greater coordination among the resettlement agencies and service providers.

This provision is generally known as the Wilson/Fish Amendment. The Department has already issued a separate notice in the **Federal Register** with respect to applications for such projects [50 FR 24583, June 11, 1985]. The

notice on alternative projects does not contain provisions for the allocation of additional social service funds beyond the amounts proposed for availability in this notice. Therefore a State which may wish to consider carrying out such a project should take note of this in planning its use of social service funds being allocated under the present notice.

Finally, ORR believes that the continued and/or increased utilization of refugee mutual assistance associations (MAAs) in the provision of social services promotes appropriate use of services as well as the effectiveness of the overall service system. This belief is reinforced by the interest in MAAs which has developed under similar incentive funds awarded to State's in previous years. Therefore additional funds which would be targeted specifically to these organizations have been included as an optional award to States which would use them for this purpose.

In order to receive the MAA incentive funds, the appropriate State agency official must provide written assurance to the Office of Refugee Resettlement that the following conditions will be observed by the State agency in using funds made available to the State under this special allocation:

(1) That such funds will be used to fund refugee/entrant mutual assistance associations for the direct provision of services to refugee and entrant clients.

(2) That the MAA incentive allocations is subject to and included under ORR's requirement that 85% of the total amount of social service funds allocated by this notice to a State be used for priority services, as defined elsewhere in this notice.

(3) That the State agency will observe the following definition of a mutual assistance association:

(a) The organization must be legally incorporated as a nonprofit organization; *and*

(b) Not less than 51% of the composition of the Board of Directors or governing board of the mutual assistance association will be comprised of refugees/entrants or former refugees/entrants.

(4) That the State agency will assist MAAs in seeking other public and/or private funds for the provision of services for refugee and entrant clients in subsequent years.

Written assurances should be sent to the Director, Office of Refugee Resettlement, Room 1229 Switzer Building, 330 C Street, SW., Washington, DC 20201, with a duplicate copy to the appropriate ORR Regional Director. States must respond by 30 days from the date of publication of this notice in order to avail themselves of this special allocation.

## II. Discussion of Comments Received

Eight comments were received in response to the notice of the proposed allocation to States of FY 1987 funds for social services for refugees and Cuban/Haitian entrants. The comments are summarized below and are followed in each case by the Department's response.

*Comment:* One commenter objected to the use of a formula based on the population of refugees who have been in the U.S. less than 3 years and suggested that "time-expired" refugees be counted for purposes of the formula.

*Response:* As indicated in the notice, the formula required by statute mandates that the population be limited to refugees who have been in the United States for no more than 36 months.

*Comment:* Two commenters asserted that the Continuing Resolution for FY 1987 makes available for social services $71,700,000 rather than the $68,617,000 stated in the notice. The commenters said that the FY 1986 reduction of 4.3% under Pub. L. 99–177, the Balanced Budget and Emergency Deficit Control Act of 1985 (Gramm-Rudman-Hollings) should not have been applied by ORR in determining the amount available for FY 1987.

*Response:* The Department does not agree with the commenters' reading of the FY 1987 Continuing Resolution; $68,617,000 is the amount which has been made available to ORR.

*Comment:* Two commenters, while recognizing that the formula is required, expressed concern about the effects of applying it: One commenter expressed the hope that ORR would have special projects that could provide additional funding to help address the needs of "time-expired" refugees who have been in the U.S. more than 3 years. This commenter also felt that use of the 3-year population-based formula for the mutual assistance association (MAA) incentive allocation could hamper the support for MAA activities in States with relatively small time-eligible refugee populations. A second commenter, from a State with a small refugee population, stated that the formula did not provide sufficient funds to meet basic service needs of refugees.

*Response:* While ORR has been using a 3-year formula for the allocation of social service funds during recent years, prior to the inclusion of the formula in the authorizing legislation, we have recognized its limitations in addressing special needs which may exist for particular refugee populations. Discretionary projects for which States are eligible to apply have provided a means for helping to meet such needs. ORR has developed two FY 1987 initiatives to help address these needs: For States which have been identified as having relatively high rates of refugee dependence on cash assistance, ORR is undertaking a Key States Initiative (KSI) to develop cooperatively with these States special efforts to increase self-support and reduce the need for assistance. For other States, ORR has issued to States an announcement of an FY 1987 discretionary grant program, termed Community Stability Projects (CSP).

*Comment:* Three comments were received on the proposal for floor amounts for States with very small refugee populations: Two commenters, from States affected by the floor, said that the floor proposed for FY 1987 was insufficient to meet their needs; that the proposal for the floor was made to late to enable them to plan for a reduction; and, in one case, that contracts had already been entered into in anticipation of a continuation of the $75,000 floor that was in effect in FY 1986. The third commenter, from a State with a large refugee population, asserted that there should be no floor and that the funds proposed for the floor should, instead, be allocated among all the States based on the 3-year formula.

*Response:* We disagree with the view that there should be no floor since certain basic costs must occur in order for a State to provide services to even a small number of refugees. We view the floor as a discretionary add-on of a modest amount of funds to an otherwise impractically small figure which the formula alone would yield for the seven States with very small refugee populations.

After consideration of the two comments from States affected by the floor, we have concluded that their arguments in favor of a continuation of the same floor provisions as in FY 1986 and earlier years have merit. Accordingly, in this final notice, we have adopted a $75,000 floor for the seven States with very small populations. The cost of the floor is $327,418, approximately one-half of one percent of the funds available for social services.

*Comment:* Three commenters objected to the $10.5 million proposed to be used for discretionary purposes. One of these commenters suggested that the amount should be $5 million. Another commenter stated that either there should be no set-aside of funds for discretionary purposes or, if there were, the funds would have to be distributed according to the 3-year formula under

law. The third commenter also expressed the view that any discretionary funds would be required to be distributed according to the statutory formula.

*Response:* Neither the Refugee Assistance Extension Act of 1986 (Pub. L. 99–605) nor its legislative history prohibits the use of social service funds for discretionary purposes or requires that all of the funds must be distributed under the formula. In fact, the Senate report (S. Rept. No. 99–154, p. 6) included a recommendation that "a small portion of social service funds be reserved for certain groups of time-ineligible refugees who experience particular difficulty in achieving employment and self-sufficiency—such as the Hmong in California." This would be one example of needs which could be addressed through ORR's Key States Initiative, cited previously.

After careful consideration of these commenters' proposal that a smaller amount of funds, or no funds, be used for discretionary purposes, ORR has concluded that the importance of the Key States Initiative to reduce welfare dependence, the Community Stability Projects, and other potential discretionary projects to improve the effectiveness and efficiency of the refugee resettlement program fully merit the use of funds for these purposes to address particular needs in a more flexibile and productive manner than could be achieved by simply adding these funds to the formula allocation.

*Comment:* One commenter asserted that, under the law, ORR does not have the authority to exclude from the population figures used in the formula the refugees who are aided under the matching grant program. This commenter noted that the matching grants assure the provision of services for a maximum of only four months, after which the refugees may need to rely on services funded through the allocations to States.

*Response:* After review of this question, the Department agrees that the statutory language requires the inclusion of the matching grant refugees in the 3-year population base.

### III. Proposed Allocation Formula

Of the funds available for FY 1987 for social services, $55,000,000 will be allocated to States in accordance with the formula specified below. A State's allowable allocation will be calculated as follows:

1. The total amount of funds determined by the Director to be available for this purpose; divided by—

2. The total number of refugees and entrants who arrived in the United States not more than 3 years prior to the beginning of the fiscal year for which the funds are appropriated, as shown by the ORR Refugee Data System. The resulting per capita amount will be multiplied by—

3. The number of refugees and entrants in item 2, above, in the State as of October 1, 1986, adusted for estimated secondary migration.

The calculation above will yield the formula allocation for each State.

MAA incentive award supplements are allocated on the same 3-year population basis as that used in the social service formula. These funds will be made available contingent upon letters of assurance from States, as described previously.

### IV. Basis of Refugee and Entrant Population Estimates

The population estimates for the allocation of funds in FY 1987 are based on data on refugee arrivals from the ORR Refugee Data System, adjusted as of October 1, 1986, for estimated secondary migration. The data base includes refugees of all nationalities as well as Cuban and Haitian entrants resettled after September 30, 1983. Figures on the numbers of entrants resettled are maintained by the ORR Florida office.

For fiscal year 1987, ORR's formula allocations to the States for social services for refugees are based on the numbers of refugees who arrived, and on the numbers of entrants who arrived or were resettled, during the preceding three fiscal years: 1984, 1985, and 1986. Therefore estimates have been developed of the numbers of refugees and entrants with arrival or resettlement dates between October 1, 1983, and September 30, 1986, who are thought to be living in each State as of October 1, 1986. The population estimates for the FY 1987 allocations cover refugees of all nationalities and Cuban/Haitian entrants.

All participating States submitted data on their secondary in-migration on Form ORR–11 for use in adjusting these population estimates. The total reported migration was summed, yielding a net migration figure for each State. This figure, the minimum documented migration affecting each State, was applied to the State's total arrival figure, resulting in a revised population estimate. Six States submitted evidence that their refugee populations were larger than the figure published by ORR on January 12, 1987. There States were given credit for the additional refugees which they documented, and where the original destinations of those refugees were established, their numbers were subtracted from other States' estimates accordingly. The resulting estimate was converted into a percentage of the total 3–year refugee population. The percentage distribution was compared with the percentage distribution generated from the refugee child count done by the U.S. Department of Education in May 1986. Where a significant discrepancy between the two percentage distributions existed which could not be explained except by secondary migration, a further adjustment was made to the State's estimated population. The population estimates of 15 States were adjusted in this manner. Finally, each State's population was deflated by approximately 0.84% to constrain the sum of the State figures to the known national total. Due to the adjustments made for population appeals and the inclusion of matching grant refugees, the population estimates for most States are changed slightly from the notice of January 12, 1987.

Estimates were developed separately for refugees and entrants and then combined into a total estimated 3-year refugee/entrant population for each State.

Table 1, below, shows the estimated 3-year populations, as of October 1, 1986, of all refugees and entrants (col. 1); the formula amounts which the population estimates yield (col. 2); the total allocation amounts after allowing for the minimum amounts (col. 3); and the amounts available as an incentive to States to use MAAs as service providers (col. 4).

### V. Allocation Amounts

The following amounts are allocated for refugee social services in FY 1987:

TABLE 1.— ESTIMATED 3-YEAR REFUGEE/ENTRANT POPULATIONS OF STATES PARTICIPATING IN THE REFUGEE PROGRAM AND SOCIAL SERVICE FORMULA AMOUNTS AND ALLOCATIONS FOR FY 1987.

| State | Total population (1) | Formula amount (2) | Allocation (3) | MAA incentive allocation (4) |
|---|---|---|---|---|
| Alabama | 997 | $272,306 | $272,306 | $14,215 |
| Arizona | 2,625 | 716,960 | 716,960 | 37,425 |
| Arkansas | 536 | 146,396 | 146,396 | 7,642 |
| California | 68,704 | 18,764,966 | 18,764,966 | 979,532 |
| Colorado | 2,373 | 648,132 | 648,132 | 33,833 |

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

**[AZ-020-4212-13; A-22539]**

### Realty Action; Federal Land Exchange; Maricopa and Mohave Counties, AZ

**AGENCY:** Bureau of Land Management (BLM), Interior.

**ACTION:** Notice of realty action—exchange of public lands in Maricopa County for private lands in Mohave County, Arizona.

The following described public lands have been determined to be suitable for exchange pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716.

**Gila and Salt River Meridian. Maricopa County, Arizona**

T. 1 S., R. 2 W.,
Secs. 12, 13, 24, 25, 31, 32, 36.

Comprising 2,008.74 acres more or less of public land.

In exchange for the above described public lands, the federal government will acquire private lands described below from American Continental Corporation, Inc., a California Corporation.

**Gila and Salt River Meridian, Mohave County, Arizona**

T. 30 N., R. 15 W.,
Secs. 19, 29, 31.
T. 30 N., R. 16 W.,
Secs. 9, 11, 15, 17, 19, 21, 27, 33, 35.
T. 29 N., R. 15 W.,
Secs. 5, 7, 9, 19.
T. 29 N., R. 16 W.,
Secs. 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 35.
T. 28 N., R. 16 W.,
Secs. 3, 9.
T. 25 N., R. 22 W.,
Secs. 3, 11, 15, 23.
T. 25 N., R. 21 W.,
Secs. 1, 3, 11, 13, 19, 23.
T. 26 N., R. 21 W.,
Sec. 21.
T. 26 N., R. 20 W.,
Sec. 20.
T. 29 N., R. 17 W.,
Sec. 35.
T. 28 N., R. 17 W.,
Secs. 1, 11, 13, 15.
T. 22 N., R. 13 W.,
Secs. 1, 2, 3, 5, 7, 9, 11, 13, 15, 17.
T. 23 N., R. 13 W.,
Secs. 19, 21, 29, 31, 33.
T. 23 N., R. 14 W.,
Secs. 3, 5, 7, 9, 11, 15, 16, 17.
T. 23 N., R. 15 W.,
Secs. 1, 11, 13, 14.
T. 24 N., R. 14 W.,
Secs. 31, 32.

Total acreage of the offered private lands is 39,815.01 acres. The final number of acres to be exchanged will be determined by appraisal of the selected public lands and offered private lands.

A detailed list of legal descriptions for the offered and selected lands listed in this Notice as well as an Environmental Assessment of the proposed exchange is available at the Phoenix District Office.

The exchange proposal involves the exchange proponent's interest in the surface estate of the private lands. The mineral estate of the offered lands is owned by the Atchison, Topeka and Santa Fe Railroad Companies. The surface and mineral estates of the selected public lands will be exchanged except for the mineral estate on section 36 which is owned by the State of Arizona. The exchange is consistent with the Land Tenure Adjustment sections of the Lower Gila South Resource Management Plan.

Lands to be transferred from the United States will be subject to the following reservations, terms and conditions:

1. A right-of-way for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. Right-of-way A-7274 to Tucson Electric Power Company for electric transmission line and access road.

3. Right-of-way A–7872 to Tucson Electric Power Company for electric transmission line and access road.

4. Right-of-way A–10350 to Salt River Project for electric transmission line and access road.

5. Right-of-way A–22554 to Sam Cambron for access road.

This Notice of Realty Action for A–22539 replaces the applicable segregative effect provided by Notice of Realty Action for A–21963 published May 29, 1986.

The segregation of the described lands shall terminate upon issuance of a document conveying title to such lands or upon publication in the Federal Register of a notice of termination of the segregation, or the expiration of two years from date of publication, whichever occurs first.

For a period of forty-five (45) days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027. Any adverse comments will be reviewed by the State Director, who may modify, vacate, or sustain this realty action.

Dated: May 6, 1987.

Henri R. Bisson,

*District Manager.*

## Realty Action; Lease/Conveyance of Public Lands in Nevada County, CA

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Initiation of a 45 day public comment period on the proposed classification of public land within Empire Mine State Park for recreation and public purposes.

**SUMMARY:** Pursuant to the authority in the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 et. seq.), a 45 day public comment period is initiated on the following land proposed to be classified as suitable for lease or conveyance to the State of California for park purposes:

Mt. Diablo Meridian

T. 15N., R. 8E.
Sec. 1, Lot 38.
T. 16N., R. 8E.
Sec. 34, Lot 31;
Sec. 35, Lots 27, 28, and 30.
Containing 0.44 acre more or less.

**SUPPLEMENTARY INFORMATION:** The public lands are located within Empire Mine State Park. The lands are not needed for Federal purposes. Lease or conveyance is consistent with current BLM land use planning and would be in the public interest.

The lease/patent, when issued, will be subject to the following terms, conditions and reservations:

1. Provisions of the Recreation and Public Purposes Act and to all applicable regulations of the Secretary of the Interior.

2. A right-of-way for ditches and canals constructed by the authority of the United States.

3. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals.

Upon publication of this notice in the Federal Register, the lands will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for recreation and public purposes and leasing under the mineral leasing laws.

**DATES:** For a period of 45 days from the date of publication of this notice, interested parties may submit comments.

**ADDRESS:** Written comments should be sent to: Folsom Resource Area Manager, Bureau of Land Management, 63 Natoma, Folsom, California 95630. Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification will become effective 60 days from the date of publication of this notice.

**FOR FURTHER INFORMATION CONTACT:** Charles J. Kihm, District Realty Specialist, Bureau of Land Management, Bakersfield District, 800 Truxtun Avenue, Room 311, Bakersfield, California 93301; (805) 861–4191.

Dated: May 4, 1987.

## Plat of Survey; Lassen County, CA

May 5, 1987.

1. This plat of the following described land will be officially filed in the California State Office, Sacramento, California immediately:

Mount Diablo Meridian, Lassen County

T. 34 N., R. 10 E.

2. This plat (two sheets) representing the dependent resurvey of a portion of the south, east, and north boundaries, and a portion of the subdivisional lines, and the survey of the subdivision of certain sections, Township 34 North, Range 10 East, Mount Diablo Meridian, California, under Group No. 845, California, was accepted April 7, 1987.

3. This plat will immediately become the basic record of describing the land for all authorized purposes. This plat has been placed in the open files and is available to the public for information only.

4. This plat was executed to meet certain administrative needs of the Lassen National Forest, Forest Service.

5. All inquiries relating to this land should be sent to the California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Room E–2841, Sacramento, California 95825.

## Plats of Survey Filing; Colorado

May 4, 1987.

The plats of survey of the following described lands, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10:00 A.M., May 4, 1987.

The plat, representing the dependent resurvey of a portion of the west boundary and subdivisional lines; and the survey of the subdivision of certain sections, T. 35 N., R. 15 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, representing the dependent resurvey of a portion of the south and east boundaries, and subdivisional lines; and the survey of the subdivision of certain sections, T. 36 N., R. 16 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, representing the dependent resurvey of a portion of the Ninth Standard Parallel North, (south boundary), T. 37 N., R. 15 W., portions of the south boundary and subdivisional lines, and the subdivision of certain sections, T. 36 N., R. 15 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, in two sheets, representing the dependent resurvey of the west boundary, portions of the north boundary and subdivisional lines; and the survey of the subdivision of certain sections, T. 37 N., R. 15 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, representing the dependent resurvey of portions of the Ninth Standard Parallel North (south boundary), Second Guide Meridian West (west boundary), and subdivisional lines; and the survey of the subdivision of certains sections, and a metes-and-bounds survey in sections 25 and 35, T. 37 N., R. 16 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, representing the dependent resurvey of a portion of the west boundary of the Ute Ceded Lands, portions of the subdivisional lines, and certain tracts; the survey of the subdivision of certain sections, and a metes-and-bounds survey of lot 5, section 12, T. 37 N., R. 17 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, representing the dependent resurvey of a portion of the subdivisional lines, and the subdivision of sections 21 and 28, and the survey of the subdivision of sections 21, 28, and 32, T. 38 N., R. 15 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, representing the dependent resurvey of a portion of the Second Guide Meridian West (west boundary), east and north boundaries, and subdivisional lines; and the survey of the subdivision of sections 19 and 28, T. 39 N., R. 16 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

The plat, representing the dependent resurvey of a portion of the west boundary of the Uted Ceded Lands, a portion of the Sectional Guide Meridian, a portion of the subdivisional lines and Tract 38; and a survey of the east 40 acres of the south 120 acres of Tract 38, designated as Parcel A, T. 39 N., R. 17 W., New Mexico Principal Meridian, Colorado, Group No. 717, was accepted April 21, 1987.

These surveys were executed to meet certain administrative needs of the Bureau of Reclamation.

All inquiries about these lands should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado 80215.

Duane E. Olsen,

*Acting Chief, Branch of Cadastral Survey.*

## California; Filing of Withdrawal Application

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of filing of withdrawal application.

**SUMMARY:** On February 20, 1987, the Regional Forester, Pacific Southwest Region, Forest Service, U.S. Department of Agriculture, filed an application under the provisions of sec. 204 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1714) to withdraw the

following described national forest land from appropriation under the general mining laws (30 U.S.C., Ch. 2), subject to valid existing rights:

Mount Diablo Meridian, California

Siskiyou County; Shasta-Trinity National Forests

T. 37 N. R. 4 W.,
Sec. 17, S½SE¼SE¼NW¼SW¼, N½NE¼NE¼SW¼SW¼, S½N½NE¼SW¼SW¼, S½N½SW¼SW¼, and N½S½SW¼SW¼.

Containing 25 acres.

FOR FURTHER INFORMATION CONTACT: Viola A. Andrade, California State Office, (916) 978–4815.

The purpose of the withdrawal application is for a developed recreation site—the Sims Campground—located within the Mt. Shasta Ranger District. The said lands will continue to be managed as a developed recreation site during the segregation period.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections concerning the proposed withdrawal may present their views, in writing, to the undersigned officer, Bureau of Land Management, Room E–2841, 2800 Cottage Way, Sacramento, California 95825.

Notice is hereby given that all persons who desire that a public meeting be held must submit a written request to the undersigned officer within 90 days from the date of publication of this notice. If the State Director, Bureau of Land Management, determines that a public meeting will be held, a notice of the time and place will be published in the Federal Register at least 30 days prior to the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in Part 2300 of Title 43, Code of Federal Regulations.

The publication of this notice in the Federal Register shall segregate the lands described in the application to the extent that they shall not be subject to appropriation under the general mining laws (30 U.S.C., Ch. 2) for a period of 2 years from the date of publication in the Federal Register, unless the application is allowed or denied or cancelled, in whole or in part, prior to the expiration of the 2-year period. The 2-year segregative period does not alter the applicability of those public land laws governing the use of the land under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

Inquiries concerning the land should be addressed to the Forest Supervisor, Shasta-Trinity National Forests, 2400 Washington Avenue, Redding, California 96001.

Dated: May 7, 1987.

Sharon N. Janis,
*Chief, Branch of Adjudication and Records.*

## Proposed Modification and Continuation of Withdrawal, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) proposes that 10 acres of withdrawn land for the Elko air navigation site be modified to establish a 20-year term. The land will remain closed to surface entry and mining. The BLM proposes to open the land to application under the mineral leasing laws.

DATE: Comments should be received by August 12, 1987.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Bureau of Land Management, Nevada State Office, P.O. Box 12000, Reno, NV 89520, (702) 784–5481.

SUPPLEMENTARY INFORMATION: The FAA proposes that the existing land withdrawal made by Public Land Order No. 1905 of July 15, 1959, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Mount Diablo Meridian, Nevada

T. 33 N., R. 55 E.,
Sec. 20, NE¼NW¼SE¼.

The area described contains 10 acres in Elko County.

The purpose of the withdrawal is to provide the minimum essential acreage required to protect the construction, operation, and maintenance of this site from electronic or physical interference for flight safety purposes. The withdrawal segregates the land from operation of the public land laws, including the mining laws and the mineral leasing laws. No change is proposed in the purpose of the withdrawal; however, it is proposed to change the segregative effect of the withdrawal to allow for applications under the mineral leasing laws. Mineral leasing will be allowed only with FAA's concurrence.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations in the Nevada State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the Federal Register. The existing withdrawal will continue until such final determination is made.

Dated: May 8, 1987.

Robert G. Steele,
*Deputy State Director, Operations.*

## Proposed Modification and Continuation of Withdrawal; NE

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) proposes that the two withdrawals aggregating 160 acres for the Wells Vortac air navigation site be modified to establish a 20-year term. The land will remain closed to surface entry and mining, but has been and will remain open to mineral leasing.

DATE: Comments should be received by August 12, 1987.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Bureau of Land Management, Nevada State Office, P.O. Box 12000, Reno, NV 89520, (702) 784–5481.

SUPPLEMENTARY INFORMATION: The FAA proposes that the existing withdrawals made by Secretarial Order of March 7, 1947, and Public Land Order 3449 of September 23, 1964, be modified to establish a 20-year term. This action is taken pursuant to section 204 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2751; 43 U.S.C. 1714). The lands are described as follows:

Mount Diablo Meridian, Nevada

T. 38 N., R. 62 E.,
Sec. 28, SW¼.

The area described aggregates 160 acres in Elko County.

The purpose of the withdrawals is to provide the minimum essential acreage required to protect the construction, operation, and maintenance of this site from electronic or physical interference for flight safety purposes. The withdrawals segregate the land from operation of the public land laws, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or the segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Nevada State Office, P.O. Box 12000, Reno, Nevada 89520.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Dated: May 6, 1987.

## Proposed Continuation of Withdrawals; Nevada

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** The Forest Service proposes that 51.4 acres of withdrawn land for three administrative sites be continued for an additional 25 years. The land will remain closed to surface entry and mining but has been and will remain open to mineral leasing.

**DATE:** Comments should be received by August 12, 1987.

**FOR FURTHER INFORMATION CONTACT:** Vienna Wolder, Bureau of Land Management, Nevada State Office, P.O. Box 12000, Reno, NV 89520.

**SUPPLEMENTARY INFORMATION:** The Forest Service proposes that three existing land withdrawals made by Executive Order 2506 of January 3, 1917, Public Land Order 3144 of July 30, 1963, and Public Land Order 3844 of October 5, 1965, be continued for a period of 25 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Mount Diablo Meridian, Nevada

T. 13 N., R. 40 E.,
Sec. 15, SE¼NW¼.
T. 11 N., R 43 E.,
Sec. 30, that part of the NE¼NE¼ lying east of the Nevada State Highway right-of-way, Star Route 8-A, as it existed on July 30, 1963.
T. 2 N., R. 42 E.,
Sec. 2, a tract within the NE¼ described by metes and bounds as follows: Commencing at Corner No. 4 of Mining Patent Tonopah No. 4, Survey No. 2080, thence N. 30°50'E. along the east boundary of said mining patent, 312.41 feet to the true point of beginning; thence N. 35°50' E., 405.89 feet to corner No. 3 of said mining patent; thence N. 28°22' E. along the east boundary of said mining patent, 195.5 feet; thence S. 67°52' E., 299.2 feet to a point on the west boundary of Mining Patent California Lode, Survey No. 4729; thence S. 5°32' W. along the west boundary, 422.3 feet to corner No. 4 of the said mining patent; thence S. 5°32' W., 82.8 feet; thence N. 75°32' W., 571.0 feet to the point of beginning.

The area described aggregates 51.4 acres in Nye County.

The purpose of the withdrawals is to protect the construction, operation, and maintenance of three administrative sites. Two of the withdrawals segregate the land from operation of the public land laws generally, including the mining laws, but not the mineral leasing laws. The site located in T. 13 N., R. 40 E., is segregated only from the location of nonmetalliferous mining. No change is proposed in the purpose or segregative effects of the withdrawals.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawals continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations in the Nevada State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawals will be continued and, if so, for how long. The final determination on the continuation of the withdrawals will be published in the **Federal Register**. The existing withdrawals will continue until such final determination is made.

Dated: May 7, 1987.

## Arizona; Yuma District Advisory Council Meeting

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Yuma (Arizona) District Advisory Council Meeting.

**SUMMARY:** A meeting of the Yuma District Advisory Council will be held on Friday, June 12, beginning at 10 a.m. in the Lake Havasu City Council Chambers located at 1795 Civic Center Boulevard.

**DATE:** Friday, June 12, 1987.

**FOR FURTHER INFORMATION CONTACT:** Douglas B. Stockdale, Yuma District Office, 3150 Winsor Avenue, Yuma, Arizona 85365, 602-726-6300.

**SUPPLEMENTARY INFORMATION:** Discussions will center on District program updates, the wilderness review process, and other Council initiated topics. The public is invited to attend the meeting.

Written statements from the public may be filed for the Council's consideration. Statements must arrive at the District Office by June 8. Oral statements will also be accepted but, depending on the number of persons wishing to address the Council, a per-person time limit may be imposed.

Summary of minutes of the District Advisory Council meeting will be maintained in the Yuma District Office and will be available for inspection and reproduction during regular business hours (7:45 a.m. through 4:30 p.m.) within 30 days of the meeting.

Dated: May 8, 1987.

## Coos Bay District Advisory Council Meeting; Oregon

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Meeting of Coos Bay District Advisory Council.

**SUMMARY:** Notice is hereby given in accordance with Pub. L. 94–579 and 43 CFR, Part 1780 that a meeting of the Coos Bay District Advisory Council will be held on Friday, June 12, 1987, beginning at 9:00 a.m. The meeting will be held in the conference room of the Coos Bay District Office, 333 South Fourth Street, Coos Bay, OR.

**AGENDA:** The agenda for the meeting will include:

1. Updates on old business including the "Issues" portion of the planning process for the 1990s.
2. Discussion of the BLM Oregon/Washington Organizational Study.
3. Arrangements for the next meeting.

The meeting is open to the public and news media. Interested persons may make oral statements to the council from 10:00 a.m. to 10:30 a.m. on Friday, June 12, or file written statements for the council's consideration. Anyone wishing to make an oral statement must notify the District Manager by close of business on Monday, June 8, 1987 (Telephone 503–269–5880).

**ADDRESS:** Bureau of Land Management, Coos Bay District Office, 333 South Fourth Street, Coos Bay, OR 97420.

Minutes of the meeting will be maintained at the District Office and made available during regular business hours (7:45 a.m. to 4:30 p.m.) for public inspection or reproduction at the cost of duplication.

Dated: May 4, 1987.

## Helicopters and Motorized Vehicle To Gather Wild Horses; Hearing; Battle Mountain District, NE

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Battle Mountain District: Public hearing to discuss the use of helicopters and motorized vehicles to remove excess wild horses in FY 87 and subsequent years.

**SUMMARY:** In accordance with Public Laws 92–195 and 94–579, this notice sets forth the public hearing date to discuss the use of helicopters and motorized vehicles to remove excess wild horses from the Battle Mountain District during FY 87 and subsequent years.

**DATE:** June 19, 1987–1:00 p.m.

**ADDRESS:** The hearing will take place in the Shoshone-Eureka Conference room, Battle Mountain District Office, North Second and Scott Streets, Battle Mountain, Nevada 89820. Telephone (702) 635–5181.

**SUPPLEMENTARY INFORMATION:** The use of helicopters and motorized vehicles to remove horses from the Callahan, Roberts Mountain, Fish Creek and Seven Mile Wild Horse Herd Management Areas during FY 87 and subsequent years will be discussed.

This hearing is open to the public. Interested persons may make oral or written statements. If you wish to make oral comments, please contact Terry L. Plummer by June 12, 1987. Written statements must be received by this date also.

**FOR FURTHER INFORMATION CONTACT:** Terry L. Plummer, District Manager, P.O. Box 1420, Battle Mountain, Nevada 89820 or phone (702) 635–5181.

Dated: May 5, 1987.

## Minerals Management Service

## Development Operations Coordination Document; ODECO Oil and Gas Co.

**AGENCY:** Minerals Management Service, Interior.

**ACTION:** Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

**SUMMARY:** Notice is hereby given that ODECO Oil & Gas Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS 073, Block 19, South Pelto Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from onshore bases located at Cocodrie and Houma, Louisiana.

**DATE:** The subject DOCD was deemed submitted on May 6, 1987.

**ADDRESS:** A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

**FOR FURTHER INFORMATION CONTACT:** Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2867.

**SUPPLEMENTARY INFORMATION:** The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and

procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: May 8, 1987.

## INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

## International Agreement for Installation of Data Collection Platforms on Mexican Tributaries to the Rio Grande; Finding of No Significant Impact

**AGENCY:** United States Section, International Boundary and Water Commission, United States and Mexico.

**ACTION:** Notice of Finding of No Significant Impact.

**SUMMARY:** Based on an environmental assessment, the U.S. Section finds that the proposed action to enter into an international agreement to provide additional weather data communications stations in Mexico to obtain rainfall and river stage data for the Rio Grande is not a major Federal action that would have a significant adverse affect on the quality of the human environment. Therefore, pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Final Regulations (40 CFR Parts 1500-1508); and the U.S. Section's Operational Procedures for Implementing section 102 of the National Environmental Policy Act (NEPA), published in the **Federal Register** September 2, 1981 (46 FR 44083); the U.S. Section hereby gives notice that an environmental impact statement is not being prepared for the Government of the United States to enter into an agreement with the Government of Mexico through the International Boundary and Water Commission, to provide for installation and arrangements for maintenance of Data Collection Platforms (DCPs) at six sites on Mexican tributaries to the Rio Grande and at one site on the Rio Grande.

**FOR FURTHER INFORMATION CONTACT:** Mr. M. R. Ybarra, U.S. Section Secretary; International Boundary and Water Commission, United States and Mexico, United States Section; The Commons, C-310; 4171 North Mesa; El Paso, Texas 79902. Telephone: (915) 534-6698, FTS 570-6698.

**SUPPLEMENTARY INFORMATION:**

*Proposed Action*

It is proposed that the Government of the United States enter into an agreement with the Government of Mexico, through the International Boundary and Water Commission (Commission), to provide for installation and arrangements for maintenance of Data Collection Platforms (DCPs) at six sites on Mexican tributaries to the Rio Grande and one site on the Rio Grande. The purpose of the DCPs on these streams is to provide advance warning of flood flows as well as timely information needed for joint flood operations of the international dams and reservoirs and the international flood control projects of the Commission.

*Alternatives Considered*

*Two alternatives were considered:*

The Proposed Action Alternative provides for the two governments to enter into an agreement recommending a joint Mexico-U.S. program for installation of DCPs at six sites on Mexican tributaries to the Rio Grande and at one site on the Rio Grande.

The U.S. National Weather Service (NWS), recognizing a need for a short-notice flood forecasting data collection network in the Lower Rio Grande Basin, will, as a part of this agreement, provide to Mexico, at the expense of the United States Government, equipment for the installation of the DCPs over the ensuing three to four years. Further, the NWS will provide expert advice on DCP siting and telecommunications requirements for data transmission, site installations, and surveys. Finally, the NWS will assist in initial maintenance visits, as feasible, and in training of maintenance personnel.

Mexico will obtain and prepare the sites for the installations, do the installation, provide security and maintenance of the installations, provide quality assurance for the data and make the data available. The U.S. Section will assist with the installation of compatible stream and precipitation gages. Construction, operation and maintenance of the installations will be under the supervision of the Commission.

Under the No Action Alternative, flood operations would continue as in the past without the advance data on possible flood inflows to the Rio Grande from these remote areas in Mexico. The forecasting of flood flows and more reliable operation of Commission international flood control projects will continue to be more difficult without the timely data DCPs on Mexican tributaries to the Rio Grande could provide.

*Environmental Assessment*

The U.S. Section completed the Draft Environmental Assessment on April 30, 1987.

*Findings of the Environmental Assessment*

*The Draft Environmental Assessment finds that:*

1. The proposed agreement would provide for the installation, wholly in Mexico, of DCPs at six existing stream gaging stations on Mexican tributaries to the Rio Grande and at one existing site on the Rio Grande.

2. The data collected by the DCPs would be transmitted along existing lines of communication, including GOES (Geo-synchronous Orbiting Environmental Satellite) and other direct telecommunications links.

3. Secondary beneficial effects of reduced flood damage to habitat and properties, including those on or proposed for nomination to the National Register of Historic Places and the National Registry of Natural Landmarks; and the saving of lives could result from the advance warning of precipitation and floodwaters and subsequent Commission operations of international dams and international flood control projects.

On the basis of the Draft Environmental Assessment, the U.S. Section determines that an environmental impact statement is not required for the Government of the United States to enter into an agreement with the Government of Mexico to provide for installation and arrangements for maintenance of DCPs on Mexican tributaries to the Rio Grande and hereby supplies notice of a finding of no significant impact.

An environmental impact statement will not be prepared unless additional information which may affect this decision is brought to our attention within thirty (30) days of the date of this Notice.

The Draft Finding of No Significant Impact (FONSI) and Draft Environmental Assessment (EA) have been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the Draft FONSI and Draft EA are available to fill single copy requests at the above address.

Dated: May 1, 1987.

## INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31037]

### Carthage, Knightstown and Shirley Railroad; Acquisition and Operation; the Indiana Midland Railroad

Carthage, Knightstown & Shirley Railroad has filed a notice of exemption to acquire and operate certain properties of the Indiana Midland Railroad. The properties consist of: the line between Markleville, IN and Carthage, IN (milepost 173.95 to milepost 193.5) and the 1.75-mile branch line from Shirley, IN to Wilkinson, IN, a toatal distance of approximately 21 miles in Madison, Henry, Hancock, and Rush countries, IN. Any comments must be filed with the Commission and served upon Thomas L. Allison, Carthage, Knightstown & Shirley Railroad, 198 Railroad Street, P.O. Box 378, Shirley, IN 47384, telephone (317) 737-6561.[1]

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: April 28, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

### Chicago, Missouri and Western Railway Co.; Trackage Rights; Chicago South Shore and South Bend Railroad

Chicago, Missouri & Western Railway Company (CM&W) has filed a Notice of Exemption to operate over trackage rights granted by the Chicago South Shore and South Bend Railroad (South Shore), between Burnham Yard and Kensington Station in Chicago, IL, a distance of 5.3 miles. This will enable

[1] The Railway Labor Executive's Association (RLEA) filed an unsupported request for labor protection claiming that this transaction is subject to the mandatory labor protection provisions of 49 U.S.C. 11347. The United Transportation union desires to become a party to the protest. Since this transaction involves an exemption from 49 U.S.C. 10901, only a showing of exceptional circumstances will justify the imposition of labor protective conditions. RLEA's request is denied, because the requisite showing has not been made. *See Class Exemption—Acq. & Oper. of R. Lines under 49 U.S.C. 10901*, 1 I.C.C. 2d 810 (1985).

CM&W to interchange with South Shore at Burnham Yard.[1]

Comments must be filed with the Commission and served on: Paul A. Cunningham, Pepper, Hamilton & Scheetz, 1777 F Street, NW., Washington, DC 20006, (202) 842-8100, and Theodore E. Cornell III, Seyfarth, Shaw, Fairweather & Geraldson, 55 East Monroe Street, Chicago, IL, (312) 346-8000.[2]

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time.[3] The filing of a petition to revoke will not automatically stay the transaction.

Decided: May 4, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

*Secretary.*

[FR Doc. 87-11013 Filed 5-13-87; 8:45 am]

BILLING CODE 7035-01-M

[1] CM&W states that interchange movements with South Shore were contemplated in the supporting statements submitted in Finance Docket No. 30911, *Chicago, Missouri & Western Railway Company—Exemption Acquisition and Operation—Illinois Central Gulf Railroad Company*, Notice of Exemption, (not printed), served October 23, 1986. The trackage rights agreement herein is claimed to be incidental to CM&W's exempted acquisition in Finance Docket No. 30911 and to promote the success of the acquisition by maintaining efficient connecting operations.

[2] The Railway Labor Executives' Association (RLEA) and United Transportation Union filed an unsupported request for labor protection claiming that this transaction is subject to the mandatory labor protection provisions of 49 U.S.C. 11347. However, the main line acquisition and related trackage rights agreements are governed by section 10901. Under section 10901(c), imposition of labor protective conditions is discretionary. Absent a specific showing of need, the Commission does not impose labor protective conditions on section 10901 transactions. Additionally, the Commission has a long standing and judicially approved policy of not imposing labor protective obligations upon newly formed acquiring carriers. There is no evidence in the record to support imposition of labor conditions, and none will be imposed. RLEA's request is denied.

[3] On April 27, 1987, a Petition to Reject, Revoke, and for Stay was filed by Francis C. Brewer and Patrick W. Simmons, United Transportation Union Legislative Directors for Indiana and Illinois, respectively. They urge rejection of the Notice in Finance Docket No. 31038 because the involved trackage rights are said not come within the class exemption promulgated at 49 CFR 1150.31 in *Class Exemption—Acq. & Oper. of R. Lines Under 49 U.S.C. 10901*, 1 I.C.C.2d 810 (1985). However, notices of exemption are rejected only if they are deficient on their face (*e.g.*, by failing to include all of the information required under 49 CFR 1150.33) As to the applicability to the transaction, these arguments will be considered in separate decisions relating to revocation and stay.

## Agency Forms Under Review by Office of Management and Budget

The following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) is being submitted to the Office of Management and Budget for review and approval. Copies of the forms and supporting documents may be obtained from the Agency Clearance Officer, Ray Houser (202) 275-6723. Comments regarding this information collection should be addressed to Ray Houser, Interstate Commerce Commission, Room 1325, 12th and Constitution Ave., NW., Washington, DC 20423 and to Gary Waxman, Office of Management and Budget, Room 3228 NEOB, Washington, DC 20503, (202) 395-7340.

Type of Clearance—Extension
Bureau/Office—Office of Proceedings
Title of Form—Application for Motor or Water Carrier Certificate or Permit, Brokerage License, Freight Forwarder Permit, or Water Carrier Exemption.
OMB Form No.—3120-0047
Agency Form No.—OP-1
Frequency—As applicant desires initial or expanded authority.
Respondents—Persons desiring operating authority
No. of Respondents—10,000
Total Burden Hrs.—80,000
Brief Description of the need & proposed use—Data are used to determine whether applicant for motor, passenger, motor property, water carrier, property broker and household goods, freight forwarder authority should be granted entry into the surface transportation industry.

Type of Clearance—Extension
Bureau/Office—Bureau of Accounts
Title of Form—Annual Report of Railroad Employees, Services and Compensation Quarterly Report of Railroad Employees, Services and Compensation Monthly Report of Number of Employees Class I Railroad
OMB Form No.—3120-0074
Agency Form No.—Annual Wage A&B m300 monthly wage report of employees
Frequency—Annually, Quarterly, Monthly
Respondents—Class I Railroads
No. of Respondents—21
Total Burden Hrs.—14,637
Brief Description of the need & proposed use—Data are used to access growth, sudden changes in carrier employment service hours and compensation and to identify changes and trends that may effect the transportation system.

Noreta R. McGee,

*Secretary.*

## DEPARTMENT OF JUSTICE

### Antitrust Division

### National Cooperative Research Act of 1984; Portland Cement Association

Notice is hereby given that pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), the Portland Cement Association ("PCA")

has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the following companies became members of the Association effective on the dates indicated below:

| | |
|---|---|
| Tarmac-LoneStar, Inc. | Jan. 1, 1987 |
| Capitol Cement Corp. | Mar. 1, 1987 |
| Dundee Cement Co. | Mar. 1, 1987 |
| Continental Cement Co. | Apr. 1, 1987 |
| Davenport Cement Co. | Apr. 1, 1987 |
| Missouri Portland Cement Co. | Apr. 1, 1987 |
| Rinker Materials Corporation | Apr. 1, 1987 |

Accordingly, at present the members of the PCA are those companies listed below:

*United States*

Aetna Cement Corporation
Alaska Basic Industries
Ash Grove Cement Corporation
Ash Grove Cement West, Inc.
Ash Grove Foreman Cement Company
Blue Circle Atlantic, Inc.
Blue Circle, Inc.
Blue Circle West, Inc.
Calaveras Cement Company
CalMat Co.
Capitol Aggregates, Inc.
Capitol Cement Corporation
Continental Cement Company
Davenport Cement Company
Dragon Products Company
Dundee Cement Company
General Portland, Inc.
Hawaiian Cement
Ideal Basic Industries, Inc.
Independence Cement Corporation
Lehigh Portland Cement Company
Lone Star-Falcon
Lone Star Industries, Inc.
Medusa Cement Corporation
Missouri Portland Cement Company
The Monarch Cement Company
Moore McCormack Cement, Inc.
Northwestern States Portland Cement Co.
Rinker Materials Corporation
Rochester Portland Cement Corporation
St. Marys Peerless Cement Company
St. Marys Wisconsin, Inc.
The South Dakota Cement Plant
Southwestern Portland Cement Company
Tarmac-LoneStar, Inc.
Tilbury Cement Company

*Canada*

Canada Cement Lafarge Ltd.
Federal White Cement Ltd.
Inland Cement Limited
Lake Ontario Cement Limited
North Star Cement Limited
St. Lawrence Cement, Inc.
St. Marys Cement Corporation
Tilbury Cement Limited

In addition, the following equipment suppliers are involved as "Participating Associates," together with PCA members, in the activities of the Manufacturing Process Subcommittee of PCA's General Technical Committee

Baker-Dolomite (DBCA)
C-E Raymond
Holderbank Consulting Ltd.
Humboldt Wedag Company
Centennial Engineering, Inc.
Allis-Chalmers Corp.
F.L. Smidth and Company
Claudius Peters, Inc.
Polysius Corp.
The Fuller Company

On January 7, 1985, PCA filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the Federal Register pursuant to section 6(b) of the Act on February 5, 1985, 50 FR 5015. On March 14, 1985, August 13, 1985, January 3, 1986, February 14, 1986, May 30, 1986, July 10, 1986, December 31, 1986, and February 3, 1987, PCA filed additional written notifications. The Department published notices in the Federal Register in response to these additional notifications on April 10, 1985 (50 FR 14175), September 16, 1985 (50 FR 37594), February 4, 1986 (51 FR 4440), March 12, 1986 (51 FR 8573), June 27, 1986 (51 FR 23479), August 14, 1986 (51 FR 29173), February 3, 1987 (52 FR 3356), March 4, 1987 (52 FR 6635), respectively.

Joseph H. Widmar,
*Director of Operations, Antitrust Division.*

BILLING CODE 4410-01-M

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-261]

### Carolina Power & Light Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of Appendix J to 10 CFR Part 50 to Carolina Power & Light Company, (the licensee), for the H.B. Robison Steam Electric Plant, Unit No. 2, located in Darlington County, South Carolina.

**Environmental Assessment**

*Identification of Proposed Action*

The exemption would grant relief from 10 CFR Part 50, Appendix J, paragraph II.A.3, which requires that all Type A (Containment Integrated Leak Rate) tests be performed in accordance with ANSI N45.4-1972, "Leakage Rate Testing of Containment Structures for Nuclear Reactors." ANSI N45.4 requires that leakage calculations be performed using the Total Time method. The licensee would rely, instead, on the Mass-Plot method described in ANSI/ANS 56.8-1981, "Containment System Leakage Testing."

The licensee's request for exemption and the bases therefor are contained in a letter dated April 17, 1987.

*The Need for the Proposed Action*

The proposed exemption is from the Standard referenced in 10 CFR Part 50, Appendix J, which requires the containment leakage calculations be performed using either Point-to-Point or the Total Time method. The licensee has performed the calculations using the Mass-Plot method, a newer method which has been accepted by the NRC staff. Additionally, the revised Standard (ANSI/ANS 56.8-1981, "Containment Leakage Testing") specifies the use of the Mass-Plot method exclusively, and the new Standard is proposed to be incorporated into a planned revision of Appendix J.

*Environmental Impacts of Proposed Action*

The proposed exemption would permit the substitution of the Mass-Plot method for the Total Time method in performing leakage calculations. The Mass-Plot method has been accepted by the NRC staff as a more accurate technique that will increase confidence in the integrity of the containment. This exemption will not affect containment integrity and does not affect the risk of facility accidents. Thus, post-radiological releases will not be greater than previously determined, nor does the proposed exemption otherwise affect radiological plant effluents, nor result in any significant occupational exposure. Likewise, the exemption does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant radiological or non-radiological environmental impacts associated with the proposed exemption.

*Alternatives to the Proposed Action*

Because it has been concluded that there is no measurable impact associated with the proposed exemption, any alternatives to the exemption will have either no

environmental impact or greater environmental impact.

The principal alternative to the exemption would be to deny the requested exemption. Such action would not reduce environmental impacts of the Robinson Unit 2 operations and would result in reduced operational flexibility or unwarranted delays in power ascension.

*Alternative Use of Resources*

This action does not involve the use of resources not previously considered in connection with the "Final Environmental Statement related to the Operation of the H.B. Robinson Steam-Electric Plant Unit 2", dated April 1975.

*Agencies and Persons Consulted*

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

**Finding of No Significant Impact**

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based on the foregoing environmental assessment, the staff concludes that the proposed action will not have significant effect on the quality of the human environment.

For further information with respect to this action, see the application for exemption previously listed, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555 and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

Dated at Bethesda, Maryland, this 8th day of May 1987.

For the Nuclear Regulatory Commission.

**Jon B. Hopkins,**

*Acting Director, Project Directorate II–1, Division of Reactor Projects—I/II.*

[FR Doc. 87–11047 Filed 5–13–87; 8:45 am]

BILLING CODE 7590–01–M

---

[Docket No. 50–313]

**Arkansas Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–51 issued to Arkansas Power and Light Company (the licensee), for operation of the Arkansas Nuclear One, Unit 1, located in Pope County, Arkansas. The request for amendment was submitted by letter dated May 6, 1987.

The proposed amendment would revise ANO–1 Technical Specification (TS) to allow a one-time waiver from TS 3.8.15 and the related Basis to allow the Auxiliary Building crane to handle a spent fuel shipping cask. The waiver would allow the licensee to ship up to 16 spent fuel pins in a spent fuel shipping cask licensed by the U.S. Department of Energy (DOE) for hot cell examination as a part of the DOE Extended Burnup Program. TS 3.8.15 presently states that the spent fuel shipping cask shall not be carried by the Auxiliary Building crane pending the evaluation of the spent fuel cask drop accident and the crane design by Arkansas Power and Light (AP&L) and NRC review and approval.

TS 3.8.15 assures that the spent fuel cask drop accident cannot occur prior to completion of the NRC staff's review of this potential accident and the completion of any modifications that may be necessary to preclude the accident or mitigate the consequences. NRC review of this particular issue was incorporated into the staff's resolution of the generic issue (A–36) related to control of heavy loads near spent fuel. AP&L has completed all actions and submittals required by the issuance of NUREG-0612, "Control of Heavy Loads at Nuclear Power Plants", and a Safety Evaluation (SE) dated October 11, 1984 was issued by the staff.

The licensee states in its application while the licensee believes that sufficient justification exists for deletion of the TS restriction, a one-time waiver would permit the licensee to work with the DOE since the DOE has only one licensed spent fuel shipping cask available for a limited time (April 15 thru June 15) while allowing the NRC staff additional time to consider the licensee's request of April 7, 1987 to delete TS 3.8.15.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. A discussion of these standards as they relate to the proposed change follows:

**(1) Consideration of Probability and Consequences of Accident**

AP&L's procedures, load paths, crane equipment certification and operator training and other related heavy load handling topics were evaluated as part of the control of heavy loads issue and found acceptable. Further, the spent fuel cask handling is discussed in Section 9.6.2.6 of the ANO–1 FSAR, and that the cask will never travel over spent fuel. This restriction is not changed by the requested amendment which would permit the cask to be carried by the Auxiliary Building crane.

Although cask handling is presently prohibited by TS 3.8.15, ANO–1 FSAR Section 9.6.2.6 further evaluates the event of a cask drop accident. The analysis indicates that the consequences are acceptable. The cask drop evaluation in ANO–1 FSAR Section 9.6.2.6 assumes 15 full fuel assemblies, 100 days after shutdown, are involved. Although the DOE extended burnup fuel assemblies have longer operation than the three cycles assumed in the FSAR evaluation, they have been stored in the ANO–1 fuel pool much longer than the assumed 100 days, thus the iodine and noble gas inventory available for release has decreased substantially due to isotopic decay. The proposed amendment will allow shipment of at most 16 spent fuel pins, a very small fraction of the number of pins in 15 full assemblies. Each fuel assembly has 208 fuel pins, therefore, the offsite doses resulting from a cask drop would be much lower than those presented in the FSAR. Additionally, with a one-time waiver request only one-time movement of the cask coupled with the modifications made for conformance to NUREG–0612 would make the probability of a dropped cask very low. The proposed change, therefore, would not involve a significant increase in the probability or consequences of an accident previously evaluated.

**(2) Consideration of Possibility of a New or Different Kind of Accident**

The cask handling methods and cask drop accident are discussed and evaluated in ANO–1 FSAR Section 9.6.2.6 Additionally, the NRC performed an independent evaluation of the radiological consequences of a cask drop accident, as documented in the ANO–1 licensing SER dated June 6, 1973. The evaluations of the cask drop accident has concluded that the consequences would be within

acceptable bounds. No new accident scenarios have been identified related to the proposed amendment request, therefore, this change is bounded by the current analysis. The proposed amendment request will therefore not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) Consideration of a Reduction in a Margin of Safety

The spent fuel cask has been issued and continues to hold an NRC Certificate of Compliance for radioactive materials packages, and the procedures, load paths and equipment to be used for cask handling have been reviewed and approved by the NRC with the resolution of the control of heavy loads issue. Further, the cask will contain only 16 fuel pins as opposed to the 15 assemblies assumed in the accident analysis. Therefore, the proposed amendment request will not involve a significant reduction in a margin of safety.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of the Federal Register notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By June 15, 1987, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Procedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Jose A. Calvo, Director, Project Directorate–IV, Division of Reactor Projects—III, IV, V and Special Projects: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Nicholas S. Reynolds, Esq., Bishop, Liberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street, NW., Washington, DC, 20036, an attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained

absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and at the Tomlinson Library, Arkansas Tech. University, Russellville, Arkansas 72801.

Dated at Bethesda, Maryland, this 11th day of May 1987.

For the Nuclear Regulatory Commission.

George Dick,

*Project Manager, Project Directorate–IV, Division of Reactor Projects—III, IV, V and Special Projects.*

[FR Doc. 87–11048 Filed 5–13–87; 8:45 am]

BILLING CODE 7590–01–M

---

[Docket No. 50–440]

**Cleveland Electric Illuminating Co. et al; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–58 issued to the Cleveland Electric Illuminating Company (CEI), the Duquesne Light Company, the Ohio Edison Company, the Pennsylvania Power Company, and the Toledo Edison Company (the licensees) for operation of the Perry Nuclear Power Plant, Unit No. 1, located in Lake County, Ohio.

The amendment would grant the licensees a one-time exception to technical Specification 4.6.1.2.f to extend the leak testing interval of the Main Steamline Isolation Valves (MSIVs) in steamline "A" until July 12, 1987. Technical Specification 4.6.1.2.f requires that MSIVs be leak tested at least once per 18 months, and the MSIVs in steamline "A" are due to be tested by May 31, 1987.

CEI was granted an earlier Technical Specification exception for the operability of the Reactor Core Isolation Cooling (RCIC) system, which expires on May 31, 1987. The basis for the May 31st date was that modifications to the water level instruments which had proved successful during RCIC system testing were to be installed on all reference legs. These modifications were to be installed during a planned May-June 1987 maintenance outage; and it was planned that the steamline "A" MSIVs would be leak tested in accordance with the Technical Specification 4.6.1.2.f test time interval at that time. However, during a recent unplanned forced outage, the RCIC system instrument modifications were completed. Therefore, the only item which would force the plant to enter into a planned outage on May 31, 1987, is the leak testing of the MSIVs in steamline "A". Since CEI only recently determined that the post-modification testing on all of the reactor vessel water level instrumentation was performed successfully prior to the planned maintenance outage, it would serve no safety function to require the plant to be shut down on May 31, 1987 to conduct the steamline "A" MSIV tests.

The one-time change to extend the time interval for leak testing of the steamline "A" MSIVs is in response to the licensees' application for amendment dated May 4, 1987, which requested that the amendment be processed under exigent circumstances in accordance with 10 CFR 50.91(a)(6) in light of the short time remaining to perform the required MSIV leak tests.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed change does not increase the probability or consequences of an accident previously evaluated. CEI is proposing to perform leak testing of the MSIVs in steamline "A" six weeks later than presently required in the Plant Technical Specifications. The Commission's regulations in 10 CFR Part 50, Appendix J, "Primary Containment Leakage Testing for Water-Cooled Power Reactors," requires Type C tests to be conducted at intervals no greater than two years. The MSIVs in steamline "A" were last leak tested on July 13, 1986. Therefore, by postponing the leak tests until July 12, 1987, CEI will still be within the testing frequency interval required in 10 CFR Part 50, Appendix J.

The proposed change does not create a new or different kind of accident from any accident previously evaluated. CEI is proposing to postpone leak testing of the two MSIVs in steamline "A" from May 31, 1987, to July 12, 1987, and that by no later than July 12, 1987, CEI will perform all required testing on the MSIVs in accordance with the Commission's regulations. In addition, the change does not result in any modification to the plant design or systems operation.

The proposed change does not involve a significant reduction in a margin of safety. As is stated above, the two MSIVs in steamline "A" were leak tested on July 13, 1986, and the results of those tests were found to be well within the acceptance criteria established for each MSIV. CEI was issued a low power operating license (No. NPF–45) for Unit 1 on March 18, 1986, and commenced nuclear heatup in August 1986. As such, the MSIVs in question have only seen approximately nine months of service; and the MSIVs would only have been in service for one year since last being tested, with approval of the test interval extension proposed.

Therefore, based on these considerations and the three criteria given above, the Commission has made a proposed determination that the amendment request, which will be effective only up to July 12, 1987, involves no significant hazards consideration.

The Commission has determined that failure to act in a timely way would result in an untimely and unnecessary shutdown of Unit 1 on May 31, 1987, with no enhancement of safety. Therefore, the Commission has insufficient time to issue its usual 30-day notice of the proposed action for public comment.

If the proposed determination becomes final, an opportunity for a hearing will be published in the Federal Register at a later date and any hearing request will not delay the effective date of the amendment.

If the Commission decides in its final determination that the amendment does involve a significant hazards consideration, a notice of opportunity for a prior hearing will be published in the Federal Register and, if a hearing is granted, it will be held before any amendment is issued.

The Commission is seeking public comments on this proposed determination of no significant hazards consideration. Comments on the proposed determination may be

telephoned to Martin J. Virgilio, Acting Director, Project Directorate III–1, by collect call to (301) 492–4553, or submitted in writing to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland, from 8:15 a.m. to 5:00 p.m.

All comments received by May 29, 1987, will be considered in reaching a final determination. A copy of the application may be examined at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Perry Public Library, 3753 Main Street, Perry, Ohio 44081.

Dated at Bethesda, Maryland, this 11th day of May, 1987.

For the Nuclear Regulatory Commission.

**Timothy G. Colburn,**

*Project Manager, Project Directorate III–1, Division of Reactor Projects—III, IV, V & Special Projects.*

[Docket Nos. 50–155 and 50–255]

## Consumers Power Co.; Applications

Notice is hereby given that the United States Nuclear Regulatory Commission (the Commission) is considering approval under 10 CFR 50.80 of the proposed corporate restructuring of Consumers Power Company (CPCo), the owner and licensee for the Big Rock Point and Palisades nuclear plants. By letter dated April 16, 1987, CPCo informed the Commission that the Board of Directors has proposed a corporate restructuring plan to be presented at the May 6, 1987 annual shareholders meeting. If a majority of CPCo shareholders approve the plan, CPCo will become a wholly-owned subsidiary of a new holding company, CMS Energy Corporation, effective on or about May 22, 1987. CPCo would remain as holder of the licenses for Big Rock Point and Palisades. If the plan is approved, the common stock of CPCo will be converted on a share-for-share basis into common stock of the holding company. The current CPCo Board of Directors will serve in the same capacity for the holding company, and there will be no significant change in ownership, management, or sources of funds for operation of the Big Rock Point or Palisades plants, according to the proposed plan.

Pursuant to 10 CFR 50.80, the Commission may approve the transfer of control of a license, after notice to interested persons, upon the Commission's determination that the holder of the license following the transfer is qualified to have the control of the license and that the transfer of such control is otherwise consistent with applicable provisions of law, regulations and orders of the Commission.

Dated at Bethesda, Maryland, this 11th day of May, 1987.

**Martin J. Virgilio,**

*Acting Director, Project Directorate III–1, Division of Reactor Projects—III, IV, V & Special Projects.*

## RAILROAD RETIREMENT BOARD

### Determination of Quarterly Rate of Excise Tax for Railroad Retirement Supplemental Annuity Program

In accordance with directions in section 3221(c) of the Railroad Retirement Tax Act (26 U.S.C., section 3221(c)), the Railroad Retirement Board has determined that the excise tax imposed by such section 3221(c) on every employer, with respect to having individuals in his employ, for each work-hour for which compensation is paid by such employer for services rendered to him during the quarter beginning July 1, 1987, shall be at the rate of 24 cents.

In accordance with directions in section 15(a) of the Railroad Retirement Act of 1974, the Railroad Retirement Board has determined that for the quarter beginning July 1, 1987, 28.7 percent of the taxes collected under sections 3211(b) and 3221(c) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Account and 71.3 percent of the taxes collected under such sections 3211(b) and 3221(c) plus one hundred percent of the taxes collected under section 3221(d) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Supplemental Account.

Dated: May 7, 1987.

By Authority of the Board.

**Beatrice Ezerski,**

*Secretary to the Board.*

## SECURITIES AND EXCHANGE COMMISSION

### Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

May 11, 1987.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following securities:

Tandem Computers Incorporated
Common Stock, $.025 Par Value (File No. 7–9877)

On-Line Software International, Inc.
Common Stock, $.01 Par Value (File No. 7–9878)

First Boston Income Fund, Inc.
Common Stock, $.001 Par Value (File No. 7–9879)

Navistar International Corporation
$5.00 Cumulative Convertible Preferred Stock Series G, $1.00 Par Value (File No. 7–9880)

Trinity Industries, Inc. (Delaware)
Common Stock, $1.00 Par Value (File No. 7–9881)

Utilicorp United Inc. (Delaware)
Common Stock, $1.00 Par Value (File No. 7–9882)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 2, 1987 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

**Jonathan G. Katz,**

*Secretary.*

[Release No. 34-24435; File No. SR-NYSE-87-8]

**Self-Regulatory Organizations; Proposed Rule Change by New York Stock Exchange, Inc.**

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 20, 1987, the New York Stock Exchange, Inc. (the "Exchange"), filed with the Securities and Exchange Commission (the "Commission"), the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

**I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The Exchange proposes to revise Article IX Section 5, "Disciplinary Proceedings—Penalties and Review," of its Constitution and Rule 476, "Disciplinary Proceedings" to eliminate the limitations on the amount of fines that may be imposed in connection with an Exchange disciplinary action. The Exchange is also proposing to amend Rule 476 to require that, to the extent reasonably possible, at least one member of the Panel hearing a disciplinary proceeding must be engaged in similar activities as the respondent.

**II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

*(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

*Elimination of Fine Limitations.* Constitution Article IX section 5 and Rule 476 currently set forth maximum per charge fines that may be imposed upon a finding of guilt in a disciplinary proceeding of $25,000 for a natural person and $100,000 for other than a natural person. These fine limitation amounts were last changed in 1988 when they were increased from $10,000 for members and allied members [and implicitly for member organizations] to $25,000 for members and allied members and $100,000 for member organizations. However, in 1978 the limitations were amended to apply on a per charge rather than a per disciplinary action basis, thereby increasing the potential maximum fine in multiple charge disciplinary actions.

For some time, the Exchange has been reviewing the adequacy of its disciplinary fining authority. It has been determined that the current fine structure is inadequate. First, the limitation amounts are generally too low in the context of the current securities industry environment. In particular, the elimination of the fine limitations is responsive to the rise in capitalization and the dollar amount of business conducted by member organizations, as well as the effect of inflation since the fine limitations were last revised.

Second, the current fine structure could render the Exchange unable to impose an appropriate penalty in a significant disciplinary action that does not involve a number of charges or to impose fines appropriate to the relative severity of each charge in a multiple charge disciplinary action. Elimination of the fine limitations will ensure adequate disciplinary authority for the Exchange in significant disciplinary actions while also permitting the tailoring of penalties to the relative severity of charges in an action, rather than relying on the number of charges, and the maximum fine per charge, to impose an appropriate sanction.

Finally, in addition to allowing for more appropriate treatment of violations, the Exchange believes elimination of the fine limitations would have a significant deterrent effect on prospective violators, and would encourage greater vigilance by its member organizations to prevent such violations.

*Amendment of Hearing Panel Composition Requirements.* Rule 476 currently sets forth procedures with respect to the composition of Panels hearing disciplinary actions, relating such composition to the nature of the respondent. The rule provides, in part, that if the respondent is a member, member organization, allied member, or approved person, the Hearing Panel shall be composed of members or allied members; if the respondent is an employee of a member or member organization (but not a member or allied member), the Panel shall be composed of employees of members or member organizations (but not members or allied members).

The Exchange currently attempts to include on the Hearing Panel judging the charges a person engaged in similar functions or activities as the respondent. The Exchange believes that the procedural safeguard of such representation on the Hearing Panel should be formalized in order to assure, to the extent feasible, that at least one member of the Panel would have the necessary knowledge and understanding of the activities generally engaged in by the respondent. It is therefore proposing an amendment of Rule 476 to provide that, to the extent reasonably possible, at least one of the persons serving on a Hearing Panel must be engaged in similar activities as the respondent. This new requirement would be in addition to the functional qualifications of Hearing Panel members (in relation to the nature of the respondent) currently required by Rule 476.

The proposed elimination of the fine limitations is consistent with the requirements of the Act in that it is designed to ensure, in accordance with section 6(b)(6) of the Act, that the Exchange's rules provide that its members and persons associated therewith are appropriately disciplined for violations of the Act or the rules and regulations thereunder, or the rules of the Exchange.

Furthermore, this proposed amendment to the Exchange's Constitution and rules is consistent with section 6(b)(5) of the Act in that it is designed to appropriately sanction such violations, and deter prospective violators, and thereby prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and, in general, protect investors and the public interest.

The proposed revision of the Exchange's Hearing Panel composition requirements is consistent with section 6(b)(7) of the Act in that it is designed to ensure that the Exchange's rules provide a fair procedure for the disciplining of members and persons associated with members by requiring that the Hearing Panel judging the charges against a respondent shall include, to the extent reasonably possible, at least one person engaged in similar activities as the respondent.

*(B) Self-Regulatory Organization's Statement on Burden on Competition*

The proposal does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

*(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

The Exchange did not solicit or receive written comments on the proposed rule change from members, participants, or others.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 4, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 7, 1987.

**Jonathan G. Katz,**

**Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Inc.**

May 8, 1987.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following securities:

American President Companies, Ltd.
Common Stock, $0.01 Par Value (File No. 7-9327)

Avery International Corporation
Common Stock, $1.00 Par Value (File No. 7-9328)

Dennison Manufacturing Company
Common Stock, $1.00 Par Value (File No. 7-9329)

International Multifoods Corporation
Common Stock, $0.10 Par Value (File No. 7-9330)

Temple-Inland Inc.
Common Stock, $1.00 Par Value (File No. 7-9331)

Todd Shipyards Corporation
Common Stock, $1.00 Par Value (File No. 7-9332)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 29, 1987, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

BILLING CODE 8010-01-M

[Release No. 35-24384]

**Filings Under the Public Utility Holding Company Act of 1935 ("Act")**

May 7, 1987.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by June 1, 1987 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

**Columbus and Southern Ohio Electric Company (70-7386)**

Columbus and Southern Ohio Electric Company ("C&SOE"), an electric utility subsidiary of American Electric Power Company, Inc., a registered holding company, and Simco, Inc. ("SIMCO"), a subsidiary of C&SOE, both located at 215 North Front Street, Columbia, Ohio 43215, have filed an application pursuant to sections 9(a) and 10 of the Act.

C&SOE, SIMCO and Peabody Coal Company ("Peabody") propose to enter into a Sale and Dissolution Agreement, which will terminate and dissolve: (1) A joint venture ("Joint Venture") formed in 1959 between SIMCO and Peabody; (2) C&SOE's leases of its interests in coal lands to the Joint Venture; and (3) an existing coal supply agreement between C&SOE and the Joint Venture. In addition: (1) Interests in certain of C&SOE's coal lands will be sold and assigned to Peabody; (2) the equipment

and vehicles owned and/or leased by SIMCO and used by the Joint Venture will be sold or assigned to Peabody; (3) a new coal supply agreement will be executed between SIMCO and Peabody; (4) C&SOE, SIMCO and Peabody will enter into a Beltline Agreement, under which Peabody will be granted the right to use SIMCO's conveyor beltline which extends from the coal lands to C&SOE's Conesville generating station; and (5) C&SOE will grant access rights to certain of its real property.

C&SOE and SIMCO will acquire from Peabody, as partial consideration for the transaction, a note in the principal amount of $11,196,000, bearing interest at a rate of 9% per annum, payable in 69 consecutive monthly installments of $20,482.64 each, and secured by an irrevocable standby letter of credit.

**Jersey Central Power & Light (70-7395)**

Jersey Central Power & Light Company ("JCP&L"), Madison Avenue at Punch Bowl Road, Morristown, New Jersey, 07960, a subsidiary of General Public Utilities Corporation, a registered holding company, has filed a declaration pursuant to section 12(d) of the Act and Rule 44 promulgated thereunder.

JCP&L proposes to sell to Riegel Products Corporation ("Riegel") for $4,050,000, a turbine, an electric generator, a computer, an electric substation and auxiliary equipment ("Property"), all located at Riegel's electric generating facility in Milford, New Jersey ("Milford Facility"). As of December 31, 1986, the Property had a net book value of $469,317. Riegel will use the Property to operate the Milford Facility as a cogeneration plant. JCP&L will purchase excess electricity produced by cogeneration at the Milford Facility.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

**[Release No. IC-15721; (812-6573)]**

## GMAC Mortgage Securities, Inc.; Application for Exemption

May 7, 1987.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

---

*Applicants:* GMAC Mortgage Securities, Inc. ("Applicant") on behalf of itself and certain grantor trusts to be created by Applicant ("Trust Issuers").

*Relevant 1940 Act Sections:* Order requested under section 6(c).

*Summary of Application:* Applicant seeks a conditional order of exemption from all provisions of the 1940 Act in connection with the issuance and sale of mortgage-backed securities and Equity Interests.

*Filing Date:* The application was filed on December 23, 1986, and amended on May 4, 1987.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on June 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESS:** Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicant, 3044 West Grand Boulevard, Detroit, Michigan 48202.

**FOR FURTHER INFORMATION CONTACT:** Joyce M. Pichholz, Staff Attorney, (202) 272-3046, or H.R. Hallock, Jr., Special Counsel, (202) 272-3030 (Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

### Applicant's Representations

1. Applicant, a Delaware corporation, is an indirect wholly-owned limited purpose finance subsidiary of GMAC Mortgage Corp., a Michigan corporation which is a wholly-owned indirect subsidiary of General Motors Corporation. Applicant was formed in 1986 to facilitate the financing of residential mortgages through the issuance of bonds collateralized by mortgages and mortgage-backed securities or funding agreements secured by mortgages and mortgage-backed securities.

2. Applicant also seeks relief on behalf of certain Trust Issuers which Applicant may create. All Trust Issuers will engage in activities substantially similar to activities engaged in by Applicant. The activities of such Trust Issuers will, however, be further restricted to the issuance of bonds collateralized by Federal Certificates [1] and funding agreements secured ty Federal Certificates.

3. Applicant and the Trust Issuers (together, "Issuers") will issue and sell bonds ("Bonds") in series ("Series") secured primarily by Mortgage Collateral as defined in Condition A (2) below. Each Series of Bonds will be issued pursuant to an indenture ("Indenture") between an Issuer and an independent trustee ("Bond Trustee"), as supplemented by one or more supplemental indentures. Each Series of Bonds will be sold to institutional or retail investors through one or more investment banking firms. Indentures for public offerings will be qualified under the provisions of the Trust Indenture Act of 1939. Each Series will consist of one or more classes ("Classes") which will have fixed (established at the time of issuance) or variable (adjusted periodically according to a fixed index set forth in the Indenture) interest rates.

4. The Mortgage Collateral securing each Series of Bonds will be owned either (i) by an Issuer or (ii) by limited purpose financing entities affiliated with homebuilders, thrifts, commercial banks, mortgage bankers and other entities engaged in mortgage finance and pledged to secure such Series of Bonds pursuant to funding agreements ("Funding Agreements"). Each Series of Bonds may also be secured by certain funds and accounts including proceeds accounts, debt service funds, reserve funds, servicing agreements and insurance policies and by other credit enhancement devices described in the prospectus supplement for such Series (any or all of the foregoing together with Mortgage Collateral, "Bond Collateral"). Each Issuer will assign to the Bond Trustee as security for the relevant Series of Bonds its entire right, title and interest in the Bond Collateral.

5. The Mortgage Collateral securing each Series of Bonds, together with cash available to be withdrawn from any debt service funds, reserve funds, or other funds, will have scheduled cash flow sufficient, when taken together with reinvestment income thereon at

---

[1] "Federal Certificates" are fully-modified pass-through mortgage-backed certificates ("GNMA Certificates") guaranteed by the Government National Mortgage Association ("GNMA"), guaranteed mortgage pass-through securities ("FNMA Certificates") issued by the Federal National Mortgage Association ("FNMA"), and mortgage participation certificates ("FHLMC Certificates") issued by the Federal Home Loan Mortgage Corporation ("FHLMC").

assumed reinvestment rates acceptable to each rating agency rating the Bonds, to make timely payments of principal of and interest on the Bonds in accordance with their terms. The outstanding bond value of the Bond Collateral securing a Series will be at least equal to the initial principal amount of such Series on the issue date.

6. Subject to Condition C, below, an Issuer may sell some or all of the rights it retains in and to any Bond Collateral upon issuance of a Series of Bonds or beneficial interests in any Trust Issuer (collectively, an "Equity Interest") to one or more banks, savings and loan associations, pension funds, insurance companies or other investors which customarily engage in the purchase of mortgages or mortgage collateral ("Owners") in transactions not constituting a public offering under section 4(2) of the Securities Act of 1933 ("1933 Act").

7. There will not be a conflict of interest between the holders of the Bonds ("Bondholders") and Owners as: (a) The Bond Collateral will not be speculative in nature; (b) the Bonds will be issued only if an independent nationally recognized statistical rating agency has rated such Bonds in one of the two highest rating categories; and (c) the relevant Indenture subjects the Bond Collateral, all income distributions thereon and all proceeds from a conversion, voluntary or involuntary, of any such collateral to a first priority perfected security interest in the name of the Bond Trustee on behalf of the bondholders. Further, neither the Owners nor the Bond Trustee will be able to impair the security afforded by the Mortgage Collateral because, without the consent of each affected Bondholder, neither the Owners nor the Bonds Trustee will be able to: (a) Change the stated maturity on any Bond; (b) reduce the principal or rate of interest on any Bond; (c) change the priority of repayment on any Class of any Series; (d) impair or adversely affect the Mortgage Collateral; or (e) permit the creation of a lien ranking prior to or on parity with the lien of the related Indenture with respect to the Mortgage Collateral or otherwise deprive the bondholders of the security afforded by the lien of the related Indenture.

8. The sale of Equity Interests will not alter the payment of cash flow under any Indenture, including the amounts to be deposited in the collection account or any reserve fund. Pricing efficiencies mandate that the Bond Collateral does not substantially exceed the amount of collateral required to be pledged in order to satisfy the standards of the rating agency. Thus, the excess cash flow from the Bond Collateral which is available to Owners always will be far less than the cash flow from the Bond Collateral that is used to make principal and interest payments to Bondholders. Further, except for the limited right to substitute Mortgage Collateral, it will not be possible for Owners to alter the Bond Collateral, and, in no event will such right of substitution result in a diminution in the value or quality of the Bond Collateral.

9. An election by an Issuer to be treated as a real estate mortgage investment conduit ("REMIC") will have no effect on the level of expenses that would be incurred by such Issuer. Administration fees and expenses will be paid or provided for in a manner satisfactory to the agency rating the Series and subject to Condition D below.

10. The proceeds from the sale of the Bonds will be used to facilitate the long-term financing of residential mortgage loans through the reinvestment of the proceeds in housing or housing-related assets. The relief requested is necessary and appropriate in the public interest because neither Applicant nor any Trust Issuer is the type of entity to which the provisions of the 1940 Act were intended to be applied, the safeguards afforded to bondholders fully protect investors, prospective purchasers of Equity Interests will be sophisticated in the area of mortgages and mortgage-backed assets and limited in number, and the proposed activities will promote the public interest by facilitating the financing of housing by supplying capital for reinvestment in the real estate and mortgage markets.

**Conditions to Order**

Applicant agrees that the requested order may be expressly conditioned upon the following:

*A. Conditions Relating to the Bond Collateral*

(1) Each Series will be registered under the 1933 Act, unless offered in a transaction exempt from registration pursuant to section 4(2) of the 1933 Act.

(2) The Bonds will be "mortgage related securities" within the meaning of section 3(a)(41) of the Securities Exchange Act of 1934. However, Mortgage Collateral collateralizing the Bonds issued by Applicant (and underlying Funding Agreements) will be limited to: (i) Mortgages that are first liens on single (one-to-four) family residences ("Mortgages"); (ii) mortgage certificates evidencing an undivided interest in pools of mortgages that are first liens on single (one-to-four) family residences ("Private Certificates"); and (iii) Federal Certificates (collectively with Private Certificates, "Mortgage Certificates"). The Mortgage- Collateral for Bonds issued by Trust Issuers and Funding Agreements securing Bonds issued by Trust Issuers will be limited to GNMA, FNMA, and FHLMC Certificates.

(3) If new Mortgage Collateral is substituted as security for a Series, the substitute collateral must: (i) Be of equal or better quality than the Mortgage Collateral replaced; (ii) have similar payment terms and cash flow as the Mortgage Collateral replaced; (iii) be insured or guaranteed at least to the same extent as the Mortgage Collateral replaced; and (iv) meet the criteria set forth in Conditions A(2), (4) and (6). New Mortgage Collateral may not be substituted for more than 20% of the aggregate face amount of the Mortgages initially pledged as Mortgage Collateral and new Mortgage Certificates may not be substituted for more than 40% of the aggregate face amount of the Mortgage Certificates initially pledged. New Mortgages may be substituted for Mortgages initially pledged as Mortgage Collateral only in the event of default, late payments or defect in the collateral being replaced. New Private Certificates may be substituted for Private Certificates initially pledged as Mortgage Collateral only in the event of default, late payments or defect in the collateral being replaced. In no event may any new Mortgage Collateral be substituted for any substitute Mortgage Collateral. New Funding Agreements ney be substituted for the initial Funding Agreements only if the substitution of the Mortgage Collateral securing such Funding Agreements would be permitted under this condition.

(4) All Bond Collateral will be held by the Bond Trustee or on behalf of the Bond Trustee by an independent custodian. Neither the Bond Trustee nor custodian may be an affiliate (as the term "affiliate" is defined in Rule 405 under the 1933 Act, 17 CFR 230.405 ("Rule 405")) of any Issuer. The Bond Trustee for each Series will be granted a first priority perfected security or lien interest in and to all Bond Collateral securing such Series.

(5) Each Series will be rated in one of the two highest bond rating categories ty at least one nationally recognized statistical rating organization that is not affiliated with any Issuer. The Bonds will not be "redeemable securities" within the meaning of section 2(a)(32) of the 1940 Act.

(6) The master servicer of any Mortgages (including, for purposes of

this paragraph, mortgages underlying Private Certificates) that are pledged as mortgage collateral may not be an affiliate of the Bond Trustee. If there is no master servicer, no servicer of such Mortgages may be an affiliate of the Bond Trustee. Any naster servicer and servicer of any such Mortgage will be approved by FNMA or FHLMC as an "eligible seller/servicer" of conventional, residential mortgage loans. The agreement governing the servicing of such Mortgages shall obligate the servicer to provide substantially the same services with respect to those Mortgages as it is then currently required to provide in connection with the servicing of mortgages insured by FHA, guaranteed by VA or eligible for purchase by FNMA or FHLMC.

(7) At least annually, an independent public accountant will audit the books and records of the Issuer and will report on whether the anticipated payments of principal and interest on the Bond Collateral continue to be adequate to pay the principal and interest on the Bonds in accordance with their terms. Upon completion, copies of the auditor's report(s) will be provided to the Bond Trustee.

*B. Conditions Relating to Variable-rate Bonds*

(1) Each Series of adjustable or floating interest rate Bonds will have a set maximum interest rate.

(2) At the time of deposit of the Bond Collateral and during the life of the Bonds, the scheduled payments of principal and interest to be received by the Bond Trustee on all Mortgage Collateral plus reinvestment income thereon, and funds, if any, pledged to secure the Bonds (as described in the Application) will be sufficient to make all payments of principal and interest on the Bonds then outstanding, assuming the maximum interest rate on each Series of adjustable or floating interest rate Bonds. Such Bond Collateral will be paid down as the mortgages constituting or underlying the Mortgage Collateral are repaid, but will not be released from the lien of the Indenture prior to the payment of the Bonds.

*C. Conditions Relating to the Sale of Equity Interests*

(1) Issuers will only sell Equity Interests with respect to Series of Bonds collaterlized by Mortgage Collateral consisting of Federal Certificates or Funding Agreements secured by Federal Certificates. Trust Issuers will sell Equity Interests only after issuing all Series of Bonds to be issued by such Trust Issuers.

(2) Any Equity Interest will be offered and sold only to (i) institutions or (ii) non-institutions which are "accredited investors" as defined in Rule 501(a) of the 1933 Act ("Owners"). Institutional investors will have such knowledge and experience in financial and business matters as to be able to evaluate the risks of purchasing Equity Interests and understand the volatility of interest rate fluctuations as they affect the value of mortgages, mortgage-related securities and residual interests therein. Non-institutional accredited investors will be limited to not more than 15 with respect to any Trust Issuer or Series of Bonds, will purchase at least $200,000 of such Equity Interests and will have a net worth at the time of purchase that exceeds $1,000,000 (exclusive of their primary residence). Further, non-institutional accredited investors will have such knowledge and experience in financial and business matters, specifically in the field of mortgage-related securities, as to be able to evaluate the risk of purchasing an Equity Interest and will have direct, personal and significant experience in making investments in mortgage-related securities and because of such knowledge and experience, will be able to understand the volatility of interest rate fluctuations as they affect the value or mortgage-related securities and residual interests therein. Owners will be limited to mortgage lenders, thrift institutions, commercial and investment banks, savings and loan associations, pension funds, employee benefit plans, insurance companies, mutual funds, real estate investment trusts or other institutional or non-institutional investors as described above which customarily engage in the purchase of mortgages and mortgage-related securities.

(3) Each sale of an Equity Interest will qualify as a transaction not involving any public offering within the meaning of section 4(2) of the 1933 Act.

(4) Each sale of an Equity Interest will prohibit the transfer of such Equity Interest if there would be more than 100 beneficial Owners of Equity Interests in any Trust Issuer or with respect to any Series of Bonds at any time.

(5) Each sale of an Equity Interest will require each purchaser thereof to represent that it is purchasing for investment and not for distribution and that it will hold such Equity Interest in its own name and not as nominee for undisclosed investors.

(6) Each sale of an Equity Interest will provide that (i) no Owner of such Equity Interest may be affiliated with the Bond Trustee for the relevant Issuer and (ii) no holders of a controlling (as that term is defined in Rule 405) Equity Interest in any Issuer may be affiliated with either the custodian of the Bond Collateral or the agency rating the Bonds of the relevant series.

(7) If the sale of the Equity Interests results in the transfer of control (as the term "Control" is defined in Rule 405) of any Issuer from the original owners of Applicant or auy Trust Issuer, the relief afforded by any Commission order granted on the application would not apply to subsequent Bond offerings by that Issuer.

*D. Condition Relating to REMICs*

An election to treat a Trust Issuer or one or more Series of Bonds as a REMIC will have no effect on the level of the expenses that would be incurred by any Issuer or Owner. In the event of any REMIC election, provision will be made for the payment of admininstrative fees and expenses as set forth in the application. Each Issuer will ensure that the anticipated level of fees and expenses will be adequately provided for regardless of the method selected.

*E. Special Condition*

Applicant undertakes to secure from each Trust Issuer its consent to comply with all of the applicable representations and conditions set forth above and more apecifically described in the application.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonthan G. Katz,

*Secretary.*

[Release No. IC-15723; 812-6607]

## Sumitomo Bank Capital Markets, Inc.; Application for Order Permitting Foreign Bank Subsidiary To Issue United States or Foreign Currency Denominated Debt Securities

May 8, 1987.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

---

*Applicant:* Sumitomo Bank Capital Markets, Inc.

*Relevant 1940 Act Sections:* Exemption requested under section 6(c) from all provisions.

*Summary of the Application:* Applicant seeks an order permitting it to issue and sell in the United States and in

the Euromarkets its debt securities denominated in United States dollars and foreign currency.

*Filing Dates:* The application was filed on January 29, 1987, and amended on April 24, May 1, and May 8, 1987.

*Hearing or Notification of Hearing.* If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on June 2, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESSES:** Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, c/o John L. Carr, Jr., Esq., Shaw, Pittman, Potts & Trowbridge, 2300 N Street NW., Washington, DC 20037.

**FOR FURTHER INFORMATION CONTACT:** Victor R. Siclari, Staff Attorney (202) 272–3037 or Brion R. Thompson, Special Counsel (202) 272–3016 (Division of Investment Management).

**SUPPLEMENTARY INFORMATION:** Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

**Applicant's Representations**

1. Applicant, organized under the laws of the State of Delaware on December 4, 1986, is a wholly-owned subsidiary of The Sumitomo Bank, Limited ("Sumitomo"). Sumitomo undertakes to own all the capital stock of Applicant in the future. As of December 31, 1986, Applicant's total assets were $500 million with paid up capital and surplus of $500 million. Applicant holds Sumitomo's 12.5% limited partnership interest in the investment banking firm of Goldman, Sachs & Co. ("Goldman Sachs"), which is funded entirely by Sumitomo's equity in Applicant and is subject to specific conditions adopted by the Board of Governors of the Federal Reserve System ("FRB").

2. Sumitomo, ranked as the third largest bank in Japan in terms of deposits as of March 31, 1986, is presently engaged in the conduct of commercial banking business through a large number of banking offices in Japan and 29 other countries. Sumitomo also engages in banking activities in the United States through its branches in New York, Chicago and Seattle, and its banking subsidiaries based in San Francisco and Honolulu.

3. Sumitomo is extensively regulated under Japanese banking laws and regulations. Sumitomo is subject to examination, reporting requirements regarding its financial and business conditions, and supervision by the Japanese Ministry of Finance, as well as detailed examinations by The Bank of Japan, Japan's central bank. Applicant, being a wholly-owned subsidiary of Sumitomo, is also subject to oversight by Japanese regulatory authorities.

4. Sumitomo is a bank holding company by virtue of ownership of its California subsidiary bank and, thus, is subject to FRB regulation under the Bank Holding Company Act of 1956 ("BHCA"). In addition, the International Banking Act of 1978 subjects Sumitomo and its United States branches and agencies to federal examination, supervision, reporting, and regulatory requirements, including requirements to maintain reserves with the Federal Reserve System. Sumitomo's activities through its United States state-licensed offices are also subject to extensive regulation and examination under the laws of the states in which they are located. Sumitomo's New York branch (the "New York Branch") is subject to extensive regulation by the FRB and the New York State Banking Department, including reserve and reporting requirements and a pledge of assets to cover a fixed percentage of liabilities.

5. Applicant's activities also are subject to FRB regulation, supervision and examination under the BHCA because it is a nonbanking subsidiary of Sumitomo. As such, the Applicant is authorized to engage solely in those activities for which Sumitomo has obtained approval from the FRB under section 4(c)(8) of the BHCA or for which an exemption from the nonbanking prohibitions of section 4 of the BHCA is otherwise available. Sumitomo has obtained FRB approval to engage through Applicant in the following activities: (i) Making, acquiring, or servicing loans or other extensions of credit such as would be made by a commercial finance company, and (ii) leasing personal real property where such transactions are the functional equivalent of a loan. In addition, the FRB has determined that Applicant's investment in Goldman Sachs is consistent with section 4 of the BHCA. Applicant further represents that its proposed issuance of debt securities to fund its activities is permissible under the BHCA without prior FRB approval. Applicant will not engage, either directly or indirectly, in any activities that are impermissible under the BHCA.

6. Applicant intends to use the bulk of the proceeds from the sale of its debt securities to engage in commercial lending (on a secured and unsecured basis) and leasing transactions with unrelated parties. The balance of such proceeds, if any, may be deposited with or advanced to Sumitomo and its affiliates, but such proceeds shall not be advanced to or deposited with any affiliate of Sumitomo (i) which is engaged primarily in investing in securities, other than securities received in commercial lending transactions, trust company activities or other activities closely related to banking or otherwise permissible under the BHCA, and (ii) which is neither a banking affiliate nor a company in which Sumitomo's investment is subject to specific conditions adopted by the FRB.

7. Applicant proposes to issue and sell in the United States from time to time public and private offerings of its (i) unsecured prime quality commercial paper debt obligations with maturities of 270 days or less, (ii) medium term unsecured debt obligations with maturities ranging from 271 days to five years and (iii) long term unsecured debt obligations with maturities greater than five years (collectively, the "Debt Securities").

8. Applicant undertakes to ensure that the Debt Securities will be offered in the United States only pursuant to the registration requirements under the Securities Act of 1933 ("1933 Act"), or pursuant to an exemption from the registration requirements thereunder. In cases where Applicant intends to rely on an exemption from registration under the 1933 Act, Applicant undertakes that it will not issue or sell the Debt Securities until (i) it has received an opinion of United States legal counsel that the Debt Securities would be entitled to an exemption under the 1933 Act or (ii) the staff of the SEC shall have stated in writing that it will not recommend enforcement action to the SEC under the circumstances of the proposed offering. Applicant does not request SEC review or approval of this opinion.

9. Payment of the principal, interest, and premiums, if any, on Applicant's Debt Securities will be unconditionally guaranteed by the New York Branch or by Sumitomo ("Guarantee"). Applicant undertakes that it will not offer any Debt Securities to be unconditionally guaranteed by any Guarantee of the New York Branch unless it shall have

received an opinion of its United States and Japanese legal counsel to the effect that (i) the obligation of the New York Branch pursuant to the Guarantee constitutes the legal, valid and binding obligation of Sumitomo enforceable directly against Sumitomo in accordance with its terms and (ii) in the event of default by Applicant in the payment of principal, interest, or premiums, if any, on the Debt Securities, the holders of those Debt Securities will be able to institute legal proceedings to enforce the applicable Guarantee directly against Sumitomo without first proceeding against Applicant or the New York Branch. Applicant does not request SEC review or approval of this opinion.

10. The Debt Securities will be issued and sold in the United States in minimum denominations of $100,000, or the equivalent thereof at exchange rates prevailing as of a recent date at the time such securities are issued, with respect to Debt Securities denominated in foreign currency. The Debt Securities will be issued and sold through one or more dealers in the United States which will reoffer the Debt Securities as principal to institutional and other sophisticated investors in the United States. The Debt Securities will be direct liabilities of Applicant and (i) will rank *pari passu* among themselves, (ii) will rank equally with all other unsecured indebtedness of Applicant, and (iii) will be superior to the rights of shareholders. Any Guarantees issued by the New York Branch or by Sumitomo in support of Applicant's Debt Securities will rank (i) *pari passu* among themselves, (ii) equally with all other unsecured indebtedness of the New York Branch or of Sumitomo (except to the extent such indebtedness is preferred by operation of law), including deposit liabilities, and (iii) superior to the rights of shareholders of Sumitomo.

11. Applicant represents that any proposed issue of the Debt Securities will have received prior to issuance one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization and that United States counsel shall have certified that such rating has been received. However, such a rating may not be obtained with respect to any such issue if in the opinion of United States counsel an exemption from registration is available under section 4(2) of the 1933 Act or Regulation D thereunder, such counsel having taken into account for the purpose thereof the doctrine of "integration"referred to in Rule 502 under the 1933 Act and various releases and relevant no-action letter made public by the SEC.

12. Applicant undertakes to ensure that the dealer will provide each offeree, prior to purchase of the Debt Securities, a memorandum describing the business of Applicant, the New York Branch (if the New York Branch issues a Guarantee) and Sumitomo, and containing Applicant's and Sumitomo's most recent publicly available audited year-end financial statements. Sumitomo's financial statements shall have been audited in accordance with Japanese accounting principles, and the memorandum will describe material differences, if any, between the accounting principles applied in the preparation of such financial statements and "generally accepted accounting principles" as employed by banks in the United States. The memorandum and financial statements will be at least as comprehensive as those customarily used by United States bank holding companies in offering debt securities in the United States and will be updated promptly to reflect material changes in the financial condition of Applicant or Sumitomo. Applicant undertakes, that in the event of an offering in the United States of its Debt Securities denominated in currency other than Unites States dollars, Applicant will set forth in the prospectus or memorandum relating to such offering (i) the rate of exchange between the currency in which the securities are denominated and United States dollars as of a recent date, and (ii) appropriate disclosure of the risks to investors regarding the potential for exchange rate fluctuations.

13. The Applicant and Sumitomo undertake to appoint a bank trust company or other financial institution in the United States to act as issuing and paying agent for the Debt Securities issued in the United States. In addition, Applicant and Sumitomo undertake to appoint an agent located in the City of New York to accept service of process in any action arising out of the sale of the Debt Securities. Applicant and Sumitomo undertake to consent to jurisdiction of any State or Federal court located in the City and State of New York in respect of any such action. Applicant and Sumitomo undertake that the appointment of an authorized agent to accept service of process and such consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the Debt Securities have been paid. Applicant and Sumitomo will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Debt Securities or otherwise in connection with the Debt Securities. Neither the issuing or paying agent, nor the agent for service of process, will be a trustee for the holders of the Debt Securities; nor will they have any responsibilities or duties to act for such holders as would a trustee.

14. Applicant also plans, from time to time, to make public offerings outside the United States of United States dollar or foreign currency-denominated short term, medium term and long term debt obligations (collectively, the "Foreign Debt Securities"). Payment of the principal, interest, and premiums, if any, on the Foreign Debt Securities will be unconditionally guaranteed by a non-U.S. office of Sumitomo.

15. Applicant undertakes that any offering of the Foreign Debt Securities will be made solely overseas and will use measures reasonably designed to preclude distribution and redistribution of the Foreign Debt Securities within the United States or to United States citizens or residents or entities organized or having their principal place of business in the United States (collectively, "United States Investors") as contemplated in Securities Act Rel. No. 33-4708 (July 9, 1964). Applicant undertakes that the Foreign Debt Securities will contain appropriate "lock up" provisions, such as a mechanism by which each issue of securities is represented by a single temporary global security until at least 90 days after the completion of the distribution at which time definitive securities may be obtained by persons entitled thereto upon certification that they are not United States Investors. The Foreign Debt Securities will not be registered under the 1933 Act.

16. The requested exemption is consistent with the protection of investors and purposes of the 1940 Act and is appropriate in the public interest. The types of abusive practices which led to adoption of the 1940 Act are not applicable to Applicant because they are either precluded by the regulations to which it is subject under BHCA or not possible in the context of its business. Applicant further asserts that, as a commercial lending subsidiary of a bank holding company, it is not the type of entity intended to be regulated by the 1940 Act.

**Applicant's Condition**

1. Applicant consents to the order sought herein being expressly conditioned upon its compliance with the undertakings summarized above and more fully set forth in the applications.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

*Secretary.*

## SMALL BUSINESS ADMINISTRATION

[License No. 09/09-0237]

### Crocker Ventures, Inc.; Surrender of License

Notice is hereby given that Crocker Ventures, Inc., 420 Montgomery Street, San Francisco, California 94163 has surrendered its License to operate as a small business investment company under the Small Business Investment Act of 1958, as amended (the Act). Crocker Ventures, Inc. was licensed by the Small Business Administration on December 1, 1978.

Under the authority vested by the Act and pursuant to the Regulations promulgated thereunder, the surrender was accepted on April 22, 1987, and accordingly, all rights, privileges, and franchises derived therefrom have been terminated.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: May 7, 1987.

Robert G. Lineberry,

*Deputy Associate Administrator for Investment.*

BILLING CODE 8025-01-M

### Maximum Annual Cost of Money to Small Business Concerns

13 CFR 107.302 (a) and (b) limit maximum annual Cost of Money (as defined in 13 CFR 107.3) that may be imposed upon a Small Concern in connection with Financing by means of Loans or through the purchase of Debt Securities. The cited regulation incorporates the term "Debenture Rate", which is defined elsewhere in 13 CFR 107.3 in terms that require SBA to publish, from time to time, the rate charged on ten-year debentures sold by Licensees to the public. Notice of this rate will be published upon change in the Debenture Rate.

Accordingly, Licensees are hereby notified that effective the date of publication of this Notice, and until further notice, the Debenture Rate to be used for computation of maximum cost of money pursuant to 13 CFR 107.302 (a) and (b) is 8.950% per annum.

13 CFR 107.302 does not supersede or preempt any applicable law imposing an interest ceiling lower than the ceiling imposed by its own terms. Attention is directed to section 308(i) of the Small Business Investment Act, as amended by section 524 of Pub. L. 96-221, March 31, 1980 (94 Stat. 161), to that law's Federal override of State usury ceilings, and to its forfeiture and penalty provisions.

Dated: May 6, 1987.

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

[CGD 87-027]

### Equipment, Construction, and Materials; Termination of Approval Notice

**AGENCY:** Coast Guard, DOT.

**ACTION:** Termination of Approval Notice.

**SUMMARY:** This notice contains a listing of Coast Guard approvals terminated between 1 September 1985 and 31 March 1987, as well as approvals terminated prior to 1 September 1985 which have not been published previously. These terminated approvals were for safety equipment and materials required by regulation to be used on certain merchant vessels and recreational

boats, and also in Outer Continental Shelf activities. This listing updates the information published in the 1 September 1985 edition of the Coast Guard publication "Equipment Lists."

**FOR FURTHER INFORMATION CONTACT:** Ms. Valarie Williams, Office of Marine Safety, Security, and Environmental Protection (G–MVI–3), U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC 20593–0001, (202) 267–1444. Normal office hours are between 7 a.m. and 3:30 p.m., Monday through Friday, except holidays.

**ADDRESS:** The current edition of "Equipment Lists" (U.S. Coast Guard publication COMDTINST M16714.3B), is available for sale through the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, DC 20402. The price is $8.00 per copy including mailing within the United States. Foreign mailing is available for an additional 25% ($10.00 total cost). The GPO order number is 050–012–00232–1, and orders may also be placed by calling the GPO Order Desk at (202) 783–3238. Visa and Mastercard are accepted for orders placed by mail or by telephone.

**SUPPLEMENTARY INFORMATION:** Certain regulations in Titles 33 and 46 of the Code of Federal Regulations require that various items of lifesaving, firefighting, pollution prevention, and other safety equipment and materials used on board merchant vessels and recreational boats, and in Outer Continental Shelf activities be approved by the Commandant, U.S. Coast Guard. The Coast Guard publishes a manual titled "Equipment Lists" dated 1 September 1985, which lists equipment currently approved, and also equipment previously approved which can continue to be used on ships and boats as long as it is in good and serviceable condition. "Equipment Lists" is available for sale from the Government Printing Office, as indicated in the **ADDRESSES** section of this notice.

This document updates the 1 September 1985 "Equipment Lists" by listing certain approvals terminated during the period from 1 September 1985 to 31 March 1987. This document also corrects the 1 September 1985 "Equipment Lists" by listing certain approvals terminated prior to 1 September 1985 which were inadvertently omitted from that document. The termination actions were taken under the procedures in 46 CFR 2.75–1 to 2.75–50.

The statutory authority for regulations governing this equipment is in sections 3306(a), 4102, and 4302(a)(2) of Title 46, United States Code, section 1333 of Title 43, United States Code, and section 198 of Title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)).

Most of the items in this list were terminated because they are no longer produced. Unless otherwise stated in the list, terminated items may continue to be used on vessels as long as the equipment is in good and serviceable condition.

The following approvals have been terminated:

**Gas Mask**

160.011/47/0 dated 2 April 1981, expired 2 April 1986. Ammonia Gas Mask, approval held by Mine Safety Appliances Co., 201 North Braddock Ave., Pittsburgh, PA 15208.

160.011/48/0 dated 2 April 1981, expired 2 April 1986. MSA Gas Mask Type N, approval held by Mine Safety Appliances Co., 201 North Braddock Ave., Pittsburgh, PA 15208.

**Self-Contained Breathing Apparatus**

160.011/50/0 dated 22 October 1980, expired 22 October 1985. Scott Rescue Pak P/N 900050, approval held by Scott Aviation Division of A–T–O, Inc., 225 Erie St., Lancaster, NY 14086.

**Flame Safety Lamp**

## Federal Railroad Administration

### Petitions for Exemption or Waiver; Corinth and Counce Railroad et al.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that nine railroads have petitioned the Federal Railroad Administration (FRA) for a waiver of compliance with certain provisions of the Hours of Service Act.

Sections 2 and 3a of the Hours of Service Act make it unlawful for a railroad to require or permit (i) employees engaged in or connected with the movement of a train and (ii) employees engaged in installing, repairing, or maintaining signal systems to remain on duty for a period in excess of 12 hours (45 U.S.C. 62, 63a). Section 3 of the Hours of Service Act, which governs operators and dispatchers, establishes a maximum of (i) 9 hours duty in an office employing two or more shifts and (ii) 12 hours duty in an office employing one shift (45 U.S.C. 63). However, the Hours of Service Act contains a provision that permits a railroad which employs not more than 15 employees who are subject to the statute to seek an exemption from the limitations imposed by the statute. 45 U.S.C. 64a(e).

**Corinth and Counce Railroad (C&C)**

*FRA Waiver Petition Docket No. HS–86–30*

The C&C seeks this exemption so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The C&C provides service over 16 miles of track extending from Corinth, Mississippi, to Counce, Tennessee.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Caroline Rail Service, Inc. (CRS)**

*FRA Waiver Petition Docket No. HS–86–31*

The CRS seeks this exemption so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The CRS provides service over three miles of track at Morehead City, North Carolina.

The CRS states that it is not their intention to employ a train crew over 12 hours per day under normal operating conditions, but that this exemption, if granted, would help their operation if they encountered unusual operating conditions or circumstances.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Chicago and Western Indiana Railroad Company (C&WI)**

*FRA Waiver Petition Docket No. HS–86–32*

The C&WI seeks this exemption so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The C&WI provides trackage over which various carriers operate in order to interchange freight cars with other carriers in the Chicago Terminal area.

The C&WI does not employ any train or locomotive crews; however, it does employ 12 persons (4 train dispatchers, 6 towermen and 2 signalmen) covered by the Hours of Service Act. The C&WI states that it does not expect the consistent need to work these employees in excess of the present restrictions, but primarily only because of after-hours failures and unanticipated sickness.

The petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Wisconsin and Calumet Railroad (W&C)**

*FRA Waiver Petition Docket No. HS–86–33*

The W&C seeks a continuation of a previously issued exemption so that it

can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The W&C provides service on over 94 miles of track extending from Freeport, Illinois, to Madison, Wisconsin and from Jamesville, Wisconsin, to Monroe, Wisconsin.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Dakota Rail (DR)**

*FRA Waiver Petition Docket No. HS–86–34*

The DR seeks this exemption so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The DR provides service over 82 miles of track in the States of South Dakota and Minnesota.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Maryland and Delaware Railroad (M&D)**

*FRA Waiver Petition Docket No. HS–87–1*

The M&D seeks a continuation of a previously issued exemption so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The M&D provides service over 119 miles of trackage on the Delmarva Peninsula, which is located on the eastern shore of States of Delaware, Maryland and Virginia.

The petition indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Winchester and Western Railroad (W&W)**

*FRA Waiver Petition Docket No. HS–87–2*

The W&W seeks a continuation of a previously issued exemption for its Virginia Division and seeks an exemption for its New Jersey Division so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The W&W provides service on over 16 miles of track in the State of Virginia and over 46 miles of track in the State of New Jersey.

The W&W states that this exemption, if granted, would help their operation if they encountered unusual operating conditions or circumstances.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Hilledale Country Railway Company (HCRC)**

*FRA Waiver Petition Docket No. HS–87–3*

The HCRC seeks this exemption so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The HCRC provides service over 84 miles of track extending from Hilledale, Michigan, to Montpelier, Ohio.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

**Texas North Western Railway (TNW)**

*FRA Waiver Petition Docket No. HS–87–4*

The TNW seeks this exemption so that it can permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The TNW provides service over 71 miles of track extending form Etter Junction to Bernstein, Texas, from Sheerin Junction to Sheerin, Texas, and from More Junction to Pringle, Texas.

The petitioner indicates that granting the exemption will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in these proceedings submitting written views and comments. FRA has not scheduled a hearing or other opportunity for oral comment since the facts do not appear to warrant it. Communications concerning the proceedings should identify the docket number and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Communications received before June 29, 1987, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments, during regular business hours (9 a.m.–5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC, on May 8, 1987.

J.W. Walsh,

*Associate Administration for Safety.*

## National Highway Traffic Safety Administration

**[Docket No. IP 87–05]**

## BMW of North America; Receipt of Petition for Determination of Inconsequential Noncompliance

BMW of North America, Inc., BMW Plaza, Montvale, New Jersey, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et sec.), for an apparent noncompliance with 49 CFR 571.108, Federal Motor Vehicle Safety Standard (FMVSS) No. 108, *Lamps, Reflective Devices, and Associated Equipment*, on the basis that it is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Paragraphs S4.1.1.36(f)(4)(ii) and S4.1.1.36(c) of Federal Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*, require that the lens of each upper beam headlamp be permanently marked with the letter "U" and the lens of each replaceable bulb headlamp using HB3 or HB4 light sources, or HB1 light sources in conjunction with HB3 or HB4 light sources within a headlamp system on a motor vehicle, permanently display the Type Designation(s) for that standardized replaceable light source on the lens in front of each light source. BMW of North America manufactured 1,400 735i passenger cars from January 10, 1987 to February 17, 1987, that do not comply with the above paragraphs. The lens of each upper beam headlamp was not permanently marked "U" and "HB3" as required by FMVSS No. 108.

BMW considers these noncompliances to be inconsequential as they relate to motor vehicle safety, because:

1. Mechanics will always be able to determine and obtain the correct replaceable bulbs and headlamps, and will install them correctly.

2. BMW replaceable bulb headlamps are vehicle-specific and left/right-specific. These provisions make incorrect positioning of the upper and lower beam headlamps physically impossible.

3. The HB3 bulbs only fit HB3 connectors and only HB3 bulbs fit into BMW upper beam headlamps. Also, the wires to the upper beam bulb are too short to reach the lower beam headlamp.

4. In view of low importation and lamp production, reduced by vehicle-specificity and left/right specificity, the small number of headlamps involved is likely to keep the BMW headlamp proprietary. BMW believes there will be no confusion regarding headlamp or bulb availability, identification or installation position.

5. FMVSS No. 108 does not require lenses or replaceable bulb headlamps using only HB1 bulbs to be so marked. BMW believes the BMW upper beam headlamps and their HB3 bulbs will be as easy to use as the HB1 bulbs and headlamps.

Interested persons are invited to submit written data, views and arguments on the petition of BMW of North America, Inc. described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, the Notice will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: June 15, 1987.

(Sec.102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on: May 8, 1987.

Barry Felrice,

*Associate Administrator for Rulemaking.*

[FR Doc. 87-10999 Filed 5-13-87; 8:45 am]

BILLING CODE 4910-59-M

## Establishment of the Motor Vehicle Research Advisory Committee

Notice is hereby given of the establishment of the Motor Vehicle Safety Research Advisory Committee. The purpose of the Committee is to provide a forum for the development, consideration and communication of motor vehicle safety research except: (1) Those projects which were part of the Coordinated Research Program and the subject of the settlement agreement in *Claybrook v. National Highway Traffic Safety Administration*, including (i) Side impact test procedure development; (ii) steering assembly test procedure development; and (iii) biomechanics research performed by Task Force 3; and (2) any matter that is specifically the subject of an open rulemaking. The Committee will provide information, advice and recommendations to the Administrator, National Highway Traffic Safety Administration (NHTSA) on matters relating to motor vehicle safety research with the exception of those noted above.

The formation and use of the Committee is determined to be in the public interest in connection with the performance of duties imposed on NHTSA by law.

The Charter of the Committee is set forth below:

### Charter: Motor Vehicle Safety Research Advisory Committee

*I. Purpose*

This Charter establishes the Motor Vehicle Safety Research Advisory Committee (MVSRAC) and provides for its operation in accordance with the Federal Advisory Committee Act, 5 U.S.C. App. 2 (the FACA), Federal regulation 49 CFR Part 95 and Department of Transportation Order 11120.3A.

*II. Sponsor And Office Providing Support Services*

The National Highway Traffic Safety Administration (NHTSA) will be the MVSRAC sponsor. Support services will be provided by the Office of the Associate Administrator for Research and Development and by the Executive Secretariat, NHTSA.

*III. Scope*

(a) The MVSRAC provides information, advice and recommendations to the Administration on matters relating to motor vehicle safety research, except: (1) Those projects which were part of the Coordinated Research Program and the subject of the settlement agreement in *Claybrook v. National Highway Traffic Safety Administration*, including: (i) Side impact test procedure development; (ii) steering assembly test procedure development; and (iii) biomechanics research performed by Task Force 3; and (2) any matter that is specifically the subject of an open rulemaking proceeding.

(b) The MVSRAC provides a forum for the development, consideration and communication of motor vehicle safety research, except in the areas specifically included in III(a), from a knowledgeable, independent perspective.

(c) The MVSRAC does not exercise program management responsibility or make decisions directly affecting the programs on which it provides advice.

*IV. Objectives and Duties*

Consistent with the scope of the activities described in paragraph III, the MVSRAC is authorized to:

(a) Review the current and planned motor vehicle safety research projects of the organizations represented by the members;

(b) Recommend research approaches and indicate the most efficient means to pursue such approaches;

(c) Review the progress of any research conducted pursuant to its recommendations; and

(d) Reort to the Administrator, NHTSA, on such vehicle safety research topics as the Administrator requests or the MVSRAC deems appropriate.

*V. Membership*

(a) In general: (1) the MVSRAC shall be composed of fifteen members, two non-voting members from the Department of Transportation and thirteen voting members from outside the Federal Government. Each member shall be appointed by the Secretary of Transportation after consultation with public and private organizations that have an established expertise in vehicle safety research. These organizations will recommend for membership those individuals who best represent their concerns. (2) Appointment shall be for a three year term, except that for the initial appointment of members, one-third shall be appointed for a one year term, one-third shall be appointed for a two year term, and one-third shall be appointed for a full three year term. A member may be reappointed at the expiration of his or her term and may continue to serve pending reappointment or until a successor is named. (3) A member may designate an alternate, representing the same interest as the member, to attend MVSRAC meetings and activities. The designation must be in writing and with the approval

of the MVSRAC Chairperson. (4) The membership wil be fairly balanced in terms of the points of view represented.

(b) Voting members: (1) Voting members shall be appointed by the Secretary from the public and private organizations that have an established expertise in vehicle safety research. (2) A voting member serves in a representative capacity and is not considered a "Special Government Employee" as defined in 18 U.S.C. § 202.

(c) Non-voting members: When a non-voting member speaks for or represents the Department, the non-voting member shall obtain coordination, review and approval from appropriate officials to ensure that such representation accurately reflects the position of the Department.

*VI. Officers*

The Chairperson and each Subcommittee chair shall be appointed by the Administrator, NHTSA. The Chairperson shall designate the Secretary for the MVSRAC and the Secretary of each subcommittee established.

*VII. Committee Structure*

The Chairperson may establish continuing subcommittees, short-term subcommittees and/or task forces as deemed necessary.

*VIII. Meeting*

(a) The MVSRAC and each subcommittee or task force shall meet not less than once a year, at the call of the MVSRAC Chairperson. Agendas will be reviewed and approved by the MVSRAC Chairperson.

(b) Each committee and subcommittee meetings shall be open to the public. A notice of each meeting shall be published in the **Federal Register** at least fifteen days in advance of the meeting. Shorter notice is permissible in cases of emergency, but the reason for the emergency must be reported in the notice.

(c) Detailed minutes of each meeting shall be kept and their accuracy certified to by the MVSRAC Chairperson. The minutes shall include the time and place of the meeting, a record of the persons present, a complete summary of matters discussed and conclusions reached and copies of all reports received, issued or approved by the committee or subcommittee.

*IX. Compensation for Non-Government Members*

Non-government members serve without compensation and will not be reimbursed for expenses.

*X. Estimated Annual Cost to the Government*

The Government does not expect to incur additional costs as a result of the Committee. Travel costs for each member will be borne by the organizations represented. However, the time of government members, their travel costs and other miscellaneous costs are listed below: Travel: $2,500; Salaries: $3,500 to $6,500; Misc.: $1,000; Staff Years: 1/5.

The total estimated annual cost is $7,000 to $10,000. No government staff positions are being allocated to the Committee on a full time basis.

*XI. Public Interest*

The formation and use of the MVSRAC is determined to be in the public interest in connection with the performance of duties imposed on NHTSA by law.

*XII. Effective Date*

This charter is effective 15 days after publication in the **Federal Register**, and terminates two years after this date unless, prior to that time, it is extended in accordance with the FACA and other applicable requirements.

Additional information may be obtained from the NHTSA Executive Secretariat, Room 5221, 400 Seventh Street SW., Washington, DC 20590, telephone 202–366–2870.

Sharon Goldstein,

*Director, Executive Secretariat.*

FEDERAL COMMUNICATIONS COMMISSION

FCC To Hold Open Commission Meeting Thursday May 14, 1987

May 7, 1987.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, May 14, 1987, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, NW., Washington, DC.

*Agenda, Item No., and Subject*

General—1—Title: In the Matter of Petition for Reconsideration of *Second Report and Order* in "Underbrush" Proceeding (MM Docket 83-842). Summary: The Commission will consider whether to adopt a Memorandum Opinion and Order on Reconsideration of the *Second Report and Order* in this proceeding adopted on March 13, 1986.

Common Carrier—1—Title: In the Matter of Regulation of Small Telephone Companies, CC Docket No. 86-467. Summary: The Commission will consider adoption of a Report and Order concerning tariff filing requirements that apply to small telephone companies.

Common Carrier—2—Title: Amendment of Part I of the Commission's Rules to Revise Certain Hearing Procedures for Selection of Common Carrier Licensees. Summary: The Commission will consider revising its hearing procedures for common carrier applicants selected by lottery.

Mass Media—1—Title: Amendment of Parts 15 and 76 Relating to Terminal Devices Connected to Cable Television Systems. Summary: The Commission will consider a Report and Order concerning technical standards applicable to converters, decoders and other terminal devices intended for connection to cable systems.

Mass Media—2—Title: Notice of Inquiry to Reexamine the Commission's Cross-Interest Policy. Summary: The Commission will consider whether to issue a Notice of Inquiry concerning the Cross-Interest Policy.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Sarah Lawrence, FCC Office of Congressional and Public Affairs. Telephone number (202) 632-5050.

Issued: May 7, 1987.
Federal Communications Commission.
William J. Tricarico,
*Secretary.*

FEDERAL ELECTION COMMISSION

**PREVIOUSLY ANNOUNCED DATE AND TIME:** Thursday, May 14, 1987, 10:00 a.m.

**CHANGE IN MEETING:** The open meeting scheduled for this date was cancelled.

* * * * *

**DATE AND TIME:** Tuesday, May 19, 1987, 10:00 a.m.

**PLACE:** 999 E Street, NW., Washington, DC.

**STATUS:** This meeting will be closed to the public.

**ITEMS TO BE DISCUSSED:**

Compliance matters pursuant to 2 U.S.C. 437g.
Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration.
Internal personnel rules and procedures or matters affecting a particular employee.

* * * * *

**DATE AND TIME:** Thursday, May 21, 1987, 10:00 a.m.

**PLACE:** 999 E Street, NW., Washington, DC.

**STATUS:** This meeting will be open to the public.

**MATTERS TO BE CONSIDERED:**

Setting of Dates for Future Meetings.
Correction and Approval of Minutes.
Eligibility Report for Candidates to Receive Presidential Primary Matching Funds.
Public Financing of Presidential Candidates: Explanation and Justification of Final Rules.
Routine Administrative Matters.

**PERSON TO CONTACT FOR INFORMATION:** Mr. Fred Eiland, Information Officer, Telephone: 202-376-3155.

Marjorie W. Emmons,
*Secretary of the Commission.*

BILLING CODE 6730-01-M

**STATE JUSTICE INSTITUTE**

**TIME AND DATE:**

9:00 to 5:00, May 21, 1987
9:00 to 5:00, May 22, 1987

**PLACE:** State Justice Institute, 120 South Fairfax Street, Alexandria, Virginia 22314.

**STATUS:** The meeting will be closed from 9:00 a.m. until 11:00 a.m. both days to discuss matters exempted from public discussion, pursuant to 5 U.S.C. 552b(c).

**MATTERS TO BE CONSIDERED:**

Portions Open to the Public

Consideration of concept papers submitted for Institute funding.

Portions Closed to the Public

Discussion of internal personnel practices and procedures.

**CONTACT PERSON FOR MORE INFORMATION:** David I. Tevelin, Executive Director, State Justice Institute, 120 South Fairfax Street, Alexandria, Virginia, 22314 (703) 684-6100.

**David I. Tevelin,**

*Executive Director.*

# Corrections

Federal Register
Vol. 52, No. 93
Thursday, May 14, 1987

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[ID-020-07-4212-13; I-22682]

### Realty Action; Exchange of Public and Private Lands in Cassia County, ID

*Correction*

In notice document 87-9312 appearing on page 13761 in the issue of Friday, April 24, 1987, make the following corrections:

1. The docket number in the heading should read as set forth above.

2. In the second column, in the **SUMMARY**, in the 14th line, "SE¼NE, E½SE¼" should read "SE¼NE¼, E½SE¼".

3. In the third column, the FR Doc. number should read "FR Doc. 87-9312".

BILLING CODE 1505-01-D

## DEPARTMENT OF THE TREASURY

### Customs Service

19 CFR Part 101

[T.D. 87-66]

### Customs Regulations; Amendment Relating to Changes in the Customs Service Preclearance Offices in Foreign Countries

*Correction*

In rule document 87-10148 beginning on page 16373 in the issue of Tuesday, May 5, 1987, make the following correction on that page:

In the third column, under **EFFECTIVE DATE**, on the third line, "January 28, 1987" should read "January 18, 1987".

Part II

# Department of Housing and Urban Development

**Office of the Assistant Secretary for Housing—Federal Housing Commissioner**

**Housing Development Grant Program; Invitation, for Applications; Notice**

**DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**

**Office of the Assistant Secretary for Housing—Federal Housing Commissioner**

**[Docket No. N-87-1695; FR-2337]**

**Housing Development Grant Program; Invitation for Applications**

**AGENCY:** Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

**ACTION:** Invitation for applications.

**SUMMARY:** This Notice invites any unit of general local government, including cities, counties, towns or townships, parishes, villages, or other general purposes political subdivisions of a State, and any State acting on behalf, and with the concurrence, of units of general local government, to submit applications for grants under HUD's Housing Development Grant Program. The Grant funds awarded under the program will be used to support the construction or substantial rehabilitation of residential rental, cooperative or mutual housing in which at least 20 percent of the units will be occupied by lower income families for a minimum of 20 years. Manufactured home parks and manufactured homes are not eligible for this program.

Applicants that responded to the June 20, 1984, February 13, 1985, or June 5, 1986 Invitation for Applications must reapply to be considered for funding. A revised or a new proposal may be submitted that is consistent with the guidance provided in this Invitation for Applications, the revised (May 1987) Application Packet and the List of Designated Eligible Areas published in the **Federal Register** of April 1, 1987. Neither Fiscal Year 1987 funds, nor recaptured or cancelled funds from previously awarded grants will be set aside to fund projects that were submitted in response to previous Invitations for Applications.

**EFFECTIVE DATE:** May 14, 1987.

**FOR FURTHER INFORMATION CONTACT:** Jessica Franklin, Director, Housing Development Grant Division, Room 6110, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Telephone (202) 755-6142 (This is not a toll-free number).

**SUPPLEMENTARY INFORMATION:** The statutory authority for the Housing Development Grant Program is provided by section 17 of the U.S. Housing Act of 1937. Section 17 was added to the U.S. Housing Act of 1937 by section 301 of the Housing and Urban-Rural Recovery Act of 1983 (Pub. L. 98-181) which was enacted on November 30, 1983. On June 14, 1984, HUD published implementing regulations for the new program in a new 24 CFR Part 850 (see 49 FR 24634).

**Program Funds**

HUD has been authorized to provide $99,590,000 in Housing Development Grant funds during Fiscal Year 1987. Funds recaptured from projects awarded in previous years may be added to this new authorization. An estimate of these funds is not available at this time. HUD estimates that authorized Fiscal Year 1987 funds will be adequate to support applications for approximately 5,500 units of rental, cooperative, or mutual housing.

**Nature of and Limits on Program Assistance**

Under the Housing Development Grant Program, HUD provides grants to units of general local government, including cities, counties, towns, townships, parishes, villages, or any other general purpose political subdivision of a State, and to States acting on behalf, and with the concurrence, or units general local government. These grantees, in turn, may use the grant funds to provide either grants or loans that may be applied toward interest reduction payments, rental assistance payments, or other forms of assistance to promote the construction or substantial rehabilitation of residential rental, cooperative or mutual housing. The maximum grant that may be approved for a project is limited to an amount sufficient to produce decent rental housing of modest design that is affordable by families and individuals without other reasonable and affordable housing alternatives in the private market. Grant assistance may not exceed 50 percent of the total costs associated with the rehabilitation or construction of the project, normally excluding the cost of acquisition, debt service and operating deficit reserves, working capital, sponsor profit and risk allowance, and relocation costs in excess of an amount that HUD determines to be reasonable. Under certain limited circumstances, HUD may permit the cost of acquisition to be included in the base amount to which the 50 percent limitation is applied. The program regulations and the application packet to be distributed to prospective applicants provide guidance on the circumstances under which the inclusion of acquisition costs may be permitted.

**Eligible Applicants/Grants**

Any unit of general local government, or any State, acting on behalf, and with the concurrence, of units of general local government is eligible to apply for and receive grant assistance under the Housing Development Grant Program. For purposes of qualifying as an eligible applicant under this program, the term "unit of general local government" means any city, county, town, township, parish, village, or other general purpose political subdivision of a State; any Indian Tribe as defined in section 102(a)(17) of the Housing and Community Development Act of 1974; and the District of Columbia, Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States. Entities that qualify as "States" include each of the several States and the Commonwealth of Puerto Rico. Applications from "State" applicants must be signed by the Governor. Applications from units of local government must be signed by the Chief Executive Officer of the unit of local government. Housing Finance Agencies are not eligible to apply, but they may administer a HDG project pursuant to a delegation agreement with an applicant/grantee.

**Previously Submitted Applications**

Applications submitted under this program in response to the June 20, 1984, February 13, 1985, or June 5, 1986, Invitation for Applications will not be considered for funding. A revised or a new proposal may be submitted which is consistent with the guidance provided in this Invitation for Applications, the revised (May, 1987) Application Packet, and the List of Designated Eligible Areas published in the **Federal Register** of April 1, 1987 (52 FR 10442). Neither Fiscal Year 1987 funds nor recaptured or cancelled funds from previously awarded grants will be set aside to fund projects which were submitted in response to previous Invitations for Applications.

**Eligible Types of Applications**

There are three types of applications eligible for submission under this program:

(1) *Eligible Area Application*—This is an application for a project located in an area determined by HUD, on the basis of statutorily prescribed factors, to be experiencing a severe shortage of decent rental housing opportunities for families and individuals without other reasonable and affordable alternatives in the private market. Additional

statutorily prescribed factors included in the 1986 Continuing Resolution on Appropriations require that an eligible area have both an overall rental vacancy rate and a duration of vacancy rate (i.e., units vacant more than two months) that are less than the national average rates. (HUD's list of designated eligible areas was published in a Notice in the Federal Register of April 1, 1987 (52 FR 10442). That Notice also explains the derivation of the national rates.)

(2) *Special Housing Need Application.*—This is an application for a project that is not located in a designated eligible area, but is intended to meet a special housing need that cannot be met through the moderate rehabilitation of housing stock located in the project neighborhood. A special housing need application must address either a special renter group need (e.g., need for housing to accommodate large families); or a special need resulting from rapid population growth or dislocation, provided the current rental vacancy rate is 7 percent or below. See 24 CFR 850.15(a) and (b).

(3) *Neighborhood Preservation Purpose Application*—This is an application for a project that is not located in a designated eligible area, but is intended to advance a particular neighborhood preservation purpose that cannot be advanced through rehabilitation of housing stock located in the project neighborhood. The proposed project must be located in a neighborhood preservation area in which concentrated housing, physical development, and public service activities are being carried out in a coordinated manner pursuant to a locally developed strategy for neighborhood improvement, conservation, or preservation. See 24 CFR 850.15(c).

**Project Eligibility**

To be eligible for assistance under the Housing Development Grant Program, a project must involve new construction or substantial rehabilitation. For purposes of this program, "substantial rehabilitation" is defined as repairs, replacements, and improvements (a) the cost of which exceeds the greater of 15 percent of the property's value after rehabilitation or $8,500 per dwelling unit (adjusted by an appropriate supportable local high cost factor), or (b) that entail the replacement of more than one major building component (e.g., roof structure; ceiling, wall or floor structures; plumbing system; or electrical system).

Manufactured home parks and manufactured (mobile) homes are not eligible for the program. For the purpose of this program, "Manufactured Home Parks" are defined as rental communities of single-family manufactured (mobile) homes, where the occupants either own their manufactured home and rent the site on which the home is placed, or where both the home and the site are rented. For the purpose of this program, "Manufactured Home" means a structure, transportable in one or more sections, which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities, and includes the plumbing, heating, air condition, and electrical systems contained in the structure.

Projects must be designed primarily for residential rental use that is nontransient and that does not contain special purpose space (e.g., medical facilities) requiring specialized features which increase the cost of construction. Generally, not more than 10 percent of the gross floor area of a project may be utilized for commercial purposes. HUD may approve commercial space of up to 20 percent of the gross floor area if special conditions warrant exceeding the 10 percent limit. (This restriction applies to all functionally related facilities on the project site notwithstanding that the commercial space may be separated from the residential units by condominium ownership.) Cooperative and mutual housing projects are eligible under this program, but must be controlled to assure the continued availability and affordability of at least 20 percent of the units to lower income households. For a project with two or more sites, the sites must be located within the same neighborhood and within a three block radius of each other. Further, each site must contain both lower income and market rate units.

The lower income units must be of the same construction type, but need not contain the same amount of floor space or interior amenities as the market rate units. The exterior of the lower income units must be indistinguishable from the exterior of the market rate units. The estimated value of a project after construction or substantial rehabilitation may not exceed the amount of a mortgage that could be insured for the project under section 207 of the National Housing Act based on the sum of the statutory per-unit limits adjusted by the appropriate supportable local high-cost factor and an allowance determined by HUD for costs not attributable to dwelling use (including costs for commercial space).

Projects currently assisted (or for which assistance is anticipated) under any other Federal housing assistance program, e.g., UDAG, Section 312, FmHA, or that were formerly owned or held by HUD, are ineligible for assistance under this program.

**Minimum and Maximum Project Size Limitations**

Applications may not be submitted in response to this Invitation for Applications for projects containing fewer than 20 or more than 200 dwelling units.

**Applicability of Gautreaux Consent Decree**

Applications for projects to be developed within the Chicago, Illinois SMSA must comply with all applicable requirements of the *Gautreaux* consent decree. For further information on such requirements, prospective applicants should contact the HUD Chicago Regional Office (Attention: Ms. Mary Anderson) by calling (312) 353-5067. (This is not a toll-free number.)

**Other Program Requirements**

The following are additional requirements of the Housing Development Grant Program that are not mentioned elsewhere in this Notice:

(1) *Lower Income Units.* At least 20 percent of the units in any project assisted under the Housing Development Grant Program must be occupied, or available for occupancy, by lower income households (i.e., families or individuals whose incomes do not exceed 80 percent of the area median income, with adjustments determined by HUD) during the period beginning when the project is initially available for occupancy and ending 20 years from the date on which 50 percent of the project units are first occupied. Owners must reexamine the income of each household occupaying a lower income unit at least once a year.

(2) *Lower Income Unit Rents.* Rents (including utilities) charged for the units designated for lower income occupancy may not exceed 30 percent of the adjusted income for a family whose income equals 50 percent of the area median income, as determined by HUD, with adjustments for smaller and larger families. HUD will provide the median income data and standard income adjustments to be used by owners in establishing the maximum rents for lower income units.

(3) *Restriction on Conversions.* During the 20 year period starting when the project is initially available for occupancy, or during the Project Term, as defined in the HUD/Grantee Grant Agreement, whichever is longer, owners may not convert units to condominium

ownership or any form of cooperative ownership which would be ineligible for assistance under the Housing Development Grant Program.

(4) *Marketing and Tenant Selection.* In renting units, owners may not discriminate against prospective tenants because of their eligibility for, or receipt of, housing assistance under any Federal State, or local housing assistance program, or because they have children (unless the units in a project are designated for occupany only by the elderly). An owner must have a HUD-approved Affirmative Fair Housing Marketing Plan and must carry out all marketing activities in accordance with HUD's Affirmative Fair Housing Marketing Regulations at 24 CFR Part 200, Subpart M.

(5) *Displacement/Relocation.* A project may not be assisted under the Housing Development Grant Program if its development will cause the involuntary displacement of very low-income households from the project site by households which are not very low-income. The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 and HUD's implementing regulations (24 CFR Part 42) apply to any displacement resulting from acquisition by a State agency, as defiend in 24 CFR 42.85. The revised Uniform Relocation Act regulations took effect on May 1, 1986. See 51 FR 7010, February 27, 1986. In any case where there will be project-related displacement or relocation and the Uniform Act is not applicable, the following requirements apply:

(a) The applicant (grantee) must have a written tenant assistance policy;

(b) No tenant may be required to move *permanently* unless provided adequate advance written notice and appropriate advisory services;

(c) Lower income tenants required to move permanently must receive adequate advance notice, appropriate advisory services, and financial assistance sufficient to obtain decent, safe, sanitary, and affordable replacement housing in accordance with HUD policy;

(d) Lower income tenants required to move *temporarily* must be provided with decent, safe, and sanitary temporary housing; financial assitance to cover reasonable moving expenses and any increase in monthly costs during the temporary relocation period; and for each household an opportunity to occupy a unit in the newly constructed or subetantially rehabilitated project at rent levels not to exceed the Total Tenant Payment as determiend by 24 CFR 813.107(a).

(6) *Construction and Design Standards.* The HUD Multifamily Minimum Property Standards will not apply to projects under the Housing Development Grant Program unless they are FHA-insured. All projects must, however, meet applicable State and local building codes.

(7) *Environmental Standards.* Projects are subject to section 104(f) of the Housing and Community Development Act of 1974; the National Environmental Policy Act of 1969; and HUD's implementing regulations at 24 CFR Part 58. Under this program, the applicant/grantee, not HUD, is responsible for performing an environmental assessment of the proposed project as necessary, in accordance with the requirements of 24 CFR Part 58. Certifications of compliance must be submitted with the application.

(8) *Labor Standards.* All HDG Projects are subject to the prevailing wage requirements of the Davis-Bacon Act and the provisions of the Contract Work Hours and Safety Standards Act. (These Acts apply since the minimum HDG project size is 20 units and by their terms these Acts apply to projects consisting of 12 or more units.)

(9) *HAP Consistency.* A proposed project must be consistent, at the time of submission of an application, with any applicable local Housing Assistance Plan approved by HUD. If a HAP amendment is required, such amendment must be filed with the local HUD Office before the application submission deadline date.

(10) *OMB Circulars.* The policies, guidelines and requirement of OMB Circulars A–102 Revised (Uniform Administrative Requirements for Grants-in-Aid to State and Local Governments); A–122 (Cost Principles for Non-profit Organizations); A–87 (Cost Principles Applicable to Grants, Contracts and Other Agreements with State and Local Governments); and 24 CFR Part 44 implementing A–128 (Single Audit Act) apply to this program.

(11) *Intergovernmental Review.* The provisions of Executive Order 12372 and HUD's implementing regulations at 24 CFR Part 52 apply to this program. Applicants are required to submit applications directly to the reviewing body.

(12) *Debarred, Suspended, or Ineligible Contractors.* HUD's regulations at 24 CFR Part 24 relating to the use of debarred, suspended, or ineligible contractors or subcontractors apply to this program. Grantees will be responsible for assuring that such contractors or subcontractors are not used for projects assisted under this program during any period of debarment, suspension, or placement in ineligibility status.

(13) *Flood Insurance.* No site proposed for a project to be assisted under this program may be located in an area that has been identified by the Federal Emergency Management Agency (FEMA) as having special flood hazards, unless the community in which the area is situated is participating in the National Flood Insurance Program, or less than a year has passed since FEMA notification regarding such hazards, and the applicant (grantee) can provide assurance that flood insurance on the structure will be obtained in compliance with section 102(a) of the Flood Disaster Protection Act of 1973.

(14) *Nondiscrimination and Equal Opportunity.* Grantees and owners must comply with the requirements of Title VIII of the Civil Rights Act of 1968, 42 U.S.C. 3601–19 (Pub. L. 90–284) and the implementing regulations; Executive Order 11063 and the implementing regulations at 24 CFR Part 107; and Title VI of the Civil Rights Act of 1964 (Pub. L. 88–352) and the implemening regulations at 24 CFR Part 1. Under Title VI and 24 CFR Part 1, no determination regarding the selection of a site or location of a Federally assisted project may be made with the purpose or effect of excluding individuals from, or denying them the benefits of, or subjecting them to discrimination on the basis of race, color, or nation origin, or with the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of Title VI or 24 CFR Part 1. Grantees and owners must also comply with prohibitions against discrimination on the basis of age under the Age Discrimination Act of 1975 (42 U.S.C. 6101-07) and the prohibitions on discrimination against handicapped individuals under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794); the requirements of Executive Order 11246 and the regulations issued thereunder at 41 CFR Chapter 60; and the requirements of section 3 of the Housing and Urban Development Act of 1968.

(15) *Minority and Women's Business Enterprise Opportunity.* The grantee and owner must prepare, implement, and maintain a development plan for minority- and women-owned businesses that must contain specific and measurable goals and an affirmative strategy to promote awareness and participation by such businesses in the contracting and procurement activities generated by the project.

(16) *Administrative Costs.* Grant funds may not be used for

administrative costs incurred by an applicant/grantee in carrying out its responsibilities under the Housing Development Grant Program. Such administrative costs include, but are not limited to, staff and consultant salaries and operating expenses of the applicant/grantee. Program Income (24 CFR 850.71), however, may be used to support operating expenses incurred by the grantee.

(17) *Construction Start Deadline.* Project construction or rehabilitation must commence within 24 months of HUD's notice of application selection.

(18) *Owner-Grantee Agreement.* The owner and grantee must enter into an Agreement requiring the owner to comply with certain statutory and regulatory restrictions (e.g., items (1), (2), and (3) above). The grantee will be responsible for assuring that the owner complies with the Agreement even if the grantee delegates responsibility for administration of the project to another entity. Any Housing Development Grant Assistance provided to the owner will constitute a debt payable in the event of failure to comply with the Agreement. In the event of an uncorrected violation, the owner will be required to pay the grantee an amount equal to the total amount of the grant assistance (plus interest thereon at a rate determined by HUD based on the Federal Government's borrowing rate) less 10 percent for each year in excess of 10 years from the effective date of the agreement. The owner's contingent debt must be secured by a security instrument (e.g., a lien against the property). The owner(s) and lender(s) must agree that the requirements of 24 CFR 850.151(b), (c), (d) and (e) will be imposed as covenants running with land or deed restrictions with which they will comply for the Project Term, as defined in the Grant Agreement.

**Application Submission Requirements**

The application submission requirements are described in general terms in § 850.33 of the program regulations. The Application Packet that HUD will make available to prospective applicants will describe in much greater detail the required contents of an application and will contain detailed guidance to assist applicants in preparing acceptable applications.

**HUD Review and Selection of Applications**

Applications will be reviewed both by HUD Headquarters and by HUD Field Offices. Field Offices will be responsible for making review comments and recommendations, but all selections will be made by Headquarters. HUD may request clarification of information in the application after the deadline for submission has passed. Where there is no documentation or the documentation provided is clearly insufficient to make an appropriate determination with respect to the application, the application may be rejected.

To be considered eligible for ranking and possible selection, an application must meet all threshold requirements. The threshold requirements are specified in the program regulations at 24 CFR 850.37.

HUD will rate and rank applications on the basis of the following factors (the maximum number of points to be awarded for each factor is shown in parentheses):

(1) *Shortage of decent affordable housing (28 points).* HUD will consider two separate elements under this factor. More favorable consideration will be given to projects that are located in areas with (a) lower rental vacancy rates in the jurisdiction as a whole and (b) in all lower income census tracts in the jurisdiction (or where requested in the application and approved by HUD, in the market area).

(2) *Leveraging ratios (20 points).* HUD will consider two separate elements under this factor. More favorable consideration will be given to projects with (a) higher project leveraging ratios (i.e., total private and non-Federal public financial resources committed to the project divided by the requested grant amount) and (b) higher private project leveraging ratios (i.e., total private financial resources committed to the project divided by the requested grant amount).

(3) *Neighborhood development and mitigation of displacement (2 points).* HUD will consider two separate elements under this factor. More favorable consideration will be given to those projects that (a) have a more favorable effect on neighborhood development and (b) cause no displacement or provide for effective mitigation of displacement.

(4) *Demonstrated performance and capacity (2 points).* HUD will consider the applicant's record of performance in meeting its assisted housing needs and the applicant's capacity to commence and carry out the project in a timely manner. More favorable consideration will be given to those with the better record of performance in meeting annual and three-year Housing Assistance Plan goals and administering programs of federally assisted housing.

(5) *Efficient use of grant funds (10 points).* HUD will consider the extent to which the housing development grant requested will provide the maximum number of units for the least cost to the Federal government. More favorable consideration will be given to projects with the better performance in achieving this result, and where the grant is to be repaid to the Grantee under conditions specified in the Application Packet. HUD has developed least cost ratios to account for differences in unit size (number of bedrooms), types of tenants being served, financing alternatives, construction costs, and project type.

(6) *Rent affordability (3 points).* HUD will consider two elements under this factor. More favorable consideration will be given to projects that provide a more effective mechanism for assuring that rents for lower income units meet the rent requirements of § 850.151(e) of the program regulations, and that provide the greater amount of assistance, if any, to assure that rents are affordable for very low-income households.

(7) *Financial feasibility (10 points).* All projects must present adequate documentation of firm financial commitments for a minimum of 20 years. The strength of these commitments, e.g., the level of documentation and the absence of unacceptable qualifying conditions, will determine the points earned in this subcategory. Another subcategory of determination will be based upon project rents, costs, and expenses. Projects will be rated as to (a) feasibility of rents, reasonableness of costs and expenses and (b) financial feasibility for the Project Term.

(8) *Family housing (15 points).* More favorable consideration will be given to projects that provide the greater number of units for families and for large families with children. Assisted units with an average of three bedrooms or more and projects with the highest overall average bedroom size greater than two will receive the maximum points.

(9) *Minority and women's business enterprise (5 points).* Points will be awarded to applications that include a certification that controlling project ownership will be vested in, and exercised by, minority persons or women.

(10) *Promoting nondiscrimination and equal opportunity (5 points).* HUD will take into account the present pattern of assisted housing location and occupancy. Favorable consideration will be given to projects that are located (a) outside areas of minority concentration where the current pattern shows most assisted projects in minority areas, or (b) in areas where there is no other assisted housing, or (c) in areas undergoing revitalization through public

or private investment and in which rental opportunities for lower income households are declining.

**Priority Projects/Bonus Points**

In making selections, HUD will give priority (up to 15 bonus points) to projects located in areas where waiting lists for housing assistance are relatively long and where section 8 certificate-holders require an excessive length of time to find housing, provided that more than 25 percent of the units will be made available for occupancy by lower-income families.

More specific information on how HUD will rate applications on the selection criteria and apply selection priority will be provided to prospective applicants in the Application Packet.

**Where to Obtain Application Packets**

Beginning on May 18, 1987, Application Packets containing all required application forms and exhibits, detailed application instructions, and pertinent program guidance may be obtained from the HUD Field Offices listed in Appendix A of this Notice. Each prospective applicant should obtain and carefully review an application packet before attempting to prepare an application for submission to HUD.

**Deadline for Submission of Applications**

The deadline for application submission is close of business on July 7, 1987, for both Headquarters and the local HUD Office covering the jurisdiction in which the project is located. Only applications received in both places before the deadline will be eligible for consideration. Close of business for Headquarters in Washington, DC is 5:15 p.m. EDT. The addresses, locations and telephone numbers of each local HUD Office are included in Appendix A of this publication. Information on the time of official close of business for local HUD Offices should be obtained directly from the respective HUD Offices.

**Announcements and Awards**

Grant awards will be announced no later than September 30, 1987. Projects that are not selected will receive written notification.

**Other Information**

A Finding of No Significant Impact with respect to the environment has been made in accordance with HuD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the General Counsel, Rules Docket Clerk, at the above address.

(The collection of information requirements referenced in this notice have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB control number 2503-0033)

(The Catalog of Federal Domestic Assistance program number for this program is 14.174)

Authority: Sec. 17(d), United States Housing Act of 1937 (42 U.S.C. 1437(o)); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: May 5, 1987

# Department of Education

**Office of Special Education and Rehabilitative Services**

## Rehabilitation Long-Term Training Program for Fiscal Year 1987; Applications for New Awards; Notices

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Rehabilitation Long-Term Training Program; Proposed Funding for Fiscal Year 1987

AGENCY: Department of Education.

ACTION: Notice of Proposed Funding Priority for Fiscal Year 1987.

SUMMARY: The Secretary proposes a funding priority for long-term training grants in the field of Rehabilitation Counseling to ensure effective use of program funds and to direct funds to an area of identified training need during fiscal year 1987. The Secretary will reserve funds for applications meeting this priority.

DATE: Comments must be received on or before June 15, 1987.

ADDRESS: All written comments and suggestions should be sent to Ed Sontag, Office of Developmental Programs, Rehabilitation Services Administration, Office of Speical Education and Rehabilitative Services, Department of Education, 400 Maryland Avenue, SW., (Switzer Building, Room 3042—M/S 2312), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Delores Watkins, Office of Developmental Programs, Rehabilitation Services Administration. Telephone: (202) 732–1349.

SUPPLEMENTARY INFORMATION: Grants for the Rehabilitation Training Program are authorized by Title III, section 304 of the Rehabilitation Act of 1973, as amended. Program regulations for the Rehabilitation Long-Term Training Program are established at 34 CFR Part 386. The purpose of the Rehabilitation Long-Term Program is to support projects designed to increase the supply of qualified personnel available for employment in public and private agencies and institutions involved in the vocational and independent living rehabilitation of physically and mentally handicapped individuals, especially those who are the most severely handicapped.

*Eligible Applicants:* Awards are made under this program to State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education.

*Funds Available:* The Congress appropriated $29,550,000 for the Rehabilitation Training Program in Fiscal Year 1987. Of this amount, it is estimated that $800,000 to $1,200,000 will be available for the support of new projects announced under this notice. An estimated 13 to 18 awards will be funded at an average project award of $65,000.

*Proposed Priority*

In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3),the Secretary proposes to give an absolute preference to long-term training applications submitted in the field of Rehabilitation Counseling in fiscal year 1987 that respond to the priority described below. An absolute preference is one which permits the Secretary to select only those applications that meet the described priority.

Applications must be submitted in the long-term training field of Rehabilitation Counseling and must be designed to improve and strengthen the capacity of rehabilitation counselors to serve and place severely disabled individuals in employment, especially competitive employment. The training must directly involve students with business and industry in providing rehabilitation services, especially placement services, to severely physically and mentally disabled individuals. The coursework must be designed to provide students with skills and knowledge in: (1) Interpreting diagnositic, psychological, and educational background information to assess the functional capacities of, and do vocational planning for, disabled individuals, including traumatically brain injured individuals and learning disabled individuals; (2) planning effective rehabilitation programs for, and delivering rehabilitation services to, disabled individuals, including traumatically brain injured and learning disabled individuals; (3) job development, job modification, and job restructuring; (4) workers' compensation programs; (5) providing services to disabled individuals to facilitate their transition from school to employment; (6) providing supported employment services to disabled individuals; (7) the applicability of sections 501, 502, 503 and 504 of the Rehabilitation Act and their implications for placement of disabled individuals; and (8) consulting with employers and potential employers to identify employment opportunities for disabled individuals, to educate and train employers in identifying and removing barriers to the employment of disabled individuals, and to educate or train employers and potential employers about various disabilities and the vocational implications of those disabilities. Practicum training must involve students directly with business and industry in developing jobs for and placing disabled individuals in competitive employment. The practicum training may include actual student experiences in business and industry settings.

The proposed training must be pre-employment training and must be at the master's degree level.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding the proposed priority. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 30th day after publication of this document will be considered before the Secretary issues the final priority. All comments submitted in response to this proposed priority will be available for public inspection, during and after the comment period, in Room 3042, Mary E. Switzer Building, 330 C Street SW., Washington, DC between the hours of 8:30 a.m. and 4:00 p.m. (Washington, DC time), Monday through Friday of each week except Federal holidays.

Dated: April 13, 1987.

William J. Bennett,
*Secretary of Education.*

[FR Doc. 87–11038 Filed 5–13–87; 8:45 am]
BILLING CODE 4000-01-M

[CFDA No.: 84.129]

Inviting Applications for New Awards Under the Rehabilitation Long-Term Training Program for Fiscal Year 1987; Rehabilitation Counseling

*Purpose:* To provide grants to State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education, for projects designed to increase the supply of trained personnel available for employment in public and private rehabilitation agencies and institutions involved in the vocational and independent living rehabilitation of individuals with disabilities and to maintain and upgrade the skills and knowledge of personnel employed as providers or administrators of vocational, medical, social, or psychological rehabilitation services to individuals with severe disabilities.

*Deadline for Transmittal of Applications:* June 30, 1987.

*Applications Available:* May 15, 1987.

*Range of Funds Available:* $800,000 to $1,200,000.

*Estimated Average Size of Awards:* $55,000.

*Estimated Number of Awards:* 13 to 18.

*Project Period:* Not to exceed 36 months.

*Applicable Regulations:* (a) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77 and 78); (b) Regulations governing the Rehabilitation Long-Term Training Program (34 CFR Parts 385 and 386); and (c) When adopted in final form, the Notice of Proposed Priority published in this issue of the Federal Register. Applicants should prepare their applications based on the proposed priority. If there are any changes made when the final priority is published, applicants will be given the opportunity to amend or resubmit their applications.

*Priority:* As described in the Notice of Proposed Priority, the Secretary proposes to give an absolute preference to applications that meet the described priority.

*For Applications or Information Contact:* Mary Vest, Office of Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, SW., (Switzer Building, Room 3332–M/S 2312), Washington, DC 20202. Telephone: (202) 732–1343.

*Program Authority:* 29 U.S.C. 774

Dated: May 11, 1987.

Madeleine Will,

*Assistant Secretary, Office of Special Education and Rehabilitative Services.*

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, Chicago, IL, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

**How To Cite This Publication:** Use the volume number and the page number. Example: 52 FR 12345.

## THE FEDERAL REGISTER
## WHAT IT IS AND HOW TO USE IT

**FOR:** Any person who uses the Federal Register and Code of Federal Regulations.

**WHO:** The Office of the Federal Register.

**WHAT:** Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

**WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

### WASHINGTON, DC

**WHEN:** June 9, at 9 a.m.
**WHERE:** Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
**RESERVATIONS:** Gertrude E. Belton, 202–523–5237

### CHICAGO, IL

**WHEN:** July 8, at 9 a.m.
**WHERE:** Room 204A, Everett McKinley Dirksen Federal Building, 219 S. Dearborn Street, Chicago, IL.
**RESERVATIONS:** Call the Chicago Federal Information Center, 312–353–0339.

### BOSTON, MA

**WHEN:** July 15, at 9 a.m.
**WHERE:** Main Auditorium, Federal Building, 10 Causeway Street, Boston, MA.
**RESERVATIONS:** Call the Boston Federal Information Center, 617–565–0129

The President

## Executive Order 12597 of May 13, 1987

## Establishing Procedures for Facilitating Presidential Review of International Aviation Decisions by the Department of Transportation

By the authority vested in me as President by the Constitution and laws of the United States of America, including Section 801 of the Federal Aviation Act, as amended (49 U.S.C. app. § 1461), and in order to provide presidential guidance to department and agency heads and facilitate presidential review of decisions by the Department of Transportation pursuant to the Federal Aviation Act, it is hereby ordered as follows:

**Section 1.** Executive Order No. 12547 of February 6, 1986, is revoked.

**Sec. 2.** The Secretary of Transportation is designated and empowered to receive on behalf of the President any decision of the Department of Transportation (hereinafter referred to as the "DOT") subject to Section 801 of the Federal Aviation Act, as amended. The Secretary of Transportation is further designated and empowered to exercise, without the approval, ratification, or other action of the President, the authority of the President under Section 801 of the Federal Aviation Act, as amended, to review and determine not to disapprove any such decision that is not the subject of any written recommendation for disapproval or for a statement of reasons submitted to the Department of Transportation in accordance with section 5(b) of this Order.

**Sec. 3.** (a) Except as otherwise provided in this section, decisions of the DOT subject to Section 801 of the Federal Aviation Act, as amended, may be made available by the DOT for public inspection and copying following transmission to Executive departments and agencies pursuant to section 3(c) of this Order.

(b) In the interests of national security, and in order to allow for consideration of appropriate action under Executive Order No. 12356, decisions of the DOT transmitted to Executive departments and agencies pursuant to section 3(c) of this Order shall be withheld from public disclosure for a period not to exceed 5 days after said transmission.

(c) At the same time that decisions of the DOT are received by the Secretary of Transportation pursuant to section 2 of this Order, the DOT shall transmit copies thereof to the Secretary of State, the Secretary of Defense, the Secretary of the Treasury, the Attorney General, the Assistant to the President for National Security Affairs, the Director of the Office of Management and Budget, and any other Executive department or agency that the DOT deems appropriate.

(d) The Secretary of State and the Secretary of Defense, or their designees, shall review the decisions of the DOT transmitted pursuant to section 3(c) of this Order and shall promptly advise the Assistant to the President for National Security Affairs or his designee whether action pursuant to Executive Order No. 12356 is deemed appropriate. If, after considering these recommendations, the Assistant to the President for National Security Affairs determines that classification under Executive Order No. 12356 is appropriate, he shall take such action and immediately so inform the DOT. Action pursuant to this subsection shall be completed by the persons designated herein within 5 days of the transmission of the decision.

(e) On and after the 6th day following transmission of a DOT decision pursuant to section 3(c) of this Order, or upon earlier notification by the Assistant to the President for National Security Affairs or his designee, the DOT is authorized to disclose all unclassified portions of the text of such decision. Nothing in this section is intended to affect the ability to withhold material under any Executive order or statute other than Section 801.

**Sec. 4.** (a) Departments and agencies outside of the Executive Office of the President shall raise only matters of national defense or foreign relations in the course of the presidential review established by this Order. All other matters, including those related to regulatory policy, shall be presented to the DOT in accordance with the procedures of the DOT.

(b) Departments and agencies outside of the Executive Office of the President that identify matters of national defense or foreign relations while a decision is pending before the DOT shall, except as confidentiality is required for reasons of defense or foreign policy, make those matters known to the DOT in the course of its proceedings.

**Sec. 5.** (a) The DOT shall receive the recommendations, addressed to the President, of the departments and agencies referred to in section 3(c) of this Order.

(b) Departments or agencies outside of the Executive Office of the President making recommendations on matters of national defense or foreign relations with respect to any decision received by the Secretary of Transportation under section 2 of this Order shall submit their recommendations in writing to the DOT: (1) within 4 days of the DOT's issuance of a decision subject to a 10-day statutory review period under Section 801(b); and (2) within 21 days of the DOT's issuance of a decision subject to a 60-day statutory review period under Section 801(a); or (3) in exceptional cases, within the period specified by the DOT in its letter of transmittal.

(c) The DOT shall, as soon as practical after the deadlines specified in section 5(b) of this Order: (1) if no recommendations for disapproval or for a statement of reasons are received from the departments and agencies specified in section 3(c) of this Order, issue its decision to become effective according to its terms; or (2) if recommendations for disapproval or for a statement of reasons are received, transmit them to the Assistant to the President for National Security Affairs, who, upon review, shall transmit a memorandum to the President with a recommendation as to whether or not the President should disapprove the proposed decision.

**Sec. 6.** (a) In advising the President with respect to his review of a decision pursuant to Section 801, departments and agencies outside of the Executive Office of the President shall identify with particularity the defense or foreign policy implications of the DOT decision that are deemed appropriate for consideration.

(b) If any department or agency that made recommendations to the President pursuant to Section 801 believes that, if the President decides not to disapprove a decision, the letter so advising the DOT should include a statement that the decision not to disapprove was based on national defense or foreign relations reasons, it should so indicate separately and explain why.

**Sec. 7.** Individuals within the Executive Office of the President shall follow a policy of: (a) refusing to discuss matters relating to the disposition of a case subject to the review of the President under Section 801 with any interested private party, or an attorney or agent for any such party, prior to the decision by the President or his designee; and (b) referring any written communication from an interested private party, or an attorney or agent for any such party, to the appropriate department or agency outside of the Executive Office of the President. Exceptions to this policy may be made only when the head of an appropriate department or agency outside of the Executive Office of the President personally finds, on a nondelegable basis, that direct written or oral

[FR Doc.

Billing cod

communication between a private party and a person within the Executive Office of the President is needed for reasons of defense or foreign policy.

**Sec. 8.** Departments and agencies outside of the Executive Office of the President that regularly make recommendations in connection with the presidential review pursuant to Section 801 shall, consistent with applicable law, including the provisions of Chapter 5 of Title 5 of the United States Code:

(a) establish public dockets for all written communications (other than those requiring confidential treatment for defense or foreign policy reasons) between their officers and employees and private parties in connection with the preparation of such recommendations; and

(b) prescribe such other procedures governing oral and written communications as they deem appropriate.

**Sec. 9.** This Order is intended solely for the internal guidance of the departments and agencies in order to facilitate the presidential review process. This Order does not confer rights on any private parties.

**Sec. 10.** None of the time deadlines specified in this Order shall be construed as a limitation on expedited presidential review of any decision under Section 801.

**Sec. 11.** The provisions of this Order shall become effective upon publication in the **Federal Register** and shall govern the review of any proposed decisions of the DOT that have not become final prior to that date under Executive Order No. 12547.

**Sec. 12.** References in any Executive order to any provision in Executive Order No. 12547 shall be deemed to refer to the corresponding provision in this Order.

Federal Register
Vol. 52, No. 94
Friday, May 15, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### 7 CFR Part 910

[Lemon Regulation 561]

### Lemons Grown in California and Arizona; Limitation of Handling

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** Regulation 561 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 375,000 cartons during the period May 17–23, 1987. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

**DATES:** Regulation 561 (§ 910.861) is effective for the period May 17–23, 1987.

**FOR FURTHER INFORMATION CONTACT:** James M. Scanlon, Acting Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone: (202) 447–5697.

**SUPPLEMENTARY INFORMATION:** This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1986–87. The committee met publicly on May 12, 1987, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended by an 11 to 1 vote (with one abstention) a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the market continues to improve.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

**List of Subjects in 7 CFR 910**

Marketing agreements and orders, California, Arizona, and Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

**PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA**

1. The authority citation for 7 CFR Part 910 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.861 is added to read as follows:

**§ 910.861 Lemon Regulation 561.**

The quantity of lemons grown in California and Arizona which may be handled during the period May 17, 1987, through May 23, 1987, is established at 375,000 cartons.

Dated: May 13, 1987.

**Ronald L. Cioffi,**

*Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

### 7 CFR Part 1040

### Milk in the Southern Michigan Marketing Area; Order Suspending Certain Provisions

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Suspension of rule.

**SUMMARY:** This action suspends for the months of May through August 1987 the requirement in the Southern Michigan Federal milk order that a cooperative association deliver to pool distributing plants at least 50 percent of its members' producer milk in order to qualify its supply plants as pool plants under the order. The suspension was requested by a cooperative association that represents producers supplying milk to the fluid market. The action is needed to avoid inefficient handling of milk and to ensure that dairy farmers historically associated with the Southern Michigan market will continue to share in the market's fluid milk sales.

**EFFECTIVE DATE:** May 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–4829.

**SUPPLEMENTARY INFORMATION:** Prior document in this proceeding:

Notice of Proposed Suspension: Issued April 10, 1987; published April 17, 1987 (52 FR 12537).

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the beneifts that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Service Act of 1937, as amended (7 U.S.C. 601–674), and of the order regulating the handling of milk in the Southern Michigan marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on April 17, 1987 (52 FR 12537) concerning a proposed suspension of certain provisions of the order. Interested parties were afforded an opportunity to file data, views, and arguments thereon. No comments were received.

After consideration of all relevant material, including the proposal in the notice, and other available information, it is hereby found and determined that for the months of May through August 1987 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1040.7(b)(2), the words "if transfers from such supply plant to plants described in paragraph (b)(5) of this section and by direct delivery from the farm to plants qualified under paragraph (a) of this section are:"

2. In § 1040.7(b)(2), paragraphs (i) and (ii).

**Statement of Consideration**

This action makes inoperative for the months of May through August 1987 the provisions requiring a cooperative association to deliver at least 50 percent of its members' producer milk to pool distributing plants, either through its supply plants or directly from farms, in order to qualify the supply plants as pool plants. The suspension was requested by Michigan Milk Producers Association (MMPA), which represents producers supplying the market. MMPA had originally requested that April be included in the suspension period, but indicated later that it was not necessary to include April in the suspension period.

This action is needed because MMPA otherwise would be unable to efficiently pool approximately 55 million pounds of member milk during the period of May through August 1987. Approximately 48 percent of their members' production, which is pooled as part of a supply plant unit, is needed to satisfy the requirements of the distributing plants they supply during May through July. MMPA projects that 48 percent of that supply will be needed at distributing plants in August. For March 1987, at MMPA's request the Department suspended the pooling provision that required a supply plant operator to ship at least 30 percent of its receipts of Grade A milk to distributing plants. At that time, they indicated that their fluid milk sales had declined dramatically in February and no improvement was expected in March. That situation has not changed.

MMPA operates approximately 85 percent of the plant capacity for manufacturing butter and nonfat dry milk in the market. Thus, MMPA is the major handler of reserve milk supplies pooled on the Southern Michigan order.

Accordingly, it is appropriate to suspend the qualification requirement that a cooperative association must deliver to distributing plants at least 50 percent of its members' producer milk in order to qualify its supply plants as pool plants under the order.

If the provisions were not suspended for the months of May through August 1987, MMPA would encounter considerable difficulty in pooling certain supply plants and the milk of producers who historically have been associated with the Southern Michigan fluid market. Without the suspension, milk would be shipped in an inefficient and costly manner merely to assure its continued pooling under the order. This would disrupt the orderly marketing of milk in the Southern Michigan marketing area.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions in the marketing area in that substantial quantities of milk from producers who regularly supply the market otherwise could be excluded from the marketwide pool, or else the milk would have to be shipped in an inefficient and costly manner, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views, or arguments concerning this suspension. No comments were filed.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

**List of Subjects in 7 CFR Part 1040**

Milk marketing orders, Milk, Dairy products.

*It is therefore ordered,* That the following language in § 1040.7(b)(2) of the Southern Michigan order is suspended for the months of May through August 1987, as follows:

**PART 1040—MILK IN THE SOUTHERN MICHIGAN MARKETING AREA**

1. The authority citation for 7 CFR Part 1040 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

**FEDERAL HOME LOAN BANK BOARD**

**12 CFR Parts 545, 561, 563, 563c and 570**

**[No. 87–529]**

**Definition of Regulatory Capital**

Dated: May 5, 1987.

**AGENCY:** Federal Home Loan Bank Board.

**ACTION:** Final rule.

**SUMMARY:** The Federal Home Loan Bank Board ("Board"), as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), is amending its regulations pertaining to the definition

of regulatory capital applicable to all institutions the accounts of which are insured by the FSLIC ("insured institutions" or "institutions"). First, the Board is requiring that all financial statements issued by insured institutions, including statements of condition required pursuant to 12 CFR 545.115, and all financial reports filed with the Board shall be prepared in accordance with generally accepted accounting principles ("GAAP"). Second, the term "regulatory capital" is defined to mean the sum of equity capital as determined in accordance with GAAP plus certain other items based on risk analysis reporting ("RAR"). These amendments are part of the Board's comprehensive revision of appropriate capital requirements for insured institutions. The Board adopted amendments to its regulatory capital requirements for insured institutions on August 15, 1986. Regulatory Capital Requirements of Insured Institutions, Board Res. No. 86–857, 51 FR 33565 (1986) (to be codified at 12 CFR 563.13). The rules are designed to operate in a complementary manner to further the Board's goals of more effectively monitoring the condition of insured institutions and the related risks to the Corporation.

In addition to adopting this final regulation, the Board today also is proposing a related rule that would revise its current regulation governing classification of assets, which would in certain cases require increased capital, and proposed a rule and policy statement relating to the appraisal policies and practices of insured institutions and service corporations. *See* Board Res. Nos. 87–527, 87–528, published in the Proposed Rules section of this issue.

**DATE:** The regulation is effective January 1, 1988.

**FOR FURTHER INFORMATION CONTACT:** Christina M. Gattuso, Attorney, Office of General Counsel, (202) 377–6649; Robert J. Pomeranz, Senior Policy Analyst, Office of Policy and Economic Research, (202) 377–6760, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552; Thomas R. Bloom, Chief Accountant, (202) 778–2532; or Barefoot Bankhead, Professional Accounting Fellow, (202) 778–2538, Office of Regulatory Policy, Oversight and Supervision, Federal Home Loan Bank System, 900 Nineteenth Street, NW., Washington, DC 20006.

**SUPPLEMENTARY INFORMATION:** These amendments are adopted pursuant to the provisions of section 403(b) of the National Housing Act ("NHA"), 12 U.S.C. 1726(b), as amended by the Garn-St Germain Depository Institutions Act of 1982 ("DIA"), Pub. L. 97–320, 96 Stat. 1469, which gives the Corporation broad discretion to determine appropriate reserve requirements for insured institutions. Specifically, section 403(b) of the NHA requires all insured institutions to "provide adequate reserves in a form satisfactory to the Corporation, to be established in accordance with regulations made by the Corporation." Pursuant to its authority as operating head of the Corporation, the Board has established regulatory capital requirements for insured institutions and determined those components of capital includable in regulatory capital.

### A. Description of the Proposal

On April 24, 1986, the Board proposed to revise its regulation defining "regulatory net worth," 12 CFR 561.13, which includes components of net worth as determined in accordance with GAAP as well as other components the Board has determined constitute net worth in accordance with regulatory accounting practices. Board Res. No. 86–427, 51 FR 16542 (May 5, 1986). In the preamble to the proposed revision, the Board fully described the reasons for and history of the distinctions that exist between equity capital under GAAP and regulatory net worth under regulatory accounting practices.

The proposal would have required all insured institutions to file all financial statements, including statements of condition required pursuant to 12 CFR 545.115, and reports to the Board on a GAAP basis with a reconciliation to regulatory capital, a concept that the proposal would have substituted for regulatory net worth.

In conjunction with this GAAP reporting requirement, the proposal also would have restructured the definition of regulatory capital to reflect the concepts embodied in the proposed risk analysis reporting and to streamline and remove those procedures the Board no longer deemed appropriate for RAR. This feature of the proposal was intended to ensure comprehensive disclosure and to minimize any potential for confusion on behalf of the public.

The Board also proposed to substitute the term "regulatory capital" for the term "regulatory net worth" in section 561.13. This change recognizes that the term "regulatory net worth" does not precisely parallel "net worth" or "equity" as defined by accounting literature and reaffirms the Board's discretion to define the components of regulatory capital for purposes of its regulations in a manner most appropriately suited to the objectives and responsibilities of the Board. The proposal would also have amended 12 CFR Chapter V to clarify that all existing references in the Board's regulations to "regulatory net worth" and "net worth" should be construed to mean "regulatory capital." In Board Resolution 86–857, the Board amended 12 CFR Chapter V to substitute the term "regulatory capital" for "regulatory net worth." *See* 51 FR at 33584.

These structural changes, in the Board's view, best balanced the benefits of GAAP and RAR by revising the provisions of 12 CFR 561.13 to define "regulatory capital" as the sum of (1) equity capital as determined in accordance with GAAP ("equity capital"), (2) items that serve as the functional equivalents of capital for the FSLIC by providing a buffer against losses, as well as specific capital instruments created by congressional action and Board authority ("definitional capital"), (3) certain other components of capital as the Board determines to be consistent with its risk analysis conventions, and (4) risk analysis reporting forbearances. Regulatory capital so computed would be used to determine an institution's compliance with the Board's minimum regulatory capital requirements under § 563.13, as amended in Board Res. No. 86–857, 51 FR 33565 (Sept. 22, 1986).

The Board also proposed to substitute the term "risk analysis reporting" for "regulatory accounting practices" in describing the Board's modification of GAAP in determining the capital components considered appropriate for evaluating risk to the FSLIC.

### B. Discussion of the Comments

The Board received 184 public comments in response to the proposal. The majority of comments (138) were submitted by insured institutions. Of the remainder, 20 were submitted by national and commercial banks, 14 by industry trade associations, 4 by law firms representing insured institutions and investment companies, 1 by an economic consultant representing insured institutions, 1 by a state banking regulator, 3 by various entities representing insured institutions, 1 by the American Institute of Certified Public Accountants ("AICPA"), 1 by the Mortgage Securities Corporation of America, Inc., and 1 by the Financial Accounting Standards Board ("FASB").

Most commenters opposed the proposal, although other commenters generally supported the proposal. Both supporters and opponents suggested various substantive and technical modifications to the proposal. A few

commenters suggested alternatives to the proposal. Although the comment period ended on July 7, 1986, the Board has considered late-filed and late-received letters in its efforts to maximize public participation in the rulemaking. After carefully considering the issues raised by the commenters, which are more fully discussed below, the Board has determined to adopt the amendments substantially as proposed with certain modifications and clarifications.

*1. Reporting in Accordance With GAAP*

Although many commenters supported the GAAP reporting requirement, the majority of commenters opposed immediate implementation of the requirement, especially with respect to statements of condition made publicly available at the institution pursuant to 12 CFR 545.115 ("counter statements") and publicly available reports filed within the Board. The latter believed that an immediate return to GAAP reporting would cause a loss of public confidence in the thrift industry and the FSLIC because many insured institutions that currently report positive capital under RAR would report negative capital under GAAP.

A majority of commenters, both supporters and opponents, agreed with the Board's goal of moving the thrift industry closer to GAAP. They urged, however, that the Board gradually phase in GAAP reporting over a period of time ranging from 2 years to 15 years. They contended that many institutions would not have taken advantage of RAR had they known it would be eliminated over time. Thus, they argued that such a phase-in period would allow insured institutions to continue to restructure their balance sheets and would alleviate any adverse publicity that could thwart the ability of insured institutions to raise additional capital in the financial markets.

Similarly, commenters maintained that GAAP reporting would have a significant impact on an institution attempting to sell stock subscriptions in the local market because individual investors would be reluctant to invest in an institution that reports a low or negative GAAP equity capital. Moreover, several commenters contended that the thrift industry has made significant strides in improving earnings and net worth and that a return to GAAP reporting at this time would cause an unwarranted loss of public confidence in many insured institutions. Such a loss of confidence would in turn cause "disintermediation"—or loss of deposits—to other financial institutions and result in a far greater strain on the FSLIC.

The majority of commenters opposed GAAP reporting because of the accounting treatment of deferred loan losses under GAAP. These commenters noted that many insured institutions, with encouragement from the Board, restructured their portfolios in the early 1980s by selling substantial amounts of low-rate, fixed-rate mortgages and certain other securities at a significant discount and amortized the resulting losses into expense over the remaining contractual term of the asset sold pursuant to 12 CFR 563c.14. Because GAAP requires immediate recognition of the entire loss, many insured institutions would be forced to report a reduced or negative net worth on a GAAP financial statement. The commenters asserted that the long-term accounting treatment of these loan losses under RAR necessitates an extended phase-in period in order to measure fully the benefit of reinvestment and the annual amortization of deferred losses.

Similarly, several commenters opposed GAAP reporting because of the treatment of appraised equity capital under GAAP. Pursuant to 12 CFR 563.13(c), an insured institution may include in regulatory capital an amount that represents the unrecognized appreciation of selected eligible office land, buildings, and improvements used for an institution's own operations. Under GAAP, such unrecognized appreciation is not considered to be capital. Because the amount of capital represented by deferred loan losses and appraised equity capital is substantial in the thrift industry, several commenters suggested that the Board permit the inclusion of deferred loan losses and appraised equity capital in the regulatory capital section of their counter statements and publicly available reports.

One commenter voiced strong opposition to GAAP reporting, arguing that such a requirement will reverse the Board's policy regarding the accounting treatment of net worth certificates ("NWCs") and income capital certificates ("ICCs"). The commenter contended that the Board's reversal of this accounting treatment will violate the rights of those institutions that entered into contracts with the Board to rescue and acquire ailing thrifts and relied on the Board's representations concerning the accounting treatments of NWCs and ICCs. Further, the commenter alleged that the accounting profession is considering whether there should be changes in the accounting treatment of these instruments under GAAP and, therefore, that the Board should delay implementation of any final rule until the Financial Accounting Standards Board ("FASB") makes an authoritative pronouncement on this issue.

Similarly, one commenter opposed GAAP reporting because cash contributions and forbearances acquired in connection with assisted and unassisted mergers would not be included as equity in a GAAP financial statement. The commenter contended that many institutions that merged with troubled institutions did so primarily because of cash assistance and forbearances and because they relied on their continued ability to include these items in their financial statements.

Many commenters specifically opposed GAAP reporting requirements for mutual insured institutions, arguing that such a requirement discriminates against mutual institutions and creates a particular hardship on the large number of mutuals that made major restructuring decisions in the early 1980s based on RAR. Additionally, they contended that GAAP reporting for mutuals does not advance some of the Board's stated goals because mutuals do not have stockholders or investors that have an interest in the institution's GAAP capital position. Therefore, there is no compelling reason to provide investors with a basis on which to analyze and compare the financial statements of mutual institutions with those of stock institutions. Further, they argued that an institution's regulatory capital as reported under RAR is a better measure of risk to the Board and accountholders than that provided by GAAP.

In sum, opponents of GAAP reporting argued that many insured institutions acted in good faith reliance and entered into many transactions, including mergers, on the basis of their continued ability to use RAR in reporting their financial condition. Because many insured institutions devised their long range business plans and made significant financial decisions based on continued availability of RAR, commenters contended that the Board should gradually phase in GAAP reporting to allow the amortization of differentials between GAAP and RAR currently reported on the books of institutions.

In addition to a phase-in period for GAAP reporting, several commenters suggested other alternatives. One commenter suggested that publicly available financial statements be prepared on the basis of a RAR/GAAP dual presentation within the statement,

making specific line item adjustments to RAR to derive financial statements prepared in accordance with GAAP. Several commenters suggested that the Board permit preparation of counter statements and publicly available reports on a RAR basis, with a footnote reconciliation to GAAP. One commenter urged the Board to waive the GAAP reporting requirement for insured institutions with negative GAAP equity capital. Several commenters suggested that the Board exempt mutual institutions from reporting on a GAAP basis. Finally, one commenter suggested that counter statements and publicly available reports should reflect the total regulatory capital within the statement as follows: (1) Equity capital, with a footnote to designate it as equity capital as determined in accordance with GAAP; (2) "definitional capital"; and (3) those capital items recognized by RAR. This commenter contended that such a statement would be an acceptable alternative to a pure GAAP statement and would disclose fully and fairly the financial position of insured institutions.

Although the Board understands the concerns raised by the commenters, the Board continues to believe that GAAP reporting ultimately is in the best interests of the public. As discussed in the proposal, the Board believes that GAAP reporting for all insured institutions will provide the Board with a more consistent, comprehensive basis for analyzing and comparing the financial statements issued by insured institutions and that this method of reporting will also assist the Board in monitoring the performance and soundness of the thrift industry. Further, the Board believes that GAAP reporting will benefit readers and users of financial statements by providing recognized, comparable data and, consequently, will provide credibility for those institutions seeking access to the capital markets.

A number of concerns unique to the Board's regulatory role in evaluating risk to the FSLIC led it to permit insured institutions to depart from GAAP in certain instances. Although insured institutions, especially mutual institutions, claim that they made decisions in reliance on continued use of RAR, the Board does not believe that such reliance provides justification for continued departures from GAAP reporting. The Board emphasizes that even though certain RAR items are not included in GAAP equity capital, these items are included in regulatory capital, and the Board relies primarily upon regulatory capital in assessing an insured institution's financial condition. Further, the Board utilizes regulatory capital to determine an institution's compliance with the Board's regulatory capital requirements under § 563.13, as amended by Board Res. No. 86-857. Because the Board is continuing to allow insured institutions to include both definitional capital and certain RAR items in regulatory capital, the Board is not persuaded by the reliance argument expressed by commenters. Moreover, the Board disagrees that the GAAP reporting requirement will hinder the ability of insured institutions to sell stock subscriptions in the capital markets because institutions must comply with GAAP for such transactions under the federal securities laws and the Board's existing regulations. *See* 12 CFR Part 563c (1986).

The Board recognizes that many insured institutions are reluctant to move immediately to GAAP reporting because they fear that the public will react adversely to the less favorable GAAP financial condition of many insured institutions. The Board believes, however, that public confidence in the thrift industry will be enhanced by the use of consistent GAAP reporting and disclosure. In recent years, the Board and the thrift industry have been criticized for employing regulatory accounting techniques that are perceived to misrepresent the true financial condition of insured institutions. The Board believes that the negative press resulting from this criticism has caused an erosion of public confidence in the thrift industry. In the Board's experience, those insured institutions with low or negative GAAP capital positions have not suffered from severe deposit flights and consequently have not presented a serious threat to the FSLIC because of such flights. The Board generally believes that there is a high degree of public confidence in the FSLIC, and, in the Board's view, full and fair disclosure under GAAP by insured institutions, will better serve the public, the thrift industry, and the FSLIC.

Further, the Board notes that regulatory reports filed with the Board are currently prepared on an RAR basis. Under the Freedom of Information Act such reports are available to the public and, because items such as definitional capital, deferred loan losses, and appraised equity capital are segmented by the reporting system, an approximation of the GAAP equity capital position can be derived from such reports. Therefore, in effect, approximations of the GAAP equity position of individual institutions and the industry as a whole are currently available to the public.

Accordingly, the Board has determined that all financial statements and reports issued by insured institutions or filed with the Board for all periods beginning on or after January 1, 1988, shall be prepared in accordance with GAAP and shall include a footnote reconciliation of GAAP equity capital to regulatory capital. This includes all financial statements issued by insured institutions subject to the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*), all audited financial statements and reports filed pursuant to Bulletin PA-7a, all financial reports that must be filed with the Board, and all counter statements prepared by insured institutions. The Board wishes to emphasize, however, that additional disclosures may be necessary on a case-by-case basis for securities filings.

Moreover, the Board has determined that all counter statements prepared by insured institutions shall include in bold type on the body of the statement the following language: "The Federal Savings and Loan Insurance Corporation ("FSLIC") insures all depositors' savings up to $100,000 in accordance with the rules and regulations of the FSLIC." Additionally, the footnote reconciliation of equity capital to regulatory capital contained in the counter statement shall include the following language: "Regulatory capital is the basis by which the Federal Home Loan Bank Board determines whether an institution is insolvent, and whether an institution is meeting its regulatory capital requirement."

In the Board's view, the inclusion of this additional language in the counter statement prepared by insured institutions will assure depositors that their savings are insured by the FSLIC and will also serve to inform both investors and depositors of the amount of an institution's regulatory capital and that such regulatory capital is the basis by which the Board evaluates an institution's capital position.

*2. The Components of Regulatory Capital*

The majority of comments supported the proposed calculation of regulatory capital but suggested several modifications to the proposal. Several commenters, while acknowledging the need to revise the current definition of regulatory capital, advocated that the Board require institutions to maintain both a "primary" and "total" capital requirement, thereby adopting the structure employed by the commercial banking regulators. Under one commenter's specific proposal, components of an institution's "primary"

capital would include equity capital (consisting of permanent preferred stock and common stock, paid-in surplus, reserves, and retained earnings), as well as ICCs, mutual capital certificates, appraised equity capital, nonwithdrawable accounts, NWCs, unallocated loan loss reserves, minority interests in consolidated subsidiaries, deferred tax liabilities, deferred loan fees, goodwill and other intangible assets, and an amount of subordinated debt that equals no more than 50 percent of primary capital exclusive of such subordinated debt. Assets classified as loss would be subtracted from primary capital.

"Total" capital would consist of all the components of primary capital plus components of "secondary" capital, which would include all subordinated debt not included in primary capital, as well as nonpermanent preferred stock. Under this proposal, insured institutions would be required to meet a 5.5 percent primary capital ratio and a 6 percent total capital ratio.

The definition of regulatory capital suggested by the commenters included certain items not included in the Board's proposed definition and, in some cases, not included by the bank regulatory agencies. The Board will address most of those items separately below. With respect to the general suggestion that capital be defined as primary capital and total capital, the Board notes that, traditionally and historically, the Board's minimum regulatory capital requirements for insured institutions have been based upon total regulatory capital, as defined by the Board. The components previously included in "net worth" and which continue to be included as regulatory capital include those items that as a whole, in the Board's view, provide adequate protection to insured institutions and serve to buffer the FSLIC from loss. Consequently, the Board believes that the bank regulatory formula for capital is not an appropriate model to use in establishing adequate capital reserves for insured institutions.

Although the Board is revising its definition of regulatory capital and its regulatory capital requirements, the basic principles involved have not changed. The Board continues to believe that certain items do not provide the FSLIC with the same degree of protection as permanent capital items. The commenters' definition of total capital includes all subordinated debt and nonpermanent preferred stock. The Board does not believe that the total amount of these items should be included in computing regulatory capital and the minimal regulatory capital requirements of insured institutions. While the Board recognizes that subordinated debt affords protection to the FSLIC in the event of the insolvency of an insured institution, the Board believes that the use of an amortization schedule that reduces the amount of subordinated debt includable in regulatory capital as the subordinated debt approaches maturity appropriately recognizes that subordinated debt is a nonpermanent liability that must be repaid upon maturity. Similarly, the Board believes that nonpermanent preferred stock, in terms of the degree of protection it affords the FSLIC, should be treated in the same manner as subordinated debt. Accordingly, the Board does not agree that capital should be defined in the manner suggested by the commenters and, therefore, has determined that an insured institution's regulatory capital requirements should continue to be based on regulatory capital, as defined herein.

a. *Deferred loan fees and deferred income taxes.* Several commenters suggested that deferred loan fees and deferred income taxes be included as components of regulatory capital, contending that these items serve to buffer institutions and the FSLIC from losses and thus provide the FSLIC with protection analogous to traditional equity capital and definitional capital. Further, these commenters argued that under the proposed FASB treatment of deferred loan fees and deferred income taxes the true financial condition of an insured institution could be understated.

Since the issuance of the proposal, the FASB has issued Statement of Financial Accounting Standards No. 91, *Accounting for Nonrefundable Fees and Costs Associated With Originating or Acquiring Loans and Initial Direct Costs of Leases* (Dec. 1986) ("SFAS No. 91"). SFAS No. 91 generally requires an institution to defer all loan origination and commitment fees and recognize them by the interest method over the contractual life of the related loan as an adjustment to yield. Incremental direct costs (narrowly defined) of originating or acquiring a loan are capitalized and recognized by the interest method as a reduction of the loan's yield. With respect to deferred income taxes, the FASB proposal on income taxes would reject the indefinite reversal concepts of Accounting Principles Board ("APB") Opinion No. 23 and would require a deferred tax liability to be established for all previous deductions known as bad debt reserves, thereby significantly reducing the net worth of the thrift industry. *See* Proposed Statement of Financial Accounting Standards, *Accounting for Income Taxes Exposure*, Draft (Sept. 2, 1986).[1]

Although the Board recognizes the concerns raised by the commenters, it believes that such concerns are premature. The FASB's adoption of SFAS No. 91 for loan fees will not affect the computation of regulatory capital for insured institutions, because they may continue to include the RAR/GAAP differential for loan origination and commitment fees in computing their regulatory capital. The Board is of the view that deferred loan fees should not be included in regulatory capital because, by definition, any deferred fees have been deemed to be yield adjustments since the insured institution already has recognized the acquisition credits pursuant to 12 CFR 563.23–1. Accordingly, the Board is of the view that deferred loan fees should be recognized over the term of the asset as interest income and, therefore, should not be included as a component of regulatory capital. The Board notes, however, that it may determine at a future date to eliminate the RAR/GAAP differential for loan fees.

Under GAAP, an insured institution must provide amounts for deferred taxes for differences between income that is reflected in financial statements and income that is recognized in the institution's tax returns. These deferred taxes eventually will be used for future tax liabilities. Consequently, such taxes are a liability and as such do not provide additional protection to the FSLIC. Thus, the Board has determined not to include deferred taxes in regulatory capital. The Board notes, however, that if the FASB requires insured institutions to establish a deferred tax liability account for bad debt reserves, the Board will reconsider this issue and determine whether the amount of deferred taxes specifically set aside for bad-debt reserves should be added back into regulatory capital. The Board recognizes that amounts for deferred taxes set aside for bad debt reserves typically provide additional protection to the FSLIC because, in practice, such taxes are rarely paid.

b. *Minority interests in consolidated subsidiaries.* A few commenters suggested that the Board include minority interests in consolidated subsidiaries as a component of regulatory capital. They contended that

[1] On January 28, 1987, the FASB tentatively decided to depart from the proposal in the Exposure Draft and retain the indefinite reversal concept of APB Opinion No. 23. However, this issue may be readdressed by the FASB at a later date.

this item is included in the primary capital of commercial banks and, therefore, the Board should allow it as a component of regulatory capital for insured institutions.

The Board acknowledges that the banking regulators allow the inclusion of minority interests in equity accounts of consolidated subsidiaries as a component of primary capital. The Board notes, however, that the bank regulatory agencies allow inclusion of this item in primary capital because banks are required to report their holdings in majority owned subsidiaries on a consolidated basis. *See* 12 CFR 3.2(c)(1) (1986); 12 CFR 325.2(h) (1986); 12 CFR Part 225, App. A (1986). Therefore, the inclusion of such minority interests provides capital support to the risk in the consolidated assets. The Board previously has required and continues to require that insured institutions file their regulatory reports to the Board on an unconsolidated basis and report investments in majority owned subsidiaries by the "equity method of accounting," and as a result insured institutions are only including their pro rata interests in the net assets of the majority owned subsidiaries. Thus, minority interests in consolidated subsidiaries do not provide support to the risk in the institution's assets and may not be included as a component of regulatory capital.

Further, the Board stresses that interests that arise when an insured institution transfers unencumbered or overcollateralized assets to a subsidiary in exchange for common stock of that subsidiary may not be included in regulatory capital. In this type of transaction, the subsidiary then sells preferred stock to third parties. The preferred stock becomes a minority interest in a consolidated subsidiary but, in effect, fails to provide any capital support to the consolidated entity inasmuch as the security holders have a preferred claim on sufficient assets to mitigate their risk. Therefore, transactions of this nature may not be included in insured institutions' regulatory capital. The Board also notes that minority interests in these types of transactions are also excluded from capital by the bank regulatory agencies. *See e.g.*, 50 FR 11138, 11141 (Mar. 19, 1985).

c. *Goodwill and other intangibles.* Several commenters favored the inclusion of goodwill and other intangibles in the definition of regulatory capital. One such commenter advocated such consideration on the ground that goodwill accounting for savings institutions is in accordance with GAAP. This commenter also asserted that from the standpoint of precedent, institutions have operated under the assumption that these items would continue to be considered capital for regulatory purposes. Furthermore, because non-lead bank intangible assets count as capital at the commercial bank holding company level, a similar treatment of intangibles for savings institutions is possibly justified. One commenter opposed the inclusion of goodwill and other intangibles, arguing that if the industry is being encouraged to access the capital markets with GAAP financial statements, the definition of regulatory capital should be consistent for all financial institutions that access those capital markets.

The Board notes that the inclusion of goodwill is in accordance with the precepts of GAAP and therefore is properly includable in equity capital.

d. *Annual income payments on capital certificates.* Finally, in reviewing the proposed components of regulatory capital, the Board has determined that accumulated annual income payments on capital certificates not due and payable ("AIPs") should be included in regulatory capital. While this item is not always considered to be equity capital under GAAP, the Board believes that AIPs provide the FSLIC with protection analogous to traditional equity capital and, thus, is amending section 561.13(b)(1) to include this item in definitional capital. The Board notes that insured institutions must report AIPs on their financial statements and reports in accordance with GAAP, which would reduce retained earnings and net income available to common shareholders. However, such amounts would be included in regulatory capital until such time as the AIPs become due and payable. At that point, such amounts would be included in liabilities, thereby reducing regulatory capital.

*3. Pre-Final Rule Risk Analysis Reporting*

a. *Appraised equity capital.* The majority of the several commenters that addressed the Board's proposal regarding the treatment of appraised equity capital as a component of regulatory capital favored the continued inclusion of this item. One commenter argued that the inclusion of appraised equity capital is a significantly more economical and workable alternative to requiring insured institutions to sell and leaseback properties that have appreciated. Another commenter reasoned that if appraised equity capital was a reasonable component of capital during a limited recovery period, then it is equally useful at a time when the Board is raising minimum capital requirements. Concern was also expressed that the more conservative GAAP treatment fails to present a true picture of an institution's financial condition.

One commenter opposed the inclusion of appraised equity capital on the ground that this item does not genuinely aid in the assessment of protection afforded to insurers of the institution. Another commenter similarly opposed the inclusion of this item, citing the fact that the volatility of such appraisal values provide the insurer with less protection than commonly assumed. The latter commenter suggested that if the Board nevertheless continues to include appraised equity capital in regulatory capital the Board should require reappraisals every 3 years to ensure the maintenance of appraised equity.

As the Board noted in the proposal, it believes that the current expiration date for the use of the appraised equity capital rule is appropriate. In promulgating the rule authorizing the inclusion of appraised equity capital in regulatory net worth in 1982, the Board recognized that appraised equity capital represented a real, though unrealized, equity value that would serve to protect the interests of the FSLIC in case of merger or liquidation. The Board took this step in an effort to maintain public confidence in the thrift industry in an unfavorable economic climate. Although a minority of institutions continue to experience financial difficulty, the financial climate has improved dramatically. In 1986, more than 70 percent of all insured institutions were profitable. Consequently, because this rule was designed to bolster net worth during a limited recovery period, the Board allowed the rule to expire on December 31, 1986. Institutions that have included the amount of appraised equity capital in regulatory capital prior to the expiration of the rule may continue to include that appraised equity capital in their capital under the final rule.

b. *Deferral of loan gains and losses.* Several commenters favored the deferral of loan gains and losses in computing regulatory capital, arguing that the cutoff date should be extended beyond the effective date of the proposed regulation. The proposal would have authorized such gain and loss deferrals as a component of regulatory capital only if, and to the extent that, the insured institution had excluded such gains and included such losses prior to the effective date of the final rule.

The deferral and amortization of gains and losses from the sale of mortgage

BEST COPY AVAILABLE

loans and mortgage-related securities was adopted at a time when the sharp rise in mortgage interest rates increased the need of institutions to dispose of such mortgages in economically advantageous ways. This deferral of such loan gains and losses in computing regulatory capital was intended to facilitate the restructuring of insured institutions' portfolios, which were characterized primarily by long-term, fixed-rate mortgage assets. In keeping with the clear intent of this proposal, the Board believes that institutions have had adequate time to reduce future interest-rate risk through well planned mortgage disposition programs. Additionally, in today's favorable interest rate environment, current recognition of gains and losses from asset sales should not significantly inhibit an institution's ability to restructure its portfolio. Accordingly, insured institutions may continue to exclude the unamortized amount of loan gains and to include the unamortized amount of loan losses that were deferred pursuant to 12 CFR 563c.14, provided that the institution has excluded such gains and included such losses in computing its regulatory capital prior to January 1, 1988.

*4. Post-Final Rule Risk Analysis Reporting*

a. *RAR/GAAP differential for loan origination and commitment fees.* Commenters were divided over the proposal permitting institutions to continue including in regulatory capital an amount representing the RAR/GAAP differential for loan origination and commitment fees. One commenter supporting the proposal asserted that the inclusion of the differential will assist the industry in recapitalizing at a faster pace and in meeting higher regulatory capital requirements. A majority of commenters advocated the continued use of the differential on the ground that the FASB had not yet rendered a final determination of appropriate GAAP treatment of loan origination and commitment fees. These commenters noted, however, that the differential should be used only until such a clearly defined GAAP treatment is enunciated and reviewed.

One commenter argued that the proposed treatment of loan fees does not result in either as conservative a measure of capital as produced under GAAP nor in as meaningful a measure of an institution's ability to absorb future losses, which should be primary objectives of the Board. Finally, one commenter suggested that the Board suspend consideration of this matter pending anticipated clarification from the FASB on the treatment of such fees under GAAP.

The Board recognizes the need to measure accurately both an institution's capital and its ability to absorb future losses. However, the Board is reluctant to abandon the application of RAR to loan origination and commitment fees at this time. As several commenters recognized, the Board would be ill advised to switch to a GAAP treatment for these fees in light of the recent changes adopted by the FASB in SFAS No. 91, specifically with respect to such fees. Until the Board can conduct a considered review of such changes to determine their breadth and likely effect, the Board must conclude that the inclusion of the RAR/GAAP differential in regulatory capital provides a more effective tool for analyzing risk of loss to the FSLIC.

b. *Allowance for loan losses.* Several commenters opposed the continued use of RAR with respect to allowance for loan losses pursuant to the Board's classification of assets rule, reevaluation of assets; adjustment of book value and adjustment charges. 12 CFR 561.16c, 571.1a, 563.17–2. A few commenters contended that the Board should accept GAAP as a unified whole and should not deviate from GAAP in those instances when RAR is more conservative. Some commenters argued that the Board's rationale in adopting its regulations on allowance for loan loses is no longer justified as a result of the Board's new minimum regulatory capital requirements for insured institutions.

Several commenters contended that the inclusion of assets classified Substandard in the definition of scheduled items requires an institution to increase its regulatory capital requirements by an amount equal to 20 percent of scheduled items and, consequently, the Board's regulations effectively require a specific loss reserve equal to 20 percent of substandard assets. They alleged that under GAAP and the accounting principles applied to commercial banks, Substandard assets do not warrant specific reserves and, therefore, do not affect the capital of other entities. Additionally, they argued that the Board's need to include Substandard assets as scheduled items is lessened by the Board's new increased minimal capital requirements.

Moreover, these commenters contended that assets classified Loss or Doubtful pursuant to the Board's regulations should not be deducted in computing regulatory capital. They maintained that such a requirement differs from the treatment of these items by commercial banks because commercial banks are permitted to add back loss reserves in calculating their primary capital.

Many commenters urged the Board to allow insured institutions to include unallocated (general) loan loss reserves as a component of regulatory capital. In Board Resolution 86–857, which was adopted on August 15, 1986, the Board amended § 561.13 to clarify that allowances for loan losses constitute a component of regulatory capital. The Board noted, however, that the allowance for loan losses does not include specific reserves of any kind, including those established pursuant to § 561.16c, § 563.17–2, or § 571.1a.

Several commenters urged the Board to adopt GAAP with respect to allowance for loan loses. Specifically, one trade association requested the Board's Office of Regulatory Policy, Oversight and Supervision to rewrite its Memorandum R–41b to conform with GAAP and allow insured institutions to carry a problem loan at the lower of (1) unpaid principal amount, (2) net realizable value, or (3) a carrying value determined in accordance with the provisions of FASB, Statement of Financial Accounting Standards No. 15, *Accounting by Debtors and Creditors for Troubled Debt Restructurings* (June 1977).

At the outset, the Board notes that in adopting its Classification of Assets Regulation, 12 CFR 561.1a, 561.16c, and 563.17–2(b) ("classification regulations"), the Board found that certain assets present an increased risk to insured institutions and the FSLIC and that the classification regulations were necessary to minimize losses to the FSLIC fund. Although the classification regulations became effective on January 30, 1986, the Board specifically solicited "further comments on the general scope of the classification system" and provided for "a 60-day comment period after which, if appropriate, the scope [of the regulations] may be modified, extended or otherwise addressed." 50 FR 53275, 53281 (Dec. 31, 1985).

Today the Board also has proposed a rule which would revise its current regulation governing classification of assets. Bd. Res. No. 87–527, published in the Proposed Rules section of this issue. Under the proposal, assets classified as substandard would no longer be treated as scheduled items and therefore an insured institution would not have to include twenty percent of substandard items in computing the contingency component of its minimum regulatory capital requirement. Additionally, under the proposal, institutions would no longer be required to establish specific

BEST COPY AVAILABLE

allowances for loan losses for items classified as doubtful. The proposal would amend the regulation to require that institutions establish general loss allowances for those assets classified as Substandard and Doubtful. As is provided in the current regulation, the proposal would require institutions to establish specific allowances for assets classified as Loss. As proposed, the rule also provides that if an examiner concludes that the general valuation allowances established by the institution are inadequate, the examiner would determine whether an increase in the amount of general allowances is warranted, subject to PSA review. Further, the proposal would amend the regulatory capital regulation to permit the Supervisory Agent to impose an additional capital requirement on an insured institution based on the quality of its asset portfolio. Finally, the proposal would broaden the scope of the classification of assets regulation to include debt and equity securities and to require valuation allowances to be established for such securities in accordance with FASB Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies.*

The Board today also proposed a rule and policy statement relating to its appraisal policies and policies of insured institutions and service corporations. Board Res. No. 87–528, published in the Proposed Rules section of this issue. This proposal would codify the standards to be used by examiner and supervisory staff in determining compliance with the appraisal requirements of 12 CFR 563.17–1 and 563.17–2. Specifically, the proposal would clarify and simplify the current R–41c guidelines with respect to management policies, appraisal content, appraisal management and related consideration.

In the Board's view, these two proposals address many of the concerns raised by commenters with respect to the definition of regulatory capital. The comment period on the proposals is scheduled to end on July 14, 1987. At that time, the Board will determine what, if any, modifications should be made to its classification of assets regulation and its appraisal standards. Consequently, the Board has determined that it is both premature and inappropriate, at this time, to deviate from RAR with respect to allowances for loan losses pursuant to classification of assets and the Board's appraisal policies.

c. *Uncollected interest.* Several commenters suggested that, in defining regulatory capital, the Board should in no way deviate from GAAP, and should consider the elimination of other accounting principles that depart from GAAP in order to assure the integrity of financial statements and to assuage public perceptions that a piecemeal adoption is merely an accounting device serving to mask financial instability. In advocating strict adherence to GAAP, one commenter specifically urged the Board to employ GAAP to permit uncollected interest to be included as an asset, if it is collectible.

The Board concludes that it is prudent to continue to permit the use of RAR with respect to uncollected interest. Whereas Board regulations provide a time limit after which uncollected interest becomes classified uncollectible, and thus not includable in regulatory capital, GAAP relies heavily on managements' judgment as to the probability of collection of delinquent loans. The Board believes that the former approach represents a more objective, conservative accounting practice that provides insured institutions and the Board with uniform evaluation standards and that prevents the overstatement of income.

*5. Risk Analysis Reporting Forbearances*

Several commenters addressed the Board's proposal to include within regulatory capital RAR forbearances authorized by the Corporation, the Board, or the Principal Supervisory Agents. Some commenters supported the departure from GAAP in this instance because it affords the FSLIC with greater protection and permits the Board to retain needed flexibility to facilitate merger transactions. Other commenters opposed the inclusion of forbearances on the ground that such inclusion would hinder the Board's stated desire to assess risk properly. Two such commenters argued that such forbearances should not be considered as a component of regulatory capital, but should more appropriately be reflected as an adjustment to the minimum regulatory capital requirements set by the Board.

After thorough consideration of the effect such an inclusion of forbearances in regulatory capital may have on its ability to assess risk, the Board has decided to permit insured institutions to include such forbearances in their regulatory capital. Of overriding concern to the Board is the fact that such forbearances are required to facilitate the acquisition of failed institutions. Such a departure from GAAP is consistent with the Board's supervisory objectives and responsibility effectively to monitor risk to the FSLIC. Consequently, the Board's decision to continue to include forbearances as a component of regulatory capital will benefit both the FSLIC and the thrift industry as a whole.

*6. Elimination of Certain Risk Analysis Reporting Requirements*

As noted earier, several commenters suggested that the Board eliminate all RAR and require strict adherence to GAAP in order to assure the integrity of financial statements. While the Board has determined to permit continued adjustments to regulatory capital for certain items, it may determine at a later date to adjust regulatory capital to include or exclude certain other items that the Board determines to be appropriate or inappropriate for risk analysis.

A number of commenters expressed support for the Board's proposal that institutions determine gains or losses arising from futures transactions in accordance with GAAP. One such commenter noted that the elimination of RAR in this regard is an important step that will communicate to the capital markets and the investing public the Board's intent to follow prudent accounting practices.

Two commenters opposed the requirement that insured institutions record and carry marketable equity securities in accordance with GAAP because other assets and liabilities of insured institutions are not marked to market. One law firm requested that the Board permit insured institutions to deviate from GAAP and carry at cost investments in open-end management investment companies registered with the Securities and Exchange Commission ("mutual funds") the portfolio of which consists solely of debt obligations of the U.S. Government or its agencies with maximum remaining maturities at the time of purchase not in excess of 5 years. This commenter argues that if investments in such mutual funds are required to be carried in accordance with GAAP (the lower of aggregate cost or market value) the economics of the investment decision would force institutions to invest directly in liquid assets, thereby reducing protection to the FSLIC as well as thwarting Congressional intent.

The Board, as it stated in the proposal, believes that GAAP more accurately reflects the attendant risk to the FSLIC and that a variance from GAAP in this area does not result in increased protection to the FSLIC. GAAP considers investments in mutual funds to be investments in marketable equity securities and, therefore, such

investments must be carried at the lower of aggregate cost or market value. Although the Board recognizes the concerns raised by the commenters, it has concluded that there should be no deviations from GAAP unless such a deviation would more accurately assess the risk of loss to the FSLIC. Accordingly, insured institutions must report investments in marketable equity securities—including mutual funds—in accordance with GAAP.

*7. Procedural and Technical Comments*

Several commenters generally opposed the proposal due to the timing and overall complexity of the regulation in relation to other pending Board regulations and industry developments. More specifically, commenters urged the Board to delay consideration of the definition of regulatory capital proposal in light of ongoing tax code revisions in the United States Congress, pending accounting policy changes to be announced by the FASB, and current proposals to recapitalize the FSLIC. Commenters thought the proposal untimely in light of these pending developments, other recently proposed and final regulations of the Board, and the uncertain future movement of interest rates.

These commenters recommended that the Board delay further consideration of the proposal until the full impact and scope of these pending developments, and their interrelationship with the Board's proposal concerning regulatory capital requirements, could be properly assessed. Several commenters requested the Board to assemble a joint industry-agency committee or task force to analyze these accounting, legislative, and regulatory proposals prior to the implementation of new regulatory capital regulations.

The Board's role as operating head of the FSLIC is to develop a regulatory framework that balances the thrift industry's competitive need for operating flexibility with the FSLIC's continuing need for controlled risk exposure. Although the Board is mindful of pending legislative and policy developments, the Board is equally cognizant of its responsibility to maintain the solvency of the FSLIC fund.

In developing the proposal, the Board considered the potential impact of these pending legislative, regulatory, and industry developments. The Board's Office of Policy and Economic Research ("OPER") conducted a feasibility study to investigate the extent to which thrift institutions could satisfy the capital requirements set forth in the April 1986 Board proposal regarding regulatory capital requirements. *An Analysis of the Proposed Capital Requirements for Thrift Institutions: A Staff Economic Study* (Aug. 15, 1986) (*"Flexibility Study"*). Although any analysis of the future impact of legislative, regulatory or industry changes must rely on uncertain financial, economic, and legal developments, the *Feasibility Study* merits review.

A thrift's ability to raise capital depends on the long-run profitability of the institution. Staff analysis of the proposed plan to recapitalize the FSLIC fund concluded that such a plan will not have a significant, direct effect on thrift profitability. As proposed, the recapitalization plan will raise substantial funds through the use of public financing and FSLIC premium income. Thus, the plan levies no additional assessments on the industry that would not have been levied in the absence of the plan.

Similarly, staff analysis has concluded that other pending Board regulatory proposals will likely have only a small effect on profitability. Although the scope of pending FASB changes are not known at this time, the proposed amendments were drafted with such uncertainty in mind. With specific regard to loan origination and commitment fees, the Board noted that the FASB was defining GAAP for such fees, and thus the Board authorized the continued use of RAR until such time as the Board can effectively evaluate these accounting procedures in light of FASB changes.

Although continued study and evaluation of every conceivable legislative and industry development might shed some additional light on the effect this rule may have on thrift operating latitude and profitability, this cannot be the Board's sole concern. As the Board noted in the preamble to the proposed rule, the amendments will aid its supervisory efforts in evaluating the viability of insured institutions and the related risk to the FSLIC. The Board believes these amendments sufficiently provide the industry with necessary operating flexibility to meet the challenges of intensified competition, while simultaneously meeting the Board's responsibility to limit the risk exposure to the FSLIC. To the extent pending legislative, policy, or industry developments adversely affect or complicate these regulatory capital amendments, the Board could always reconsider such provisions if necessary.

One commenter voiced its concern over the potential effect of the regulation on small insured institutions, arguing that the Board must comply with the Regulatory Flexibility Act. The Board's regulatory flexibility analysis responding to this concern appears below.

**C. Description of the Final Rule**

The final rule requires that all financial statements issued by insured institutions, including counter statements, and all financial reports filed with the Board, for all periods beginning on or after January 1, 1988, shall be prepared in accordance with GAAP and shall include, in a footnote, a full and fair disclosure of the reconciliation of equity capital, as determined in accordance with GAAP, with regulatory capital.

The final rule defines regulatory capital as the sum of (1) equity capital as determined in accordance with GAAP ("equity capital"), (2) items that serve as the functional equivalents of capital for the FSLIC by providing a buffer against loss, as well as specific capital instruments created by congressional action and Board authority ("definitional capital"), (3) certain other components of capital as the Board determines to be consistent with its risk analysis conventions, and (4) risk analysis reporting forbearances.

*1. Equity Capital*

Equity capital is determined in accordance with GAAP. Equity capital represents the difference between the recorded values of an institution's assets and its liabilities, as determined under GAAP. *See* FASB *Statement of Financial Accounting Concepts No. 6* (Dec. 1985), which sets forth a detailed discussion of equity capital. The Board notes that institutions will continue to use "push-down" accounting as set forth in OES Memorandum No. R 55 and the Board's current accounting procedures for wash sale transactions as set forth in the OES Memorandum No. T 50–8.

*2. Definitional Capital*

Definitional capital includes qualified subordinated debt, qualified redeemable preferred stock, ICCs, mutual capital certificates, NWCs, AIPs, pledged certificates of deposit, allowances for loan losses except specific allowances (including those established pursuant to §§ 561.16c, 563.17–2 and 571.1a of this subchapter) and other nonwithdrawable accounts (excluding any treasury shares held by the insured institution) to the extent such nonwithdrawable accounts are not included in equity capital.

*3. Pre-Final Rule Risk Analysis Reporting*

This category of regulatory capital includes only the components of risk analysis reporting permitted prior to

January 1, 1988 for which further elections cannot be made, including appraised equity capital, the deferral of certain gains and losses pursuant to 12 CFR 563c.14, and certain other practices enumerated in detail below.

a. *Appraised equity capital.* Under this category, an insured institution may add to equity capital the amount of appraised equity capital as defined in 12 CFR 563.13(c), provided that the insured institution had included appraised equity capital as part of its regulatory capital prior to December 31, 1986.

b. *Deferral of asset gains and losses.* In computing its regulatory capital an insured institution may also continue to exclude the unamortized amount of asset gains and to include the unamortized amount of asset losses that were deferred pursuant to 12 CFR 563c.14, provided that the institution has excluded such gains and included such losses in computing its regulatory capital prior to January 1, 1988.

c. *Miscellaneous.* The rule also permits an insured institution to continue to include in regulatory capital amounts reflecting the RAR/GAAP differential for specific items, provided that the insured institution elected to use RAR for these items prior to January 1, 1988. An insured institution may include in its regulatory capital the amount representing the RAR/GAAP differential for the following items: accounting for the sale of real estate developed by the institution or its subsidiary (12 CFR 563.23–1(f)), futures transactions (12 CFR 563.17–4(g)), and accretion of discounts and amortization of premiums on securities (12 CFR 563.23–1(a),(b)).

*4. Post-Final Rule Risk Analysis Reporting*

Insured institutions may also continue to include in their regulatory capital an amount that represents the difference between the treatment of certain items under GAAP and the treatment of those same items under RAR. An insured institution may compute the items in this category under both RAR and GAAP for purposes of regulatory capital. The amount that represents the RAR/GAAP differential for a particular item would be added to or subtracted from equity capital to arrive at regulatory capital.

First, this category includes amounts reflecting the RAR/GAAP differential treatment of loan origination and commitment fees pursuant to newly redesignated 12 CFR 563.23–1(f)(3). The second item in this category is the amount of the RAR/GAAP differential in the treatment of gains or losses realized on options transactions pursuant to 12 CFR 563.17–5(g). Third, institutions shall continue to use RAR with respect to allowance for loan losses pursuant to the Board's classification of assets rule, 12 CFR 561.16c, reevaluation of assets, adjustment of book value, and adjustment charges 12 CFR 563.17–2, and accounting for uncollectible interest with respect to 1–4 family residential mortgage loans pursuant to 12 CFR 563c.11.

*5. Risk Analysis Reporting Forbearances*

Insured institutions may also include in their regulatory capital additional items reflecting forbearances previously authorized, or which may be authorized in the future, by the Corporation, the Board, or the Principal Supervisory Agents. Most of the forbearances included in this category result from FSLIC merger transactions.

*6. Elimination of Certain Risk Analysis Reporting Requirements*

The final rule eliminates altogether prospective authority for insured institutions to rely on five other accounting procedures heretofore permitted by the Board which represent departures from GAAP. First, the Board's accounting regulations, 12 CFR 563.23–1(f) (1986), are eliminated, and insured institutions and their service corporations must account for the sales of real estate developed by the institution or its service corporation in accordance with GAAP. *See* FASB *Statement of Financial Accounting Standards No. 66.* Second, insured institutions must record marketable equity securities in accordance with GAAP. *See* FASB *Statement of Financial Accounting Standards No. 12.* Third, the final rule amends 12 CFR 563.17–4(g) to require institutions to determine gains or losses arising from futures transactions in accordance with GAAP. *See* FASB *Statement of Financial Accounting Standards No. 80.* Fourth, 12 CFR 563.23–1 is amended to require that premiums on securities be amortized and that discounts on securities be accreted in accordance with GAAP. *See* FASB *Statement of Financial Accounting Standards No. 65.* Fifth, the final rule removes obsolete accounting procedures set forth in 12 CFR 563.23–2, which provided for the deferral and amortization of gains and losses on the disposition of securities made for purposes of meeting the Board's liquidity requirements during the period beginning on December 11, 1969, and ending December 31, 1971.

*7. Technical and Procedural Matters*

As discussed above, the final rule requires that all insured institutions file all financial statements and reports with the Board on a GAAP basis with a reconciliation to regulatory capital. The Board, however, wishes to clarify that, for purposes of regulatory reporting to the Board, insured institutions shall continue to file such reports on an unconsolidated basis and report any investments in majority owned subsidiaries by the "equity method of accounting." Further, pursuant to 12 CFR 563c.10, insured institutions with total assets of $10 million or less are not required to use the accrual basis of reporting.

**D. Effective Date of Final Rule**

The final rule becomes effective on January 1, 1988, as of which date all insured institutions shall compute their regulatory capital pursuant to § 561.13. With respect to the GAAP reporting requirement, all financial statements issued by insured institutions subject to the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*), all audited financial statements and reports, all financial reports required to be filed with the Board, and all counter statements prepared by insured institutions for all periods beginning on or after January 1, 1988, shall be prepared in accordance with GAAP and shall include a footnote reconciliation of GAAP equity capital to regulatory capital.

**Final Regulatory Flexibility Analysis**

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 604, the Board is providing the following regulatory flexibility analysis:

1. *Need for and objectives of the rule.* These elements are incorporated above in SUPPLEMENTARY INFORMATION.

2. *Issues raised by comments and agency assessment and response.* These elements are incorporated above in SUPPLEMENTARY INFORMATION.

3. *Significant alternatives minimizing small-entity impact and agency response.* The Small Business Administration defines a small financial institution as "a commercial bank or savings and loan association, the assets of which, for the preceding fiscal year, do not exceed $100 million." 13 CFR 121.13(a). Therefore, small entities to which the final rule applies include insured institutions which had assets totaling $100 million or less as of December 31, 1986, or 1,651 institutions. Because undercapitalization and its attendant problems are no respecter of size, the final rule treats all institutions identically regardless of their size for

the reasons discussed fully in SUPPLEMENTARY INFORMATION. To do otherwise would be fundamentally inconsistent with the objectives of the rule.

**List of Subjects in 12 CFR Parts 545, 561, 563, 563c and 570**

Accounting, Bank deposit insurance, Consumer protection, Credit, Electronic funds transfers, Investments, Manufactured homes, Mortgages, Reporting and recordkeeping requirements, Savings and loan associations and Securities.

Accordingly, the Board hereby amends Part 545, Subchapter C, Parts 561, 563, 563c, and 570, Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

**SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM**

**PART 545—OPERATIONS**

1. The authority citation for 12 CFR Part 545 continues to read as follows:

Authority: Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425a); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402–403, 407, 48 Stat. 1256–1257, 1260, as amended (12 U.S.C. 1725–1726, and 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943–1948 Comp., p. 1071.

2. Section 545.115 is amended by revising paragraph (b) to read as follows:

**§ 545.115 Statement of condition.**

* * * * *

(b) *Format.* The information set forth in a Statement of Condition shall be presented in accordance with generally accepted accounting principles and shall include a full and fair disclosure of the reconciliation of equity capital, as determined in accordance with generally accepted accounting principles, with regulatory capital, as defined in § 561.13 of this chapter. Each statement of condition shall include in bold type in the body of the statement the following language: "The Federal Savings and Loan Insurance Corporation (FSLIC), an agency of the United States Government, insures all depositors' savings up to $100,000 in accordance with the rules and regulations of the FSLIC." In addition, the footnote reconciliation of equity capital to regulatory capital contained in such statements shall include the following language: "Regulatory capital is the basis by which the Federal Home Loan Bank Board determines whether an institution is insolvent, and whether an institution is meeting its regulatory capital requirement."

* * * * *

**SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION**

**PART 561—DEFINITIONS**

3. The authority citation for 12 CFR Part 561 continues to read as follows:

Authority: Sec. 1, 47 Stat. 725, as amended (12 U.S.C. 1421 *et seq.*); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943–1948 Comp., p. 1071.

4. Section 561.13 is revised to read as follows:

**§ 561.13 Regulatory capital.**

Regulatory Capital is the sum of:

(a) Equity capital, as determined in accordance with generally accepted accounting principles ("equity capital");

(b) Definitional capital, which is the sum of:

(1) Income capital certificates, mutual capital certificates (issued pursuant to § 563.7–4 of this subchapter), outstanding net worth certificates issued in accordance with Part 572 of this subchapter or which the Corporation is committed to purchase by virtue of § 572.3(c), accumulated annual income payments on capital certificates not due and payable, pledged certificates of deposit, allowances for loan losses except specific allowances (including those specific allowances established pursuant to §§ 561.16c, 563.17–2, and 571.1a of this subchapter), and any other nonwithdrawable accounts (excluding any Treasury shares held by the insured institution) to the extent such nonwithdrawable accounts are not included in equity capital: *Provided*, that for any nonpermanent instrument qualifying as regulatory capital under paragraph (b)(1) of this § 561.13, either (i) the remaining period to maturity or required redemption (or time of any required sinking fund or other prepayment or reserve allocation with respect to the amount of such prepayment or reserve) is not less than one year, or (ii) the redemption or prepayment is only at the option of the issuing insured institution and such payments would not cause the insured institution to fail or continue to fail to meet its regulatory capital requirement under § 563.13 of this subchapter: *Provided further*, that capital stock may be included as regulatory capital without limitation if it would otherwise qualify but for a provision permitting redemption in the event of a merger, consolidation, or reorganization approved by the Corporation when the issuing institution is not the survivor, or a provision permitting a redemption when the funds for redemption are raised by the issuance of permanent stock;

(2)(i) Subordinated debt securities issued pursuant to § 563.8–1 of this subchapter: *Provided*, that an institution whose application to include subordinated debt in net worth pursuant to § 563.8–1 was approved prior to December 5, 1984, shall be permitted to continue to include 100 percent of the principal amount of such subordinated debt as regulatory capital until the remaining period to maturity (or time of any required sinking fund or other prepayment or reserve allocation with respect to the amount of such prepayment or reserve) is less than one year: *Provided further*, that an institution that had filed a substantially complete application pursuant to § 563.8–1 prior to December 5, 1984, shall be permitted to include 100 percent of the subordinated debt issued pursuant to such application as regulatory capital until the remaining period to maturity (or time of any required sinking fund or other prepayment or reserve allocation with respect to the amount of such prepayment or reserve) is less than one year if such subordinated debt otherwise is in compliance with the requirements of § 563.8–1 and if such application is not amended in any material respect subsequent to December 5, 1984: *Provided further*, that, except as otherwise provided in paragraph (b)(2)(i) of this § 561.13 and unless otherwise approved by the Corporation in writing, subordinated debt securities issued pursuant to § 563.8–1 after December 5, 1984, may be included as regulatory capital only in accordance with the following schedule:

| Years to maturity of outstanding subordinated debt | Percent included in regulatory capital |
|---|---|
| Greater than or equal to 7 | 100 |
| Less than 7 but greater than or equal to 6 | 86 |
| Less than 6 but greater than or equal to 5 | 71 |
| Less than 5 but greater than or equal to 4 | 57 |
| Less than 4 but greater than or equal to 3 | 43 |
| Less than 3 but greater than or equal to 2 | 29 |
| Less than 2 but greater than or equal to 1 | 14 |
| Less than 1 | 0 |

(ii) For purposes of determining the principal amount outstanding of an obligation issued at a discount that exceeds 10 percent of the face amount, the issuing institution shall treat as principal only the gross consideration actually received upon issuance plus the accrued interest not payable until maturity, as of the date of the computation. In the case of an instrument sold at a discount which exceeds 10 percent and which bears no stated rate of interest, the amount which can be added to principal each period is an amount equal to the accrued interest payable computed on the "level-yield" or "interest" method.

(iii) For purposes of computing the amount of subordinated debt includable as regulatory capital pursuant to paragraph (b)(2) of this § 561.13, the issuing institution must determine the effective maturity of each portion of the principal amount outstanding of the subordinated debt which is subject to required sinking fund payments, other required prepayments, and required reserve allocations, and calculate the percentage amount of each portion of the principal amount outstanding which may be included pursuant to the schedule set forth in paragraph (b)(2)(i) of this § 561.13; and

(3)(i) Preferred stock that is redeemable at the option of the issuer (A) which was issued prior to July 23, 1985, or (B) which was issued on or after July 23, 1985: *Provided,* that the form of any security issued on or after July 23, 1985, was approved prior to issuance pursuant to § 563.1 of this subchapter and states that no redemption may be made by the issuing insured institution if, after giving effect to such redemption, the insured institution would fail to meet its regulatory capital requirement under § 563.13 of this subchapter;

(ii) Mandatorily redeemable preferred stock that (A) was issued prior to July 23, 1985, or (B) was issued pursuant to § 563.7–5 of this subchapter on or after July 23, 1985, was approved as to its form prior to issuance pursuant to § 563.1 of this subchapter, and was approved in writing by the Corporation for inclusion as regulatory capital, before or after its issuance, pursuant to § 563.7–5: *Provided,* that unless otherwise approved by the Corporation in writing, mandatorily redeemable preferred stock issued on or after July 23, 1985, may be included as regulatory capital only in accordance with the schedule set forth in paragraph (b)(2)(i) of this § 561.13 and consistent with the provisions of paragraphs (b)(2)(ii) and (2)(iii) of this § 561.13;

(c) The sum of the following items determined in accordance with risk analysis reporting in effect prior to January 1, 1988, and which an insured institution has included in computing and reporting its regulatory capital to the Corporation prior to January 1, 1988:

(1) Appraised equity capital (as defined in § 563.13(c) of this subchapter);

(2) The amount of unamortized loan gains and losses the exclusion or inclusion of which was deferred pursuant to § 563c.14 of this subchapter; and

(3) The amount of the following items computed by an insured institution in accordance with risk analysis reporting in effect prior to January 1, 1988, and included in its financial statements prior to January 1, 1988. An institution may include an amount which represents the sum of the differences between the treatment of the following items under generally accepted accounting principles and the treatment under risk analysis reporting after January 1, 1988:

(i) Sales of real estate developed by the institution or its subsidiary;

(ii) Futures transactions; and

(iii) Accretion of discounts and amortization of premiums on securities.

(d) The amount which represents the sum of the differences between the treatment of the following items under generally accepted accounting principles and the treatment under risk analysis reporting after January 1, 1988:

(1) Loan origination and commitment fees calculated pursuant to § 563.23–1(f)(3) of this subchapter;

(2) Gains or losses realized on options transactions pursuant to § 563.17–5(g) of this subchapter;

(3) Valuation allowances established pursuant to asset classification and appraisals under §§ 561.16c, 563.17–2, and 571.1a of this subchapter;

(4) Uncollectible interest determined pursuant to § 563c.11 of this subchapter; and

(e) Forbearances permitted under risk analysis reporting which shall include all forbearances and other practices authorized by the Corporation, the Board, or its Principal Supervisory Agents.

(f) Notwithstanding paragraphs (a), (b), (c), (d) and (e) of this § 561.13, the term "regulatory capital" does not include any capital instrument or security which may be included as regulatory capital pursuant to any of those paragraphs of § 561.13 if such capital instrument or security is held by a service corporation or other subsidiary, regardless of the organizational form of that entity, in which the insured institution directly or indirectly (1) owns, controls, or holds with power to vote, or holds proxies representing 10 percent or more of the voting shares or rights in such entity, or (2) invested in or contributed to such entity more than 10 percent of such entity's capital, unless inclusion of regulatory capital is specifically approved by the Corporation in writing.

## PART 563—OPERATIONS

5. The authority citation for 12 CFR Part 563 continues to read as follows:

**Authority:** Sec. 1, 47 Stat. 725, as amended (12 U.S.C. 1421 *et seq.*); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

### § 563.17–4 [Amended]

6. Section 563.17–4 is amended by removing paragraph (g).

7. Section 563.23–1 is amended by revising paragraphs (a) and (b) to read as follows; and by removing paragraph (f) and redesignating paragraph (g) as the new paragraph (f):

### § 563.23–1 Premiums, discounts, charges, and credits with respect to loans; sale of real estate; and related items.

(a) *Purchase at a premium.* A premium paid by an insured institution in connection with the acquisition of a loan shall be accounted for in accordance with generally accepted accounting principles.

(b) *Purchase at a discount.* If an insured institution purchases a loan at a discount, the discount shall be deferred by a credit to an account descriptive of deferred income and shall thereafter be credited to income in accordance with generally accepted accounting principles. For purposes of § 563.23–1 a loan shall be deemed to have been purchased at a discount if the price paid for the loan is less than the amount of the loan balance. Any charges by the purchaser in connection with the purchase of a loan shall be deducted from the purchase price to determine the amount of the discount.

* * * * *

### § 563.23–2 [Removed]

8. Part 563 is amended by removing § 563.23–2.

9. Section 563.23–3 is amended by revising paragraph (c); and by adding a new paragraph (d) to read as follows:

§ 563.23-3 Accounting Principles and Procedures.

* * * * *

(c) Prepare all financial statements and financial reports to the Corporation on the basis of generally accepted accounting principles and include in all such financial statements and reports a full and fair disclosure of the reconciliation of equity capital, as determined in accordance with generally accepted accounting principles, to regulatory capital, as defined in § 561.13 of this subchapter; and

(d) Prepare its Statement of Condition in accordance with generally accepted accounting principles and include in a footnote to such statement a full and fair disclosure of the reconciliation of equity capital, as determined in accordance with generally accepted accounting principles, with regulatory capital, as defined in § 561.13 of this chapter. Each statement of condition shall include in bold type in the body of the statement the following language: "The Federal Savings and Loan Insurance Corporation ("FSLIC"), an agency of the U.S. government, insures all depositors' savings up to $100,000 in accordance with the rules and the regulations of the FSLIC." In addition, the footnote reconciliation of equity capital to regulatory capital contained in such statements shall include the following language: "Regulatory capital is the basis by which the Federal Home Loan Bank Board determines whether an institution is insolvent, and whether an institution is meeting its regulatory capital requirement."

## PART 563c—ACCOUNTING REQUIREMENTS

10. The authority citation for Part 563c is revised to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402–403, 407, 48 Stat. 1256–1257, 1260, as amended (12 U.S.C. 1725–1726, 1730); secs. 3(b), 12–14, 23, 48 Stat. 882, 892, 894–895, 901, as amended (15 U.S.C. 78c(b), m, n, w); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

11. Section 563c.14 is amended by adding a new paragraph (f) to read as follows:.

§ 563c.14 Accounting for gains and losses on the sale or other disposition of mortgage loans, redeemable ground-rent leases, and certain securities; matching the amortization of discounts and losses.

* * * * *

(f) *"Sunset" and "Grandfather" Provisions.* Authority to exclude the unamortized amount of gain deferrals and to include the unamortized amount of loss deferrals pursuant to § 561.13 in computing an institution's regulatory capital will cease as of January 1, 1988. Any insured institution that has excluded gain deferrals and included loss deferrals in computing its regulatory capital as of January 1, 1988, may continue to exclude the unamortized amount of such gain deferrals and include the unamortized amount of such loss deferrals in computing its regulatory capital after January 1, 1988.

## PART 570—BOARD RULINGS

16. The authority citation for Part 570 is revised to read as follows:

Authority: Secs. 552, 559, 80 Stat. 383, 388, as amended (5 U.S.C. 552, 559); sec. 11, 47 Stat. 733, as amended (12 U.S.C. 1431); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–403, 405, 407, 48 Stat. 1255–1257, 1259–1260, as amended (12 U.S.C. 1724–1726, 1728, 1730); sec. 414, as added by sec. 522, 94 Stat. 165, as amended (12 U.S.C. 1730g); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

13. Section 570.4 is amended by revising the heading of the section and paragraph (a) to read as follows:

§ 570.4 Regulatory capital.

(a) The term "regulatory capital" is defined in § 561.13 of this subchapter to mean the sum of equity capital as determined in accordance with generally accepted accounting principles, definitional capital, certain other components of capital as the Board determines consistent with its risk analysis conventions, and risk analysis reporting forbearances. To the extent regulatory capital includes reserves (except specific or valuation reserves), the rules set forth in paragraphs (b) and (c) of this section 570.4 shall apply.

* * * * *

By the Federal Home Loan Bank Board.

**Nadine Y. Washington,**

*Acting Secretary.*

## SMALL BUSINESS ADMINISTRATION

### 13 CFR Part 101

[Revision 2; Amdt. 46]

### Delegation of Authority To Conduct Program Activities in Field Offices; Surety Guarantee

**AGENCY:** Small Business Administration.

**ACTION:** Final rule.

**SUMMARY:** This final rule revises 13 CFR Part 101, § 101.3-2, Part III, Section C—Surety Guarantee to conform it to § 18014 of the Consolidated Omnibus Reconciliation Act of 1985 (Pub. L. 99-272, approved April 7, 1986), which increased the amount of the contracts which SBA is permitted to guarantee from $1,000,000 to $1,250,000. This rule increases delegated authority, as applicable, from $1,000,000 to $1,250,000; from $500,000 to $750,000; and from $250,000 to $500,000.

**EFFECTIVE DATE:** May 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Howard F. Huegel, Director, Office of Surety Guarantees, Small Business Administration, 4040 No. Fairfax Drive, Arlington, VA 22203, telephone (703) 235-2900.

**SUPPLEMENTARY INFORMATION:** Part 101 consists of rules relating to the Agency's organization, management and procedures; therefore, notice of proposed rulemaking, public participation and reviews under Executive Order 12291 or the Regulatory Flexibility Act, 5 U.S.C. 501, et seq., are not required and this amendment is adopted without resort to those procedures. This final rule does not contain recordkeeping requirements subject to the Paperwork Reduction Act 44 U.S.C. Chapter 35.

### List of Subjects in 13 CFR Part 101

Authority delegations (Government agencies), Administrative practice and procedure, Organization and functions (Government agencies).

## PART 101—[AMENDED]

1. The authority citations for 13 CFR Part 101 continues to read as follows:

Authority: Secs. 4 and 5, Pub. L. 85-536, 72 Stat. 384 and 385 (15 U.S.C. 633 and 634, as amended); Sec. 308, Pub. L. 85-699, 72 Stat. 694 (15 U.S.C. 687, as amended); Sec. 5(b)(11), Pub. L. 93-386 and 5 U.S.C. 552.

§ 101.3-2 [Amended]

In 13 CFR 101.3-2, Part III, Section C—Surety Guarantee Items A through H are revised to read as follows:

1.* * *

| | |
|---|---|
| a. Regional Administrator | $1,250,000 |
| b. Deputy Regional Administrator | 1,250,000 |
| c. Assistant Regional Administrator/FVI, except Atlanta and Seattle R.O.'s | 750,000 |
| d. Assistant Regional Administrator/FSI, Atlanta and Seattle R.O.'s only | 1,250,000 |
| e. Supervisory Surety Bond Guarantee Specialist, Philadelphia R.O. only | 750,000 |
| f. Surety Bond Coordinator, Atlanta and Seattle R.O.'s only | 750,000 |
| g. Senior Surety Bond Guarantee Specialist | 500,000 |
| h. Surety Bond Officer | 500,000 |

Date: April 28, 1987.

## FEDERAL TRADE COMMISSION

### 16 CFR Part 436

### Regulatory Flexibility Act Review of Franchise Rule

**AGENCY:** Federal Trade Commission.

**ACTION:** Notice of results of Regulatory Flexibility Act Review of the Franchise Rule.

**SUMMARY:** In accordance with the Regulatory Flexibility Act, (5 U.S.C. 601 et seq.) the Federal Trade Commission solicited comments during the period February 24, 1986, through April 25, 1986, on whether the Trade Regulation Rule entitled "Disclosure Requirements and Prohibitions Concerning Franchising and Business Opportunity Ventures" (16 CFR Part 436) has had a significant economic impact on a substantial number of small entities and, if it has, whether the Rule should be rescinded or amended to minimize any such significant economic impact on small entities (51 FR 6421). The Commission concluded that no modification of the Rule was warranted.

**FOR FURTHER INFORMATION CONTACT:** John M. Tifford, Rule Coordinator for Franchising, Federal Trade Commission, 6th and Pennsylvania Avenue, NW., Washington, DC 20580. Telephone: (202) 326-3032.

**ADDRESS:** Copies of the comments and two impact evaluation studies are available at the Public Reference Room 130 at the above address.

**SUPPLEMENTARY INFORMATION:** The Regulatory Flexibility Act, Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601 et seq. (RFA) requires that the Federal Trade Commission conduct a periodic review of rules which have or may have a significant economic impact upon a substantial number of small entities.

On December 21, 1978, the Federal Trade Commission promulgated the Franchise Rule (16 CFR Part 436). The Rule, which became effective on October 21, 1979, requires franchisors and franchise brokers to furnish prospective franchisees with information about the franchisor, the franchise business and the terms of the franchise agreement. Franchisors and franchise brokers must furnish additional information if they make any claim about actual or potential earnings, either to the prospective franchisee or in the media. All disclosures must be made: (i) Before any sale is made and (ii) by means of disclosure documents whose form and content are set forth in the Rule.

The Federal Trade Commission, in accordance with the RFA, solicited comments on whether the Rule has had a significant economic impact on a substantial number of small entities and, if it has, whether the Rule should be amended to minimize any significant economic impact on small entities (51 FR 6421). Attention was directed to two impact evaluation studies of the Rule which were conducted for the Commission by independent research organizations.

Questions posed were: (1) Whether the Rule has had a significant economic impact on a substantial number of small entities; (2) whether there was a continued need for the Rule and all its requirements; (3) what burdens, if any, compliance with the Rule places on small entities; (4) what changes, if any, should be made to minimize any economic impact the Rule has on small businesses; (5) to what extent the Rule overlaps, duplicates or conflicts with other federal, state and local government rules; (6) whether any changed conditions have occurred that affect the Rule; and (7) whether three million dollars is an appropriate size standard for the RFA review.

While the comments contained general suggestions concerning possible modifications of the disclosure documents or of the Commission's enforcement policies, no changes to the Rule were suggested that would specifically minimize the impact on small entities. In addition, two commentators suggested that the Rule pre-empt state franchise disclosure laws, alleging that such laws are costly, burdensome, economically inefficient and do not enhance consumer protection or furnish information not now required by the Rule. The Commission considered and rejected pre-emption at the time of the Rule's promulgation in December 1978, choosing, instead, to establish a minimum standard of disclosure application to all states and permitting each state to take whatever additional measures it deemed appropriate for particular local needs. Insufficient evidence has been presented, to date, to demonstrate the need to reevaluate the Commission's current policy, especially in the context of an analysis directed specifically at the impact of the Rule on small entities.

Ten comments were submitted. These comments and the two studies indicate the Rule provides substantial benefits for both franchisors and prospective franchisees, that there is a continuing need for the Rule, that the Rule is accomplishing the objectives contemplated by Congress and the Commission, that the Rule serves the interests of both franchisors and prospective franchisees and that any burdens imposed by the Rule are outweighed by the benefits to both franchisors and prospective franchisees. Accordingly, the Commission has no basis to conclude that the Rule has had a significant economic impact on a substantial number of small entities sufficient to warrant modification.

## EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

### 29 CFR Part 1601

### Filing of Charges; Technical Amendment

**AGENCY:** Equal Employment Opportunity Commission.

**ACTION:** Final rule; technical amendment; correction.

**SUMMARY:** This final rule corrects references in the text of § 1601.13 in order to conform to a recent amendment of that section which redesignated two of its paragraphs.

**EFFECTIVE DATE:** May 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Nicholas M. Inzeo, Assistant Legal Counsel, or Thomas J. Schlageter, Staff Attorney, at (202) 634-6592.

**SUPPLEMENTARY INFORMATION:** On March 31, 1987 (52 FR 10224), EEOC published a revision of § 1601.13(a) deleting former paragraph (a)(3) and redesignating paragraphs (a)(4) and (a)(5) as paragraphs (a)(3) and (a)(4). This technical amendment is issued to conform the references in the text of the section to the redesignations made by the March 31, 1987 final rule.

BILLING CODE 6760–01–M

## PENSION BENEFIT GUARANTY CORPORATION

### 29 CFR Part 2619

### Valuation of Plan Benefits in Single-Employer Plans; Amendment Adopting Additional PBGC Rates

**AGENCY:** Pension Benefit Guaranty Corporation.

**ACTION:** Final rule.

**SUMMARY:** This amendment to the regulation on Valuation of Plan Benefits in Single-Employer Plans contains the interest rates and factors for the period beginning June 1, 1987. The use of these interest rates and factors to value benefits is mandatory for some terminating single-employer pension plans and optional for others. The PBGC adjusts the interest rates and factors periodically to reflect changes in financial and annuity markets. This amendment adopts the rates and factors applicable to plans that terminate on or after June 1, 1987, and will remain in effect until the PBGC issues new interest rates and factors.

**EFFECTIVE DATE:** June 1, 1987.

**FOR FURTHER INFORMATION CONTACT:** John Foster, Attorney, Corporate Policy and Regulations Department, Code 35400, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202–778–8850 (202–778–8859 for TTY and TDD). These are not toll-free numbers.

**SUPPLEMENTARY INFORMATION:** The PBGC's regulation on the valuation of plan benefits in single-employer plans (29 CFR Part 2619) sets forth the methods for valuing plan benefits of terminating single-employer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Although the amendments to Title IV effected by the Single-Employer Pension Plan Amendments Act of 1986 ("SEPPAA") change significantly the rules for terminating single-employer plans, the valuation rules are much the same. (SEPPAA applies to all plan terminations initiated on or after January 1, 1986.) Under amended ERISA section 4041(c), all plans wishing to terminate in a distress termination (like all insufficient plans under prior law) must value guaranteed benefits and (new under SEPPAA) benefit commitments under the plan using the formulas set forth in Part 2619. Plans terminating in a standard termination may, for purposes of the notice given to the PBGC, use these formulas to value benefit commitments, although this is not required. (Such plans may value benefit commitments that are payable as annuities on the basis of a qualifying bid obtained from an insurer.)

Appendix B in Part 2619 sets forth the interest rates and factors that are to be used in the formulas contained in the regulation. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

The rates and factors currently in use have been in effect since March 1, 1987 (52 FR 4617 (February 13, 1987)). Changes in the financial and annuity markets now require an increase in those rates. Accordingly, this amendment adds to Appendix B a new set of interest rates and factors for valuing benefits in plans that terminate on or after June 1, 1987, which set reflects an increase of ¼ percent in the immediate interest rate to 7½ percent.

Generally, the interest rates and factors will be in effect for at least one month. However, any published rates and factors will remain in effect until such time as the PBGC publishes another amendment changing them. Any change in the rates normally will be published in the **Federal Register** by the 15th of the month preceding the effective date of the new rates or as close to that date as circumstances permit.

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This finding is based on the need to determine and issue new interest rates and factors promptly so that the rates can reflect, as accurately as possible, current market conditions.

Because of the need to provide immediate guidance for the valuation of benefits in plans that will terminate on or after June 1, 1987, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

### List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, Pensions.

In consideration of the foregoing, Part 2619 of Chapter XXVI, Title 29, Code of Federal Regulations, is hereby amended as follows:

## PART 2619—[AMENDED]

1. The authority citation for Part 2619 is revised to read as follows:

**Authority:** 29 U.S.C. 1301(a), 1302(b)(3), 1341, 1344, 1362, as amended by secs. 11004(a), 11007–11009, 11016(c)(12)–(c)(13) and 11011(a), Pub. L. 99–272, 100 Stat. 239–240, 244–252, 274 and 253–257.

2. Rate Set 67 of Appendix B is revised and Rate Set 68 of Appendix B is added to read as follows. The introductory text is shown for the convenience of the reader and remains unchanged.

### Appendix B—Interest Rates and Quantities Used to Value Immediate and Deferred Annuities

In the table that follows, the immediate annuity rate is used to value immediate annuities, to compute the quantity "$G_T$" for deferred annuities and to value both portions of a refund annuity. An interest rate of 5% shall be used to value death benefits other than the decreasing term insurance portion of a refund annuity. For deferred annuities, $k_1$, $k_2$, $k_3$, $n_1$, and $n_2$ are defined in § 2619.45.

good cause exists for making the rates

| Rate set | For plans With a Valuation Date | | Immediate annuity rate (percent) | Deferred annuities | | | | |
|---|---|---|---|---|---|---|---|---|
| | On or after | and before | | $k_1$ | $k_2$ | $k_3$ | $n_1$ | $n_2$ |
| • • • • • • • • | | | | | | | | |
| 67 | 3-1-87 | 6-1-87 | 7.25 | 1.0650 | 1.0525 | 1.0400 | 7 | 8 |
| 68 | 6-1-87 | | 7.50 | 1.0675 | 1.0550 | 1.0400 | 7 | 8 |

BILLING CODE 7708-01-M

## 29 CFR Part 2676

## Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal; Interest Rates

**AGENCY:** Pension Benefit Guaranty Corporation.

**ACTION:** Final rule.

**SUMMARY:** This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR Part 2676). The regulation prescribes rules for valuing benefits and certain assets of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month. On or about the fifteenth of each month, the PBGC publishes a new entry in the table for the following month, whether or not the rates are changing. This amendment adds to the table the rate series for the month of June 1987.

**EFFECTIVE DATE:** June 1, 1987.

**FOR FURTHER INFORMATION CONTACT:** Deborah C. Murphy, Attorney, Corporate Policy and Regulations Department (35400), Pension Benefit Guaranty Corporation 2020 K Street, NW., Washington DC 20006; 202-778-8850 (202-778-8859 for TTY and TDD). (These are not toll-free numbers.)

**SUPPLEMENTARY INFORMATION:** The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (*See* 5 U.S.C. 533 (b) and (d).)

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competiton, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

### List of Subjects in 29 CFR Part 2676

Employee benefit plans, Pensions.

In consideration of the foregoing, Part 2676 of Subchapter H of Chapter XXVI of Title 29, Code of Federal Regulations, is amended as follows:

### PART 2676—VALUATION OF PLAN BENEFITS AND PLAN ASSETS FOLLOWING MASS WITHDRAWAL

1. The authority citation for Part 2676 continues to read as follows:

**Authority:** 29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1).

2. In § 2676.15, paragraph (c) is amended by adding to the end of the table of interest rates therein the following new entry:

**§ 2676.15 Interest.**

BILLING CODE 7708-01-M

## VETERANS ADMINISTRATION

## 38 CFR Part 36

## Increase in Maximum Permissible Interest Rates on Guaranteed Manufactured Home Loans, Home and Condominium Loans, and Home Improvement Loans

**AGENCY:** Veterans Administration.

**ACTION:** Final regulations.

**SUMMARY:** The VA (Veterans Administration) is increasing the maximum interest rates on guaranteed manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans. In addition, the maximum interest rates applicable to fixed payment and graduated payment home and condominium loans, and to home improvement and energy conservation loans are also increased. These increases are necessary because previous rates were not competitive enough to induce lenders to make guaranteed or insured home loans without substantial discounts, or to make manufactured home loans. The increase in the interest rates will assure a continuing supply of funds for home mortgages, home improvement and manufactured home loans.

**EFFECTIVE DATE:** May 11, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mr. George D. Moerman, Loan Guaranty Service (264), Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-3042.

**SUPPLEMENTARY INFORMATION:** The Administrator is required by section 1819(f), title 38, United States Code, to establish maximum interest rates for

manufactured home loans guaranteed by the VA as he finds the manufactured home loan capital markets demand. Recent market indicators—including the prime rate, the general increase in interest rates charged on conventional manufactured home loans, and the increase in other short-term and long-term interest rates—have shown that the manufactured home capital markets have become more restrictive. It is now necessary to increase the interest rates on manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans in order to assure an adequate supply of funds from lenders and investors to make these types of VA loans.

The Administrator is also required by section 1803(c), title 38, United States Code, to establish maximum interest rates for home and condominium loans, including graduated payment mortgage loans, and for loans for home improvement purposes. Recent market indicators—including the rate of discount charged by lenders on VA loans and the general increase in interest rates charged by lenders on conventional loans, have shown that the mortgage money market has become more restrictive. The maximum rates in effect for VA guaranteed home and condominium loans and those for energy conservation and home improvement purposes have not been sufficiently competitive to induce private sector lenders to make these types of VA guaranteed or insured loans without imposing substantial discounts. To assure a continuing supply of funds for home mortgages through the VA loan guaranty program, it has been determined that an increase in the maximum permissible rates applicable to home and improvement loans is necessary. The increased return to the lender will make VA loans competitive with other available investments and assure a continuing supply of funds for guaranteed and insured mortgages.

**Regulatory Flexibility Act/Executive Order 12291**

For the reasons discussed in the May 7, 1981 **Federal Register** (46 FR 25443), it has previously been determined that final regulations of this type which change the maximum interest rates for loans guaranteed, insured, or made pursuant to chapter 37 of title 38, United States Code, are not subject to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601–612.

These regulatory amendments have also been reviewed under the provisions of Executive Order 12291. The VA finds that they do not come within the definition of a "major rule" as defined in that Order. The existing process of informal consultation among representatives within the Executive Office of the President, OMB, the VA and the Department of Housing and Urban Development has been determined to be adequate to satisfy the intent of this Executive Order for this category of regulations. This alternative consultation process permits timely rate adjustments with minimal risk of premature disclosure. In summary, this consultation process will fulfill the intent of the Executive Order while still permitting compliance with statutory responsibilities for timely rate adjustments and a stable flow of mortgage credit at rates consistent with the market.

These final regulations come within exceptions to the general VA policy of prior publication of proposed rules as contained in 38 CFR 1.12. The publication of notice of a regulatory change in the VA maximum interest rates for VA guaranteed, insured, and direct home and condominium loans, loans for energy conservation and other home improvement purposes, and loans for manufactured home purposes would create an acute shortage of funds pending the final rule publication date which would necessarily be more than 30 days after publication in proposed form. Accordingly, it has been determined that publication of proposed regulations prior to publication of final regulations is impracticable, unnecessary, and contrary to the public interest.

(Catalog of Federal Domestic Assistance Program numbers, 64.113, 64.114, and 64.119)

These regulations are adopted under authority granted to the Administrator by sections 210(c), 1803(c)(1), 1811(d)(1) and 1819 (f) and (g) of title 38, United States Code. The regulations are clearly within that statutory authority and are consistent with Congressional intent.

These increases are accomplished by amending §§ 36.4212(a) (1), (2), and (3), and 36.4311 (a), (b), and (c), and 36.4503(a), title 38, Code of Federal Regulations.

**List of Subjects in 38 CFR Part 36**

Condominiums, Handicapped, Housing, Loan Programs—housing and community development, Manufactured homes, Veterans.

Approved: May 8, 1987.

By direction of the Administrator:

**James E. DeWire,**

*Chief of Staff, Veterans Administration.*

**PART 36—[AMENDED]**

38 CFR Part 36, Loan Guaranty, is amended as follows:

1. In § 36.4212, paragraph (a) is revised as follows:

**§ 36.4212 Interest rates and late charges.**

(a) The interest rate charged the borrower on a loan guaranteed or insured pursuant to 38 U.S.C. 1819 may not exceed the following maxima except on loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration prior to the respective effective date: (38 U.S.C. 1819(f))

(1) Effective May 11, 1987, 12½ percent simple interest per annum for a loan which finances the purchase of a manufactured home unit only.

(2) Effective May 11, 1987, 12 percent simple interest per annum for a loan which finances the purchase of a lot only and the cost of necessary site preparation, if any.

(3) Effective May 11, 1987, 12 percent simple interest per annum for a loan which will finance the simultaneous acquisition of a manufactured home and a lot and/or the site preparation necessary to make a lot acceptable as the site for the manufactured home.

* * * * *

2. In § 36.4311, paragraphs (a), (b), and (c) are revised as follows:

**§ 36.4311 Interest rates.**

(a) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the VA which specify an interest rate in excess of 10 per centum per annum, effective May 11, 1987, the interest rate on any home or condominium loan, other than a graduated payment mortgage loan, guaranteed or insured wholly or in part on or after such date may not exceed 10 per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

(b) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the

VA which specify an interest rate in excess of 10¼ per centum per annum, effective May 11, 1987, the interest rate of any graduated payment mortgage loan guaranteed or insured wholly or in part on or after such date may not exceed 10¼ per centum per annum. (38 U.S.C. 1803(c)(1))

(c) Effective May 11, 1987, the interest rate on any loan solely for energy conservation improvements or other alterations, improvements or repairs, which is guaranteed or insured wholly or in part on or after such date may not exceed 11½ per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

* * * * *

3. In § 36.4503, paragraph (a) is revised as follows:

**§ 36.4503 Amount and amortization.**

(a) The original principal amount of any loan made on or after October 1, 1980, shall not exceed an amount which bears the same ratio to $33,000 as the amount of the guaranty to which the veteran is entitled under 38 U.S.C. 1810 at the time the loan is made bears to $27,500. This limitation shall not preclude the making of advances, otherwise proper, subsequent to the making of the loan pursuant to the provisions of § 36.4511. Except as to home improvement loans, loans made by the VA shall bear interest at the rate of 9½ percent per annum. Loans solely for the purpose of energy conservation improvements or other alterations, improvements, or repairs shall bear interest at the rate of 11 percent per annum. (38 U.S.C. 1811(d)(1) and (2)(A))

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 61

[FRL-3202-6]

### National Emission Standards for Hazardous Air Pollutants (NESHAPS); Delegation of Authority to the State of Kansas

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of delegation of authority.

**SUMMARY:** This notice announces the delegation of authority by the Environmental Protection Agency (i.e., EPA or the agency) to the state of Kansas for the implementation of certain provisions of NESHAPS 40 CFR Part 61, Subpart M. This action is in response to the state's request for delegation of authority. The effect of the delegation is to shift the primary responsibility for implementation of the standard from EPA to the state of Kansas. Under the terms of the delegation, Kansas will implement certain provisions of NESHAPS and EPA will retain the primary authority to enforce against the NESHAPS violations.

**EFFECTIVE DATE:** May 15, 1987.

**ADDRESSES:** All requests, reports, applications, submittals, and such other communications, which are required to be submitted under 40 CFR Part 61, Subpart M (including all the notifications required to be submitted under 40 CFR 61.146) for the affected owners or operators in Kansas, should be sent to the Kansas Department of Health and Environment, Forbes Field, Topeka, Kansas 66620. A copy of all related notifications must also be sent to the attention of the Director, Air and Toxics Division, U.S. EPA, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101.

**FOR FURTHER INFORMATION CONTACT:** Charles W. Whitmore, Air Compliance Section, Air Branch, U.S. EPA, Region VII, at the above address or call (913) 236-2896 or FTS: 757-2896.

**SUPPLEMENTARY INFORMATION:** Section 112(d) of the Clean Air Act allows the Administrator of Environmental Protection Agency (i.e., EPA or the agency) to delegate to any state government authority to implement certain provisions promulgated by the agency under 40 CFR Part 61, Subpart M. When a delegation is issued, the agency retains concurrent authority to implement the delegated standard. This delegation basically shifts the primary responsibility for implementation of the standard from the agency to the state government. The agency maintains the primary responsibility for enforcement of the standard.

The state of Kansas has requested the authority for delegation of 40 CFR Part 61, Subpart M. On November 5, 1986, the agency and the state of Kansas entered into an agreement which delegated authority to implement certain provisions of the NESHAPS Subpart. The provisions which are affected by this delegation are:

Applicability: Section 61.145 (a)–(d); excluding (d)(1)
Notification: Section 61.146
Emission Control: Section 61.147; excluding that portion of (c) dealing with dry removal

Interested individuals are informed that, as of November 5, 1986, the state of Kansas has EPA's authorization to implement the requirements of the certain NESHAPS provisions affected by the delegation agreement. These provisions are listed in the delegation of authority letter dated November 5, 1986, which is reproduced in its entirety as follows:

Barbara J. Sabol,
*Secretary, Kansas Department of Health and Environment, Forbes Field, Topeka, Kansas 66620.*

Dear Ms. Sabol: This letter is in response to the request by the Kansas Department of Health and Environment (KDHE) for partial delegation of the National Emission Standards for Hazardous Air Pollutants (NESHAPS), 40 CFR Part 61, Subpart M, National Emission Standard for Asbestos.

KDHE was given the authority by the Kansas State Legislature to implement and enforce asbestos control law and regulations (K.S.A. 65-5301 *et seq.*, and Kansas Administrative Regulations 28-50-1 through 28-50-14) which were adopted on April 24, 1985. The regulations became effective on January 1, 1986. The Environmental Protection Agency (EPA) has determined that the state of Kansas asbestos regulations provide adequate and effective procedures for partial implementation of 40 CFR Part 61, Subpart M.

The EPA hereby delegates the authority to implement certain provisions of the asbestos standard at 40 CFR Part 61, Subpart M. The sections of this subpart which are affected by this delegation are:

Applicability: Section 61.145 (a)–(d); excluding (d)(1)
Notification: Section 61.146
Emission Control: Section 61.147; excluding that portion of (c) dealing with dry removal

Since the state's asbestos regulations, effective January 1, 1985, pertaining to proper asbestos removal and disposal, do not apply to building owners, the EPA retains the primary authority to implement and enforce 40 CFR Part 61, Subpart M, for violations involving building owners. KDHE will continue to implement and enforce the state regulations. EPA will use information obtained during KDHE inspections to enforce the NESHAPS regulations.

If the Director, Air and Toxics Division, determines that the NESHAPS asbestos program is not being effectively carried out, this partial delegation may be revoked. In such instances, the regional office will notify the state of this action. The EPA may specify (or suggest) appropriate corrective measures, and will allow the state a reasonable period of time to implement corrective measures. If deficiencies continue to exist after the allotted time, the EPA regional office may revoke the delegation as discussed above. The regional office will notify the state of its intent to revoke the delegation, and will state the reason(s) for the intended action, at least fifteen (15) calendar days prior to the effective date of the action.

If the state determines that it can (or will) no longer implement the NESHAPS regulation for any reason, it may request, by letter, that

the delegation be revoked in whole or in part. To ensure a smooth transfer of primary enforcement responsibilities, the state will continue to implement the delegated provisions until the regional office formally acts on the revocation request, unless the circumstances of the situation absolutely dictate otherwise.

The state and the EPA regional office shall continue to maintain a system of communication sufficient to guarantee that each office is always fully informed regarding the compliance status of the subject facilities and of enforcement actions taken (or being contemplated) by the offices involved. A protocol will be developed by the respective state and EPA staffs concerning the implementation of this delegation. When finalized the protocol will become part of this delegation.

The EPA retains concurrent authority to implement and/or enforce all provisions of the delegated regulation. The agency shall give the state prior notification before it exercises its concurrent authority. However, nothing in this partial delegation shall relieve any person subject to any requirement of 40 CFR Part 61, Subpart M, of the obligation to comply with such requirement.

This delegation is effective immediately, unless otherwise requested by the state of Kansas. Please acknowledge acceptance, in writing, within ten (10) days of receipt of this letter. A notice announcing this partial delegation will appear in the Federal Register in the near future.

If you have any questions, please contact Ms. Mary Tietjen at (913) 236–2886.

Sincerely yours,

Morris Kay,

*Regional Administrator.*

cc: David J. Romano, KDHE

Effective immediately, all reports, correspondence, and such other communications, that are required to be submitted under the NESHAP Subpart for owners or operators in Kansas affected by the delegation of authority, should be sent to the KDHE at the above address. A copy of each notification required to be submitted under 40 CFR 61.146, must also be sent to the attention of the Director, Air and Toxics Division, U.S. EPA Region VII, at the above address.

Each document and letter mentioned in this notice is available for public inspection at the EPA regional office.

This notice is issued under the authority of section 112 of the Clean Air Act, as amended (42 U.S.C. 7412).

Morris Kay,

*Regional Administrator.*

BILLING CODE 6560–50–M

## 40 CFR Part 61

[FRL 3201–4]

## National Emission Standards for Hazardous Air Pollutants (NESHAPS); Change of Address

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The information in 40 CFR 61.04 is being revised to reflect a recent NESHAPS delegation to the state of Kansas. The intended effect of the action is to keep the information in 40 CFR 61.04 current.

**EFFECTIVE DATE:** May 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Charles W. Whitmore, Chief, Air Compliance Section, Air Branch, EPA, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101 (913/236–2886 or FTS: 757–2886).

**SUPPLEMENTARY INFORMATION:** Section 40 CFR 61.04 sets forth the EPA regional offices and state agencies to which all requests, reports, applications, submittals, and other communications must be sent by owners and/or operators of facilities (or activities) affected by the National Emission Standards for Hazardous Air Pollutants (NESHAPS) regulation. The information in 40 CFR 61.04 is being revised to reflect a recent NESHAPS delegation to the state of Kansas. All interested individuals are hereby informed of the new information.

The Administrator finds good cause for foregoing prior public notice of the amendments and for making this rulemaking effective immediately in that the amendments are an administrative change and not one of substantive content. No additional burdens are imposed upon the parties affected by the amendments.

BILLING CODE 6560–50–M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Public Health Service

## 42 CFR Part 64a

## Obligated Service Provisions for Mental Health Traineeships

**AGENCY:** Public Health Service, HHS.

**ACTION:** Final rule.

**SUMMARY:** This rule amends regulations implementing the provisions of section 303 of the Public Health Service (PHS) Act (42 U.S.C. 242a), as amended by section 803 of the Mental Health Systems Act, regarding the service payback obligations of individuals who receive clinical traineeships in psychology, psychiatry, social work or nursing (that are not of limited duration or experimental nature). The rule amends Part 64a of Title 42 of the Code of Federal Regulations to establish a uniform rate of interest for all individuals who receive clinical traineeships, clarifies the fact that funds owed to the Government become a debt when the trainee fails to complete the obligation, requires that training institutions conduct entrance and exit interviews with trainees to inform them of the seriousness of their service obligations, and provides guidelines for hardship deferrals.

**EFFECTIVE DATE:** June 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Diana Trunnell, Grants Management Specialist, National Institute of Mental Health, Room 7C–26, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4924.

**SUPPLEMENTARY INFORMATION:** A Notice of Proposed Rulemaking was published on May 28, 1986 (51 FR 19225) to amend 42 CFR Part 64a, regulations implementing the service and monetary payback obligations of individuals receiving mental health clinical traineeships under section 303 of the Public Health Service Act, 42 U.S.C. 242a. These proposed changes would affect the manner in which interest is calculated for monetary payback,

require training institutions to conduct entrance and exit interviews, and establish criteria for granting extensions of time to perform service payback. Because no comments were received on the proposed rules and the Secretary believes their adoption is appropriate, the Final Rule adopts the proposed changes without modification.

**Economic Impact of Regulatory Requirements**

Because the Final Rule does not impose a significant burden on training institutions, it is anticipated that compliance with the rule will not impose any new major expenditures on their part. The change in the method of calculating the interest rate will solely affect individual trainees and, in the aggregate, is not expected to be substantial although it may be significant in individual cases. Therefore, these regulations will not have a significant economic impact on a substantial number of small entities and a Regulatory Flexibility Analysis under the Regulatory Flexibility Act of 1980 is not required. Further, since these regulations do not meet any criteria for a major regulation under Executive Order 12291, a Regulatory Impact Analysis is not required.

**Paperwork Reduction Act**

Section 64a.104 of this Final Rule contains information collection requirements which have been approved for use through March 31, 1989 (OMB No. 0930–0120).

**List of Subjects in 42 CFR Part 64a**

Health professions, Manpower training programs, Mental health programs, Clinical traineeships, Obligated service.

Dated: March 20, 1987.

**Robert E. Windom,**

*Assistant Secretary for Health.*

Approved: April 30, 1987.

**Otis R. Bowen,**

*Secretary.*

Therefore, Subchapter E of Chapter I of Title 42 of the Code of Federal Regulations is amended in Part 64a as follows:

**PART 64a—[AMENDED]**

1. The authority citation for Part 64a continues to read as follows:

Authority: Section 803, Pub. L. 99–398, 94 Stat. 1607–1608 (42 U.S.C. 242a).

2. In § 64a.104, paragraphs (b) and (c) are revised and (d) and the OMB control number are added to read as follows:

**§ 64a.104 What requirements are imposed upon grantees?**

* * * * * *

(b) Before awarding a clinical traineeship, conduct an entrance interview with the individual in order to explain and emphasize the service obligation the individual is incurring, obtain the individual's written assurance that he or she will satisfy the requirements of § 64a.105, and document, in accordance with paragraph (d) of this section, the entrance interview on the form containing the individual's written assurance.

(c) At the time of termination of the clinical traineeship,

(1) Notify the Secretary in writing of the date on which the individual's traineeship is terminated;

(2) Conduct an exit interview with the individual to remind the trainee of the service obligation, to fully explain the consequences that will incur should the trainee fail to satisfy the obligation, and, to tell the individual that the Secretary has been notified of the date of termination of the traineeship; and

(3) Document, in accordance with paragraph (d) of this section, the exit interview on the form notifying the Secretary of the termination of the traineeship.

(d) Document the entrance and exit interviews with at least the following information: The date of the interview, the names of the participants involved in the interview, and a statement that the interview included an explanation to the individual of the service payback requirement and the consequences of failing to fulfill the service payback requirement.

(Approved by the Office of Budget and Management under control number 0930–0120)

3. Section 64a.105(e)(1)(iii) is added and paragraph (g) is revised to read as follows:

**§ 64a.105 What are the conditions of obligated service?**

* * * * *

(e) *Conditions for deferral or break in service, waiver, or cancellation.* (1) * * *

* * * * *

(iii) In making determinations under § 64a.105(e)(1)(i)(C), the Secretary will take into consideration the following factors:

(A) The individual's present financial resources and obligations;

(B) The individual's estimated future financial resources and obligations;

(C) The reasons for the individual's failure to complete the requirements within the prescribed period, such as problems of a personal nature;

(D) The unavailability of employment opportunities appropriate to the individual's education and training; and

(E) Any other extenuating circumstances.

* * * * *

(g) *Recovery for failure to perform obligated service.* (1) If an individual fails to begin or complete the obligated service in accordance with the requirements of paragraphs (a) through (f) of this section, that individual is obligated to repay the United States an amount equal to three times the cost of the award (including stipends and other trainee allowances) plus interest on that amount calculated for the total period since the trainee failed to perform the obligated service at the rate set by the Secretary of the Treasury for National Research Service Awards prevailing on the date on which the period of appointment begins, multiplied, in any case in which the service that was required has been performed in part, by the percentage which the length of service that was not performed is to the length of the service that was required to be performed. The amount will be determined under the following formula:

$$A = 3(\theta + mi\theta)\frac{(t-s)}{(t)}$$

where

A = the amount the United States is entitled to recover;

$\theta$ = the cost of the clinical traineeship (including stipends and other trainee allowances);

m = the number of months since the trainee failed to perform obligated service;

i = the National Research Service Award rate on the date which the period of appointment begins divided by twelve;

t = the total number of months of the service obligation;

s = the number of months that have been served.

(2) Unless the Secretary extends the repayment period as provided in paragraph (e) of this section, the individual shall pay to the United States the total amount which the United States is entitled to recover under paragraph (g)(1) immediately upon the date that the individual fails to begin or complete the period of obligated service (including failing to comply with the applicable terms and conditions of an extension or break in service granted the individual) or upon the date that the individual indicates his or her intention not to fulfill the service obligation as determined by the Secretary. The

amount is considered a debt owed to the United States, with interest accruing monthly upon the total debt as provided under paragraph (g)(1).

[FR Doc. 87-10997 Filed 5-14-87; 8:45 am]
BILLING CODE 4196-17-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 32, 77, 92, 96, 190 and 195

[CGD 84-073]

Miscellaneous Changes; Tank Vessels, etc.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule makes changes to the regulations in three general areas. First, it modifies regulations for accommodations, rails and guards, and anchors for tank vessels to bring 46 CFR Subchapter D into uniformity with the rules for other vessels found in 46 CFR Subchapters H, I, and U. Since the requirements for radiotelegraph, radiotelephone, and radio direction finder are found in the Federal Communications Commission (FCC) regulations, this rule deletes overlapping regulations from Subchapters D, H, I and U. This action does not, however, change or delete any current requirements for this equipment aboard certain ships. Third, this rule will bring the structural fire protection regulations of Subchapter I and U in conformity with Subchapters D and H, the 1981 amendments to the International Conference on Safety of Life at Sea, 1974 (SOLAS 74), and current marine practice with regard to non-combustible construction in control spaces. The purpose of the rule is to revoke unnecessary regulations, and revise existing regulations to be more uniform in application among the various classes of vessels. The rule results in clearer and more consistent regulations.

EFFECTIVE DATE: April 1, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. John M. Kinsey, Ship Design Branch, Marine Technical and Hazardous Materials Division, Office of Marine Safety, Security and Environmental Protection, (202) 267-2997.

SUPPLEMENTARY INFORMATION: A Notice of proposed rulemaking was published on September 30, 1985 at 50 FR 39729, and public comment was invited for 60 days ending November 29, 1985. Comments were received from two marine trade organizations, and two shipping companies.

**Regulatory Background**

The Federal Register of October 18, 1952 revised, updated, and rearranged the Coast Guard vessel inspection regulations, grouping them into subchapters pertaining to various classes of vessels. The regulations for tank vessels were not revised to the same extent as the regulations for passenger and cargo and miscellaneous vessels. The language and depth of treatment for fire protection, accommodations, and other headings have differed between Subchapter D and Subchapters H, I, and, more recently, U, notwithstanding the fact that many tank, passenger, cargo, and miscellaneous vessels are generally similarly sized, engaged on similar routes, exposed to similar hazards, and have similar manning by crews of similar training and competency. Under the circumstances, similar standards for accommodations, rails and guards, anchors and ground tackle, and structural fire protection are in order in the interests of uniformity and marine safety.

A review of the rules in Subchapter D for rails (46 CFR 32.01-10) revealed there was no provision for storm rails in tank vessels as there is for other vessel classes. Current marine practice dictates, however, that tank vessels are typically furnished with these rails during construction. This rule codifies a good current marine practice that should remain in force.

Under the present tank vessel regulations, anchors, chains, and hawsers are not required as they are for other classes of vessels. Such equipment is clearly necessary for the safe operation of all vessels. This rule corrects this oversight.

A review of Subchapters I and U indicated that specific requirements for non-combustible construction in control spaces (i.e., spaces that contain emergency sources of power, and those spaces in which a continuous watch is maintained and in which navigating, radio, or fire control equipment is located) were not included. In addition, the first set of amendments to SOLAS 74, which have been in effect since September 1, 1984, require that control spaces on new cargo and tank vessels over 500 gross tons on international voyages be constructed with non-combustible materials. In keeping with the Coast Guard's intention to minimize any economic impact of these revisions, the requirements for non-combustible construction in control spaces will not apply to existing vessels, i.e. those for which an initial Application for Inspection was submitted before the effective date of these rules. Similarly, the fire protection requirements for control spaces in oceanographic research vessels will not apply to vessels for which an Application for Inspection was received before the effective date of these rules. A complete revision of all the fire regulations will be forthcoming to bring the rules for all vessel classes into conformity with the international standards.

**Drafting Information**

The principal persons involved in drafting this rule are Mr. John M. Kinsey, Project Manager, and Commander Ronald C. Zabel, Project Counsel, Office of Chief Counsel.

**Discussion of Comments and Changes**

Four comments were received related to specific sections of the proposed rules. These comments are discussed below.

One comment from an association representing the offshore marine industry expressed concern that the addition of fire protection requirements for control spaces in Subchapter I would constitute a major change in current marine practice for industrial vessels (offshore supply vessels). The letter stated "By adding a new paragraph (g) to § 92.07-10, the Coast Guard has applied international standards intended for cargo ships of 500 gross tons trading internationally to domestic vessels and cargo ships less than 500 gross tons generally." This impression is not correct. The vessels to which 46 CFR 92.07-10 applies have not been changed. The non-combustible construction requirements apply to all cargo and miscellaneous vessels over 4000 gross tons contracted for on or after January 1, 1962, and industrial vessels over 300 gross tons, contracted for on or after July 1, 1968, carrying more than 12 industrial personnel. The international requirements for non-combustible construction apply to cargo vessels of 500 gross tons and over on international voyages, and they came into effect when the U.S. adopted the 1981 amendments to SOLAS 74 on September 1, 1984.

The addition of § 92.07-10(g) in this rule is intended to require non-combustible construction in control spaces on new domestic Subchapter I (cargo and miscellaneous) and U (oceanographic) vessels whose initial applications for inspection are submitted after publication of this rule. However, the applicability sections in 46 CFR 92.07-1 (a) and (b) and 190.07-1 (a)-(d) with regard to tonnage are not

changed. The Coast Guard, as a matter of policy, has always considered these standards to apply to control spaces on cargo and oceanographic vessels in the past, and has consistently required non-combustible construction. The Coast Guard has only recently noted that "control spaces" were not specifically cited in the regulations in Subchapters I and U, as they are in Subchapters D and H. With regard to the specific concern of this comment, § 92.07–10(g) will require new industrial vessels (offshore supply vessels) to have control spaces constructed with non-combustible materials only if they exceed 300 gross tons and carry more than twelve industrial personnel. Most offshore supply vessels in service today are less than 300 gross tons and below the threshold for non-combustible construction as presently detailed.

The Coast Guard believes that the impact on the industry is not significant. The regulatory policy and application is unchanged from the past, but the language now specifically requires certain cargo, industrial and oceanographic vessels for which initial Applications for Inspection are made on or after the effective date of these regulations to apply non-combustible material standards to control spaces.

One comment suggested "deckhouse sides" be further described as pertaining to weather decks at all deck levels in proposed 46 CFR 32.01–10(d) regarding installation of storm rails. We have added the phrase "on weather decks" after "deckhouse sides" to clarify this.

One comment suggested the last sentence of the proposed 46 CFR 32.15–15(d) be revised to read "If the service of the tank vessel is significantly changed, the suitability of the existing equipment will be evaluated by the Officer in Charge, Marine Inspection." The suggested addition of the word "significantly" is misleading. What is of concern is not the extent of the change in service, but whether the vessel's equipment is suitable for the new service. In view of the many possible circumstances that could arise, the only suitable solution is a case-by-case evaluation. Accordingly, we have substituted the word "evaluated" for the word "established" to clarify the intent of the rule.

One comment suggested paragraph (b) and (c) of 46 CFR 32.40–5 could be deleted since paragraph (a) covers the intent of the section. We agree. Paragraph (b) distinguished between officers and unlicensed crew, but in several places, the word "crew" implies that both officer and non-officer accommodations are affected. In § 32.40–15 "crew quarters" applies to officers as well, and "crew accommodations" in §§ 32.40–70 and 32.40–80 also cover the licensed members. The only specific accommodation standard for officers is § 32.40–25(b), where each licensed officer is to be provided a separate stateroom where practicable. Subparagraph (c) simply enumerated spaces considered under the term "accommodation space." Since these are discussed specifically in the sections that follow, there is no need for such a definition. Therefore, paragraphs (b) and (c) have been omitted and paragraph (a) has been revised to clarify that "crew" includes both officer and unlicensed personnel.

One comment suggested rewriting 46 CFR 32.40–70(a) in a somewhat abbreviated form, but offered no explanation for the suggested change. Since no real substantive change was offered, we have left the wording intact. 46 CFR 32.40–70(b) was suggested for rewording as follows: "Accommodations shall be properly lighted, heated, drained, located, arranged and insulated from undue noise and odors." While we understand the motive was to make the rule a general statement of the construction considerations, we prefer the proposed rule wording which requires the construction to be "consistent with the principles underlying the requirements" for larger tank vessels, thus providing guidance to designers and a discretionary reference to Officers in Charge, Marine Inspection.

One trade operator felt the accommodation regulations for Subchapter D presented a standard below that considered acceptable by the industry, and should be eliminated as unnecessary. Another operator expressed the view that the portions of those regulations dealing with arrangements of sleeping spaces (proposed 46 CFR 32.40–25) and the regulations dealing with requirements for adequate clothes washing facilities and recreation space (proposed 46 CFR 32.40–55) were inappropriate for regulations. The Coast Guard recognizes the standards are lower than what is generally provided today on large oceangoing tankships, as these vessels are able to devote more than ample space to crew accommodations due to their size. We consider it expedient, however, to include in our regulations minimum standards for adequate living conditions for the crew. Proper ventilation, lighting, toilet and washing facilities, and living quarters free of excessive noise, heat, vibration and noxious odors contribute directly to the health and well being of the crew, and thereby the safety of the vessel. The standards will have a greater bearing on new smaller tank vessels (presently about 25 percent of the fleet of inspected tankships is under 5,000 gross tons and replacements are anticipated). To provide these essential facilities and living conditions, designers may need to pay additional attention to the arrangement of these smaller vessels.

The living conditions of U.S. Merchant seamen were not always what they are today. It was the result of union demands and public awareness that led to the passage of the Seaman's Act of 1915 (The LaFollette Act). This law imposed minimum space allotments and general construction standards for crew spaces. The statutory standards were drafted within the confines of the available knowledge of the times and with regard to the type and limitations of shipbuilding design available to the marine industry seventy years ago. These 1915 standards were the minimums applied to all commercial vessels of 100 gross tons and over until 1952 when the Coast Guard revised the regulations for accommodations for officers and crew of cargo and passenger vessels, specifying somewhat larger spaces than the minimum statutory allotments. The tank vessel regulations (46 CFR Subchapter D) were not similarly amended. This rule now incorporates accommodation requirements for tankships similar to those of cargo and passenger vessels. While there is no indication that these requirements exceed current tank vessel construction and arrangement practices, it makes good sense to incorporate the same modern minimum standard into the tank vessel regulations and provide uniformity with 46 CFR Subchapters H, I and I–A.

One national trade association, representing 24 U.S. flag shipping companies owning or operating ten million deadweight tons of tankers, dry bulk carriers and other ocean going vessels engaged in the domestic and international trades of the United States, expressed unqualified support of the proposed amendments to the regulations for accommodations, rails and guards, and anchors for tank vessels as well as the deletions of requirements for radiotelegraph, radiotelephone and radio direction finders in deference to the similar requirements of the Federal Communications Commission.

**E.O. 12291 and DOT Regulatory Policies and Procedures**

These regulations are considered to be non-major under Executive Order 12291 and nonsignificant under the Department of Transportation regulatory

policies and procedures (44 FR 11034; February 26, 1979). The regulations contain minor changes that in some cases may appear to be adding requirements for new vessels with a corresponding increase in cost. However, vessels being constructed today meet and often exceed the regulations. There will be no economic impact on existing vessels because the proposal provides for acceptance of current arrangements and equipment on these vessels. Thus, this proposed change to 46 CFR Subchapters D, H, I, and U represents no real cost increase to industry or government. Since the economic impact is expected to be minimal, the Coast Guard has determined that no further evaluation is necessary.

**Regulatory Flexibility Act**

Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

**Paperwork Reduction Act**

These regulations contain no information collection or recordkeeping requirements.

**Environmental Assessment**

The Coast Guard has considered the environmental impact of the regulations and concluded that preparation of an environmental impact statement is not necessary.

**List of Subjects**

*46 CFR Part 32*

Barges, Fire protection, Marine safety, Tank vessels.

*46 CFR Part 77*

Marine safety, Navigation (water), Passenger vessels.

*46 CFR Part 92*

Cargo vessels, Fire protection, Marine safety.

*46 CFR Part 96*

Cargo vessels, Marine safety, Navigation (water).

*46 CFR Part 190*

Fire prevention, Marine safety, Oceanographic vessels.

*46 CFR Part 195*

Marine safety, Navigation (water), Oceanographic vessels.

For the reasons set out in the preamble, Title 46, Chapter 1 of the Code of Federal Regulations, is amended as follows:

## PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS

1. The authority citation for Part 32 is revised to read as follows and all other authority citations in the part are removed:

**Authority:** 46 U.S.C. 3306, 3703; 50 U.S.C. 198; 49 CFR 1.46(b) and (n).

2. By adding a new paragraph (d) to § 32.01–10 to read as follows:

**§ 32.01–10 Rails—TB/ALL.**

* * * * *

(d) All tank vessels in ocean and coastwise service, except unmanned tank barges, constructed on or after April 1, 1987, must have suitable storm rails installed in all passageways and at the deckhouse sides on weather decks where persons on board might have normal access. Storm rails must be installed on both sides of passageways which are six feet or more in width. Tank vessels to which this paragraph applies constructed prior to April 1, 1987, may retain previously accepted or approved installations so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

3. By revising § 32.15–15 to read as follows:

**§ 32.15–15 Anchors, Chains, and Hawsers—TB/ALL.**

(a) *Application.* The provisions of this section, with the exception of paragraph (d), apply to every tankship and manned seagoing barge constructed on or after April 1, 1987. Tankships and manned seagoing barges constructed prior to April 1, 1987 must meet the requirements of paragraph (d) of this section.

(b) *Ocean, Coastwise, or Great Lakes Service.* Tankships in ocean, coastwise, or Great Lakes service and manned seagoing barges must be fitted with anchors, chains and hawsers in general agreement with the standards established by the American Bureau of Shipping. The current standards of other recognized classification societies may also be accepted upon approval by the Commandant.

(c) *Lakes, Bays, and Sounds, or River Service.* Tankships in lakes, bays, and sounds, or river service must be fitted with such ground tackle and hawsers as deemed necessary by the Officer in Charge, Marine Inspection, depending upon the size of the tankship and the waters on which it operates.

(d) *Tankships and Barges Constructed Prior to April 1, 1987.* For tankships and manned seagoing barges constructed prior to April 1, 1987, the installations previously accepted or approved will be considered satisfactory for the same service so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection. If the service of the tank vessel is changed, the suitability of the equipment will be evaluated by the Officer in Charge, Marine Inspection.

**§ 32.15–20 [Removed]**

4. By removing § 32.15–20.

**§ 32.15–25 [Removed]**

5. By removing § 32.15–25.

6. By revising Subpart 32.40 to read as follows:

**Subpart 32.40—Accommodations for Officers and Crew**

Sec.

32.40–1 Application—TB/ALL.
32.40–5 Purpose and definitions—T/ALL.
32.40–10 Restrictions—T/ALL.
32.40–15 Location of crew spaces—T/ALL.
32.40–20 Construction—T/ALL.
32.40–25 Arrangement of sleeping spaces—T/ALL.
32.40–30 Size of sleeping spaces—T/ALL.
32.40–35 Berths and lockers—T/ALL.
32.40–40 Wash spaces; toilet spaces; and shower spaces—T/ALL.
32.40–45 Messrooms—T/ALL.
32.40–50 Hospital space—T/ALL.
32.40–55 Miscellaneous accommodation spaces—T/ALL.
32.40–60 Heating requirements—T/ALL.
32.40–65 Insect Screens—T/ALL.
32.40–70 Crew accommodations on tankships of less than 100 gross tons and manned tank barges—TB/ALL.
32.40–90 Crew accommodations on tankships constructed before April 1, 1987—T/ALL.

**Subpart 32.40—Accommodations for Officers and Crew**

**§ 32.40–1 Application—TB/ALL.**

(a) The provisions of this subpart, with the exception of § 32.40–70 and § 32.40–90, apply to all tankships of 100 gross tons and over constructed on or after April 1, 1987.

(b) Tankships of less than 100 gross tons and manned tank barges must meet the requirements of § 32.40–70.

(c) Tankships of 100 gross tons and over constructed prior to April 1, 1987, must meet the requirements of § 32.40–90.

**§ 32.40–5 Purpose and definitions—T/ALL.**

The accommodations provided for the crew, including both officers and unlicensed members, on all tankships must be securely constructed, properly lighted, heated, drained, ventilated, equipped, located, arranged, and insulated from undue noise and odors.

**§ 32.40-10 Restrictions—T/ALL.**

(a) There must be no direct communication between the accommodation spaces and any chainlocker, stowage, or machinery space, except through solid, close-fitted doors or hatches.

(b) No access, vent, or sounding tube from a fuel or oil tank may open into any accommodation space, except that accesses and sounding tubes may open into corridors.

**§ 32.40-15 Location of crew spaces—T/ALL.**

Crew quarters must not be located forward of a vertical plane located at five per cent of the tankship's length aft of the stem at the designed summer load line. However, for tankships in other than ocean or coastwise service, this distance does not need to exceed 28 feet. For the purpose of this paragraph, the length defined in § 42.13-15 of Subchapter E (Load Lines) of this chapter is to be used. No section of the deckhead of the crew spaces may be below the deepest load line.

**§ 32.40-20 Construction—T/ALL.**

(a) Each sleeping, mess, recreational, or hospital space that is adjacent to or immediately above a galley, machinery space, paint locker, drying room, washroom, toilet space, or other odor source must be made odor proof.

(b) Each accommodation space that is adjacent to or immediately above a galley, machinery space, machinery casing, boiler room, or other noise or heat source, must be protected from heat and noise.

(c) Where the shell of an unsheathed weather deck forms a boundary of an accommodation space, the shell of the deck must have a covering that prevents the formation of moisture.

(d) The deckheads of each accommodation space must be light in color.

(e) Each accommodation space in which water may accumulate must have a drain scupper located in the lowest part of the space, considering the average trim of the vessel.

(f) Each public toilet space must be constructed and located so that its odors do not readily enter any sleeping, mess, recreational, or hospital space.

**§ 32.40-25 Arrangement of sleeping spaces—T/ALL.**

(a) To the extent practicable, each crew department must be berthed together in sleeping spaces arranged to minimize disturbance created by personnel leaving for or arriving from a working period.

(b) Each licensed officer is to be provided with a separate stateroom where practicable.

**§ 32.40-30 Size of sleeping spaces—T/ALL.**

(a) No sleeping space may berth more than four persons.

(b) Without deducting any equipment used by the occupants, each sleeping space must have for each occupant—

(1) 30 square feet of deck area; and

(2) 210 cubic feet of volume.

(c) Each sleeping space must have at least six feet three inches of headroom over clear deck areas.

**§ 32.40-35 Berths and lockers—T/ALL.**

(a) Each sleeping space must have a separate berth for each occupant.

(b) No more than one berth may be placed over another.

(c) Each berth must have a framework of hard, smooth material that is not likely to corrode or harbor vermin.

(d) Each berth must be arranged to provide ample room for easy occupancy.

(e) Each berth must be at least 30 inches wide by 76 inches long.

(f) Adjacent berths must be separated by a partition that extends at least 18 inches above the sleeping surface.

(g) The bottom of the lower berth must be at least 12 inches above the deck.

(h) The bottom of an upper berth must be at least 30 inches from the bottom of the berth below it and from the deck or any pipe, ventilating duct, or other overhead installation.

(i) Each berth must have a berth light.

(j) Each sleeping space must have a readily accessible locker of hard, smooth material for each occupant.

(k) Each locker must be at least 300 square inches in cross section and 60 inches high.

**§ 32.40-40 Wash spaces; toilet spaces; and shower spaces—T/ALL.**

(a) For the purposes of this section—

(1) "Private facility" means a toilet, washing, or shower space that is accessible only from one single or double occupancy sleeping space;

(2) "Semi-private facility" means a toilet, washing, or shower space that is accessible from one or two one-to-four person occupancy sleeping spaces; and

(3) "Public facility" means a toilet, washing, or shower space that is not private or semi-private.

(b) Each private facility must have one toilet, one shower, and one washbasin, all of which may be in a single space.

(c) Each semi-private facility must have at least one toilet and one shower, which may be in a single space.

(d) Each room adjoining a semi-private facility must have a washbasin if a washbasin is not installed in the semi-private facility.

(e) Each tankship must have enough public facilities to provide at least one toilet, one shower, and one washbasin for each eight persons who occupy sleeping spaces that do not have private or semi-private facilities.

(f) Urinals may be installed in toilet rooms, but no toilet required in this section may be replaced by a urinal.

(g) Each public toilet space and washing space must be convenient to the sleeping space that it serves.

(h) No public facility may open into any sleeping space.

(i) Each washbasin, shower, and bathtub must have hot and cold running water.

(j) Adjacent toilets must be separated by a partition that is open at the top and bottom for ventilation and cleaning.

(k) Public toilet facilities and shower facilities must be separated.

(l) Each public facility that is a toilet space must have at least one washbasin unless the only access to the toilet space is through a washing space.

(m) Each toilet must have an open front seat.

(n) Each washing space and toilet space must be so constructed and arranged that it can be kept in a clean and sanitary condition and the plumbing and mechanical appliances kept in good working order.

(o) Washbasins may be located in sleeping spaces.

**§ 32.40-45 Messrooms—T/ALL.**

(a) Each messroom that is not adjacent to the galley that serves it must be equipped with a steam table.

(b) Each messroom must seat the number of persons expected to eat in the messroom at one time.

**§ 32.40-50 Hospital space—T/ALL.**

(a) Except as specifically modified by paragraph (j) of this section, each tankship, which in the ordinary course of its trade makes voyages of more than three days duration between ports and which carries a crew of twelve or more, must have a hospital space. This space is to be situated with due regard for the comfort of the sick so that they may receive proper attention in all weather.

(b) The hospital must be suitably separated from other spaces and used only for the care of the sick and for no other purpose.

(c) The entrance to each hospital space must be wide enough and arranged to readily admit a person on a stretcher.

(d) Each berth in a hospital space must be made of metal.

(e) Berths may be in double tier, provided the upper berth is hinged and arranged to be secured clear of the lower berth when not in use.

(f) Each hospital space must have at least one berth that is accessible from both sides.

(g) Each hospital space must have one berth for every twelve members of the crew or portion thereof who are not berthed in single occupancy rooms, but the number of berths need not exceed six.

(h) Each hospital space must have a toilet, washbasin, and bathtub or shower accessible from the hospital space.

(i) Each hospital space must have a clothes locker, a table, and seats.

(j) On tankships in which the entire crew is berthed in single occupancy rooms, a hospital space is not required if one room is designated and fitted for use as a treatment and/or isolation room, and meets the following standards:

(1) The room must be available for immediate medical use;

(2) The room must be accessible to stretcher cases;

(3) The room must have a single berth or examination table that is accessible from both sides; and

(4) A washbasin with hot and cold running water must be installed either in or immediately adjacent to the space and other required sanitary facilities must be conveniently located.

**§ 32.40-55 Miscellaneous accommodation spaces—T/ALL.**

(a) Each tankship must have enough facilities for the crew to wash their own clothes, including at least one tub or sink that has hot and cold running water.

(b) Each tankship must have enough equipment for the crew to dry their own clothes.

(c) Each tankship must have an accommodation space that can be used for recreation.

**§ 32.40-60 Heating requirements—T/ALL.**

(a) Each accommodation space must be heated by a heating system that can maintain at least 68°F.

(b) Radiators and other heating apparatus must be constructed, located or shielded so as to avoid risk of fire or danger and discomfort to the occupants of each accommodation space.

(c) Each exposed pipe in an accommodation space leading to a radiator or other heating apparatus must be insulated.

**§ 32.40-65 Insect screens—T/ALL.**

(a) Accommodation spaces must be protected against the admission of insects.

(b) Insect screens must be installed when natural ventilation is provided.

**§ 32.40-70 Crew accommodations on tankships of less than 100 gross tons and manned tank barges—TB/ALL.**

(a) The crew accommodations on all tankships of less than 100 gross tons and all manned tank barges must have sufficient size and equipment, and be adequately constructed to provide for the protection of the crew in a manner practicable for the size, facilities, and service of the tank vessel.

(b) The crew accommodations must be consistent with the principles underlying the requirements for crew accommodations on tankships of 100 gross tons or more.

**§ 32.40-90 Crew accommodations on tankships constructed before April 1, 1987—T/ALL.**

All tankships of 100 gross tons and over constructed before April 1, 1987 may retain previously accepted or approved installations and arrangements so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection.

## PART 77—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

7. The authority citation for Part 77 is revised to read as follows and all other authority citations in the part are removed:

**Authority:** 46 U.S.C. 3306; 50 U.S.C. 198; 46 CFR 1.46 (b) and (n).

**§ 77.13 [Removed]**

8. By removing § 77.13.

**§ 77.15 [Removed]**

9. By removing § 77.15.

## PART 92—CONSTRUCTION AND ARRANGEMENT

10. The authority citation for Part 92 is revised to read as follows and all other authority citations in the part are removed:

**Authority:** 46 U.S.C. 3306; 50 U.S.C. 198; 46 CFR 1.46 (b) and (n).

11. By adding a new paragraph (g) to § 92.07-10 to read as follows:

**§ 92.07-10 Construction.**

* * * * *

(g) The provisions of subparagraphs (1) through (9) of paragraph (d) of this section apply to control spaces on vessels whose initial Application for Inspection is submitted to an Officer in Charge, Marine Inspection on or after April 1, 1987.

## PART 96—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

12. The authority citation for Part 96 is revised to read as follows and all other authority citations in the part are removed:

**Authority:** 46 U.S.C. 3306; 50 U.S.C. 198; 46 CFR 1.46 (b) and (n).

**§ 96.13 [Removed]**

13. By removing § 96.13.

**§ 96.15 [Removed]**

14. By removing § 96.15.

## PART 190—CONSTRUCTION AND ARRANGEMENT

15. The authority citation for Part 190 is revised to read as follows and all other authority citations in the part are removed:

**Authority:** 46 U.S.C. 3306; 50 U.S.C. 198; 46 CFR 1.46 (b) and (n).

16. By adding a new paragraph (f) to § 190.07-10 to read as follows:

**§ 190.07-10 Construction.**

* * * * *

(f) The provisions of subparagraphs (1) through (9) of paragraph (d) of this section apply to control spaces on vessels whose initial Application for Inspection is submitted to an Officer in Charge, Marine Inspection on or after April 1, 1987.

## PART 195—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

17. The authority citation for Part 195 is revised to read as follows and all other authority citations in the part are removed:

**Authority:** 46 U.S.C. 3306; 50 U.S.C. 198; 46 CFR 1.46 (b) and (n).

**§ 195.13 [Removed]**

18. By removing § 195.13.

**§ 195.15 [Removed]**

19. By removing § 195.15.

Dated: March 17, 1987.

**W.J. Ecker,**

## INTERSTATE COMMERCE COMMISSION

**49 CFR Part 1160**

**[Ex Parte No. 55 (Sub-No. 63)]**

## Technical Revisions

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Final rule.

**SUMMARY:** The Commission's regulations at 49 CFR Part 1160, *How to Apply for Operating Authority*, govern the filing of applications for authority to conduct regulated operations as a motor carrier, as a household goods freight forwarder, as a water carrier, and as a broker of motor vehicle transportation. The Commission here adopts technical revisions, all ministerial in nature, to these regulations. These revisions will bring the regulations up-to-date and will correct certain errors.

**EFFECTIVE DATE:** June 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Paul Markoff, 202–275–7960.

or

Mark Shaffer, 202–275–7292.

**SUPPLEMENTARY INFORMATION:** Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area).

### Environmental and Energy Considerations

This rule will not significantly affect either the quality of the human environment or the conservation of energy resources.

### Regulatory Flexibility Analysis

The Commission certifies that this rule will not have a significant economic impact on a substantial number of small business entities because the changes are ministerial only and do not impose additional requirements on any entity.

### List of Subjects in 49 CFR Part 1160

Administrative practice and procedure.

Decided: April 28, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

**Noreta R. McGee,**

*Secretary.*

Title 49 of the Code of Federal Regulations is amended as follows:

## PART 1160—HOW TO APPLY FOR OPERATING AUTHORITY

1. The authority citation for Part 1160 is revised to read as follows:

**Authority:** 49 U.S.C. 10101, 10305, 10321, 10921, 10922, 10923, 10924, and 11102; 5 U.S.C. 553; 16 U.S.C. 1456.

2. In § 1160.5, the third sentence of paragraph (d)(1) is revised, and paragraph (e) is added, to read as follows:

**§ 1160.5 Information to be submitted by applicants (except fitness only applications).**

* * * * *

(d) * * *

(1) * * * This evidence shall be submitted in part (9) of applicant's verified statement, as shown in § 1160.6 of this part.

* * * * *

(e) *Water carriers: Compliance with the Coastal Zone Management Act.* An applicant filing an application for a certificate, permit, or exemption for water carrier transportation of property or passengers, to be conducted in the "coastal waters" of a "coastal State" (hereinafter, a "coastal zone water carrier applicant"), must comply with the applicable requirements of the Coastal Zone Management Act of 1972 (CZMA), 16 U.S.C. 1451 et seq., as established in the implementing regulations, 15 CFR Part 930, see especially Subpart D thereof.

(1) The CZMA contains technical definitions of such terms as "coastal zone," "coastal waters," and "coastal State." *See* 16 U.S.C. 1453. For our purposes, it sufficies to say that the CZMA applies to water carrier activities conducted in the waters of the Atlantic, Pacific, or Arctic Oceans, the Gulf of Mexico, Long Island Sound, or one or more of the Great Lakes; and that the coastal States are the States bordering on these waters. The CZMA, which applies to certain water carrier application cases, requires, *inter alia*, (i) that any Federal agency conducting or supporting activities in a coastal zone management area shall ensure to the maximum extent practicable that these activities are consistent with the State's coastal zone management program (CZMP), and (ii) that an applicant conducting an activity affecting land or water lying within a State's designated coastal zone provide the Federal agency with a certification that its proposal is consistent with the State's CZMP. The CZMA further provides that no Federal agency shall issue a permit or license to an applicant seeking authorization affecting a coastal zone until the State whose coastline is involved concurs in the applicant's certification that its proposal is consistent with the State's CZMP. See 16 U.S.C. 1456(c)(3)(A).

(2) Regulations promulgated under the CZMA have different filing requirements for federal licensing applicants depending on whether the proposed activity is subject to consistency review. 15 CFR 930.53(b). If a coastal State has listed, in its approved CZMP, the ICC licensing of water carriers as subject to consistency review, an applicant shall certify in its application that the proposed activity complies with and will be conducted in a manner consistent with the State's approved CZMP. 15 CFR 930.57. Applicant must also file, with the State agency that administers the State's CZMP, a copy of its certification, and the information required by 15 CFR 930.58. These States will then have 6 months from the date of applicant's consistency certification to concur with or object to the certification. Absence of action by a State will be conclusively presumed to be concurrence. 15 CFR 930.60 and 930.63.

(3) If a coastal State has not listed, in its approved CZMP, the ICC licensing of water carriers as subject to consistency review, an applicant must notify the State agency of its application, 15 CFR 930.54, and must thereafter comply with the procedure set out in that section (which varies, depending upon whether or not the State agency seeks to review the application). Applicant must include in its application a copy of its notice to the State agency. If the State agency wants to review the activity and receives the approval of the Assistant Administrator for Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, then applicant must follow the certification process described above. 15 CFR 930.54(a), (c), (e). A State agency's failure to object within the time periods set out in 15 CFR 930.54(e) will be presumed to be concurrence.

3. Section 1160.6 is revised to read as follows:

**§ 1160.6 Applicant's verified statement (except fitness only applications).**

Applicant shall file the information described in this section. The information shall be provided in separately numbered paragraphs. If a particular item seems inapplicable, write "N/A."

**APPLICATIONS COVERED**

Motor common carrier of property application.

Motor contract carrier of property application.

BEST COPY AVAILABLE

Household goods freight forwarder application.
Water common carrier application.
Water contract carrier application.
Water carrier exemption application.

INFORMATION TO BE SUBMITTED

(1) Legal name and domicile of application.
(2) Name of witness presenting evidence of applicant and why this person is qualified to speak for applicant (as, position with applicant and experience).
(3) Authority requested in this application.
(4) Brief description of present ICC regulated operations, or any other transportation experience. Do not submit copies of existing authority unless they are an issue in the application.
(5) *Description of equipment.* It is not necessary to list separately all pieces. A summary is preferred. If applicant has no equipment, it shall specify its plan to obtain equipment (*e.g.*, owner-operators under lease).
(6) *Safety evidence.* Motor carriers holding ICC authority should indicate that they are in compliance with DOT safety regulations. New entrants shall state the following:
I certify that I have access to and am familiar with all applicable regulations of the U.S. Department of Transportation relating to the safe operation of commercial vehicles and the safe transportation of hazardous materials, and I will comply with these regulations.
**Note to Applicants.**—These regulations are found in Title 49, Code of Federal Regulations, Parts 171 to 179 and Parts 390 to 399. Information concerning safety and hazardous materials regulations may be obtained by calling DOT's Office of Motor Carrier Safety Field Operations, at 202–366–2983 (safety) and at 202–366–1724 (Hazardous materials).
(7) Services now provided to supporting shipper or witness, if any, or service provided within area sought by application.
(8) Description of service that will be provided if this application is granted. State whether services of this type are not now available.
(9) Any other evidence in support of the application. *Motor common carrier of property applicants.* If no shipper support statements are being provided, applicant shall submit other evidence under this paragraph.
(10) Legal argument supporting the application. (Optional.)
(11) Any oral hearing request (Optional).
*Verification:* Separate verification of this statement is not necessary. Applicant understands that the oath in the application form applies to this statement.

4. In § 1160.8, paragraphs (2), (5), and (7)(vi) under INFORMATION TO BE SUBMITTED are revised to read as follows:

**§ 1160.8 The applicant's verified statement in fitness only applications.**

* * * * *

(2) Name of witness presenting evidence and why this person is qualified to speak for applicant (as, position with applicant and experience).

* * * * *

(5) *Safety evidence:* Motor carriers holding ICC authority shall indicate that they are in compliance with DOT safety regulations. New entrants shall state the following:
I certify that I have access to and am familiar with all applicable regulations of the U.S. Department of Transportation relating to the safe operation of commercial vehicles and the safe transportation of hazardous materials, and I will comply with these regulations.

**Note to Applicants:**

These regulations are found in Title 49 of the Code of Federal Regulations, Parts 171 to 179 and Parts 390 to 399. Information concerning safety and hazardous materials regulations may be obtained by calling DOT's Office of Motor Carrier Safety Field Operations, at 202–366–2983 (safety) and at 202–366–1724 (hazardous materials). (1 only.)

* * * * *

(7) * * *
(vi) When the certification in paragraph (5) of this section is made, and applicant has otherwise established its right to a certificate, the Commission will issue a certificate subject to the filing, when rail service is terminated, of another certification that all service has ceased at the granted points.

* * * * *

5. In § 1160.19, paragraph (b) is revised to read as follows:

**§ 1160.19 Compliance.**

* * * * *

(b) For Motor Contract Carriers of Property, 49 CFR Parts 1043, 1044, and 1053.

* * * * *

6. In § 1160.23, paragraph (e) introductory text is revised to read as follows:

**§ 1160.23 Water carrier applicants only.**

* * * * *

(e) If applicant is a water common carrier seeking a revised certificate covering extension of service pursuant to 49 U.S.C. 10922(g)(3)(B), the following shall be furnished:

* * * * *

7. In § 1160.64, paragraph (c) is revised to read as follows:

**§ 1160.64 Petition to clarify or interpret formally an operating authority.**

* * * * *

(c) Notice of the petition will be published in the *ICC Register.* Interested persons may obtain copies of the petition from petitioner's representative in the same manner as provided in §§ 1160.13 and 1160.61. Petitioner may file a rebuttal to any opposing argument.

8. In § 1160.66, paragraph (d) is revised to read as follows:

**§ 1160.66 Consolidation of applications.**

* * * * *

(d) The applications will be published in the *ICC Register* and their consolidation will be indicated. Protestants may file a single protest which will apply to all the proceedings.

9. In § 1160.71, paragraph (a)(5) is revised to read as follows:

**§ 1160.71 Types of proof required for applications for operating authority to perform motor carrier transportation of passengers.**

* * * * *

(a) * * *
(5) Motor common carrier of passengers transportation to any community where the only interstate motor common carrier of passengers has applied to discontinue the interstate service under 49 U.S.C. 10925(b) or to reduce intrastate service under 49 U.S.C. 10935 to less than one trip per day (excluding Saturdays and Sundays).

* * * * *

10. In § 1160.73, paragraph (b) is revised to read as follows:

**§ 1160.73 Starting the application process.**

* * * * *

(b) Obtain the form at Commission regional and field offices, or call either of the following headquarters offices: Publications (202–275–7833) or Public Assistance (202–275–7597).

11. In § 1160.75, paragraphs (g) and (j), and the fifth sentence in paragraph (k), are revised to read as follows:

**§ 1160.75 Applicant's verified statement.**

* * * * *

(g) Safety evidence: Motor passenger carriers holding ICC authority shall indicate that they are in compliance with DOT safety regulations. New entrants shall state the following:

"I certify that I have access to and am familiar with all applicable regulations of the U.S. Dept. of Transportation relating to the safe operation of commercial vehicles and the safe transportation of hazardous materials, and I will comply with these regulations."

**Note to Applicants**

These regulations are found in Title 49 of the Code of Federal Regulations, Parts 171 to 179 and Parts 390 to 399. Information concerning safety and hazardous materials regulations may be obtained by calling DOT's Office of Motor Carrier Safety Field Operations, at 202–366–2983 (safety) and at 202–366–1724 (hazardous materials).

* * * * *

(j) Application under § 1160.71(a)(5): If the application is to provide transportation to any community where the only interstate motor common carrier of passengers seeks to

BEST COPY AVAILABLE

discontinue interstate service under 49 U.S.C. 10925(b) or to reduce intrastate service under 49 U.S.C. 10935 to less than one trip per day (excluding Saturdays and Sundays), certify that the community has only one interstate motor passenger service available, and provide a copy of, or appropriate reference to, the existing carrier's application to the Commission for discontinuance or reduction.

(k) * * * Applicant should submit sufficient information under this paragraph for the Commission to determine readily the precise portions of the existing authorities on which applicant's proposal is based. * * *

* * * * *

12. In § 1160.76, paragraph (a)(1)(iii) introductory text is revised to read as follows:

**§ 1160.76 Caption summary.**

(a) * * *

(1) * * *

(iii) 49 U.S.C. 10922(c)(4) applications for charter/special authority: * * *

* * * * *

13. In § 1160.78, paragraph (b) is revised to read as follows:

**§ 1160.78 Commission review of the application.**

* * * * *

(b) The caption summary will be published in the *ICC Register* to give notice to the public in case anyone wishes to oppose the application. The application will be published in the form of a grant of authority.

* * * * *

14. The heading for § 1160.80 is revised to read as follows:

**§ 1160.80 After publication in the ICC Register.**

15. In § 1160.87, paragraph (a) is revised to read as follows:

**§ 1160.87 Appeals.**

(a) If a division of the Commission, or an employee board or other decisional body, rejects an application, applicant has a right of appeal. The appeal must be filed at the Commission within 10 days of the date of the letter of rejection.

* * * * *

16. In § 1160.106, paragraph (e)(2) is revised to read as follows:

**§ 1160.106 Fitness-only authority.**

* * * * *

(e) * * *

(2) For contract carriage.—To operate as a *contract carrier,* by motor vehicle, over irregular routes, transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizer, and other soil conditioners,* by the owner of the motor vehicle in such vehicle, between points in the United States, under continuing contract(s) with _____ (person, class of persons, industry, or industries).

BILLING CODE 7035-01-M

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

### 50 CFR Part 675

**[Docket No. 61225-7052]**

### Groundfish of the Bering Sea and Aleutian Islands Area

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Notice of inseason adjustment.

**SUMMARY:** NOAA announces the apportionment of amounts of Alaska groundfish to the joint venture processing (JVP) portion of the domestic annual harvest (DAH) under provisions of the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area. Groundfish are apportioned according to the regulations implementing the FMP. The intent of this action is to assure optimum use of these groundfish by allowing the domestic fishery to proceed without interruption.

**EFFECTIVE DATE:** May 12, 1987. Comments will be accepted through May 27, 1987.

**ADDRESS:** Comments should be mailed to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802, or to be delivered to Room 453, Federal Building, 709 West Ninth Street, Juneau, Alaska.

**FOR FURTHER INFORMATION CONTACT:** Janet E. Smoker (Resource Management Specialist, NMFS), 907-586-7230.

**SUPPLEMENTARY INFORMATION:** The FMP governs the groundfish fishery in the exclusive economic zone under the Magnuson Fishery Conservation and Management Act. The FMP was developed by the North Pacific Fishery Management Council (Council) and implemented by rules appearing at 50 CFR 611.93 and Part 675. The total allowable catches (TACs) for various groundfish species are apportioned initially among DAH, reserves and total allowable level of foreign fishing (TALFF). Each reserve amount, in turn, is to be apportioned to DAH and/or TALFF during the fishing year, under 50 CFR 611.93(c) and 675.20(b). Under § 675.20(b)(1)(i), reserves may be apportioned after April 1, June 1, August 1 and other dates as necessary. No action was scheduled for the April 1 date because the need for additional JVP was not apparent at that time.

The initial specifications of domestic annual processing (DAP) and JVP (both components of DAH) for 1987 were based in part on the projected needs of the U.S. industry as assessed by a mail survey sent by the Director, Alaska Region, NMFS (Regional Director), to fishermen and processors in November 1986. The results of the survey indicated that the total DAH capacity for pollock in the Bering Sea subarea exceeded the TAC. After the 15 percent of TAC was placed in the non-specific reserve, as required at § 675.20(a)(3), the initial specifications for Bering Sea pollock were determined as follows: for DAP, 189,987 mt; and for JVP, the remainder, 830,013 mt (52 FR 785, January 9, 1987).

On January 1, JVP was supplemented by 18,339 mt of the non-specific reserve, and TALFF by 10,071 mt of the non-specific reserve, which included 5,000 mt to the Bering Sea pollock TALFF, to provide bycatch in foreign flatfish fisheries. This action supplements DAH by 100,000 mt from the current 271,590 mt non-specific reserve, reducing the non-specific reserve to 171,590 mt.

**Reapportionments (Table 1)**

The following actions are taken by this notice to reapportion specifications in the BSA fisheries.

**To the BSA–JVP**

To provide for continued JVP fishing in the Bering Sea for pollock, 100,000 mt of the non-specific reserve is transferred to the Bering Sea pollock JVP. The JVP catch of pollock in the Bering Sea through April 18 was 725,337 mt; at current catch rates, the remainder of the current quota would be taken during the first week of May. About 40 foreign processors and 70 U.S. catcher boats continue to target pollock in the Bering Sea subarea. This apportionment does not result in overfishing of the pollock stock, as the resulting TAC is 1,125,000 mt, less than the equilibrium yield (EY) of 1.2 million mt.

**Comments and Responses**

In accordance with 50 CFR 611.92(c) and 675.20(b), aggregated reports on U.S. catches of Alaska groundfish and the processing of those groundfish were available for public inspection to

facilitate informed public comment. In addition, those provisions afforded the public an opportunity to submit comments on the extent to which U.S. fishermen will harvest and the extent to which U.S. processors will process Alaska groundfish. Three comments were received, each making the same request.

*Comment:* Because the remaining allocation for the Bering Sea appears insufficient to carry the JVP pollock fishery beyond the May Council meeting, where the question of JVP pollock allocations will be reviewed, NMFS should transfer adequate pollock reserves to JVP to allow the fishery to continue until that time.

*Response:* The 100,000 mt of reserves released should be sufficient to allow the JVP pollock fishery to continue until late May, assuming similar catch rates are experienced during May of this year as for that month for the two previous years of the fishery.

## Classification

This action is taken under the authority of 50 CFR 675.20(b) and complies with Executive Order 12291.

The Assistant Administrator for Fisheries finds for good cause that it is impractical and contrary to the public interest to provide prior notice and comment. Immediate effectiveness of this notice is necessary to benefit groundfish who otherwise would have to forego substantial amounts of other groundfish species if fishing were closed as a result of achieving previously specified JVPs or TACs. However, interested persons are invited to submit comments in writing to the address above for 15 days after the effective date of this notice.

## List of Subjects in 50 CFR Part 675

Fisheries.

**Authority:** 16 U.S.C. 1801 et seq.

Dated: May 8, 1987.

**James E. Douglas, Jr.,**

*Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.*

TABLE 1.—BERING SEA/ALEUTIANS ISLANDS REAPPORTIONMENTS OF TAC

| | | Current | This action | Revised |
|---|---|---|---|---|
| Pollock (Bering Sea Subarea) EY=1,200,000; TAC=1,125,000 | DAP | 189,987 | | 189,987 |
| | JVP | 830,013 | +100,000 | 930,013 |
| | TALFF | 5,000 | | 5,000 |

# Proposed Rules

Federal Register
Vol. 52, No. 94
Friday, May 15, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### 7 CFR Part 929

### Cranberries Grown in the States of Massachusetts et al.; Order Directing That a Referendum Be Conducted, Determination of Representative Period for Voter Eligibility, and Designation of Referendum Agents To Conduct the Referendum

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Referendum order.

**SUMMARY:** This document directs that a referendum be conducted among eligible growers of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, to determine whether they favor continuance of the marketing agreement and order program.

**DATES:** Referendum period May 20 through May 30, 1987.

**FOR FURTHER INFORMATION CONTACT:** James M. Scanlon, Acting Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, telephone (202) 447–5697.

**SUPPLEMENTARY INFORMATION:** Pursuant to Marketing Order No. 929, as amended (7 CFR Part 929), and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), it is hereby directed that a referendum be conducted within the period May 20 through May 30, 1987, among the growers who, during the period September 1, 1987, through March 31, 1987, (which period is hereby determined to be a representative period for purposes of such referendum), were engaged in the production area in the production of cranberries covered by the said amended marketing agreement and order to ascertain whether continuance of the said amended marketing order is favored by the growers. Section 929.68(d) specifies that such a referendum shall be held during the month of May 1975, and during the month of May every fourth year thereafter, to ascertain whether growers favor such continuance.

The Secretary of Agriculture has determined that continuance referenda are an effective means for ascertaining whether growers favor continuation of marketing order programs. The Secretary would consider termination of the order if less than Two-thirds of the growers of cranberries voting in the referendum and growers of less than two-thirds of the volume of such fruit represented in the referendum favor continuance. However, in evaluating the merits of continuance versus termination, the Secretary will not only consider the results of the continuance referendum but also all other relevant information concerning the operation of the order and the relative benefits and disadvantages to producers, handlers, and consumers in order to determine whether continued operating of the order would tend to effectuate the declared policy of the Act.

In any event, section 8c(16)(B) of the Act requires the Secretary to terminate an order whenever the Secretary finds that a majority of all growers favor termination, and such majority produced for market more than 50 percent of the commodity covered by such order.

Patricia A. Petrella and Jay N. Guerber, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250, are hereby designated as referendum agents of the Secretary of Agriculture to conduct such referendum. The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda in Connection with Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR Part 900.400 *et. seq.*).

Copies of the texts of the aforesaid amended marketing order may be examined in the offices of the referendum agents or of the Director, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250.

Ballots to be cast in the referendum may be obtained from the referendum agents and from their appointees.

**Authority:** Agricultural Marketing Agreement Act of 1937, as amended, Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Dated: May 12, 1987.

Kenneth A. Gilles,
*Assistant Secretary for Marketing and Inspection Services.*

BILLING CODE 3410–02–M

## FEDERAL HOME LOAN BANK BOARD

### 12 CFR Parts 561, 563, and 571

[No. 87–527]

### Classification of Assets

Date: May 5, 1987.

**AGENCY:** Federal Home Loan Bank Board.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Home Loan Bank Board ("Board"), as operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC"), is proposing to revise its present regulations governing the classification of assets of insured institutions. This proposed rule would ensure the use of broader, but judicious, examiner discretion in the classification of assets, consistent with the examination practices of the bank regulatory agencies. Specifically, the proposal employs the existing classification categories of Substandard, Doubtful, and Loss, but significantly alters the consequences of the respective classifications with respect to both reserve requirements and minimum capital requirements.[1] Assets classified Substandard would no longer be treated as scheduled items; thus, twenty percent of Substandard assets would not be included in calculating the contingency component of an insured institution's minimum regulatory capital requirement. Moreover, with respect to assets classified Doubtful, the Board would no longer require institutions to establish specific allowances for loan losses. With respect to assets classified Substandard or Doubtful, if the examiner concludes that the valuation allowances established by the

[1] N.B. This proposal refers to specific and general "allowances for loan losses" or to "valuation allowances" instead of "reserves," since the former designations are more consistent with accepted accounting terminology.

institution are inadequate, the examiner would determine the need for, and extent of, any increase necessary in the insured institution's general allowances for loan losses, subject to review by the Principal Supervisory Agent ("PSA"). For the portion of assets classified Loss, the Board would continue to require institutions either to establish specific allowances for losses of 100 percent of the amount classified, or charge off such amount. Institutions would also be required to classify their own assets and to establish prudent general allowances for loan losses. The Board is soliciting public comment on all aspects of the proposed rule.

This proposal is part of the Board's comprehensive review of its scheme for classification and appraisal of assets of insured institutions. The Board also is proposing today a rule that would codify its appraisal standards with appropriate changes to clarify and simplify existing supervisory directives. Board Res. No. 87–528, published elsewhere in the Proposed Rules section of this issue of the **Federal Register**.

**DATES:** Comments must be received on or before July 14, 1987.

**ADDRESS:** Send comments to: Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552. Comments will be available for public inspection at this address.

**FOR FURTHER INFORMATION CONTACT:** Karen Knopp O'Konski, Deputy Director, (202) 377–7240, Daniel G. Lonergan, Staff Attorney, (202) 377–6458, Kathy L. Kresch, Staff Attorney, (202) 377–6417, Regulations and Legislation Division, Office of General Counsel; or Robert J. Pomeranz, Senior Policy Analyst, (202) 377–6760, Jane W. Katz, Senior Policy Analyst, (202) 377–6782, Office of Policy and Economic Research, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552; Edward J. Taubert, Associate Director—Policy, (202) 778–2511, or Francis E. Raue, Policy Analyst, (202) 778–2517, Office of Regulatory Policy, Oversight and Supervision, Federal Home Loan Bank System, 900 Nineteenth Street, NW., Washington, DC 20006.

**SUPPLEMENTARY INFORMATION:** The Board, as operating head of the FSLIC, is authorized pursuant to section 403(b) of the National Housing Act ("NHA"), to conduct examinations of institutions the accounts of which are insured by the FSLIC ("insured institutions"). 12 U.S.C. 1726(b). Pursuant to this authority, the Board has the responsibility to examine and evaluate insured institutions' assets, to require reporting, and to prescribe the treatment of such assets for regulatory evaluation purposes. In addition, the NHA requires insured institutions to establish and maintain reserves in accordance with Board regulations. *Id.*

Section 325 of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320, 96 Stat. 1469, amended section 5(c)(1)(R) of the Home Owners Loan Act of 1933, 12 U.S.C. 1464(c)(1)(R), to authorize federally chartered savings and loan associations and mutual savings banks to invest in secured or unsecured loans for commercial, corporate, business, or agricultural purposes within specified limits. The Board promptly promulgated regulations to implement this new commercial lending authority for federal institutions. *See* 12 CFR 545.46. Moreover, many states subsequently granted state-chartered institutions the authority to engage in commercial lending activity.

The Board's then-existing asset classification system, which had been primarily designed to address the requirements of home lending, emphasized the timely receipt of periodic payments and other features inherent in loans secured by real estate. Because of Board concern that this system of asset classification was not attuned to the characteristics of the newly authorized type of lending and was thus not appropriately suited to gauge the condition of a given asset, the Board sought a better method of evaluating the condition of these loans.

On June 21, 1985, the Board proposed for public comment a new method of classifying certain commercial loans and a revision of its regulation governing examiners' reevaluation of real estate. Board Res. No. 85–504, 50 FR 27290 (July 2, 1985). The Board's proposal adopted the basic asset classification concepts contained in the "Uniform Agreement on the Classification of Assets and Appraisal of Securities Held by Banks" ("Uniform Agreement"), issued in revised form on May 7, 1979, as a Joint Statement of the Office of the Comptroller of the Currency ("OCC"), the Federal Deposit Insurance Corporation ("FDIC"), the Board of Governors of the Federal Reserve System ("FRB"), and the Conference of State Bank Supervisors. In short, the proposed scheme classified problem assets as Substandard, Doubtful, or Loss and prescribed treatment of each problem asset depending on the category to which it was assigned.[2] The proposal also sought to revise the appraisal provisions in the Board's examinations and audit regulation. *See* 12 CFR 563.17–2(b).

On December 9, 1985, the Board adopted as a final rule the proposed classification of assets scheme with some modifications. This regulation, currently in effect, employs the classification categories of the Uniform Agreement, *i.e.*, Substandard, Doubtful, and Loss. Assets classified Substandard are treated as scheduled items, thus increasing the contingency component of an institution's minimum regulatory capital requirement under § 563.13 by an amount equal to 20 percent of the dollar amount of the substandard assets. *See* Board Res. No. 86–857, 51 FR 33565, 33585 (Sept. 22, 1986) (to be codified at 12 CFR 563.13(b)(4)(ii)(B)). *See also* 12 CFR 561.16c(c)(1). In effect, this classification serves to increase an insured institution's capital requirement by 20 percent of the assets classified Substandard, since the contingency component is added to an institution's liability component (minus the maturity matching credit) to determine the minimum regulatory capital requirement. *See* Board Res. No. 86–857, 51 FR 33565, 33584 (Sept. 22, 1986) (to be codified at 12 CFR 563.13(b)). Assets classified as Doubtful require establishment of specific allowances for loan losses of up to 50 percent of the amount of the asset so classified. Assets classified as Loss require establishment of specific allowances for loan losses of 100 percent of book value of the amount of the asset classified as Loss. This scheme permits assets to be "split" for classification purposes: different portions of the same asset may be classified to different categories and a portion of an asset may remain unclassified. 12 CFR 571.1a.

The Board's final rule also authorized examiners to reevaluate assets in accordance with the newly adopted classification system, as reflected in 12 CFR 563.17–2(b). Section 563.17–2(b) was amended to provide that a re-evaluation of real estate is to be based on an appraisal, except in the following instances: (1) If a loan or investment requires an appraisal under the Board's rules but the institution has no appraisal in its files, the asset is to be classified as

[2] These categories are defined in detail in the existing regulation and policy statement. *See* 12 CFR 561.16c(b), 571.1a(a). Generally, assets classified Substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, and have a well defined weakness or weaknesses. Assets classified Doubtful have all of the weaknesses inherent in those classified Substandard, with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable. Assets classified Loss are considered uncollectible and of such little value that their continuance as assets without establishment of a specific allowance for loan losses is not warranted.

Doubtful; (2) if there is an appraisal in the institution's files that does not conform with the Board's appraisal standards, or if the examiner determines that the assumptions underlying an appraisal (even one that was in compliance when made) are demonstrably incorrect, such assets should be classified as Substandard; and (3) if the examiner and District Appraiser determine that the assumptions underlying an appraisal are demonstrably incorrect, rendering such appraisal inaccurate, and the asset has an additional weakness inherent in an asset classified Substandard, such asset is to be classified Doubtful. In promulgating this final rule, the Board emphasized that its supervisory experience indicated that continued reliance on reappraisals as the sole means for classifying problem real estate assets was not advisable.

The Board also amended § 563.17–2(c) to require adjustments to the book value of assets deemed to be overvalued on the institution's books as a result of asset re-evaluation. At the direction of its supervisory agent, an institution must make such an adjustment to the book value by establishing a specific valuation allowance in an amount equal to the overvaluation.

Although the Board adopted the above classification of assets scheme as a final rule, the Board also provided an additional 60-day comment period to solicit further public comment on the general scope of the classification system which, in its final form, encompassed all assets except consumer loans, loans secured by one-to-four family, owner-occupied homes, and securities.

In response to its solicitation of comments on the scope of the final rule, the Board received fifty-six comment letters. Of these fifty-six letters, only thirty addressed the scope of the classification of assets regulation, while the remainder addressed aspects of the final rule on which comment had not been solicited. Forty-four of the letters were received from insured institutions. Of the remainder, seven letters were received from industry trade associations, two were received from state agencies, one was received from a law firm representing 20 insured institutions, one was received from a mortgage insurance company, and one letter was received from a private citizen.

Although the comments received in response to the scope of the final rule were generally supportive, several criticisms and suggestions were made by more than one commenter. Several commenters recommended that the Board broaden the scope of the regulation specifically to include loans on the security of one-to-four family owner-occupied homes. Several other commenters objected to the breadth of the scope of the final rule, specifically criticizing its application to loans secured by real estate. These commenters generally argued that because loans made on the security of real property are inherently less risky than commercial loans, such loans should not fall within the rule. Several other commenters contended that the rule should properly apply only to those institutions that are of "substantial supervisory concern" to the Board and threaten the industry, and that the Board should not "overregulate" all insured institutions for the excesses of a few.

One trade association commenter supported the broadened scope of the rule contingent upon further regulatory modifications, including granting supervisory personnel discretion to establish loan loss allowance requirements below the stated percentages to take into account the lower loss levels associated with loans secured by real estate. Another trade association asserted that the Board lacked authority under the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*, to broaden the scope of the proposed rule without soliciting additional comment prior to its issuance of the final rule.

In proposing the following revisions of the existing classification of assets provisions, the Board has carefully considered all comments submitted. In view of the fact that further comment is solicited in this proposal, however, the Board has decided to defer responding to the comments just described and consider them together with any additional comments it receives.

**Objectives of the Proposal**

The Board's current classification regulation became effective on January 30, 1986. Thus, the Board, the Federal Home Loan Bank System supervisory staff, and the field examination staff have had more than a year of experience with the rule. This experience suggests that modifications to the rule are in order. Specifically, by adopting this proposal the Board seeks to encourage greater exercise of discretion, judgment, and flexibility by both supervisory and examination staff, to integrate the classification system with other regulations prescribing treatment of problem assets, to promote the Board's goal of increasing the thrift industry's capital, and, finally, to achieve greater conformity with the classification practices of the bank regulators.

Upon further consideration, the Bank Board believes that the existing classification system could be construed to constrain the broad exercise of judgment, flexibility, and discretion by both supervisory agents and examiners. As written, certain portions of the provisions bearing on asset classification rely heavily on appraisals of collateral. For example, the Board's regulation governing re-evaluation of assets imposes a requirement that, when reevaluation is necessary, most assets should be classified based on an appraisal done in conformity with Board standards. 12 CFR 563.17–2. *See also* Office of Regulatory Policy, Oversight and Supervision ("ORPOS") Memorandum No. R–41c (Sept. 11, 1986). Similarly, the Board's Statement of Policy on classification of assets requires that the amount of specific allowances for loan losses for assets classified Doubtful or Loss be based on a conforming appraisal. 12 CFR 571.1a.

The Board's original classification of assets proposal contained language that would have made reliance on an appraisal in re-evaluating real estate merely permissive, in order to allow for evaluations that take into consideration economic factors that directly affect the immediate value of the assets from the insured institution's point of view. Board Res. No. 85–504, 50 FR 27290 (July 2, 1985). Most commenters opposed this position. "They believed that the proposal might lead to arbitrary decision-making by examiners because it was highly subjective and, consequently, they believed that it would give examiners too much discretionary authority." 50 FR 53280 (summary of comments). The Board responded to these comments by requiring appraisals to support reevaluation of most assets and by providing for the automatic classification of assets unsupported by a conforming appraisal. 12 CFR 563.17–2.

The Board continues to believe that an appraisal of collateral that follows accepted appraisal methodology is an important factor in an examiner's assessment of the risk of non-payment associated with assets in an insured institution's portfolio. Risk of non-payment is also dependent upon other factors, however. These factors include the overall risk involved in the project being financed; the nature and degree of the collateral security; the character, capacity, financial responsibility, and record of the borrower; and the feasibility and probability of orderly liquidation of the asset. Of necessity, the

examiner's arrival at a valuation based on all the relevant factors will involve the exercise of some subjective judgment. The Board recognizes the importance of an appraisal; however, it believes the value of the collateral should not be the sole determinant of asset valuation where, for example, the borrower has other resources for repayment against which the lender has legal recourse.

Nor does the Board believe that the examiner's exercise of discretion and judgment will result in arbitrary valuation. Three reasons support this conclusion. First, the Board notes that additional training has been available to the examiners, especially since July of 1985 when the Board transferred its field examination force to the twelve Federal Home Loan Bank districts under the authority of the PSAs. Second, today's proposal does not give unreviewable discretion to examiners but retains the current approach of vesting the PSA or his designee with authority to review and disapprove or modify the examiner's classification and valuation of assets. Finally, the Board notes that it is also proposing to adopt by regulation appraisal standards that would assist examiners by clarifying and simplifying the appraisal requirements currently imposed by supervisory memorandum. Board Res. No. 87–528.

The approach implicit in today's proposal—that is, the introduction of greater flexibility into the classification process—is more consistent with the practices of the banking regulatory agencies. As a matter of course, bank examiners exercise informed judgment both in determining whether to classify an asset and in determining the appropriate amounts of capital and allowances for loan losses to be maintained by a bank whose portfolio contains classified assets. One virtue of a more flexible approach to classification is that it is more likely to encourage the examiner to identify weaknesses inherent in the institution's ongoing lending strategies and practices, in addition to quantifying current problems.

The Board believes that classification is a crucial tool for protecting both insured institutions and the FSLIC insurance fund. Identification of problem assets enables the FSLIC, through the examination process, to require institutions to maintain adequate allowances for loan losses and, under today's proposal, adequate capital to help insulate the FSLIC from loss. The classification process can serve a second, invaluable function. It can reveal lending patterns or deficiencies in portfolio administration that are consistently causing collectibility problems for an institution. Once the examiner identifies such patterns or deficiencies, his or her discussions with management can focus on avoiding practices that have resulted in the necessity for classifying existing assets. In this way, the classification process can serve a preventive, as well as a protective, function.

By adopting this proposal, the Board also seeks to promote consistency between its classification scheme and other aspects of its regulatory framework. For example, the Board has given high priority to encouraging insured institutions to increase their levels of capital. In August, 1986, some nine months after issuing its rule on classification of assets, the Board instituted a comprehensive revision of its regulatory capital requirements. *See* Board Res. No. 86–857, 51 FR 33565 (Sept. 22, 1986) (to be codified at 12 CFR 563.13). Like the banking regulatory agencies, whose practice it is to vary capital requirements depending on, among other factors, the quality of an institution's asset portfolio, the Board believes that classified assets, which by definition present an increased risk of non-payment, should be supported not only by allowances for loan losses but also by additional capital. Moreover, the Board believes that the amount of additional capital should be determined based on an evaluation of the institution's asset portfolio as a whole. Therefore, this proposal would provide for imposition of a higher capital requirement based on the quality of an institution's asset portfolio.

**Description of Proposal**

*1. Scope.*

The Board is proposing to broaden the scope of the classification of assets regulation to encompass securities (debt and equity), as defined in § 561.41 of the Board's regulations. In issuing the existing rule, the Board earlier alluded to the desirability of including securities within the scope of the regulation, but recognized the need for further review of the implications of such an expansion of coverage. 50 FR 53275, 53279 (December 31, 1985). Upon further consideration, and in light of supervisory experience, the Board believes it would be appropriate to include securities in its asset classification scheme. In addition, while off-balance-sheet items are not subject to the classification of assets regulation, the Board believes that, as a matter of prudent practice, insured institutions should continue to establish valuation allowances and liabilities for such items in accordance with generally accepted accounting principles ("GAAP") as described in Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies* ("FASB–5").[3] FASB–5, which is attached to this proposal as Attachment 2 provides that an estimated loss shall be accrued when it is probable that the asset has been impaired or a liability incurred, and the amount of loss can be reasonably estimated. The Board has not specifically addressed how debt and equity securities should be valued for purposes of the proposed classification of assets rule, and solicits comment on an appropriate valuation method.

Although the proposed regulation continues the exclusion for consumer credit as defined in § 561.38 and loans secured by one-to-four family, owner-occupied dwellings, the Board specifically solicits comment on whether the latter loans generally should continue to be excluded from classification. The Board also seeks comment on whether real estate owned, which at the time it served as collateral for a loan was one-to-four family, owner-occupied real estate, should continue to be excluded and treated as a scheduled item under § 561.15(c).[4]

*2. Effect of classification.*

Under today's proposal, the categories to which problem assets may be classified—Substandard, Doubtful, and Loss—would remain the same as they are in the current classification regulation. 12 CFR 561.16c(b). The Board reiterates that, as under the existing rule, a portion of an asset may remain unclassified, or may be classified under a different category than the remainder of the asset. Moreover, this proposal would retain without change the factors used to determine the proper category or categories to which an asset should be classified, except in cases of certain "automatic" classifications related to appraisal deficiencies. 12 CFR 571.1a;

[3] Generally, valuation allowances are established for assets and liabilities are established for off-balance-sheet items. Because off-balance-sheet items are typically not assets, it is advised that liabilities be recorded for such items when off-balance-sheet loss becomes probable and estimable.

[4] Section 407 of the NHA provides that, in making examinations of insured institutions, examiners appointed by the Board shall have power, on behalf of the FSLIC, to make such examinations of the affairs of all affiliates of such institutions as shall be necessary to disclose fully the relations between such institutions and their affiliates, and the effect of such relations upon such institutions. 12 U.S.C. 1730(m)(1). In view of this authority, the Board also solicits comment on the extent to which the proposed classification scheme should be applied to the assets of the affiliates of insured institutions.

see discussion at subheading 5., *infra*, "Automatic Classification for Failure to Comply with Appraisal Requirements." This proposal would, however, amend both the classification rule and policy statement to change the effect of classification for two of the three categories.

The proposal would no longer require treating assets classified Substandard as scheduled items. For assets classified Doubtful, establishing specific allowances for loan losses would no longer be required; instead, in cases where assets are classified Substandard or Doubtful, the proposal would authorize the examiner to direct the establishment of general allowances for loan losses based on the assets classified and the overall quality of the asset portfolio. In cases where an examiner has classified an asset Loss, the institution would continue to be required either to establish a specific allowance for loan losses in the amount of 100 percent of the amount classified Loss, or be permitted to charge off that amount. The Board solicits comment on whether institutions should be permitted to charge off such loss amounts as an alternative to establishing specific allowances for loan losses.

In examining an institution's asset portfolio, the examiner will consider the systems and internal controls employed by the institution in classifying assets. By examining those assets classified and the allowances for loan losses established pursuant to the institution's self-classification, the examiner can determine the effectiveness of, and the institution's adherence to, its classification procedures and methods of evaluation, and determine the need to require additional valuation allowances and/or additional capital.

This proposed treatment of classified assets more closely parallels that used by examiners in the commercial banking system. Once assets have been classified Substandard or Doubtful, the thrift examiner would review the adequacy of an insured institution's general allowances for loan losses and, if necessary, direct that an institution increase these allowances. While establishing these allowances reduces GAAP equity, the institution could include general allowances for loan losses in determining its regulatory capital. An increase in general allowances will thus have a different result from the current allocation of amounts to specific allowances for loan losses for Doubtful items, because specific valuation allowances for loan losses do not qualify as regulatory capital.[5] *See* Board Res. No. 86–857, 51 FR 33565, 33584 (Sept. 22, 1986) (to be codified at 12 CFR 561.13(a)).

Treatment of items classified Loss remains the same under this proposal as in the current regulation; the requirement that institutions establish specific allowances or undertake charge-offs for these items is analogous to the practice, employed by banking examiners, of requiring an immediate charge-off for items classified Loss.

In Attachment 1 to this proposal, the Board is providing a simple example of the accounting consequences of classification under today's proposal. Readers are advised that this example is intended only to illustrate the operation of the proposed scheme under regulatory accounting principles. Insured institutions should not rely upon it to predict the consequences of classification on their own capital positions, nor should they conclude that the calculation would be the same under GAAP.

As indicated earlier, the Board believes that, consistent with the current practice of the banking regulators, weak assets (*i.e.*, assets posing significant problems of collectibility) should be supported by additional capital. Accordingly, this proposal would amend the Board's regulation on minimum regulatory capital requirements to permit the PSA to impose an additional capital requirement on an insured institution based on the quality of its asset portfolio.

The amendments contained in today's proposal are silent with regard to the factors that should influence the examiner or the PSA in setting the amount of general allowances for loan losses or the amount of additional capital required as a result of the classification process. The Board believes that such an approach is consistent with the practice of the banking regulatory agencies and the Board's goal of achieving similar flexibility in the administration of its own classification system.[6] In adopting this approach, the Board recognizes its responsibility to ensure that examiners receive necessary training.

*3. Self-Classification and Reporting*

The Board is also proposing to amend section 561.16c to require that insured institutions independently review their asset portfolios, classify their assets, and set aside appropriate valuation allowances on the basis of such self-classification. This amendment merely sets forth as a regulatory requirement what is commonly regarded as a prudent institutional management policy. This process of self-classification is already widely observed throughout the commercial banking industry.[7]

Pursuant to the Board's authority, as operating head of the FSLIC, to prescribe the manner in which an insured institution reports its affairs to the FSLIC, 12 CFR 563.18, the Board also is proposing to require that an institution reflect its self-classification of assets in its quarterly reports to the Board, in the form of aggregate totals of assets for each of the three asset classifications.

*4. Delegations and Interpretations*

This portion of the classification regulation would remain substantially unchanged. The Principal Supervisory Agent would retain primary authority (which the PSA could delegate to a supervisory agent) over the examiner's classification of an asset, the examiner's directives with respect to the appropriate amount of allowances for loan losses to be established, and the acceptability of an appraisal made in connection with the re-evaluation of an asset. The amendment would also substitute a delegation to ORPOS for the previous delegation to the Board's former Office of Examination and Supervision ("OES"). *See* Board Res. No. 86–755, 51 FR 27165, 27167 (July 24, 1986) (to be codified at 12 CFR 522.90) (ORPOS succeeds to all delegations of authority from Board to OES).

---

[5] The Federal Reserve Board ("FRB"), upon consultation with other federal bank regulatory agencies and the Bank of England, has issued several recent proposals in an effort to establish uniform capital standards. The FRB has issued for comment a revised proposal that would establish a risk-based capital measure (risk asset ratio) to be used in tandem with existing ratios of primary and total capital to total assets. This proposal would also amend the definition of primary capital. 52 FR 5119 (February 19, 1987). As proposed, primary capital would exclude "reserves allocated for identified losses." 50 FR 531, 5121. The Board solicits comment on the extent to which the FRB's treatment of reserves differs from the Board's existing or proposed treatment of valuation allowances, and the extent to which the FRB's proposed approach should be followed.

[6] It should be noted that the Board continues to believe that factors such as the coverage of a loan by private mortgage insurance should be taken into account in determining the appropriate allowances for loan losses when the probability of a full insurance payment is substantial. *See* 12 CFR 571.1a(b)(3).

[7] This self-classification and reporting requirement should not pose a particular problem for insured institutions GAAP financial reporting, since the proposed method of setting aside allowances for loan losses is generally consistent with GAAP.

*5. Automatic Classification for Failure to Comply With Appraisal Requirements*

The Board also is proposing to amend § 563.17–2 pertaining to the re-evaluation of assets. The proposal would delete those provisions of § 563.17–2(b) requiring "automatic" or mandatory classification where the appraisal is absent or does not conform with the Board's appraisal requirements, or where the assumptions underlying such appraisal are demonstrably incorrect. While the Board recognizes the importance of a properly conducted appraisal to an examiner's assessment of the risk of nonpayment associated with a particular asset, such an amendment is consistent with the Board's recognition that risk of nonpayment is dependent upon other factors as well. Therefore, the Board is deleting this automatic classification mechanism to provide examiners with sufficient flexibility and discretion to consider these other factors and to promote consistency between the Board's classification of assets scheme and the classification practices of the bank regulatory agencies. This is also consistent with the Board's intention to afford examiners adequate discretion to determine the necessity of, and appropriate reliance on, a re-appraisal, subject to review by the PSA.

*6. Technical Questions*

Today's proposal includes amendments to the scheduled items regulation consistent with the amendments just described to the classification of assets provisions. *See* 12 CFR 561.15. First, the proposal would delete references in the scheduled items regulation to assets classified Substandard, Doubtful, or Loss as unnecessary in view of the revisions to the classification scheme. Second, the proposal would amend § 561.15(c) to clarify that the reference to real estate owned means only real estate that, at the time it served as collateral for a loan, was a one-to-four family, owner-occupied home. These assets are excluded from the coverage of the classification regulation and therefore properly come within the scope of scheduled items. Finally, the proposal would delete the paragraph prescribing scheduled-item treatment for securities in view of the proposed inclusion of those assets in the classification scheme.

In light of the proposal's deletion of the requirement of specific valuation allowances for assets classified Doubtful, questions may arise as to the appropriate treatment of existing specific valuation allowances for assets classified Doubtful under the current regulation. The Board contemplates that, as of the effective date of any final rule, specific allowances for loan losses set aside for assets classified Doubtful will be added to the institution's general valuation allowances. At the institution's next examination following the effective date of the proposal, the examiner will review the institution's asset portfolio to evaluate the adequacy of allowances for loan losses established for such assets. The Board specifically solicits comment as to this treatment of existing specific valuation allowances for assets classified Doubtful, and seeks comment on the need, if any, for institutions to retain those specific allowances set aside for assets classified Doubtful on the basis of a reappraisal.

*7. Solicitation of Comment*

The Board solicits comment on all aspects of this proposal without limitation. Commenters are invited to suggest alternatives to today's proposal, including retention of the current classification scheme. The Board notes that ORPOS has issued a supervisory memorandum on asset classification that interprets the current regulation to permit the PSAs to require specific allowances for loan losses for Doubtful assets in variable amounts up to 50 percent of book value. ORPOS Memorandum No. SP–68 (Aug. 14, 1986). SP–68 also includes factors for PSAs to consider in classifying assets. SP–68 is set forth as Attachment 3 to this proposal so that commenters may consider whether the Board should adopt the approach SP–68 sets forth in lieu of the modifications contained in today's proposal.

**Initial Regulatory Flexibility Analysis**

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 603, the Board is providing the following regulatory flexibility analysis:

1. *Reasons, objectives, and legal basis underlying the proposed rule.* These elements are incorporated above in SUPPLEMENTARY INFORMATION.

2. *Small entities to which the proposed rule would apply.* The proposed rule would apply to all insured institutions without regard to size.

3. *Impact of the proposed rule on small entities.* The Board believes that the proposed revision of its classification of asset scheme will not have a disparate effect on small entities. Moreover, to the extent that small entities engage to a greater degree than larger insured institutions in one-to-four family, owner-occupied mortgage lending, the impact of the proposal would be minimized since such loans are not within the coverage of the proposal.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that duplicate, overlap, or conflict with this proposal.

5. *Alternatives to the proposed rule.* In the above SUPPLEMENTARY INFORMATION the Board is soliciting comment on the rule as proposed.

**List of Subjects in 12 CFR Parts 561, 563 and 571**

Accounting, Bank deposit insurance, Investments, Reporting and recordkeeping requirements, and Savings and loan associations.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend Parts 561, 563, and 571, Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

**SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION**

**PART 561—DEFINITIONS**

1. The authority citation for Part 561 continues to read as follows:

**Authority:** Sec. 1, 47 Stat. 725, as amended (12 U.S.C. 1421 *et. seq.*); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

2. Amend § 561.15 by revising paragraph (a) to read as follows; by removing the period at the end of paragraph (d) and by inserting the following phrase to read as follows; and by removing paragraph (e) and by redesignating existing paragraphs (f) through (l) as new paragraphs (e) through (k) respectively:

**§ 561.15 Scheduled items.**

* * * * *

(a) Slow consumer credit and slow loans (other than loans specified in paragraph (b) of § 561.15).

* * * * *

(c) * * *, *Provided,* however, that this paragraph (c) includes only real estate owned that, at the time it served as collateral for a loan, was one-to-four-family, owner-occupied, residential real estate.

* * * * *

3. Amend § 561.16c by revising paragraphs (a), (c), and (d); and by adding a new paragraph (e) to read as follows:

**§ 561.16c Classification of certain assets.**

(a) *Scope.* The classification system described in this section applies to all assets or portions thereof held by an insured institution except for loans secured by "homes," as defined in § 541.14, that are owner-occupied, and "consumer credit," as defined in § 561.38 of this chapter.

* * * * *

(c) *Implementation of classification system.* (1) In connection with examinations of an insured institution, the examiner shall have authority to identify problem assets and, if appropriate, classify them.

(2) Each insured institution shall classify its own assets on a regular basis.

(3) In its quarterly reports to the Corporation, each insured institution shall include aggregate totals of assets that the institution has classified in each of the three asset classification categories.

(d) *Effect of classification.* (1) When, pursuant to § 561.16c, an insured institution has classified one or more assets, or portions thereof, Substandard or Doubtful, the insured institution shall establish prudent general allowances for loan losses. When, pursuant to § 561.16c, an examiner has classified one or more assets or portions thereof Substandard or Doubtful, and has determined that the existing valuation allowances are inadequate, the insured institution shall establish general allowances for loan losses in an appropriate amount as determined by the examiner.

(2) When, pursuant to § 561.16c, either an insured institution or an examiner has classified one or more assets or portions thereof Loss, the insured institution shall establish specific allowances for loan losses in the amount of 100 percent of the portion of the asset(s) classified Loss, or charge off such amount.

(e) *Delegations and interpretations.* (1) The Principal Supervisory Agent may approve, disapprove, or modify any classifications of assets made pursuant to § 561.16c and any amounts of general allowances for loan losses established by insured institutions or required by examiners pursuant to § 561.16c.

(2) When an appraisal is required or made in connection with any re-evaluation of assets, the Principal Supervisory Agent may approve or reject the appraisal and any valuation related to it.

(3) The Office of Regulatory Policy, Oversight and Supervision of the Federal Home Loan Bank System shall, from time to time, issue interpretations and other informational material regarding classification of assets. *See* § 571.1a of this subchapter containing the Corporation's statement of policy on the classification of assets.

(4) The Principal Supervisory Agent may delegate functions assigned under § 561.16c to a Supervisory Agent in the same Federal Home Loan Bank district.

## PART 563—OPERATIONS

4. The authority citation for Part 563 continues to read as follows:

**Authority:** Sec. 1, 47 Stat. 725, as amended (12 U.S.C. 1421 *et seq.*); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

5. Amend § 563.13 by adding a new paragraph (a)(3) to read as follows:

**§ 563.13 Regulatory capital requirement.**

(a) *Scope.* * * *

(3) In addition to the minimum regulatory capital requirements imposed by this section, the Principal Supervisory Agent may require an insured institution to maintain additional capital, in an amount to be determined by the Principal Supervisory Agent, if the insured institution's asset portfolio contains assets classified pursuant to § 561.16c of this subchapter.

* * * * *

6. Amend § 563.17–2 by revising paragraph (b) to read as follows:

**§ 563.17–2 Re-evaluation of assets; adjustment of book value; adjustment charges.**

* * * * *

(b) *Re-evaluation of other assets.* In connection with each examination of an insured institution or service corporation, the Board's examiner shall make such re-evaluation of such institution's or service corporation's assets (exclusive of insured or guaranteed loans) as deemed advisable or necessary. Any such re-evaluation of real estate may be based on an appraisal as provided by § 563.17–1, and re-evaluation of parcels of real estate that are similar in all essential respects may be based on an appraisal of one or more of such parcels. When an appraisal is required, it shall conform with § 563.17–1a of the Board's regulations.

* * * * *

## PART 571—STATEMENTS OF POLICY

7. The authority citation for Part 571 continues to read as follows:

**Authority:** Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402–403, 407, 48 Stat. 1256–1257, 1260, as amended (12 U.S.C. 1725–1726, 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

8. Amend § 571.1a by removing the last sentence of the text of the introductory paragraph; and by revising paragraph (d) to read as follows:

**§ 571.1a Classification of certain assets.**

* * * * *

(d) *Effect of classification.* (1) When, pursuant to § 561.16c of this subchapter, an insured institution has classified one or more assets, or portions thereof, Substandard or Doubtful, the insured institution shall establish prudent general allowances for loan losses. When, pursuant to § 561.16c of this subchapter, an examiner has classified one or more assets, or portions thereof, Substandard or Doubtful, and has determined that the existing valuation allowances are inadequate, the insured institution shall establish general allowances for loan losses in an appropriate amount as determined by the examiner.

(2) When, pursuant to § 561.16c of this subchapter, either an insured institution or an examiner has classified one or more assets, or portions thereof, Loss, the insured institution shall establish specific allowances for losses in the amount of 100 percent of the book value of the asset(s) classified Loss, or charge off such amount.

By the Federal Home Loan Bank Board.

**Nadine Y. Washington,**

*Acting Secretary.*

**Note.**—Attachments 1 through 3 will not appear in the Code of Federal Regulations.

### Attachment 1

The following is an example of the application of the proposed classification of assets regulation to the books and records of a $1,000,000 association as noted in I. The association reviews its loan portfolio and classifies its assets which results in the amounts listed in II. The increased capital requirement as noted in the table of $17,500 is determined through a review of asset quality by the PSA. The allowances established for substandard

and doubtful assets of $12,500 are included in determining regulatory capital and the total allowance established under GAAP of $22,500 is charged against earnings in the current period as reflected in the balance sheet shown in III through a reduction to the capital accounts.

*I. Institution before allowance for loan losses and classification of assets:*

| | |
|---|---|
| Loans | $900,000 |
| Other assets | 100,000 |
| Total | 1,000,000 |
| Deposits and liabilities | 950,000 |
| Capital | 50,000 |
| Total | 1,000,000 |

*II. Loans are classified and allowances established by institution and concurred in by FHLBank examination and supervision personnel in the following manner:*

| Classification | Loan(s) balance | Amount classified | Allowances established | Increased capital |
|---|---|---|---|---|
| Substandard | 100,000 | 50,000 | [1] 5,000 | 7,500 |
| Doubtful | 75,000 | 25,000 | [1] 7,500 | 10,000 |
| | | | 12,500 | 17,500 |
| Loss | 50,000 | 10,000 | [1 2] 10,000 | 0 |
| Total | | | 22,500 | 17,500 |

[1] Allowance for loan losses established in accordance with generally accepted accounting principles (GAAP), FASB Statement No. 5 *Accounting for Contingencies.** [2] 100 percent of amount classified Loss is required as a specific allowance for loan losses.

* Statement of Financial Accounting Standards No. 5, *Accounting for Contingencies*, provides that an estimated loss should be accrued when it is probable that the asset has been impaired and if the amount of loss can be reasonably estimated.

*III. Institution after allowance for loan losses and classification of assets:*

| | |
|---|---|
| Loans | $900,000 |
| Allowance for loan losses: | |
| General | (12,500) |
| Specific | (10,000) |
| | (22,500) |
| Net Loans | 877,500 |
| Other Assets | 100,000 |
| | 977,500 |
| Deposits and liabilities | 950,000 |
| Capital | 27,500 |
| | 977,500 |
| Regulatory Capital: | |
| Capital | 27,500 |
| General reserves | 12,500 |
| | 40,000 |
| Regulatory capital requirement: | |
| 950,000×3% | 28,500 |
| Increase from classification | 17,500 |
| | 46,000 |
| Regulatory capital deficiency | (6,000) |

**INTRODUCTION**

1. For the purpose of this Statement, a contingency is defined as an existing condition, situation, or set of circumstances involving uncertainty as to possible gain (hereinafter a "gain contingency") or loss [1] (hereinafter a "loss contingency") to an enterprise that will ultimately be resolved when one or more future events occur or fail to occur. Resolution of the uncertainty may confirm the acquisition of an asset or the reduction of a liability or the loss or impairment of an asset or the incurrence of a liability.

2. Not all uncertainties inherent in the accounting process give rise to contingencies as the term is used in this Statement. Estimates are required in financial statements for many on-going and recurring activities of an enterprise. The mere fact that an estimate is involved does not of itself constitute the type of uncertainty referred to in the definition in paragraph 1. For example, the fact that estimates are used to allocate the known cost of a depreciable asset over the period of use by an enterprise does not make depreciation a contingency; the eventual expiration of the utility of the asset is not uncertain. Thus, depreciation of assets is not a contingency as defined in paragraph 1, nor are such matters as recurring repairs, maintenance, and overhauls, which interrelate with depreciation. Also, amounts owed for services received, such as advertising and utilities, are not contingencies even though the accrued amounts may have been estimated; there is nothing uncertain about the fact those obligations have been incurred.

3. When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This Statement uses the terms *probable, reasonably possible,* and *remote* to identify three areas within that range, as follows:

a. *Probable.* The future event or events are likely to occur.

b. *Reasonably possible.* The chance of the future event or events occurring is more than remote but less than likely.

c. *Remote.* The chance of the future event or events occurring is slight.

4. Examples of loss contingencies include:

a. Collectibility of receivables.

b. Obligations related to product warranties and product defects.

c. Risk of loss or damage of enterprise property by fire, explosion, or other hazards.

d. Threat of expropriation of assets.

e. Pending or threatened litigation.

f. Actual or possible claims and assessments.

g. Risk of loss from catastrophes assumed by property and casualty insurance companies including reinsurance companies.

h. Guarantees of indebtedness of others.

i. Obligations of commercial banks under "standby letters of credit." [2]

[1] The term *loss* used for convenience to include many charges against income that are commonly referred to as *expenses* and others that are commonly referred to as *losses.*

[2] As defined by the Federal Reserve Board, "standby letters of credit" include "every letter of credit (or similar arrangement however named or designated) which represents an obligation to the beneficiary on the part of the issuer (1) to repay

Continued

j. Agreements to repurchase receivables (or to repurchase the related property) that have been sold.

5. Some enterprises now accrue estimated losses from some types of contingencies by a charge to income prior to the occurrence of the event or events that are expected to resolve the uncertainties while, under similar circumstances, other enterprises account for those losses only when the confirming event or events have occurred.

6. This Statement establishes standards of financial accounting and reporting for loss contingencies (see paragraphs 8–16) and carries forward without reconsideration the conclusions of *Accounting Research Bulletin (ARB) No. 50*, "Contingencies," with respect to gain contingencies (see paragraph 17) and other disclosures (see paragraphs 18–19). The basis for the Board's conclusions, as well as alternatives considered and reasons for their rejection, are discussed in Appendix C. Examples of application of this Statement are presented in Appendix A, and background information is presented in Appendix B.

7. This Statement supersedes both *ARB No. 50* and Chapter 8, "Contingency Reserves," of *ARB No. 43*. The conditions for accrual of loss contingencies in paragraph 8 of this Statement do not amend any other present requirement in an Accounting Research Bulletin or Opinion of the Accounting Principles Board to accrue a particular type of loss or expense. Thus, for example, accounting for pension cost, deferred compensation contracts, and stock issued to employees are excluded from the scope of this Statement. Those matters are covered, respectively, in *APB Opinion No. 8*, "Accounting for the Cost of Pension Plans," *APB Opinion No. 12*, "Omnibus Opinion—1967," paragraphs 6–8, and *APB Opinion No. 25*, "Accounting for Stock Issued to Employees." Accounting for other employment-related costs, such as group insurance, vacation pay, workmen's compensation, and disability benefits, is also excluded from the scope of this Statement. Accounting practices for those types of costs and pension accounting practices tend to involve similar considerations.

## STANDARDS OF FINANCIAL ACCOUNTING AND REPORTING

### Accrual of Loss Contingencies

8. An estimated loss from a loss contingency (as defined in paragraph 1) shall be accrued by a charge of income [3] if *both* of the following conditions are met:

a. Information available prior to issuance of the financial statements indicates that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements.[4] It is implicit in this condition that it must be probable that one or more future events will occur confirming the fact of the loss.

b. The amount of loss can be reasonably estimated.

### Disclosure of Loss Contingencies

9. Disclosure of the nature of an accrual [5] made pursuant to the provisions of paragraph 8, and in some circumstances the amount accrued, may be necessary for the financial statements not to be misleading.

10. If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, disclosure of the contingency shall be made when there is at least a reasonable possibility that a loss or an additional loss may have been incurred.[6] The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made. Disclosure is not required of a loss contingency involving an unasserted claim or assessment when there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment unless it is considered probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable.

11. After the date or an enterprise's financial statements but before those financial statements are issued, information may become available indicating that an asset was impaired or a liability was incurred after the date of the financial statements or that there is at least a reasonable possibility that an asset was impaired or a liability was incurred after that date. The information may relate to a loss contingency that existed at the date of the finanical statement, e.g., an asset that was not insured at the date of the financial statements. On the other hand, the information may relate to a loss contingency that did not exist at the date of the financial statement, e.g., threat of expropriation of assets after the date of the financial statements or the filing for bankruptcy by an enterprise whose debt was guaranteed after the date of the financial statements. In none of the cases cited in this paragraph was an asset impaired or a liability incurred at the date of the financial statements, and the condition for accrual in paragraph 8(a) is, therefore, not met. Disclosure of those kinds or losses or loss contingencies may be necessary , however, to keep the financial statements from being misleading. If disclosure is deemed necessary, the financial statements shall indicate the nature of the loss or loss contingency and give an estimate of the amount or range of loss or possible loss or state that such an estimate cannot be made. Occasionally, in the case of a loss arising after the date of the financial statements where the amount of asset impairment or liability incurrence can be reasonably estimated, disclosure may best be made by supplementing the historical financial statements with pro forma financial data giving effect to the loss as if it had occurred at the date of the financial statements. It may be desirable to present pro forma statements, usually a balance sheet only, in columnar form on the face of the historical financial statements.

12. Certain loss contingencies are presently being disclosed in financial statements even though the possibility of loss may be remote. The common characteristic of those contingencies is a guarantee, normally with a right to proceed against an outside party in the event that the guarantor is called upon to satisfy the guarantee. Examples include (a) guarantees of indebtedness of others, (b) obligations of commercial banks under "standby letters of credit," and (c) guarantees to repurchase receivables (or, in some cases, to repurchase the related property) that have been sold or otherwise assigned. The Board concludes that disclosure of those loss contingencies, and others that in substance have the same characteristic, shall be continued. The disclosure shall include the nature and amount of the guarantee. Consideration should be given to disclosing, if estimable, the value of any recovery that could be expected to result, such as from the guarantor's right to proceed against an outside party.

13. This Statement applies to regulated enterprises in accordance with provisions of the Addendum to *APB Opinion No. 2*, "Accounting for the 'Investment Credit.'" If, in conformity with the Addendum, a regulated enterprise accrues for financial accounting and reporting purposes an estimated loss without regard to the conditions in paragraph 8, the following information shall be disclosed in its financial statements:

a. The accounting policy including the nature of the accrual and the basis for estimation.

b. The amount of any related "liability" or "asset valuation" account included in each balance sheet presented.

---

money borrowed by or advanced to or for the account of the account party or (2) to make payment on account of any evidence of indebtedness undertaken by the account party or (3) to make payment on account of any default by the account party in the performance of an obligation." A note to that definition states that "as defined, 'standby letter of credit' would not include (1) commercial letters of credit and similar instruments where the issuing bank expects the beneficiary to draw upon the issuer and which do not 'guaranty' payment of a money obligation or (2) a guaranty or similar obligation issued by a foreign branch in accordance with and subject to the limitations of Regulation M (of the Federal Reserve)." Regulations of the Comptroller of the Currency and the Federal Deposit Insurance Corporation contain similar definitions.

[3] Paragraphs 23–24 of *APB Opinion No. 9*, "Reporting the Results of Operations," describe the "rare" circumstance in which a prior period adjustment is appropriate. Those pargraphs are not amended by this Statement.

[4] *Date of the financial statements* means the end of the most recent accounting period for which financial statements are being presented.

[5] Terminology used shall be descriptive of the nature of the accrual (see paragraphs 57–64 of *Accounting Terminology Bulletin No. 1*, "Review and Resume").

[6] For example, disclosure shall be made of any loss contingency that meets the condition in paragraph 8(a) but that is not accrued because the amount of loss cannot be reasonably estimated (paragraph 8(b)). Disclosure is also required of some loss contingencies that do not meet the condition in paragraph 8(a)—namely, those contingencies for which there is a *reasonable possibility* that a loss may have been incurred even though information may not indicate that it is *probable* that an asset had been impaired or a liability had been incurred at the date of the financial statements.

**General or Unspecified Business Risks**

14. Some enterprises have in the past accrued so-called "reserves for general contingencies." General or unspecified business risks do not meet the conditions for accrual in paragraph 8, and no accrual for loss shall be made. No disclosure about them is required by this Statement.

**Appropriation of Retained Earnings.**

15. Some enterprises have classified a portion of retained earnings as "appropriated" for loss contingencies. In some cases, the appropriation has been shown outside the stockholder' equity section of the balance sheet. Appropriation of retained earnings is not prohibited by this Statement provided that is shown within the stockholders' equity section of the balance sheet and is clearly identified as an appropriation of retained earnings. Costs or losses shall not be charged to an appropriation of retained earnings, and no part of the appropriation shall be transferred to income.

**Examples of Application of This Statement**

16. Examples of application of the conditions for accrual of loss contingencies in paragraph 8 and the disclosure requirements in paragraph 9–11 are presented in Appendix A.

**Gain Contingencies**

17. The Board has not reconsidered *ARB No., 50* with respect to gain contingencies. Accordingly, the following provisions of paragraphs 3 and 5 of that Bulletin shall continue in effect:

a. Contingencies that might result in gains usually are not reflected in the accounts since to do so might be to recognize revenue prior to its realization.

b. Adequate disclosure shall be made of contingencies that might result in gains, but care shall be exercised to avoid misleading implications as to the likelihood of realization.

**Other Disclosures**

18. Paragrpah 6 *ARB No. 50* required disclosure of a number of situations including "unused letters of credit, long-term leases, assets pledged as security for loans, pension plans the existence of cumulative preferred stock dividends in arrears, and commitments such as those for plant acquisition or an obligation to reduce debts, maintain working capital, or restrict dividends." Subsequent Opinions issued by the Accounting Principles Board established more explicit disclosure requirements for a number of those items, i.e., lease (see *APB Opinions No. 5* and *31*), pension plans (see *APB Opinion No. 8*), and preferred stock dividend arrearages (see *APB Opinion No. 10*, paragraph 11(b)).

19. Situations of the type described in the proceding paragraph shall continue to be disclosed in financial statements, and this Statement does not alter the present disclosure requirements with respect to those items.

**Effective Date and Transition**

20. This Statement shall be effective for fiscal years beginning on or after July 1, 1975, although earlier application is encouraged. A change in accounting principle resulting from compliance with paragraph 8 or 14 of this Statement shall be reported in accordance with *APB Opinion No. 20*, "Accounting Changes." Accordingly, except in the special circumstances referred to in paragraphs 29–30 of *APB Opinion No. 20*, the cumulative effect of the change on retained earnings at the beginning of the year in which the change is made shall be included in net income of the year of the change, and the disclosures specified in *APB Option No. 20* shall be made. Reclassification of an appropriation of retained earnings to comply with paragraph 15 of this Statement shall be made in any financial statements for periods before the effective date of this Statesment, or financial summaries or other data derived therefrom, that are presented after the effective date of this Statement.

The provisions of this Statement need not be applied to immaterial items.

*This Statement was adopted by the unanimous vote of the seven members of the Financial Accounting Standards Board:*

Marshall S. Armstrong, Chairman
Oscar S. Gellein
Donald J. Kirk
Arthur L. Litke
Robert E. Mays
Walter Schuetze
Robert T. Sprouse

**Appendix A.—Examples of Application of This Statement**

21. This Appendix contains examples of application of the conditions for accrual of loss contingencies in paragraph 8 and of the disclosure requirements in paragraphs 9–11. Some examples have been included in response to questions raised in letters of comment on the Exposure Draft. It should be recognized that no set of examples can encompass all possible contingencies or circumstances. Accordingly, accrual and disclosure of loss contingencies should be based on evaluation of the facts in each particular case.

**Collectibility of Receivables**

22. The assets of an enterprise may include receivables that arose from credit sales, loans, or other transactions. The conditions under which receivables exist usually involve some degree of uncertainty about their collectibility, in which case a contingency exists as defined in paragraph 1. Losses from uncollectible receivables shall be accrued when both conditions in paragraph 8 are met. Those conditions may be considered in relation to individual receivables or in relation to groups of similar types of receivables. If the conditions are met, accrual shall be made even though the particular receivables that are uncollectible may not be identifiable.

23. If, based on available information, it is probable that the enterprise will be unable to collect all amounts due and, therefore, that at the date of its financial statements the net realizable value of the receivables through collection in the ordinary course of business is less than the total amount receivable, the condition in paragraph 8(a) is met because it is probable that an asset has been impaired. Whether the amount of loss can be reasonably estimated (the condition in paragraph 8(b)) will normally depend on, among other things, the experience of the enterprise, information about the ability of individual debtors to pay, and appraisal of the receivables in light of the current economic environment. In the case of an enterprise that has no experience of its own, reference to the experience of other enterprises in the same business may be appropriate. Inability to make a reasonable estimate of the amount of loss from uncollectible receivables (i.e., failure to satisfy the condition in paragraph 8(b)) precludes accrual and may, if there is significant uncertainty as to collection, suggest that the installment method, the cost recovery method, or some other method of revenue recognition be used (see paragraph 12 of *APB Opinion No. 10*, "Omnibus Opinion—1966"); in addition, the disclosures called for by paragraph 10 of this Statement should be made.

**Obligations Related to Product Warranties and Product Defects**

24. A warranty is an obligation incurred in connection with the sale of goods or services that may require further performance by the seller after the sale has taken place. Because of the uncertainty surrounding claims that may be made under warranties, warranty obligations fall within the definition of a contingency in paragraph 1. Losses from warranty obligations shall be accrued when the conditions in paragraph 8 are met. Those conditions may be considered in relation to individual sales made with warranties or in relation to groups of similar types of sales made with warranties. If the conditions are met, accrual shall be made even though the particular parties that will make claims under warranties may not be identifiable.

25. If, based on available information, it is probable that customers will make claims under warranties relating to goods or services that have been sold, the condition in paragraph 8(a) is met at the date of an enterprise's financial statements because it is probable that a liability has been incurred. Satisfaction of the condition in paragraph 8(b) will normally depend on the experience of an enterprise or other information. In the case of an enterprise that has no experience of its own, reference to the experience of other enterprises in the same business may be appropriate. Inability to make a reasonable estimate of the amount of a warranty obligation at the time of sale because of significant uncertainty about possible claims (i.e., failure to satisfy the condition in paragraph 8(b)) precludes accrual and, if the range of possible loss is wide, may raise a question about whether a sale should be recorded prior to expiration of the warranty period or until sufficient experience has been gained to permit a reasonable estimate of the obligation; in addition, the disclosures called for by paragraph 10 of this Statement should be made.

26. Obligations other than warranties may arise with respect to products or services that have been sold, for example, claims resulting

from injury or damage caused by product defects. If it is probable that claims will arise with respect to products or services that have been sold, accrual for losses may be appropriate. The condition in paragraph 8(a) would be met, for instance, with respect to a drug product or toys that have been sold if a health or safety hazard related to those products is discovered and as a result it is considered probable that liabilities have been incurred. The condition in paragraph 8(b) would be met if experience or other information enables the enterprise to make a reasonable estimate of the loss with respect to the drug product or the toys.

**Risk of Loss or Damage of Enterprise Property**

27. At the date of an enterprise's financial statements, it may not be insured against risk of future loss or damage to its property by fire, explosion, or other hazards. The absence of insurance against losses from risks of those types constitutes an existing condition involving uncertainty about the amount and timing of any losses that may occur, in which case a contingency exists as defined in paragraph 1. Uninsured risks may arise in a number of ways, including (a) noninsurance of certain risks or co-insurance or deductible clauses in an insurance contract or (b) insurance through a subsidiary or investee[7] to the extent not reinsured with an inde risks, for all practical purposes, may be noninsurable, and the self-assumption of those risks is mandatory.

28. The absence of insurance does not mean that an asset has been impaired or a liability has been incurred at the date of an enterprise's financial statements. Fires, explosions, and other similar events that may cause loss or damage of an enterprise's property are random in their occurrence.[8] With respect to events of that type, the condition for accrual in paragraph 8(a) is not satisfied prior to the occurrence of the event because until that time there is no diminution in the value of the property. There is no relationship of those events to the activities of the enterprise prior to their occurrence, and no asset is impaired prior to their occurrence. Further, unlike an insurance company, which has a contractual obligation under policies in force to reimburse insureds for losses, an enterprise can have no such obligation to itself and, hence, no liability.

[7] The effects of transactions between a parent or other investor and a subsidiary or investee insurance company shall be eliminated from an enterprise's financial statements (see paragraph 6 of *ARB NO. 51*, "Consolidated Financial Statements," and paragraph 19(a) of *APB Opinion No. 18*, "The Equity Method of Accounting for Investments in Common Stock"). pendent insurer. Some

[8] The Board recognizes that, in practice, experience regarding loss or damage to depreciable assets is in some cases one of the factors considered in estimating the depreciable lives of a group of depreciable assets, along with such other factors as wear and tear, obsolescence, and maintenance and replacement policies. This Statement is not intended to alter present depreciation practices (see paragraph 2).

**Risk of Loss from Future Injury to Others, Damage to the Property of Others, and Business Interruption**

29. An enterprise may choose not to purchase insurance against risk of loss that may result from injury to others, damage to the property of others, or interruption of its business operations.[9] Exposure to risks of those types constitutes an existing condition involving uncertainty about the amount and timing of any losses that may occur, in which case a contingency exists as defined in paragraph 1.

30. Mere exposure to risks of those types, however, does not mean that an asset has been impaired or a liability has been incurred. The condition for accrual in paragraph 8(a) is not met with respect to loss that may result from injury to others, damage to the property of others, or business interruption that may occur after the date of an enterprise's financial statements. Losses of those types do not relate to the current or a prior period but rather to the *future* period in which they occur. Thus, for example, an enterprise with a fleet of vehicles should not accrue for injury to others or damage to the property of others that may be caused by those vehicles in the future even if the amount of those losses may be reasonably estimable. On the other hand, the conditions in paragraph 8 would be met with respect to uninsured losses resulting from injury to others or damage to the property of others that took place prior to the date of the financial statements, even though the enterprise may not become aware of those matters until after that date, if the experience of the enterprise or other information enables it to make a reasonable estimate of the loss that was incurred prior to the date of its financial statements.

**Write-Down of Operating Assets**

31. In some cases, the carrying amount of an operating asset not intended for disposal may exceed the amount expected to be recoverable through future use of that asset even though there has been no physical loss or damage of the asset or threat of such loss or damage. For example, changed economic conditions may have made recovery of the carrying amount of a productive facility doubtful. The question of whether, in those cases, it is appropriate to write down the carrying amount of the asset to an amount expected to be recoverable through future operations in not covered by this Statement.

**Threat of Expropriation**

32. The threat of expropriation of assets is a contingency within the definition of paragraph 1 because of the uncertaintly about its outcome and effect. If information indicates that expropriation is imminent and compensation will be less than the carrying amount of the assets, the condition for accrual in paragraph 8(a) is met. Imminence may be indicated, for example, by public or private declarations of intent by a government to expropriate assets of the enterprise or actual expropriation of assets of other enterprises. Paragraph 8(b) requires that accrual be made only if the amount of loss can be reasonably estimated. If the conditions for accrual are not met, the disclosures specified in paragraph 10 would be made when there is at least a reasonable possibility that an asset has been impaired.

[9] As to injury or damage resulting from products that have been sold, see paragraph 26.

**Litigation, Claims, and Assessments**

33. The following factors, among others, must be considered in determining whether accrual and/or disclosure is required with respect to pending or threatened litigation and actual or possible claims and assessments:

a. The period in which the underlying cause (i.e., the cause for action) of the pending or threatened litigation or of the actual or possible claim or assessment occurred.

b. The degree of probability of an unfavorable outcome.

c. The ability to make a reasonable estimate of the amount of loss.

34. As a condition for accrual of a loss contingency, paragraph 8(a) requires that information available prior to the issuance of financial statements indicate that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements. Accordingly, accrual would clearly be inappropriate for litigation, claims, or assessments whose underlying cause is an event or condition occurring after the date of financial statements but before those financial statements are issued, for example, a suit for damages alleged to have been suffered as a result of an accident that occurred after the date of the financial statements. Disclosure may be required, however, by paragraph 11.

35. On the other hand, accrual may be appropriate for litigation, claims, or assessments whose underlying cause is an event occurring on or before the date of an enterprise's financial statements even if the enterprise does not become aware of the existence or possibility of the law suit, claim, or assessment until after the date of the financial statements. If those financial statements have not been issued, accrual of a loss related to the litigation, claim, or assessment would be required if the probability of loss is such that the condition in paragraph 8(a) is met and the amount of loss can be reasonably estimated.

36. If the underlying cause of the litigation, claim, or assessment is an event occurring before the date of an enterprise's financial statements, the probability of an outcome unfavorable to the enterprise must be assessed to determine whether the condition in paragraph 8(a) is met. Among the factors that should be considered are the nature of the litigation, claim, or assessment, the progress of the case (including progress after the date of the financial statements but before those statements are issued), the opinions or views of legal counsel and other advisers, the experience of the enterprise in similar cases, the experience of other enterprises, and any decision of the enterprise's management as to how the enterprise intends to respond to the lawsuit, claim, or assessment (for example, a decision to contest the case vigorously or a decision to seek an out-of-court settlement). The fact that

legal counsel is unable to express an opinion that the outcome will be favorable to the enterprise should not necessarily be interpreted to mean that the condition for accrual of a loss in paragraph 8(a) is met.

37. The filing of a suit or formal assertion of a claim or assessment does not automatically indicate that accrual of a loss may be appropriate. The degree of probability of an unfavorable outcome must be assessed. The condition for accrual in paragraph 8(a) would be met if an unfavorable outcome is determined to be probable. If an unfavorable outcome is determined to be reasonably possible but not probable, or if the amount of loss cannot be reasonably estimated, accrual would be inappropriate, but disclosure would be required by paragraph 10 of this Statement.

38. With respect to unasserted claims and assessments, an enterprise must determine the degree of probability that a suit may be filed or a claim or assessment may be asserted and the possibility of an unfavorable outcome. For example, a catastrophe, accident, or other similar physical occurrence predictably engenders claims for redress, and in such circumstances their assertion may be probable; similiarly, an investigation of an enterprise by a governmental agency, if enforcement proceedings have been or are likely to be instituted, is often followed by private claims for redress, and the probability of their assertion and the possibility of loss should be considered in each case. By way of further example, an enterprise may believe there is a possibility that it has infringed on another enterprise's patent rights, but the enterprise owning the patent rights has not indicated an intention to take any action and has not even indicated an awareness of the possible infringement. In that case, a judgment must first be made as to whether the assertion of a claim is probable. If the judgment is that assertion is not probable, no accrual or disclosure would be required. On the other hand, if the judgment is that assertion is probable, then a second judgment must be made as to the degree of probability of an unfavorable outcome. If an unfavorable outcome in probable and the amount of loss can be reasonably estimated, accrual of a loss is required by paragraph 8. If an unfavorable outcome is probable but the amount of loss cannot be reasonably estimated, accrual would not be appropriate, but disclosure would be required by paragraph 10. If an unfavorable outcome is reasonably possible but not probable, disclosure would be required by paragraph 10.

39. As a condition for accrual of a loss contingency, paragraph 8(b) requires that the amount of loss can be reasonably estimated. In some cases, it may be determined that a loss was incurred because an unfavorable outcome of the litigation, claim, or assessment is probable (thus satisfying the condition in paragraph 8(a)), but the range of possible loss is wide. For example, an enterprise may be litigating an income tax matter. In preparation for the trial, it may determine that, based on recent decisions involving one aspect of the litigation, it is probable that it will have to pay additional taxes of $2 million. Another aspect of the litigation may, however, be open to considerable interpretation, and depending on the interpretation by the court the enterprise may have to pay taxes of $8 million over and above the $2 million. In that case, paragraph 8 requires accrual of the $2 million if that is considered a reasonable estimate of the loss. Paragrah 10 requires disclosure of the additional exposure to loss if there is a reasonable possibility that additional taxes will be paid. Depending on the circumstances, paragraph 9 may require disclosure of the $2 million that was accrued.

**Catastrophe Losses of Property and Casualty Insurance Companies**

40. At the time that a property and casualty insurance company or reinsurance company issues an insurance policy covering risk of loss from catastrophes, a contingency arises. The contingency is the risk of loss *assumed* by the insurance company, that is, the risk of loss from catastrophes that may occur *during the term of the policy*. The insurance company has not assumed risk of loss for catastrophes that may occur *beyond* the term of the policy. Clearly, therefore, no asset has been impaired or liability incurred with respect to catastrophes that may occur beyond the terms of policies in force.

41. The conditions in paragraph 8 should be considered with respect to the risk of loss assumed by an insurance company for catastrophes that may occur during the terms of policies in force to determine whether accrual of a loss is appropriate. To satisfy the condition in paragraph 8(a) that it be probable that a liability has been incurred to existing policyholders, the occurrence of catastrophes (i.e., the confirming future events) would have to be reasonably predictable within the terms of policies in force. Further, to satisfy the condition in paragraph 8(b), the amounts of losses there from would have to be reasonably estimable. Actuarial techniques are employed by insurance companies to predict the rate of occurrence of and amounts of losses from catastrophes over long periods of time for insurance rate-setting purposes. Predictions over relatively short periods of time, such as an individual accounting period or the terms of a large number of existing insurance policies in force, are subject to substantial deviations. Consequently, assumption of risk of loss from catastrophes by property and casualty insurance companies and reinsurance companies fails to satisfy the conditions for accrual in paragraphs 8(a) and 8(b). Moreover, deferral of unearned premiums *within* the terms of policies in force represents the "unknown liabililty" for loss (including catastrophe losses) on unexpired policies, making an accrual inappropriate—see paragraphs 94–96 in Appendix C. Recognition of premium income as earned revenue within the terms of policies in force is discussed in the AICPA Industry Audit Guide, " Audits of Fire and Casualty Insurance Companies."

42. Although some property and causalty insurance companies have accrued an estimated amount for catastrophe losses, other insurance companies have accomplished the same objective by deferring a portion of the premium income. Deferral of any portion of premium income *beyond the terms of policies in force* is, in substance, similar to premature accrual of catastrophe losses and, therefore, also does not meet the conditions of paragraph 8.

43. The conditions for accrual in paragraph 8 do not prohibit a property and casualty insurance company from accruing probable catastrophe losses that have been incurred on or before the date of its financial statements but that have not been reported by its policyholders as of that date. If the amount of loss can be reasonably estimated, paragraph 8 requires accrual of those incurred-but-not-reported losses.

**Payments to Insurance Companies That May Not Involve Transfer of Risk**

44. To the extent that an insurance contract or reinsurance contract does not, despite its form, provide for indemnification of the insured or the ceding company by the insured or reinsurer against loss or liability, the premium paid less the amount of the premium to be retained by the insurer or reinsurer shall be accounted for as a deposit by the insured or the ceding company. Those contracts may be structured in various ways, but if, regardless of form, their substance is that all of part of the premium paid by the insured or the ceding company is a deposit, it shall be accounted for as such.

45. Operations in certain industries may be subject to such high risks that insurance is unavailable or is available only at what is considered to be prohibitively high cost. Some enterprises in those industries have "pooled" their risks by forming a mutual insurance company in which they retain an equity interest and to which they pay insurance premiums. For example, some electric utility companies have formed such a mutual insurance company to insure risks related to nuclear power plants, and some oil companies have formed a company to insure against risks associated with petroleum exploration and production. Whether the premium paid represents a payent for the transfer of risk or whether it represents merely a deposit will depend on the circumstances surrounding each enterprise's interest in and insurance arrangement with the mutual insurance company. An analysis of the contract is required to determine whether risk has been transferred and to what extent.

## Appendix B

## BACKGROUND INFORMATION

46. In April 1973, the FASB placed on its technical agenda a project then entitled "Accounting for Future Losses." The project addressed accrual and disclosure of loss contingencies. The Board believes that "Accounting for Contingencies" is a more descriptive title for this Statement than "Accounting for Future Losses."

47. A task force of 16 persons from industry, public accounting, the financial community, and academe was appointed in the summer of 1973 to provide counsel to the Board in preparing a Discussion Memorandum analyzing issues related to the project.

48. The Discussion Memorandum gave examples of various types of contingencies and considered several of those at length to assist in the development of standards of financial accounting and reporting. These included (a) uninsured risks ("self-insurance"), (b) risk of losses from catastrophes assumed by property and casualty insurance companies, and (c) risk of losses from expropriations by foreign governments.

49. Research undertaken in connection with this project included (a) a search of relevant literature, (b) an examination of published financial statements in annual reports to shareholders and in filings with the SEC on Form 10-K, (c) a questionnaire survey conducted by the Financial Executives Institute to which 64 companies responded, and (d) a study of catastrophe reserve accounting methods employed by property and casualty insurance companies. Summaries of research findings are included in appendices to the Discussion Memorandum.

50. On January 3, 1973 (prior to the date the Board placed this subject on its agenda), the Securities and Exchange Commission issued its *Accounting Series Release No. 134*, which pointed out that a number of property and casualty insurance companies had adopted the accounting policy of making a provision from each period's income to cover a portion of major losses expected to occur in future periods. The SEC Release indicated that the Committee on Insurance Accounting and Auditing of the AICPA was working actively on the subject in cooperation with industry groups. The Release set forth certain disclosure requirements pending resolution of the question of accrual.

51. The AICPA committee's report (dated July 17, 1973) was in the form of a memorandum setting forth the views of those committee members favoring and those opposing accrual of losses from future catastrophes. In the course of its study, the AICPA committee had gathered considerable data on the subject, in part from a survey of member companies of the American Insurance Association, and this information was made available to the Board.

52. On August 2, 1973, the SEC announced in *Accounting Series Release No. 145* that property and casualty insurance companies should not change their method of accounting for catastrophe losses "until a single method has been adopted by the Financial Accounting Standard Board."

53. The Board issued the Discussion Memorandum on March 13, 1974, and held a public hearing on the subject on May 13, 1974. The Board received 87 position papers, letters of comment, and outlines of oral presentations in response to the Discussion Memorandum. Eighteen presentations were made at the public hearing.

54. An Exposure Draft of a proposed Statement on "Accounting for Contingencies" was issued on October 21, 1974. The Board received 212 letters of comment on the Exposure Draft.

## Appendix C

## BASIS FOR CONCLUSIONS

55. This Appendix discusses factors deemed significant by members of the Board in reaching the conclusions in this Statement, including various alternatives considered and reasons for accepting some and rejecting others.

### SCOPE OF THIS STATEMENT

56. Some respondents to the Exposure Draft proposed that the Statement not deal with accrual and disclosure of loss contingencies in general but, rather, only with the following three specific matters: "self-insurance," risks of losses from catastrophes assumed by property and casualty insurance companies including reinsurance companies, and threat of expropriation. As the basis for that position, they noted that the Discussion Memorandum considered those three matters at length. Other respondents suggested that catastrophe losses be dealt with in a separate Statement.

57. The Board has concluded, however, that the broad issue of accrual and disclosure of loss contingencies should be dealt with in a single Statement, just as the Discussion Memorandum encompassed "the broad issue of accounting for future losses."[10] As the Discussion Memorandum stated, "future losses of all types presently known to affect enterprises and new types of future losses that may arise are conceptually included in the scope of this project." The three matters dealt with at length in the Discussion Memorandum were used "as examples to assist in the evaluation and development of criteria for accounting for future losses," and other examples were discussed. The Board has concluded that loss contingencies such as those given as examples in paragraph 4 of this Statement have common characteristics and that questions about accounting for and reporting of those contingencies should be resolved comprehensively. It is for that reason, also, that the Board believes it inappropriate to deal with catastrophe losses in a separate Statement.

58. A question has been raised whether uncollectibility of receivables and product warranties constitute contingencies within the scope of this Statement. The Board recognizes that uncertainties associated with uncollectibility of some receivables and some product warranties are likely to be, in part, inherent in making accounting estimates (described in paragraph 2) as well as, in part, the type of uncertainties that give rise to a contingency (described in paragraph 1). The Board believes that no useful purpose would be served by attempting to distinguish between those who types of uncertainties for purposes of establishing conditions for accrual of uncollectible receivables and product warranties. Consequently, those matters are deemed to be contingencies within the definition of paragraph 1 and should be accounted for pursuant to the provisons of this Statement.

### ACCRUAL OF LOSS CONTINGENCIES

59. Paragraph 8 requires that a loss contingency be accrued if the two specified conditions are met. The purpose of those conditions is to require accrual of losses when they are reasonably estimable and relate to the current or a prior period. The requirement that the loss be reasonably estimable is intended to prevent accrual in the financial statements of amounts so uncertain as to impair the integrity of those statements. The Board has concluded that disclosure is preferable to accrual when a reasonable estimate of loss cannot be made. Further, even losses that are reasonably estimable should not be accrued if it is not probable that an asset has been impaired or a liability has been incurred at the date of an enterprise's financial statements because those losess relate to a future period rather than the current or a prior period. Attribution of loss to events or activities of the current or prior periods is an element of asset impairment or liability incurrence.

60. In establishing the conditions in paragraph 8, Board members considered the factors discussed in paragraphs 61–101. Individual Board members gave greater weight to some factors than to others.

#### Accounting Accruals Do Not Provide Protection against Losses

61. Accrual of a loss related to a contingency does not create or set aside funds to lessen the possible financial impact of a loss, although some respondents to the Discussion Memorandum and the Exposure Draft argued to the contrary. The Board believes that confusion exists between accounting accruals (sometimes referred to as "accounting reserves") and the reserving or setting aside of specific assets to be used for a particular purpose or contingency. Accounting accruals are simply a method of allocating costs among accounting periods and have no effect on an enterprise's cash flow. An enterprise may choose to maintain or have access to sufficient liquid assets to replace or repair lost or damaged property or to pay claims in case a loss occurs. Alternatively, it may transfer the risk to others by purchasing insurance. Those are financial decisions, and if enterprise management decides to do neither, the presence or absence of an accrued credit balance on the balance sheet will have no effect on the consequences of that decision. The accounting standards set forth in this Statement do not affect the fundamental business economics of that decision.

62. In that regard, some respondents to the Discussion Memorandum and the Exposure Draft contended that an accounting standard that does not permit periodic accrual of so-called "self-insurance reserves" and, in the case of insurance compaines, so-called "catastrophe reserves" will force enterprises to purchase insurance or reinsurance because the "protection" afforded by the accrual would no longer exist. Those accruals, however, in no way protect the assets available to replace or repair uninsured property that may be lost or damaged, or to satisfy claims that are not covered by insurance, or, in the case of insurance companies, to satisfy the claims of insured parties. Accrual, in and of itself, provides no

[10] The Board believes that *contingencies* is a more descriptive term than *future losses*, and the Discussion Memorandum indicated that the project would necessarily involve reconsideration of both *ARB No. 50* and Chapter 6 of *ARB No. 43*.

financial protection that is not available in the absence of accrual.

63. The sole result of accrual, for financial accounting and reporting purposes, is allocation of costs among accounting periods. Some respondents to the Discussion Memorandum and the Exposure Draft took the position that estimated losses from loss contingencies should be accrued even before available information indicates that it is probable that an asset has been impaired or a liability has been incurred to avoid reporting net income that fluctuates widely from period to period. In their view, financial statement users may be misled by those fluctuations. They believe that estimated losses should be accrued without regard to whether the loss relates to the current period if, based on experience, it is reasonable to expect losses sometime in the future.

64. Financial statement users have indicated, however, that information about earnings variability is important to them. Two elements often cited as basic to the decision models of many financial statement users are (a) expected return—the predicted amount and timing of the return on an investment—and (d) risk—the variability of that expected return. If the nature of an enterprise's operations is such that irregularities in the incurrence of losses cause variations in periodic net income, that fact should not be obscured by accruing for anticipated losses that do not relate to the current period.

65. The Board recognizes that some investors may have a preference for investments in enterprises having a stable pattern of earnings, because that indicates lesser uncertainty or risk than fluctuating earnings. That preference, in turn, is perceived by many as having a favorable effect on the market prices of those enterprises' securities. If accruals for such matters as future uninsured losses and catastrophes were prohibited, some respondents contended, enterprises would be forced to purchase insurance or reinsurance to achieve the more stable pattern of reported earnings that tends to accompany the use of an "accounting reserve." Insurance or reinsurance reduces or eliminates risks and the inherent earnings fluctuations that accompany risks. Unlike insurance and reinsurance, however, the use of "accounting reserves" does not reduce or eliminate risk. The Board rejects the contention, therefore, that the use of "accounting reserves" is an alternative to insurance and reinsurance in protecting against risk. Earnings fluctuations are inherent in risk retention, and they should be reported as they occur. The Board cannot sanction the use of an accounting procedure to create the illusion of protection from risk when, in fact, protection does not exist.

66. The Board has also considered the argument that periodic accrual of losses without regard to whether an asset has been impaired or liability incurred is justified on grounds of comparability of financial statements among enterprises. Some respondents contended, for example, that accrual is necessary to make the financial statements of enterprises that do not purchase insurance comparable to those of enterprises that do purchase insurance (and report the premiums as expenses) and to make the financial statements of property and casualty insurance companies comparable regardless of the extent to which reinsurance has been purchased. In the Board's view, however, to report activity when there has been none would obscure a fundamental difference in circumstance between enterprises that transfer risks to others and those that do not.

**Financial Accounting and Reporting Reflects Primarily the Effects of Past Transactions and Existing Conditions**

67. Financial accounting and reporting reflects primarily the effects of past transactions and existing conditions, not future transactions or conditions. For example, paragraph 35 of *APB Statement No. 4*, "Basic Concepts and Accounting Principles Underlying Financial Statements of Business Enterprises," states:

> Financial accounting and financial statements are primarily historical in that information about events that have taken place provides the basic data of financial accounting and financial statements.

68. The first condition in paragraph 8—that a loss contingency not be accrued until it is probable that an asset has been impaired or a liability has been incurred—is consistent with this concept of financial accounting and financial statements. That condition is not so past-oriented that accrual of a loss must await the occurrence of the confirming future event, for example, final adjudication or settlement of a lawsuit. The condition requires only that it be probable that the confirming future event will occur. The condition is intended to prohibit the recognition of a liability when it is not probable that one has been incurred and to prohibit the accrual of an asset impairment when it is not probable that an asset of an enterprise has been impaired.

**The Concept of a Liability**

69. In many cases, the accrual of a loss contingency results in the recording of a liability, for example, accruals for a probable tax assessment, a warranty obligation, or a probable loss resulting from the guarantee of indebtedness of others. In the course of its deliberations, therefore, the Board found it relevant to consider the concept of a liability as expressed in accounting literature.

70. The economic obligations of an enterprise are defined in paragraph 58 of *APB Statement No. 4* as "its present responsibilities to transfer economic resources or provide services to other entities in the future." Two aspects of that definition are especially relevant to accounting for contingencies: first, that liabilities are *present* responsibilities and, second, that they are obligations to *other entities*. Those notions are supported by other definitions of liabilities in published accounting literature, for example:

> Liabilities are claims of creditors against the enterprise, arising out of past activities, that are to be satisfied by the disbursement or utilization of corporate resources.[11]

A liability is the result of a transaction of the past, not of the future.[12]

71. The condition in paragraph 8(a)—that a loss contingency shall be accrued if it is probable that a liability has been incurred—is intended to proscribe recognition of losses that relate to future periods but to require accrual of losses that relate to the current or a prior period (assuming the amount of loss can be reasonably estimated—see paragraph 8(b)).

72. Liability definitions also generally require that the amount of an economic obligation be known or susceptible of reasonable estimation before it is recorded as a liability. For example:

> [Liabilities] are measured by cash received, by the established price of noncash assets or services received, or by estimates of a definitive character when the amount owing cannot be measured more precisely.[13]
>
> The amount of the liability must be the subject of calculation or of close estimation.[14]

73. The condition in paragraph 8(b)—that an estimated loss from loss contingency not be accrued until the amount of loss can be reasonably estimated—is consistent with this feature of the liability concept.

**Accounting for Impairment of Value of Assets**

74. The accrual of some loss contingencies may result in recording the impairment of the value of an asset rather than in recording a liability, for example, accruals for expropriation of assets or uncollectible receivables. Accounting presently recognizes impairments of the value of assets such as the following:

a. Paragraph 9 of Chapter 3A, "Current Assets and Current Liabilities," of *ARB No. 43* provides that "in the case of marketable securities where market value is less than cost by a substantial amount and it is evident that the decline in market value is not due to a mere temporary condition, the amount to be included as a current asset should not exceed the market value."

b. Statement 5 of Chapter 4, "Inventory Pricing," of *ARB No. 43* states that "a departure from the cost basis of pricing the inventory is required when the utility of the goods is no longer as great as its cost . . . . A loss of utility is to be reflected as a charge against the revenues of the period in which it occurs."

c. Paragraph 19(h) of *APB Opinion No. 18*, "The Equity Method of Accounting for Investments in Common Stock," states that "a loss in value of an investment which is other than a temporary decline should be recognized the same as a loss in value of other long-term assets."

d. Paragraph 15 of *APB Opinion No. 30*, "Reporting the Results of Operations," states that "If a loss is expected from the proposed sale or abandonment of a segment, the estimated loss should be provided for at the measurement date . . . ." Paragraph 14 states that the measurement date is the date on which management "commits itself to a formal plan to dispose of a segment of the business, whether by sale or abandonment."

e. Paragraph 183 of *APB Statement No. 4* states that "when enterprise assets are damaged by others, asset amounts are writteh down to recoverable costs and a loss is recorded."

75. A recurring principle underlying all of these references to asset impairments in the accounting literature is that a loss should not be accrued until it is probable that an asset *has been* impaired and the amount of the loss can be reasonably estimated. As indicated by those references, impairment is recognized, for instance, when a non-temporary decline in the market price of marketable securities below cost *has taken place*, when the utility of inventory *is no longer* as great as its cost, when a commitment, in terms of a formal plan, *has been made* to abandon a segment of a business or to sell a segment at less than its carrying amount, when enterprise assets *are damaged*, and so forth. The condition in paragraph 8(a) is intended to proscribe accrual of losses that relate to future periods, and the condition in paragrapn 8(b) further requires that the amount of loss be reasonably estimable before it is accrued.

**The Matching Concept**

76. A number of respondents to the Discussion Memorandum and the Exposure Draft noted that losses from certain types of contingencies are likely to occur irregularly over an extended period of time encompassing a number of accounting periods. In their view, the matching process in accounting requires that estimated losses from those types of contingencies be accrued in each accounting period even if not directly related to events or activities of the period.

77. *APB Statement No. 4* explicitly avoids using the term "matching" because it has a variety of meanings in the accounting literature. In its broadest sense, matching refers to the entire process of income determination—described in paragraph 147 of *APB Statement No. 4* as "identifying, measuring, and relating revenue and expenses of an enterprise for an accounting period." Matching may also be used in a more limited sense to refer only to the process of expense recognition or in an even more limited sense to refer to the recognition of expenses by associating costs with revenue on a cause and effect basis.

78. Three pervasive principles for recognizing costs as expenses are set forth in paragraphs 156–160 of *APB Statement No. 4* as follows:

*Associating Cause and Effect* . . . . Some costs are recognized as expenses on the basis of a presumed direct association with specific revenue . . . recognizing them as expenses accompanies recognition of the revenue.

*Systematic and Rational Allocation* . . . . If an asset provides benefits for several periods its cost is allocated to the periods in a systematic and rational manner in the absence of a more direct basis for associating cause and effect.

*Immediate Recognition.* Some costs are associated with the current accounting period as expenses because (1) costs incurred during the period provide no discernible future benefits, (2) costs recorded as assets in prior periods no longer provide discernible benefits or (3) allocating costs either on the basis of association with revenue or among several accounting periods is considered to serve no useful purpose.

79. Some who believe that matching requires accrual of losses that are likely to occur irregularly over an extended period of time encompassing a number of accounting periods cite the systematic and rational allocation principle of expense recognition as justification for their position. That principle, however, involves the systematic and rational allocation of the cost of an asset (an asset that *has been* acquired) throughout the estimated periods that the asset provides benefits or the systematic and rational accrual of the amount of some obligations (obligations that *have been* incurred) throughout the estimated periods that the obligations are incurred. The customary depreciation of plant and equipment is an example of the former; when reasonably estimable, the accrual of vacation pay is an example of the latter. The systematic and rational allocation principle has no application to assets that are expected to be acquired in the future or to obligations that are expected to be incurred in the future.

80. Matching, in the sense of recognizing expenses by associating costs with specific revenue on a cause and effect basis, is a consideration in relation to accrual for such matters as uncollectible receivables and warranty obligations. For example, most enterprises that make credit sales or warrant their products or services regularly incur losses from uncollectible receivables and warranty obligations. Frequently, those losses can be associated with revenue on a cause and effect basis. If the amount of those losses can be reasonably estimated, paragraph 8 of this Statement requires accrual if it is probable that an asset has been impaired (estimated uncollectible receivables) or that a liability has been incurred (estimated warranty claims).

**Spreading the Burden of Irregularly Occurring Costs to Successive Generations of Customers and Shareholders**

81. Some respondents to the Discussion Memorandum and the Exposure Draft contended that all costs of doing business should be accrued in each accounting period so that successive generations of customers and shareholders would bear their share of all costs including those that occur irregularly. It would seem, however, that those irregularly occurring costs are usually borne by customers through pricing policy and that pricing is not necessarily dependent upon financial accounting and reporting practices. With regard to accrual on grounds that it enables successive generations of shareholders to bear their share of irregularly occurring costs, see paragraph 63–65.

**Conservatism**

82. On the grounds of conservatism, some respondents supported accrual of estimated losses from loss contingencies before available information indicates that it is probable that an asset has been impaired or a liability has been incurred. Conservatism is indicated as one of the "characteristics and limitations" of financial accounting in paragraph 35 of *APB Statement No. 4* as follows:

*Conservatism.* The uncertainties that surround the preparation of financial statements are reflected in a general tendency toward early recognition of unfavorable events and minimization of the amount of net assets and net income.

83. Conservatism is further discussed in paragraph 171 of *APB Statement No. 4:*

*Conservatism.* Frequently, assets and liabilities are measured in a context of significant uncertainties. Historically, managers, investors, and accountants have generally preferred that possible errors in measurement be in the direction of understatement rather than overstatement of net income and net assets. This has led to the convention of conservatism. . . .

84. The conditions for accrual in paragraph 8 are not inconsistent with the accounting concept of conservatism. Those conditions are not intended to be so rigid that they require virtual certainty before a loss is accrued. They require only that it be *probable* that an asset has been impaired or a liability has been incurred and that the amount of loss be *reasonably* estimable. In the absence of that probability or estimability, however, the Board has concluded that disclosure is preferable to accruing in the financial statements amounts so uncertain as to impair the integrity of the financial statements.

**Risk of Future Loss or Damage to Enterprise Property, Injury to Others, Damage to the Property of Others, and Business Interruption**

85. Some persons contend that the decision not to purchase insurance against losses that can be reasonably expected some time in the future (such as risk of loss or damage of enterprise property, injury to others, damage to the property of others, and business interruption) justifies periodic accrual for those losses without regard to whether it is probable that an asset has been impaired or a liability incurred at the date of the financial statements. As a basis for their position, they frequently cite the following factors: matching of revenue and expense, spreading the burden of irregularly occurring costs to successive generations of customers, and conservatism. They also believe that accrual of estimated losses from those types of risks improves the comparability of the financial statements of enterprises that do not insure with those of enterprises that purchase insurance. Some contend that a prohibition against periodic accrual for uninsured losses will force enterprises to purchase insurance coverage that would not otherwise be purchased.

86. In the Board's judgment, however, the mere existence of risk, at the date of an

enterprise's financial statements, does not mean that a loss should be accrued. Anticipation of asset impairments or liabilities or losses from business interruption that do not relate to the current or a prior period is not justified by the matching concept.

87. The Board's views regarding the contention that periodic accrual for uninsured losses is a way of providing protection against loss and improving comparability among enterprises that do and do not purchase insurance, and the contention that prohibition of accrual will force enterprises to purchase insurance, are discussed in paragraphs 61–66. The Board's position regarding periodic accrual for uninsured risks and other loss contingencies on the grounds of spreading the burden of irregularly occurring costs to successive generations of customers or on the grounds of conservatism is discussed in paragraph 81–84.

88. Some respondents to the Exposure Draft said that prohibition against periodic accrual for uninsured losses would be detrimental to government contractors because requirements of Federal government agencies in auditing costs subject to procurement regulations currently allow reimbursement for periodic accruals for uninsured losses only if they are included in the contractor's financial statement. Contract reimbursement and financial accounting and reporting may well have different objectives. Accordingly, the provisions of this Statement may not be appropriate for contract reimbursement purposes.

**Catastrophe Losses of Property and Casualty Insurance Companies**

89. At the time that a property and casualty insurance company or reinsurance company issues an insurance policy covering risk of loss from catastrophes, a contingency arises. The contingency is the risk of loss *assumed* by the insurance company, that is, the risk of loss from catastrophes that may occur *during the term of the policy.*

90. Some respondents to the Discussion Memorandum and the Exposure Draft proposed that insurance companies accrue estimated losses from catastrophes including both those that may occur during the terms of insurance policies in force and those that may occur beyond the terms of policies in force. Other respondents proposed that some portion of the premium revenue of a property and casualty insurance company be deferred beyond the terms of insurance policies in force to provide what, in substance, is an estimated liability for future catastrophe losses. Some respondents proposed that accrual of estimated losses or deferral of premiums be permitted but not required. On the other hand, some respondents to the Discussion Memorandum and the Exposure Draft were opposed to any accrual for future catastrophe losses by means of an estimated liability or deferral of premium revenue. Because those estimated liabilities and revenue deferrals have come to be referred to as "catastrophe reserves," that term will be used in paragraphs 91–101 for convenience.

91. In response to the Exposure Draft, it was recommended that the FASB appoint a special committee to study further the matter of catastrophe reserve accounting and to make recommendations thereon. The Board has concluded, however, that its own research and that of others (mentioned in Appendix B to this Statement and summarized in the Discussion Memorandum), the written responses received to the Discussion Memorandum, the presentations made at the public hearing, and the letters of comment on the Exposure Draft provide the Board with sufficient information with which to reach a conclusion.

92. Proponents of catastrophe reserve accounting generally cite the following reasons for their position:

a. *Catastrophes certain to occur.* Over the long term, catastrophes are certain to occur; therefore, they are not contingencies.

b. *Predictability of catastrophe losses.* On the basis of experience and by application of appropriate statistical techniques, catastrophe losses can be predicted over the long term with reasonable accuracy.

c. *Matching.* Some portion of property and casualty insurance premiums is intended to cover losses that usually occur infrequently and at intervals longer than both the terms of the policies in force and the financial accounting and reporting period. Catastrophe losses should, therefore, be accrued when the revenue is recognized (or premiums should be deferred beyond the terms of policies in force to periods in which the catastrophes occur) to match catastrophe losses with the related revenue.

d. *Stabilization of reported income.* Catastrophe reserve accounting stabilizes reported income and avoids erratic variations caused by irregularly occurring catastrophes.

e. *Comparability.* Reinsurance premiums paid by a prime insurer are said to be similar to accrual of catastrophe losses prior to their occurrence because the reinsurance premiums paid reduce income before a catastrophe loss occurs. Accrual of catastrophe losses as an expense prior to occurrence of a catastrophe makes the financial statements of property and casualty insurance companies comparable regardless of the extent to which reinsurance has been purchased.

f. *Non-accrual would force purchase of reinsurance.* Non-accrual of catastrophe losses will force property and casualty insurance companies to purchase reinsurance.

g. *Generations of policyholders.* Periodic accrual of estimated catastrophe losses charges each generation of policyholders with its share of the loss through the premium structure.

93. The Board does not find those arguments persuasive. The fact that over the long term catastrophes are certain to occur does not justify accrual before the catastrophes occur. As stated in paragraph 59, the purpose of the conditions for accrual in paragraph 8 is to require accrual of losses if they are reasonably estimable *and relate to the current or a prior period.* An enterprise may know with certainty, for example, next year's administrative salaries, but that does not justify accrual in the current accounting period because those salaries do not relate to that period. As indicated in paragraphs 67–68, financial accounting and reporting reflects primarily the effects of past transactions and existing conditions, not future transactions or conditions; accrual for losses from catastrophes that are expected to occur *beyond the terms of insurance policies in force* would amount to accrual of a liability before one has been incurred. Existing policyholders are insured only during the period covered by their insurance contracts; an insurance company is not presently obligated to policyholders for catastrophes that may occur after expiration of their policies. Accrual for those catastrophe losses would record a liability that is inconsistent with the concept of a liability discussed in paragraphs 69–73.

94. The Board recognizes that the costs of catastrophes to insurance companies are large and are incurred irregularly and that insurance companies recoup those costs in the long run through periodic adjustments in the premiums charged to policyholders. It is the view of the Board, however, that the long-run nature of pricing of premiums should not be a determinant of the time when a liability is recorded.

95. The AICPA Industry Audit Guide, "Audits of Fire and Casualty Insurance Companies," describes accounting for premiums as follows (pp. 24–25):

As soon as a policy is issued promising to indemify for loss, the insurance company incurs a potential liability. The company may be called upon to pay the full amount of the policy, a portion of the policy, or nothing. It would be impossible to try to measure the liability under a single policy. However, since insurance is based on the law of averages, one may estimate from experience the loss on a large number of policies.

As state supervision of insurance developed, the insurance departments set about providing a legal basis for determining the potential liability under outstanding policies in order to establish an ample reserve for the protection of policyholders and provide a uniform method of calculation. It was recognized that, since the premium is expected to pay losses and expenses, and provide a margin of profit over the term of the policy, the portion measured by the unexpired term should be adequate to pay policy liabilities (principally losses and loss expenses) and return premiums during the unexpired term on a uniform basis for all companies. Therefore the unearned premium was adopted as the basis for computing the unknown liability on unexpired policies.

96. Because unearned premiums represents the "unknown liability," the Board is of the view that it is inappropriate to accrue an additional amount as an estimate for that same unknown liability. Further, in the Board's view, deferral of premiums beyond the terms of policies in force is inconsistent with the concept of revenue recognition set forth in the Audit Guide and is without any conceptual basis. Moreover, the Board believes that its conclusion regarding the time at which accruals shall be made for catastrophic losses is consistent with the Audit Guide. It should be noted that this Statement does not prohibit (and, in fact, requires) accrual of a *net* loss (that is, a loss in excess of deferred premiums) that

probably will be incurred on insurance policies that are in force, provided that the loss can be reasonably estimated, just as accrual of net losses on long-term construction-type contracts is required (see *ARB No. 45*, "Long-Term Construction-Type Contracts").

97. With respect to catastrophes that may occur within the terms of policies in force, to satisfy the conditions for accrual in paragraph 8, the occurrence of catastrophes would have to be probable during the terms of those policies, and the amounts of losses therefrom would have to be reasonably estimable. The letters of comment and position papers received in response to the Discussion Memorandum and the Exposure Draft and presentations at the public hearing lead the Board to conclude that neither the timing of catastrophes nor the amounts of losses therefrom are reasonably predictable within the terms of policies in force.

98. The Board is of the view that accrual of losses from catastrophes is not justified by the accounting concept of matching. Systematic and rational allocation does not apply to costs that have not been incurred. The Board recognizes that large and irregularly occurring costs must of necessity be considered in systematically and rationally determining premiums to be charged to customers but does not believe that pricing considerations should dictate the accrual of losses for financial accounting purposes. The Board also does not believe that matching in the sense of recognizing expenses by associating losses with specific revenue on a cause and effect basis is, in and of itself, a basis for accrual of catastrophe losses prior to the event causing the loss. The Board believes that, for the reasons stated in paragraphs 94–96, there can be no presumed direct association with specific revenue prior to the event causing the catastrophe loss.

99. The Board's views regarding justification of periodic accrual of catastrophe reserves on grounds of (a) stabilizing reported income, (b) improving comparability among financial statements of insurance companies, and (c) preventing the "forced" purchase of reinsurance are discussed in paragraphs 61–66.

100. The argument that accrual of catastrophe reserves enables each generation of policyholders to bear its share of the losses through the premiums that it is charged is also questionable because amounts established for premiums are not necessarily dependent on financial accounting and reporting practices.

101. The Board considered the proposal that catastrophe reserve accounting be permitted but not made mandatory. Whether it is probable that an asset has been impaired or a liability incurred is determined by the circumstances, not by choice. Accordingly, the conditions for accrual in paragraph 8 apply to all loss contingencies, including risk of loss from catastrophes assumed by property and casualty insurance companies and reinsurance companies. In the Board's view, the use of different methods to report catastrophe losses in similar circumstances cannot be justified.

### APPLICABILITY TO LIFE INSURANCE COMPANIES

102. Some respondents to the Exposure Draft inquired as to whether the conditions for accrual in paragraph 8 are intended to change accounting practices of life insurance companies. This Statement does not amend the AICPA Industry Audit Guide, "Audits of Stock Life Insurance Companies."

### DISCLOSURE OF NONINSURANCE

103. A number of respondents to the Exposure Draft inquired as to whether it is the Board's intent to require disclosure of noninsurance or underinsurance. Some recommended that the Board require disclosures with respect to uninsured risks that enterprises ordinarily insure against. Others said that they were unable to define risks that would ordinarily be insured against because the insurance practices of enterprises are so varied. Because of the problems involved in developing operational criteria for disclosure of noninsured or underinsured risks, this Statement does not require disclosure of uninsured risks. However, the Board does not discourage those disclosures in appropriate circumstances.

### EFFECTIVE DATE AND TRANSITION

104. The Board considered three alternative approaches to a change in the method of accounting for contingencies: (1) prior period adjustment, (2) the "cumulative effect" method described in *APB Opinion No. 20*, "Accounting Changes", and (3) retention-of amounts accrued for contingencies that do not meet the conditions for accrual in paragraph 8 until those amounts are exhausted by actual losses charged thereto. The Exposure Draft had proposed the change be effected by the prior period adjustment method. A large number or respondents to the Exposure Draft, however, opposed the prior period adjustment method for a number of reasons, including significant difficulties involved in determining the degree of probability and estimability that had existed in prior periods as would have been required if the conditions in paragraph 8 were applied retroactively. On further consideration of all the circumstances, the Board has concluded that use of the "cumulative effect" method described in *APB Opinion No. 20* represents a satisfactory solution and has concluded that the effective date in paragraph 20 is advisable.

**Attachment 2**

**Federal Home Loan Bank Board, Office of Examinations and Supervision**

*MEMORANDUM SP68*

TO: Principal Supervisory Agents, August 14, 1985

FROM: Francis M. Passarelli, Classification of Assets

1. This memorandum reiterates the Board's policy and provides clarification for classification of assets and reevaluation of real estate pursuant to 12 CFR 561.16c and 563.17–2(b). The use of this memorandum should aid in efforts to ensure that asset evaluations receive consistent treatment nationwide.

2. It has always been the Board's intent that examination and supervision have maximum flexibility in classifying assets.

3. Principal Supervisory Agents are responsible for implementation and supervision of the classification of assets and reevaluation of real estate. The Principal Supervisory Agent has the final authority on all classifications and valuation reserves. It is the Board's intent that in exercising the discretion available to them under these regulations, the Principal Supervisory Agents may require less than a 50 percent valuation reserve, that is to say 1 to 50%, on Doubtful classifications taking into account appropriate credit and collateral factors, e.g., future prospects, performance, willingness and ability to pay, previous payment record (other than from an interest reserve) of the borrower, and management strength of the institution, its past experience in complying with supervisory directives, supervisory agreements or consent resolutions, and willingness to enter into a supervisory agreement or consent resolution geared toward resolving the problem at issue.

4. It is not the Board's intent that an entire asset be automatically classified because of a single weakness in the credit file. As indicated in the Statement of Policy (§ 571.1a) on classification of assets, it is incumbent upon examination and supervision to avoid classification of sound assets. This duty exists regardless of the type of asset or underwriting deficiency involved, e.g., the absence of any appraisal. Discretion and judgment should be exercised; if only part of the asset is at risk, only that part should be classified. Thus, consideration should be given to, among other things, the overall risk involved; the nature and degree of collateral security; the character, capacity, financial responsibility and record of the borrower; and the probability of orderly liquidation in accordance with the specified terms. Accordingly, an entire credit should not be classified as Doubtful when an analysis of the relevant factors shows that collection of a specific portion appears probable. It is The Principal Supervisory Agent who has the final authority on all classifications and valuation reserves.

5. An appraisal is only one factor to be weighed in credit analysis, and other factors, such as those discussed above in paragraph three, should be evaluated and weighed prior to determining a classification. Sound lending practices dictate that insured institutions obtain appraisals reflecting current market conditions. Memorandum R–41b is the definitive interpretation of the Board's appraisal requirements. The absence of an R–41b appraisal is a weakness because without an appraisal it is very difficult to make a sound credit judgment. The absence of an R–41b appraisal also suggests there may be a problem with the loan. Furthermore, this weakness may be considered unsafe and unsound, as a failure to reflect the asset's true value may result in misrepresentation of the institution's financial condition.

6. In classifying an asset the examiner should document all information required to support the classification and any valuation reserve. In those instances where the

BEST COPY AVAILABLE

institution disputes the classification or the reserve, the examiner should have available the information supplied by the institution so that all documentation bearing on the classification and reserve is available for decision by the Principal Supervisory Agent.

## 12 CFR Parts 563 and 571

[No. 87-528]

## Appraisal Policies and Practices of Insured Institutions and Service Corporations

Date: May 5, 1987.

**AGENCY:** Federal Home Loan Bank Board.

**ACTION:** Proposed rule.

**SUMMARY:** The Federal Home Loan Bank Board ("Board") as operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC") proposes to adopt a rule and a statement of policy pertaining to appraisal policies and practices of institutions insured by the FSLIC ("insured institutions") and service corporations of such institutions. The proposal is intended to codify the standards to be used by insured institutions and service corporations of such institutions, as well as examiners and supervisory staff, in determining compliance with the appraisal requirements of 12 CFR 563.17–1 and 563.17–2. The Board invites comment on all aspects of the proposal. This proposal is part of the Board's comprehensive review of its procedures related to classification and appraisal of insured institutions' assets. The Board is also adopting today a proposal designed to enhance its system of asset classification. Board Res. No. 87–527, published elsewhere in the Proposed Rules section of this issue.

**DATE:** Comments must be received on or before July 14, 1987.

**ADDRESS:** Send comments to Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552. Comments will be available for inspection at this address.

**FOR FURTHER INFORMATION CONTACT:** Kathy L. Kresch, Attorney, (202) 377–6417, Daniel G. Lonergan, Attorney, (202) 377–6458, or Karen Knopp O'Konski, Deputy Director, (202) 377–7240, Regulations and Legislation Division, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552; or Diana Garmus, Policy Analyst, (202) 778–2515, Office of Regulatory Policy, Oversight, and Supervision, Federal Home Loan Bank System, 900 Nineteenth Street, NW., Washington, DC 20006.

**SUPPLEMENTARY INFORMATION:** The soundness of the mortgage loans and real estate investments made by insured institutions and service corporations is dependent upon the adequacy of the appraisals used to support these transactions. Section 563.17–1 of the Board's regulations requires that the records of a loan secured by real estate include "[o]ne or more written appraisal reports, prepared at the request of the lender or its agent . . . by a person or persons duly appointed and qualified as appraisers by the board of directors of such lender, disclosing the market value of the security offered by the borrower and containing sufficient information and data concerning the appraised property to substantiate the market value of the security described in such report . . . ." 12 CFR 563.17–1(c)(1)(iv). To date, standards for compliance with 12 CFR 563.17–1 have been issued in the form of "R" Memoranda by the Office of Regulatory Policy, Oversight, and Supervision of the Federal Home Loan Bank System ("ORPOS"). Today, the Board is proposing to incorporate in its regulations appraisal standards to be used by insured institutions and service corporations in complying with regulatory requirements.

### 1. Statutory Authority

Among the paramount purposes of Title IV of the National Housing Act ("NHA") (12 U.S.C. 1724–30) and the Federal Home Loan Bank Act ("Bank Act") (12 U.S.C. 1421–29) is the development and maintenance of a system of sound and economical home financing. An additional, closely related purpose of the NHA is protection of the FSLIC fund from exposure to undue risk. The appraisal standards proposal is designed to enable the Board to carry out both statutory objectives.

It has been the Board's longstanding position, supported by legislative history and prior administrative practice, that the NHA authorizes the Board to regulate all institutions the accounts of which are insured by the FSLIC ("insured institutions") in furtherance of these purposes. Section 402(a) of the NHA (12 U.S.C. 1725(a)) empowers the Board, as the operating head of the FSLIC, to prescribe rules and regulations "for carrying out the purposes of this [Act]." Since the appraisal policies and practices proposal is designated to maintain safe, sound, and economical home financing, as well as protect the FSLIC fund from undue risk, the proposal would further the purposes of the NHA.

Moreover, under section 407 of the NHA, the Board has authority to terminate insurance coverage (12 U.S.C. 1730(b)) and to initiate cease-and-desist proceedings for any violation of a law, rule, regulation, or condition imposed by written agreement with the Board or for any unsafe or unsound practice (12 U.S.C. 1730(e)). These powers encompass the less drastic power to prevent unsafe and unsound practices through regulations, such as this appraisal practices rule.

Section 17 of the Bank Act expressly grants the Board the "power to adopt, amend, and require the observance of such rules, regulations, and orders as shall be necessary from time to time for carrying out the purposes of [this Act]." 12 U.S.C. 1437(a). As noted above, one of the paramount purposes of the Bank Act is maintenance of sound and economical home financing. The Board is therefore empowered to adopt regulations, such as this appraisal practices rule, designed to carry out that purpose.

The Board has often cited its authority under the Bank Act as support for regulations governing the deposit-insurance system administered by the FSLIC. This practice is supported by the close interrelationship between the Bank Act and the NHA, including their common purpose and similar design.

The Board also is authorized by sections 403(b) and 407(m) of the NHA to conduct examinations of insured institutions and their service corporations. 12 U.S.C. 1726(b), 1730(m). The Board believes that carefully documented appraisals are essential to accurate evaluation of the asset portfolio of an insured institution or service corporation. The proposed rule and policy statement pertaining to appraisal policies and practices of insured institutions and their service corporations therefore comport with the Board's statutory authority to examine and evaluate the asset portfolio of insured institutions and their service corporations.

A Congressional committee recently endorsed the Board's current substantive approach to appraisal standards. House Report 99–891, entitled "Impact of Appraisal Problems on Real Estate Lending, Mortgage Insurance, and Investment in the Secondary Market," [hereinafter, the "House Report"] issued by the Committee on Government

BEST COPY AVAILABLE

Operations of the United States House of Representatives on September 25, 1986, states: "Among all the Federal banking agencies, only the [Board] has a highly developed and comprehensive system regarding appraisal policies, practices and procedures. This system includes detailed guidelines for how appraisals are to be performed (Memorandum #R–41b), thorough procedures for reviewing appraisals, and . . . staff appraisers in all district offices." H.R. Rep. No. 99–891, 99th Cong., 2d Sess. 8 (1986). The House Report recommended that the banking agencies establish uniform requirements regarding appraisals and stated that such regulations and procedures should, in part, include "development and dissemination of appraisal guidelines utilizing . . . Memorandum #R–41b as a model." *Id.* at 13. The House Report made several other recommendations specifically regarding the Board's then-current appraisal standards. These recommendations are noted and discussed below.

The appraisal standards proposed by the Board in this proposed rulemaking are similar to those praised in the House Report. They are consistent with accepted appraisal practices and with the uniform standards adopted by the leading national professional appraisal organizations. The Board believes that it is in the public interest to receive public comment on these proposed standards to ensure adoption of appraisal standards that are as current and useful as possible.

**2. History of the Board's Appraisal Standards**

The Board's first appraisal guidelines were issued as R-Memorandum 41, on June 6, 1977, by its Office of Examinations and Supervision ("OES," now "ORPOS"). At that time, the thrift industry had suggested that the Board emphasize the importance of the appraisal process in prudent loan underwriting. Moreover, the Board's experience with problem loans had revealed that when a loan underwriter did not receive market-based appraisal information loans were based upon inaccurate collateral valuations and, consequently, inappropriate underwriting assumptions. In the worst cases, deficient underwriting was directly responsible for losses. The Board responded by issuing R–41 and its progeny.

The appraisal documentation requirement of R–41 was not new to the industry in 1977. An appraisal report containing a detailed description of the appraiser's reasoning in arriving at an estimate of value had been a requisite portion of a loan record at least since the adoption of 12 CFR 563.17–1 in 1963. This requirement has been continually revised and expanded in R–41a, issued September 15, 1977, R–41a–1, issued March 1, 1979, R–41b, issued March 12, 1982, and R–41c, issued September 11, 1986.

R–41c updated, revised, and replaced R–41b, the Memorandum praised by Congress in House Report 99–891. R–41c elaborated upon the appraisal guidelines of R–41b, adding to its appraisal management procedures requirements used by the leading national appraisal organizations. Additionally, R–41c updated the definition of market value to be consistent with the terminology adopted by the Federal Home Loan Mortgage Corporation ("Freddie Mac") and the Federal National Mortgage Association ("Fannie Mae"). On February 26, 1987, ORPOS issued a memorandum clarifying R–41c. *See* Memorandum from William L. Robertson to Professional Staff, Examinations and Supervision (Feb. 27, 1987) [hereinafter "R–41c Clarifications"]. The referenced documents are attached in Appendix A.

**3. Existing Appraisal Standards—Memorandum R–41c as Clarified**

R–41c, as clarified, addresses four components of the Board's appraisal standards and reporting requirements: management policies, appraisal management, appraisal content, and related considerations.

*a. Management policies*

This section of R–41c addresses the responsibility of an institution's board of directors for developing the institution's loan and investment policies and procuring appraisals to support such transactions. The board of directors of an insured institution or service corporation is responsible for establishing loan and investment policies that reflect the institution's operational policies and the regulatory limitations under which it conducts business.

Prudent lending policy must reflect both the credit arrangements offered by an institution and the underwriting procedures for each of its loan transactions. R–41c points out the responsibility of the board of directors and the senior officers to ensure that the different types of appraisal services used by the institution's underwriting staff properly reflect both the collateral lending posture of the institution and its lending policies.

Similarly, the board of directors is responsible for ensuring that appraisal services used by the institution to evaluate investments fulfill its regulatory obligation to operate in a safe and sound manner. "Failure to ensure that appraisal services match the needs of the institution will be considered an abdication of this responsibility and is representative of an unsafe and unsound operating policy." Memorandum R–41c.

Finally, an insured institution or its service corporation should be able to demonstrate that appraisers approved by its board of directors possess the requisite experience, education, and facilities to perform acceptably. Accordingly, R–41c indicates that the board of directors should encourage fee and staff appraisers to join professional appraisal organizations and to undergo continual professional development. Management is also responsible for periodically reviewing the performance of all approved appraisers and taking necessary action to eliminate substandard work.

*b. Appraisal Management*

This section of R–41c, as clarified, describes appraisal components needed to facilitate sound underwriting of an institution's investments.

A conforming appraisal should be prepared by appraisers independent of the borrower or the seller, who have been approved by the institution's board of directors. The appraisal should reflect the market value of the collateral, be sufficiently current to reflect actual market conditions, contain sufficient information to enable the institution to determine the proper loan amount, and support the categorization of an asset as a real estate loan or another type of credit arrangement.

Generally, appraisals must be presented in narrative form. However, the R–41c Clarifications indicate that compliance with the appraisal reporting guidelines and use of standard form reports approved by Freddie Mac and Fannie Mae are sufficient for appraisals on existing and proposed one-to-four family and existing multi-family properties.

An appraisal should be based upon market value and should analyze and disclose the following information: the listing or agreement of sale of the property being appraised; prior sales of the property within one year of the date of the appraisal for one-to-four-family residential property or within three years of the date of the appraisal for all other property; and in a speculative market, a sales history of comparable properties. If an appraisal is based upon preliminary plans or specifications, it must accurately reflect the impact upon value of significant changes in such

plans and specifications. Moreover, the appraisal must contain detailed information regarding the plans and specifications and describe "all value changes projected to occur from the conception of a project to its completion." Memorandum R–41c.

R–41c also requires that an appraisal contain an estimate of the highest and best use of the property appraised, based upon consideration of factors including: existing land use regulations, economic demand, physical adaptability of the property, neighborhood trends, optimal use of the property, and anticipated public and private improvements, on or off site, to the extent that market activity reflects such improvements. Additionally, all appraisals, including those involving proposed construction, development, or changes in use, must include the appraiser's analysis of the anticipated economic feasibility of the property. If an appraiser relies on feasibility or marketability studies prepared by a third party to support the estimate of highest and best use, the appraiser must attest that the study has been thoroughly examined and that he or she fully concurs with its findings and conclusions; the appraiser must specifically identify the study examined and summarize significant data, analyses, and conclusions presented in the study; and, finally, the appraiser must have available for examination a complete copy of the feasibility or marketability study prepared by the third party.

R–41c, as clarified, also requires that an appraisal state the present market value of the appraised property to a single purchaser even though a portion of the property will be sold to its ultimate users at a future date. This figure should account for deductions and discounts that reflect the expenses associated with the disposition of the property as of the date of completion, the cost of capital, and entrepreneurial profit. With regard to rental properties under construction or conversion, the appraisal should realistically state the market value of the property where anticipated market conditions indicate that stabilized occupancy is unlikely as of the date of completion. The value estimate must reflect the impact of rental and other concessions, including costs associated with preparing the improvement for occupancy by tenants.

If the property being appraised is an income-producing property, the appraisal must contain a summary of the income produced and expenses incurred in the operation of this real estate. The appraisal, moreover, should report the "as is" value of the real estate on the date of the appraisal or the last inspection of the property. Finally, where the objective of the report is to estimate the value of a fractional interest in the real estate, the appraiser must consider and report the effect on value of the terms and conditions of any agreement establishing this interest. Accordingly, the appraisal must indicate that the value of any fractional part has been evaluated by an analysis of appropriate market data.

*c. Appraisal Content*

This section of R–41c reflects the concern that an appraisal set forth, in a clear and accurate manner, the appraiser's analytical process and contain sufficient information to enable persons who must rely on this document to make an accurate decision with respect to a loan or investment transaction. Therefore, under the current standards, the content of each appraisal accepted by an insured institution must conform with the generally accepted written and established appraisal practices and standards of the nationally recognized professional appraisal organizations.

In this regard, R–41c states that each appraisal must be self-contained and possess a cogent analysis such that the appraiser's logic, reasoning, and judgment demonstrate the reasonableness of the market value reported to the reader. The appraisal should identify the property rights being appraised, highlighting the salient features of the real estate. The appraisal should state that its purpose is to estimate the market value of the property and should set forth the effective date of the value conclusion(s), the date of the report, and all relevant data as well as the analytical process employed by the appraiser to arrive at the highest and best use conclusion.

Moreover, the appraiser's analytical process should be presented so that it includes a complete explanation of all comparable data adjustments used in the analysis with appropriate market support for each adjustment and fully detailed descriptive information for all comparable data presented. Additionally, the appraisal must set forth a summary of all assumptions and limiting conditions that affect the analyses, opinions, and conclusions in the report. Finally, R–41c requires an appraiser to sign a certification statement attesting to the veracity of the information and analyses contained in the appraisal as well as his independence from the parties and property involved.

*d. Related Considerations*

R–41c warns appraisers that they will be subject to criminal prosecution under the provisions of Title 18 of the United States Code if they knowingly make false statements or willfully overvalue land, property, or security in appraisal reports "for the purpose of influencing in any way the action of a Federal Home Loan Bank, the Federal Home Loan Bank Board, a Federal Savings and Loan Association, any institution the accounts of which are insured by the FSLIC, any member of the Federal Home Loan Bank System, or the Federal Savings and Loan Insurance Corporation." *See* 18 U.S.C. 1014. R–41c concludes by emphatically stating that "[i]t is incumbent upon all appraisers to diligently adhere to generally accepted professional appraisal standards of practice and the provisions and requirements of the Federal Home Loan Bank Board's standards and reporting requirements relating to the preparation of appraisal reports prepared for these entities."

**4. The Proposed Rule and Policy Statement**

The proposed rule and policy statement address the same four components of the Board's appraisal standards and reporting requirements addressed in R–41c as clarified: management policies, appraisal management, appraisal content, and related considerations. This proposal, however, has been designed to clarify and simplify the R–41c guidelines. The chief ways in which this proposal differs from the existing standards are described below.

*a. Management Policies*

The proposed rule contains a section, entitled *Responsibilities of management*, that sets forth in a general way the obligations of management to oversee the appraisal services. This section also imposes specific requirements upon management to employ written appraisal guidelines and develop procedures for approving appraisers in accordance with lending and appraisal policies developed by the board of directors. More specific guidance concerning appropriate management policies is set forth in the proposed statement of policy.

The responsibilities of the board of directors to develop and implement prudent lending and appraisal practices are similar under the proposed policy statement and under R–41c as clarified. The board of directors would remain primarily responsible for ensuring that the appraisal services provided properly reflect the lending policies and collateral

lending posture of an institution. The board of directors would also remain responsible for approving appraisers who possess the requisite experience, education, and facilities to perform in an acceptable manner and for reviewing their work.

The Board has excluded from the proposed policy statement the language of R–41c stating that "[f]ailure [by the board of directors] to ensure that appraisal services meet the needs of the institution will be considered an abdication of this responsibility [to operate the institution in a safe and sound manner] and is representative of an unsafe and unsound operating policy." Although the responsibilities of the board of directors remain unchanged with regard to the procuring of appraisal services, the Board believes that the quoted statement addressing directors' responsibilities is unnecessary and redundant. Directors are under a fiduciary duty to operate insured institutions in a manner that comports with the requirements of safety and soundness. *See* ORPOS Memorandum No. R 62 (May 8, 1985). This duty includes the duty to oversee the adequacy of appraisal services. Moreover, because institutions will vary in their methods of fulfilling this duty, the Board is of the view that the recommendation, made in House Report 99–891, that it improve existing internal control and review systems to assure appraisal ' quality is best implemented through the examination process, on an institution-by-institution basis.

*b. Appraisal Management*

The proposed rule would require the management of an insured institution or service corporation to obtain appraisals adequate under the standards it sets forth. The appraisal management portion of the proposal lists twelve factors to guide management in this regard. The Board wishes to make clear, however, that a deficiency in management's ability to demonstrate attention to a single factor will not necessarily be deemed an unsafe and unsound practice. Rather, examiners and supervisory staff will use these factors, taken together, in determining whether an institution's overall appraisal practices conform with principles of safety and soundness.

The proposal simplifies R–41c's list of factors to be contained in appraisals supporting an insured institution's credit and investment decisions. It emphasizes the importance of appraisals in the underwriting process and reiterates the requirement of R–41c, as clarified, that an appraisal conform with recognized appraisal guidelines. In so doing, the appraisal must reflect the market value of the rights in realty offered as security and clearly label and segregate all other values or interests appraised. The proposal eliminates the restriction of R–41c that an appraisal may be deemed "sufficiently current" if it has been made within six months prior to the approval of the loan. In this regard, it is not the Board's intent to encourage the use of out-dated appraisals. Rather, the Board believes that because market conditions are indicative of the timeliness of an appraisal and do not necessarily vary over a specific time period, the underwriter should have discretion to determine whether an appraisal is sufficiently current.

The proposal also excludes the language of R–41c, as clarified, requiring an appraiser to be independent from the borrower and the seller and to have no interest in the real estate. The Board emphasizes that the exclusion of this language does not indicate that independence is no longer required of the appraiser. Rather, it is the Board's view that this language of R–41c is redundant in view of the requirement that the appraiser attest to his independence by signing a certification verifying the facts and analyses contained in the appraisal and stating that he has no present or prospective interest in either the property being appraised or with the parties involved.

Additionally, the proposal retains the R–41c requirement to present an appraisal in a narrative format unless the appraiser uses a form report that is appropriate for the specific appraisal assignment and, when read together with all attachments, results in a totally self-contained appraisal. In accordance with R–41c, as clarified, the proposal provides that, for existing and proposed one-to-four family and existing multi-family properties, compliance with the Freddie Mac and Fannie Mae appraisal reporting guidelines and use of the forms developed and approved by those agencies would satisfy the requirements of this rule.

The Board encourages industry-wide development of standardized appraisal forms and has recently solicited the submission of appraisal forms from the public. In this regard, the Board contemplates that appraisers or professional appraisal organizations will submit proposed appraisal forms for review and clearance by the supervisory staff at the appropriate Federal Home Loan Bank under the overall coordination and supervision of ORPOS.[1] The Board anticipates that the development, approval, and eventual use of forms standardized to comply with the requirements of any final rule on appraisal standards will simplify and expedite the appraisal process.

Additionally, like R–41c as clarified, the proposal requires that an appraisal state the market value of collateral. Market value is defined as:

> The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently, knowledgably and assuming the price is not affected by undue stimulus.

This definition contemplates consummation of a sale as of a specified date and the passing of title from buyer to seller under open and competitive market conditions requisite to a fair sale. The Board has determined that market value is an accurate measure of the economic potential of security property, because most troubled real estate loans have ultimately resulted in the sale of the property.

In computing market value, the anticipated net cash flows from the operation and/or disposition of a property over time are discounted back to the appraisal date at a market discount rate. The value of the property therefore should reflect the market's economic opportunity costs. Moreover, the discount factors and adjustments unique to the market value computation adjust the value of the property to reflect holding costs, return on investment, and entrepreneural profit so as to translate the future anticipated cash flows of the property back to a present market value.

The Board has also simplified the requirement of R–41c, as clarified, to require the provision of detailed information and calculations with respect to a proposed project improvement or change in use. That requirement, in part, simply repeated professional appraisal standards. Additionally, this portion of the policy statement has been designed to eliminate a frequent misperception of R–41c by emphatically stating that although it is incumbent upon an appraiser to estimate remaining economic life and it is often necessary for an appraiser to estimate an investment holding period for discounted cash flow analyses or similar valuation purposes, it is not the appraiser's obligation to make

[1] The Board intends to provide specific instructions regarding the submission of proposed standardized appraisal forms in the final rule.

projections relating to the life of an institution's investment.

Although the proposal continues to require that an appraisal reflect the value to a single purchaser of property wherein a portion of real property rights would in the future be sold to its ultimate users, the proposal requires that the appraisal report "present market value," and contain sufficient information to enable the underwriter to determine present market value as of the date of completion. Similarly, with respect to properties under construction or conversion and where anticipated market conditions indicate that stabilized occupancy is not likely as of the date of completion, the appraisal should set forth "present market value" and sufficient information to enable the underwriter to determine the value of the property upon completion.

Moreover, the Board has simplified the specific language of R–41c that requires an appraisal to contain sufficient information to enable the management and board of directors to determine the loan amount and to support classification of the asset as a real estate loan. Also eliminated is the R–41c requirement that the appraisal contain information relative to current and projected market conditions and their impact on the estimated value of the property so as to enable an institution to determine whether its financial position would be protected over the life of the investment. The Board wishes to eliminate the confusion created by R–41c and to stress that it is not incumbent upon the appraiser to determine the future market value of a project. Rather, the Board recognizes that the final value estimate reflects present production costs and sales prices in addition to future cash flows, and therefore uses a combination of the cost approach, the market approach, and the income approach to derive present market value.

*c. Appraisal Content*

The proposed rule sets forth specific requirements for information to be included in the appraisal document. The proposal modifies the requirements of R–41c, as clarified, with respect to this information. The proposal requires that the content of each appraisal accepted by an institution follow the Uniform Appraisal Standards of Professional Appraisal Practice and the Board's reporting requirements.

The Board is implementing a recommendation made by Congress in House Report 99–891 by proposing to expand the appraisal content requirements of R–41c to include a form identifying the person at each institution who has reviewed the appraisal file. The information to be included on the form includes the person's name, title, and the date of review. The Board believes that this procedure will improve internal appraisal control and review systems.

The proposal continues to require that an appraisal report contain a legal description of the appraised property and states that it is management's responsibility to ensure that the legal description in the appraisal report is identical to the legal description in the loan documents. Additionally, the proposal permits appraisals made on existing and proposed one-to-four family and existing multi-family properties to be prepared under the Freddie Mac and Fannie Mae appraisal standards and on their standardized appraisal forms.

Additionally, the Board is proposing to remove the explicit certification language set forth in R–41c, as clarified. The Board recognizes that the professional appraisal organizations have several standard certification forms and believes that appraisers should be free to choose certification language from forms sanctioned by a professional appraisal society.

*d. Related Considerations*

The Board believes that certain components of a loan file are as essential to prudent underwriting as the appraisal report. Therefore, the proposed rule specifically requires inclusion of select information in the loan documentation.

The proposal requires that the loan documentation contain any third party economic feasibility studies utilized by the appraiser. The loan documentation for construction loans should also contain information to indicate that disbursements shall not exceed the present value of the project at any time during the construction period.

The Board is, moreover, implementing another recommendation made by Congress in House Report 99–891 by requiring insured institutions to include in their files of loans purchased a form identifying the person who has inspected the property securing the subject loan. The Board believes that an inspection of the security property would constitute verification that the property is as it is represented to be in the original or any supplemental appraisal and loan documentation. The Board also believes that for loans purchased such an inspection, in conjunction with review of the latest appraisal, is an adequate substitute for securing a new appraisal strictly in conformance with the Board's current regulatory standards. The Board recognizes that there may be considerable expense associated with implementation of this verification procedure. However, the Board is of the opinion that this projected expense is negligible in view of the risk associated with the purchase of out-of-state loans.

The proposal seeks to clarify the language of R–41c regarding the applicability of the criminal code to the preparation of appraisal reports. Therefore, the proposal concludes with a statement warning appraisers that they may be subject to criminal prosecution under the provisions of Title 18 of the United States Code if they knowingly make false statements or willfully overvalue land, property, or security in appraisal reports "for the purpose of influencing in any way the action of a Federal Home Loan Bank, the Federal Home Loan Bank Board, a Federal savings and loan association, any insured institution, any member of the Federal Home Loan Bank System, or the Federal Savings and Loan Insurance Corporation." *See* 18 U.S.C. 1014. The proposal also excludes the last sentence of R–41c as clarified, because the Board believes that the very purpose of codifying its appraisal standards is to emphasize that it is incumbent upon the appraiser to adhere to the appraisal standards of the Board and the national professional appraisal organizations.

**5. Appraisal Training for Underwriters**

The Board is of the opinion that the recommendation made in House Report 99–891 that loan officers be required to undergo appraisal training is well founded. Through ORPOS, the Board currently conducts appraisal training seminars for examiners at each of its twelve Federal Home Loan District Banks. The Board strongly recommends that insured institutions throughout the Federal Home Loan Bank System institute appraisal training programs for loan officers.

**6. Solicitation of Comments**

In placing this proposal before the public, the Board's objective is to initiate a process of comment and analysis that will enable the Board to establish appraisal standards designed to promote safety and soundness throughout the thrift industry. The Board therefore solicits public comment on all aspects of the proposed rule. Finally, the Board notes that the policy statement portion of this proposal is an interpretative rule, which is not subject to the notice and comment provisions of the Administrative Procedure Act. 5 U.S.C. 553 *et seq.* The Board believes, however, that the public interest will be best served by considering public

comment on the policy statement as well as the rule that it is proposing to adopt. In this regard, the Board specifically solicits comment on the structure of the proposal as a rule and a policy statement and asks whether its appraisal standards should be combined and adopted in final as a rule alone.

**Initial Regulatory Flexibility Analysis**

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 603, the Board is providing the following initial regulatory flexibility analysis:

1. *Reasons, objectives, and legal basis underlying the proposed rule.* These elements are incorporated above in SUPPLEMENTARY INFORMATION.

2. *Small entities to which the proposed rule would apply.* The proposed rule would apply to all insured institutions without regard to size.

3. *Impact of the proposed rule on small entities.* All institutions, including small ones, should benefit from the safety and soundness resulting from investments in loans secured by property that has been valued in compliance with the revised appraisal standards set forth in the proposal.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that duplicate, overlap, or conflict with this proposal.

5. *Alternatives to the proposed rule.* In the above SUPPLEMENTARY INFORMATION the Board is soliciting comment on the rule as proposed.

**List of Subjects in 12 CFR Parts 563 and 571**

Accounting, Bank deposit insurance, Investments, Reporting and recordkeeping requirements, Savings and loan associations.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend Parts 563 and 571, Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

**SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION**

**PART 563—OPERATIONS**

1. The authority citation for Part 563 continues to read as follows:

**Authority:** Sec. 1, 47 Stat. 725, as amended (12 U.S.C. 1421 *et seq.*); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071.

2. Amend Part 563 by adding a new § 563.17–1a following § 563.17–1 to read as follows:

**§ 563.17–1a Appraisal policies and practices of insured institutions and service corporations.**

(a) *Introduction.* The soundness of an insured institution's or service corporation's mortgage loans and real estate investments depends to a great extent upon the adequacy of the appraisals used to support these transactions. This rule sets forth appraisal standards to be used by insured institutions and service corporations of such institutions, as well as the Corporation, in determining compliance with the appraisal requirements of §§ 563.17–1 and 563.17–2 of this subchapter.

(b) *Responsibilities of management.* Management shall take reasonable steps to ensure that all appraisal services provided to the insured institution properly reflect the institution's collateral lending posture and its lending policies. Management shall also take reasonable steps to ensure that all appraisals used to support credit or investment decisions demonstrate professional competence, ethics, and expertise. To achieve these results, management shall prepare and disseminate to appropriate personnel written appraisal policies and guidelines. Management shall also develop and institute procedures for approval of appraisers, whether they are fee or staff appraisers, who perform appraisal services for the insured institution. Compliance with the requirements of § 563.17–1a and with the guidelines set forth in 571.1b, which contains the Corporation's statement of policy on management policies, shall be deemed adequate to demonstrate management's fulfillment of its responsibilities under paragraph (b) of § 563.17–1a. For purposes of § 563.17–1a and 571.1b, the term management means the members of the board of directors and the senior officers of an insured institution or service corporation.

(c) *Appraisal management.* Management shall take reasonable steps to ensure that all appraisals used to support credit and investment decisions demonstrate professional competence, ethics, and expertise. The indicia of acceptable appraisals are as follows:

(1) Appraisals shall be prepared in accordance with regulatory requirements and conform with the institution's written appraisal guidelines. Management shall provide appraisers approved by the institution with a copy of both the Corporation's requirements, as set forth in this § 563.17–1a, and the institution's written guidelines. Management shall also assist appraisers in obtaining information needed to comply with these requirements. Such information includes, when reasonably available, but is not limited to, leases, purchase agreements, and profit and loss statements from the security property.

(2) Appraisals shall be sufficiently current to reduce the likelihood that material changes in actual market conditions may have occurred by the time the loan or investment decision is made.

(3) Appraisals shall reflect the market value of the rights in realty offered as security or as part of the transaction. All other values or interests appraised must be clearly labeled and segregated, *e.g.*, value of chattels, value of financing terms, business value, furnishings, fixtures, and equipment value.

(4) Appraisals shall be presented in a narrative format, unless *both* of the following conditions are met:

(i) The appraiser uses a form report that is appropriate for the specific appraisal assignment, *i.e.*, the form is designed for both the property type and the interests being appraised; and

(ii) The appraiser uses a form report that, when read together with all attachments, results in a totally self-contained appraisal.

For existing or proposed one-to-four family and existing multi-family properties, the requirements of this rule may be met by use of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association standardized appraisal forms.

(5) Appraisals shall be based upon the following definition of market value: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

(i) Buyer and seller are typically motivated;

(ii) Both parties are well informed or well advised, and each acts in what he considers his own best interest;

(iii) A reasonable time is allowed for exposure in the open market;

(iv) Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and

(v) The price represents the normal consideration for the property sold

unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

(6) Appraisals shall contain all recognized approaches to market value unless the appraiser fully explains and supports the rationale for eliminating one or more approaches to such value.

(7) Appraisals shall consider, analyze, and disclose in reasonable detail:

(i) Any current agreement of sale, option, or listing of the property being appraised when the existence and nature of such agreements are known and/or made available to the appraiser.

(ii) Any prior sales of the property being appraised that occurred within the following time periods:

(A) For one-to-four-family residential property, one year preceding the date when the appraisal was prepared;

(B) For all other property types, three years preceding the date when the appraisal was prepared;

(iii) A history of land, market, and sales comparables used, if the subject property is located in a market where many of the comparable sales properties have been atypically resold numerous times prior to the sales used by the appraiser. Such sales analysis should cover the time period of the atypical multiple transactions and address the potential or reality of artificially inflated sales prices.

(8) Appraisals shall accurately reflect the impact upon value of any known material changes in plans and specifications from those used in an appraiser's analysis of a proposed project, improvement, or change in use. In all instances where an institution relies upon an appraisal based on preliminary plans and specifications in a loan or investment decision, it shall take appropriate steps, prior to disbursement of any funds, to ensure the validity of the appraisal. Whenever material changes in plans and specifications occur after a loan or investment decision has been made, management shall take steps to assure the protection of the institution's financial position. Typically, such steps shall involve either having the original appraiser recertify his value estimate after examining the final plans and specifications for the project or obtaining a new appraisal based on the final plans and specifications.

(9) Appraisals shall contain a properly supported estimate of the highest and best use of the property appraised that is consistent with the definition of market value set forth in paragraph (c)(6) of this § 563.17–1a. Such estimate shall consider the effect on use and value of such factors as existing land use regulations, reasonably probable modifications of land use regulations, economic demand and supply, physical adaptability of the property, documentable property value trends, and optimal usage of the property. In addition, the appraisal must consider the effect on the property being appraised of anticipated public or private improvements, located on or off the site, to the extent that market actions reflect such anticipated improvements as of the appraisal date. Where appropriate, and in all cases involving proposed construction, development, or changes in use, the appraiser shall specifically address, consider, and support the anticipated economic feasibility and cite all significant market data used in developing his conclusions. Such analyses shall be presented in sufficient detail to support the appraiser's forecast of probable success and conclusion of highest and best use of the project. Moreover, if a market or economic feasibility study is prepared by someone other than the appraiser, the appraiser shall set forth the reasoning and rationale for accepting or rejecting that study.

(10) Appraisals shall report the present market value to a single purchaser and provide sufficient information to determine value upon completion for all properties for which a portion of the overall real property rights or physical asset would typically be sold to its ultimate users over some future time period. Valuations involving such properties must reflect all appropriate adjustments and discounts as well as the anticipated cash flows to be derived from the disposition of the asset over time. Appropriate adjustments and discounts are considered to be those that reflect all expenses associated with the disposition of the realty, as well as the cost of capital and entrepreneurial profit.

(11) Appraisals shall report the present market value and provide sufficient information to determine value upon completion for properties, other than those described in paragraph (c)(10) of this § 563.17–1a, that are under construction, conversion, or are proposed and where anticipated market conditions indicate that stabilized occupancy is not likely as of the date of completion. In addition, the value estimate shall reflect the impact of rental and other concessions, including the costs of preparing the improvements for occupancy by tenants.

(12) Appraisals shall reflect, in the valuation of fractional interests in the real estate, the accepted premise that it is inappropriate to arrive at the value of the whole by simply summing the fractional interests. Similarly, it is also inappropriate to arrive, without market support, at the value of a fractional interest in the real estate by merely subdividing the value of the whole into proportional parts. All analyses involving fractional interests in the real estate, where the combined value of all interests or estates is not reported, must definitively establish with market evidence whether the terms and conditions of the agreement creating the estate or fractional interest reflect market rates and terms.

(d) *Appraisal content.* The content of each appraisal accepted by an institution shall follow generally acceptable and established appraisal practices as reflected in the uniform appraisal standards of the nationally recognized professional appraisal organizations. Specifically, each appraisal shall:

(1) Be totally self-contained and not misleading so that, when it is read by any third party, the appraiser's logic, reasoning, judgment, and analysis in arriving at a final conclusion indicate to the reader the reasonableness of the market value reported;

(2) Unequivocally identify, by legal description or otherwise, the real estate being appraised (management is obliged to ensure, prior to funding, that the appraised real estate is described in a manner consistent with the description found in the institution's evidence of debt or encumbrance);

(3) Identify the property rights being appraised;

(4) Describe all salient features of the property being appraised;

(5) State that the purpose of the appraisal is to estimate market value as defined in paragraph (c)(6) of this § 563.17–1a;

(6) Set forth the effective date of the value conclusion and the date of the report;

(7) Set forth the appraisal procedures followed and the data considered that support the reasoning, analyses, adjustments, opinions, and conclusions (including highest and best use) arrived at by the appraiser;

(8) As it relates to market comparable data analysis, be presented so that:

(i) It contains descriptive information presented with sufficient detail to demonstrate that the transactions were conducted under the terms and conditions of the definition of value being estimated, or have been adjusted to meet such conditions; have a highest and best use equivalent to the best use of the subject property; and that the selected properties are physically and

economically comparable to the subject property; and

(ii) It includes a presentation and explanation of adjustments used in the analysis together with appropriate market support. In the case of existing and proposed one-to-four family dwellings and existing multi-family properties, appraisals may be prepared in accordance with Freddie Mac and Fannie Mae appraisal standards.

(9) Contain a summary of actual operating statements for existing income producing properties together with a supported forecast of the most likely future financial performance;

(10) Set forth all assumptions and limiting conditions that affect the analyses, opinions, and conclusions in the report. Such assumptions and limiting conditions may not result in either a non-market value estimate or one so limited in scope that the final product will not represent a complete appraisal. A summary of all such assumptions and limiting conditions shall be presented in one separate section within the appraisal;

(11) Include in the appraiser's certification (i) a statement that the appraiser has no present or prospective interest in either the property being appraised or with the parties involved and (ii) a statement indicating that the analyses, opinions, and conclusions were developed, and the report was prepared, in accordance with the standards and reporting requirements of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation; including, but not limited to, 12 CFR Part 529, Nondiscrimination in Federally Assisted Programs, and 12 CFR 531.8, Guidelines relating to nondiscrimination in lending;

(12) Contain a form identifying the person at the institution who has reviewed the appraisal, that person's title, and the date of review;

(13) State that it complies with all statutes, rules and regulations prohibiting discrimination on the basis of race, color, religion, sex, national origin, marital status, age of the property and location of the property.

(e) *Related considerations.* (1) Loan documentation shall contain:

(i) Any third party market or economic feasibility studies utilized by the appraiser;

(ii) With respect to loans purchased by an institution, a form identifying the person who has inspected the security property to verify the accuracy of the appraisals and the date of the latest available appraisal; and

(iii) with respect to construction loans, information to indicate that at no time during the construction period will disbursements exceed the present value of the project.

(2) Appraisers or other individuals who knowingly make false statements or willfully overvalue land, property, or security for the purpose of influencing in any way the action of a Federal Home Loan Bank, the Federal Home Loan Bank Board, a Federal savings and loan association, any insured institution, any member of the Federal Home Loan Bank System, or the Federal Savings and Loan Insurance Corporation are subject to criminal prosecution under the provisions of Title 18 of the United States Code.

## PART 571— STATEMENT OF POLICY

3. The authority citation for Part 571 continues to read as follows:

**Authority:** Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended (12 U.S.C. 1425a); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402–403, 407, 48 Stat. 1256–1257, 1260, as amended (12 U.S.C. 1725–1728, 1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

4. Amend Part 571 by adding a new § 571.1b to read as follows:

**§ 571.1b Appraisal policies and practices of insured institutions and service corporations.**

(a) *Purpose.* The purpose of this § 571.1b is to provide guidelines for the managements of insured institutions and service corporations in fulfilling their responsibilities under § 563.17–1a of this subchapter. For purposes of this § 571.1b, the term management has the same meaning as it is given in § 563.17–1a.

(b) *Management policies.* To a great extent, the complexity and diversity of the credit arrangements offered by an insured institution or a service corporation determine the types of appraisal services the institution's underwriting staff require. The board of directors and senior officers have the responsibility to assure that the appraisal services provided, whether by fee or staff appraisers, properly reflect the collateral lending posture of the institution, as well as its lending policies. Each institution or service corporation should be able to demonstrate that the appraisers approved by the board of directors, whether or not upon recommendation of staff, possess the requisite experience, education, and facilities to perform in an acceptable fashion. Appraisal skills and technology are not static, and attendance at courses and participation in the activities of professional organizations are factors to be considered by the board of directors in selecting both fee and staff appraisers. Memberships in professional appraisal organizations as well as continuous professional development should be encouraged to ensure that the appraisers whose services are being used are actively increasing their knowledge and skills over time. Management should periodically review the performance of all approved appraisers for compliance with generally accepted and established appraisal practices as reflected in the uniform appraisal standards adopted by the national professional appraisal organizations and the Board's reporting requirements. Management should take whatever steps are necessary to eliminate poor quality or inappropriate appraisal work products.

By the Federal Home Loan Bank Board.

*Memorandum #R 41*

To: OES Professional Staff, June 6, 1977

From: William Sprague, Appraisal Policies and Practices of Insured Institutions and Service Corporations

Synopsis: Guidelines Regarding Appraisal Procedures and Management.

The soundness of an association's or service corporation's mortgage loans and real estate investments depends to a great extent upon the timeliness and adequacy of the appraisals of the real estate. This memorandum provides guidelines for appraisal management and procedures to this end. It is the responsibility of the examiner at each examination to evaluate the quality of the association's appraisal function in meeting the requirements of Insurance Regulations 563.17–1(c)(1) and, 563.10. The examiner must similarly evaluate the service corporation's appraisal function.

*Appraisal Management*

The lending policies established by the board of directors determine the association's and service corporation's appraisal staff, fee appraiser and plant requirements. Management should ensure at all times that appraisal services fit both the ordinary and specialized needs of the association and service corporation, whether performed by staff or fee appraisers.

*A. Staff and Plant*

An appraisal should readily serve an underwriter's needs by providing a documented opinion of the market value of the property as of the date of the estimated market value and should indicate the degree of feasibility/marketability of the property. An accurate and fully useful appraisal is most often the work of a capable and suitably equipped fee or staff appraiser who has

ready access to current market information. Therefore, each association and service corporation must be able to demonstrate that its fee and staff appraisers are capable and have the facilities necessary to perform adequate appraisals.

*B. Training*

Staff appraisers should continually increase their knowledge and skills through attendance at courses sponsored by universities, colleges and/or professional appraisal organizations. Memberships in professional appraisal organizations should be encouraged.

*Appraisal Procedures*

The appraisal content shall follow generally accepted and established appraisal practices as reflected in the nationally recognized professional appraisal organizations, such as: The American Institute of Real Estate Appraisers and the Society of Real Estate Appraisers.

Specifically, each appraisal report must:

1. Be totally self-contained so that:

a. It is a useful tool for prudent underwriting, REO and/or LTF decisions.

b. When read by any third party, the appraiser's logic, reasoning, judgment and analysis in arriving at a final conclusion indicate to the reader the reasonableness of the market value reported.

c. It demonstrates professiona1 competence, ethics and expertise.

2. Be of a narrative style for major loans and/or investments of similar magnitude made by the association or affiliates.

3. Contain all recognized approaches to market value unless the appraiser fully explains and documents the rationale for eliminating one or more of the approaches to value.

4. Take into consideration and make provision for all appropriate deductions and discounts for any development type property that requires:

a. Marketing periods in excess of 12 months for total, 100 percent, sell out, or

b. Occupancy build-up periods in excess of 12 months for the property to reach the appraiser's anticipated normal occupancy level.

5. Address itself to the market/economic feasibility prospects for any proposed *major loan/investment* real estate project, in sufficient detail to support the appraiser's forecast of the probable success. If a market/economic feasibility report is prepared by other than the appraiser, the appraiser will set forth the reasoning and rationale for accepting or rejecting said report. All such market/ economic feasibility studies will be made a permanent part of the appraisal report.

6. For properties and investments (other than single family or two family dwellings) assigned a value of $100,000 or more, contain a sales history analysis of the property over the past five years preceding the appraisal report, fully disclosing and verifying:

a. Grantor(s)-grantee(s).

b. Sale date(s).

c. Sale price(s) and terms of financing, discounting the sale to a cash equivalent, where necessary.

d. Any interrelated parties to each transaction.

7. Address itself to "Market Value" as defined and qualified as acceptable to the Federal Home Loan Bank Board. Under no circumstance should the appraiser further qualify, or by assumptions, erode the impact of this definition. All market data inputs should be thoroughly analyzed and/or adjusted in terms of the above definition as qualified. Market value as defined is applicable in all lending/investment circumstances for insured associations and affiliates, including special purpose properties and REO/LTF situations. In REO/LTF situations, defined market value estimates will be derived on an "as is" basis.

The appraiser's "market value" estimate should, in view of the collateral lending posture of the savings and loan industry, reflect the most probable price to be derived should the property be placed on the market for sale, given the previously noted market value definition qualifiers.

*Memorandum #R 41a*

To: OES Professional Staff, September 15, 1977

From: William Sprague, Appraisal Policies and Practices of Insured Institutions and Service Corporations

Synopsis: Guidelines Regarding Appraisal Procedures and Management. Supercedes Memo #R 41.

(Editor's Note.—Revisions have been made to the introductory paragraph of Appraisal Procedures and item #6.)

The soundness of an association's or service corporation's mortgage loans and real estate investments depends to a great extent upon the timeliness and adequacy of the appraisals of the real estate. This memorandum provides guidelines for appraisal management and procedures to this end. It is the responsibility of the examiner at each examination to evaluate the quality of the association's appraisal function in meeting the requirements of Insurance Regulations 563.17–1(c)(1) and 563.10. The examiner must similarly evaluate the service corporation's appraisal function.

*Appraisal Management*

The lending policies established by the board of directors determine the association's and service corporation's appraisal staff, fee appraiser and plant requirements. Management should ensure at all times that appraisal services fit both the ordinary and specialized needs of the association and service corporation, whether performed by staff or fee appraisers.

*A. Staff and Plant*

An appraisal should readily serve an underwriter's needs by providing a documented opinion of the market value of the property as of the date of the estimated market value and should indicate the degree of feasibility/marketability of the property. An accurate and fully useful appraisal is most often the work of a capable and suitably equipped fee or staff appraiser who has ready access to current market information. Therefore, each association and service corporation must be able to demonstrate that its fee and staff appraisers are capable and have the facilities necessary to perform adequate appraisals.

*B. Training*

Staff appraisers should continually increase their knowledge and skills through attendance at courses sponsored by universities, colleges and/or professional appraisal organizations. Memberships in professional appraisal organizations should be encouraged.

*Appraisal Procedures*

The appraisal content shall follow generally accepted and established appraisal practices as reflected in the nationally recognized professional appraisal organizations.

Specifically, each appraisal report must:

1. Be totally self-contained so that:

a. It is a useful tool for prudent underwriting, REO and/or LTF decisions.

b. When read by any third party, the appraiser's logic, reasoning, judgment and analysis in arriving at a final conclusion indicate to the reader the reasonableness of the market value reported.

c. It demonstrates professional competence, ethics and expertise.

2. Be of a narrative style for major loans and/or investments of similar magnitude made by the association or affiliates.

3. Contain all recognized approaches to market value unless the appraiser fully explains and documents the rationale for eliminating one or more of the approaches to value.

4. Take into consideration and make provision for all appropriate deductions and discounts for any development type property that requires:

a. Marketing periods in excess of 12 months for total, 100 percent, sell out, or

b. Occupancy build-up periods in excess of 12 months for the property to reach the appraiser's anticipated normal occupancy level.

5. Address itself to the market/economic feasibility prospects for any proposed major loan/investment real estate project, in sufficient detail to support the appraiser's forecast of the probable success. If a market/economic feasibility report is prepared by other than the appraiser, the appraiser will set forth the reasoning and rationale for accepting or rejecting said report. All such market/economic feasibility studies will be made a permanent part of the appraisal report.

6. Appraisals of major loan/investment properties (except for home type properties) located in highly speculative local market areas which have experienced dramatic price increases relative to regional norms, must contain a sales history analysis of the subject property covering the speculative time period.

Said analysis should reasonably disclose and verify:

a. Grantor(s)-grantee(s)

b. Sale date(s).

c. Sale price(s) and terms of financing, discounting the sale to a cash equivalent, where necessary.

d. Any interrelated parties to each transaction.

7. Address itself to "Market Value" as defined and qualified as acceptable to the Federal Home Loan Bank Board. Under no circumstance should the appraiser further qualify, or by assumptions, erode the impact of this definition. All market data inputs should be thoroughly analyzed and/or adjusted in terms of the above definition as qualified. Market value as defined is applicable in all lending/investment circumstances for insured associations and affiliates, including special purpose properties and REO/LTF situations. In REO/LTF situations, defined market value estimates will be derived on an "as is" basis.

The appraiser's "market value" estimate should, in view of the collateral lending posture of the savings and loan industry, reflect the most probable price to be derived should the property be placed on the market for sale, given the previously noted market value definition qualifiers.

Memorandum #R 41 is hereby rescinded.

*Memorandum #R 41a–1*

To: Professional Staff, March 1, 1979
From: Robert J. Moore, Appraisal Policies and Practices of Insured Institutions and Service Corporations
Synopsis: Guidelines Regarding Definition of "Market Value" and "Typical Financing" Valuation Policy

The Federal Home Loan Bank Board's appraisal policy and practice guidelines as contained in Memorandum R–41a, require all appraisal reports for insured associations and affiliates to evaluate market value. Under no circumstances should the appraiser further qualify or erode by assumption the impact of the accepted market value definition. "Market value" as acceptable to the Bank Board is defined as follows:

"The highest price in terms of money which a property will bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus.

"Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. Buyer and seller are typically motivated.

2. Both parties are well informed or well advised, and each acting in what he/she considers his/her own best interest.

3. A reasonable time is allowed for exposure in the open market.

4. Payment is made in cash or its equivalent.

5. Financing, if any, is on terms generally available in the community at the specified date and typical for the property type in its locale

**Federal Home Loan Bank Board; Office of Examinations and Supervision**

*Memorandum #R 41b*

To: OES Professional Staff, March 12, 1982
From: D. James Croft, Appraisal Policies and Practices of Insured Institutions and Service Corporations
Synopsis: Guidelines Regarding Appraisal Procedures and Management. Supersedes Memo #R 41a and R 41a–1, Incorporates and Rescinds Memo #T 15–1

**(Editor's Note.—In addition to consolidating the provisions of Memoranda R 41a and R 41a–1 into a single document and incorporating the content of T 15–1, the following significant revisions have been incorporated in the section entitled "Appraisal Procedures":**

*Item #4*—expands and clarifies requirement that appraisals of development type properties reflect deductions and discounts by eliminating the 12 month sell-out/occupancy threshold formerly provided by R 41a.

*Item #5*—expands and clarifies expected use of market/economic feasibility assessments to include support of appraiser's conclusion of highest and best use as well as of probable success of the project.

*Item #7*—revises definition of "Market Value" to reflect terminology currently in use by leading professional appraisal organizations and, consistent with the collateral lending posture of the savings and loan industry, the need to obtain the most probable selling price should the property be placed on the market under the conditions herein specified.)

*Introduction*

The soundness of an association's or service corporation's mortgage loans and real estate investments depends to a great extent upon the adequacy of the appraisals of the real estate. This memorandum provides guidelines for appraisal management and procedures to assist in determining compliance with the appraisal requirements of Insurance Regulation 563.17– 1(c)(1)(iii).

*Appraisal Management*

The lending policies established by the board of directors will determine the complexity and diversity of appraisal situations to be encountered and, therefore, the general requirements of the association or service corporation for appraisal staff and facilities. Management should ensure that appraisal services provided, whether by fee or staff appraisers, meet the current needs of the association or service corporation.

An appraisal should serve an underwriter's needs by providing a supported opinion of a property's market value as of a specified date sufficiently current so as to reduce the likelihood of material value fluctuations prior to the loan/investment decision. In addition, to providing estimated market value, the appraisal should give the appraiser's opinion of the property's feasibility and marketability. An accurate and useful appraisal is most often produced by a capable and suitably equipped fee or staff appraiser who has ready access to current market information. Therefore, each association and service corporation should be able to demonstrate that its fee and staff appraisers are competent and knowledgeable of the relevant markets, and have the facilities necessary to perform adequate appraisals.

Appraisal skills and professional requirements are not static. Staff appraisers should continually increase their knowledge and skills through attendance at courses sponsored by universities, colleges, and/or professional organizations. Memberships in professional appraisal organizations should be encouraged. Attendance at courses and participation in the activities of professional organizations are also useful factors for management to consider in selecting independent fee appraisers.

*Appraisal Procedures*

The appraisal content shall follow generally accepted and established appraisal practices, as reflected in the standards of the nationally recognized professional appraisal organizations.

Specifically, each appraisal report must:

1. Be totally self-contained so that:

a. It is a useful tool for prudent underwriting, REO and/or LTF decisions.

b. When read by any third party, the appraiser's logic, reasoning, judgment and analysis in arriving at a final conclusion indicate to the reader the reasonableness of the market value reported.

c. It demonstrates professional competence, ethics and expertise.

2. Be of a narrative style for major loans and/or investments made by the association or affiliates.

3. Contain all recognized approaches to market value unless the appraiser fully explains and documents the rationale for eliminating one or more of the approaches to value.

4. Take into consideration and make provision for all appropriate deductions and discounts for any development type property.

5. Address itself to the market/economic feasibility prospects for any proposed major loan/investment real estate project, in sufficient detail to support the appraiser's forecast of the probable success and the conclusion(s) of highest and best use. If a market/economic feasibility report is prepared by other than the appraiser, the appraiser will set forth the reasoning and rationale for accepting or rejecting said report. All such market/economic feasibility studies will be made a permanent part of the appraisal report.

6. Contain, if for major loan/investment properties (except for home type properties) located in highly speculative local market areas which have experienced dramatic price increases relative to regional norms, a sales history analysis of the subject property covering the speculative time period. This

analysis should reasonably disclose and verify:

a. Grantor(s)-grantee(s).

b. Sale date(s).

c. Sale price(s) and terms of financing, discounting the sale to a cash equivalent, where necessary.

d. Any interrelated parties to each transaction.

7. Address itself to "Market Value" as hereby defined and qualified:

The most probable price in terms of money which a property should bring in competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus.

Implicit in this definition is the consummation of a sale as of a specified date and the passing of time from seller to buyer under conditions whereby:

a. Buyer and seller are typically motivated.

b. Both parties are well informed or well advised, and each acting in what they consider their own best interest.

c. A reasonable time is allowed for exposure in the open market.

d. Payment is made in cash or its equivalent.

e. Financing, if any, is on terms generally available in the community at the specified date and typical for the property type in its locale.

f. The price represents a normal consideration for the property sold unaffected by special financing amounts and/or terms, services, fees, costs, or credits incurred in the transaction.

Market value as defined is applicable in all lending/investment circumstances for insured associations and affiliates, including special purpose properties and REO/LTF situations. In REO/LTF situations, defined market value estimates will be derived on an "as is" basis. Under no circumstance should the appraiser further qualify or, by assumptions, erode the impact of this definition. All market data inputs should be thoroughly analyzed and, where necessary, adjusted in terms of the above definition, as qualified.

As reflected in qualifications d, e and f of the above definition, all valuations must be couched in terms of "cash or its equivalent" and "typical financing" for that particular property type.

Any valuations which by assumption or qualification effectively utilize any form of specialized, unique and/or subsidized financing assumptions as surrogates for "typical financing" assumptions in the appraisal methodology are not considered to be acceptable. All properties, regardless of the specific nature of the particular financing arrangements then existing and/or as proposed, must be evaluated in a market value context as defined and as qualified relative to "typical financing" and "cash equivalency."

For certain governmental subsidy programs, such as HUD Section 8 Programs, where the real estate project and the ultimate product user represent a distinct and readily identifiable separate market relative to those projects found in the typical market, the appraiser may consider the various subsidized income/vacancy guarantees and/or subsidized aspects of the specific financing/contractual programs. In no case, however, should the final value estimate exceed replacement cost. Replacement cost in this context refers to the sum of the following:

1. Market value of the subject site ("value" conforming to the above referenced market value definition).

2. Current reproduction cost less deterioration and obsolescence of all building and site improvements.

3. A reasonable, market-supportable, entrepreneurial profit.

Please note that the definition of "market value" contained in this memorandum supersedes all older definitions of "market value" or "fair market value" previously deemed acceptable to the Bank Board. Memorandum #T 15–1, which contains a now obsolete definition, is hereby rescinded. It should be understood, however, that the long-standing examining and supervisory policy described in #T 15–1 remains in effect. Substantial variations between the appraised "market value" of a property and its actual selling price (and/or book value in the case of REO) will continue to be carefully scrutinized during the examination process.

D. James Croft,

*Memorandum AB 80*

To: Professional Staff—Examinations and Supervision, February 26, 1987

From: William L. Robertson, R–41c

Clarifications

Synopsis: This Memorandum Serves to Clarify Four Areas of R–41c That Have Been Subject to Repeated Misinterpretations

It has become increasingly clear that at least four issues addressed in the R–41c memorandum need clarification. The following represents the official interpretative views of this Office relative to these issues.

1. Compliance with Freddie Mac and Fannie Mae appraisal and appraisal reporting guidelines (and standard form reports) is sufficient for appraisals on existing one-to-four family dwellings and multi-family properties.

2. In order to assist in cost control of appraisal services and to encourage the further establishment of uniform appraisal standards, the use of other standardized forms will eventually be permitted, provided they are consistent with generally accepted and established written appraisal practices and are preapproved by the Bank Board.

3. It is not intended that the appraiser enmeshed in aspects of the underwriting process other than those necessary to perform the appraisal.

4. An appraiser shall report the present market value for both existing properties and for proposed developments. The appraiser may also report a value as of the conclusion of construction and as of the projected date when stabilized occupancy is achieved.

William L. Robertson,

*Director.*

**Distribution to State supervisory authorities to be made by Principal Supervisory Agents.**

*Memorandum R 41c*

To: Professional Staff—Examinations and Supervision, September 11, 1986

From: Francis M. Passarelli, Appraisal Policies and Practices of Insured Institutions and Service Corporations

Synopsis: This Memorandum Revises and Replaces R–41b. It does not represent any shift in board policy but it does encompass significantly greater detail, specifically with regard to "Appraisal Management," adding guidelines which are appropriate to ensure acceptable appraisal procedures in the current market. The guidelines listed are generally standards of practice utilized by the leading national professional appraisal organizations. The Memorandum also contains the new definition of market value, as recently adopted by both the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae). R–41b is hereby rendered obsolete and is rescinded.

*Introduction*

The soundness of an association's or service corporation's mortgage loans and real estate investments depends to a great extent upon the adequacy of appraisals utilized to support such transactions. This memorandum sets forth the standards and reporting requirements utilized by the Federal Home Loan Bank Board in determining compliance with the appraisal requirements of Insurance Regulation 563.17–1(c)(1)(iii).

*Management Policies*

Loan and investment policies established by an institution's board of directors should reflect both the overall operational policies of the institution as well as the regulatory limitations under which it must conduct its business. Such policies should be clearly defined and set forth in a manner that provides effective supervision of the institution's operations by the directors.

Prudent loan policy should identify the types of credit arrangements the institution offers as well as the procedures to be followed in the underwriting of each of these arrangements. In secured credit transactions, such policies should definitively address the need to establish the value of collateral offered by borrowers in order to ensure that the institution is appropriately protected throughout the life of the credit arrangement. To a great extent, the complexity and diversity of the credit arrangements offered will determine the types of appraisal services the institution's underwriting staff will require. It is the board of directors' and

senior officers' responsibility to ensure that the appraisal services provided, whether by fee or staff appraisers, properly reflect the collateral lending posture of the institution, as well as its lending policies.

Similarly, the board of directors is responsible for establishing appropriate guidelines and procedures relative to other investments of an institution. Appraisal services utilized by the institution in evaluating such transactions should reflect the institution's regulatory obligation to operate in a safe and sound manner. Failure to ensure that appraisal services match the needs of the institution will be considered an abdication of this responsibility and is representative of an unsafe and unsound operating policy.

In formulating its loan and investment policies, the board of directors should recognize that appropriate appraisal services are most often produced by fee or staff appraisers, who are both competent and knowledgeable and have properly equipped facilities within which to prepare adequate appraisals. Each association or service corporation should be able to demonstrate that the appraisers approved by the board of directors possess the requisite experience, education and facilities to perform in an acceptable fashion.

Appraisal skills and technology are not static and attendance at courses and participation in the activities of professional organizations are factors to be considered by the board of directors in selecting both fee and staff appraisers. Memberships in professional appraisal organizations as well as continuous professional development should be encouraged to ensure that the appraisers whose services are being utilized are actively increasing their knowledge and skills over time. Management should periodically review the performance of all approved appraisers for compliance with the standards and reporting requirements of the Federal Home Loan Bank Board and take whatever steps are necessary to eliminate poor quality or inappropriate work products.

*Appraisal Management*

Appraisals serve as an important basis in the decision processes involved in the underwriting of secured credit transactions as well as investment decisions involving interests in real property. Management must ensure that all appraisals utilized in these decisions:

1. Are prepared in accordance with the standards and reporting requirements of the Federal Home Loan Bank Board and conform to the institution's written appraisal guidelines. Management should provide appraisers approved by the institution with a copy of both the Board's requirements, as promulgated herein, and the institution's written guidelines. Management should also assist appraisers in obtaining the information needed to comply with these requirements. Such information includes leases, Purchase agreements, profit and loss statements from the security property, etc.

2. Are sufficiently current to reduce the likelihood of material changes in actual market conditions from those upon which the loan or investment decision were predicated. (Though not exclusively definitive, "sufficiently current" may be deemed to be an appraisal made six months prior to the approval of the loan or investment.)

3. Reflect the market value of the rights in realty offered as security or involved with the transaction. All other values or interests appraised must be clearly labeled and segregated, i.e., value of chattels, value of financing terms, business value, furniture, furnishing and equipment value, etc.

4. Contain sufficient information to assist management and/or the board of directors in establishing the loan amount as well as other significant terms involved in the credit arrangement.

5. Support the classification of the asset as a real estate loan or other type of credit arrangement.

6. Are prepared by appraisers, independent from the borrower or the seller of the real estate, and approved by the institution's board of directors. It is suggested the board review the prior work and references of newly engaged appraisers. Final board of directors' approval should be recorded in the board's minutes.

7. Contain adequate infomation relative to both current and projected market conditions and their resulting impact upon the estimated value of the property to enable an institution to determine whether its financial position will be properly protected over the life of the credit arrangement or term of the investment. The scope of such information will depend upon the property type, the structure of the credit or investment arrangement and the financial realities of the contemplated transaction.

8. Are presented in a narrative style format, unless *both* of the following conditions are met:

a. A form report is utilized which is appropriate for the specific appraisal assignment, i.e., the form is designed for both the property type and the interests being appraised.

b. A form report is utilized, including all attachments, that results in a totally self-contained appraisal, as defined elsewhere in this memorandum.

9. Are based upon the following definition of market value: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

a. Buyer and seller are typically motivated;

b. Both parties are well informed or well advised, and each acting in what he considers his own best interest;

c. A reasonable time is allowed for exposure in the open market;

d. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and

e. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

10. Correctly employ all recognized appraisal methods and techniques that are necessary to produce a credible analysis, opinion, or conclusion. Exclusion or omission of any recognized method for cause must be fully justified.

11. Consider, analyze and disclose in reasonable detail:

a. Any current agreement of sale, option, or listing of the property being appraised.

b. Any prior sales of the property being appraised that occurred within the following time periods:

(1) One year preceding the date when the appraisal was prepared for one to four family residential property, and

(2) Three years preceding the date when the appraisal was prepared for all other property types.

c. A sales history of the comparables, if the subject property is located in a speculative market, which has experienced dramatic price fluctuations relative to regional norms, covering the speculative time period involving the comparable sales.

12. Contain the following information where an analysis, opinion or conclusion of a proposed project, improvement or change in use is involved: (i) Plans, specifications, or other documentation in sufficient detail to identify the scope and character of the proposed improvements; (ii) evidence indicating the probable time of completion of the proposed improvements; (iii) clear and appropriate evidence supporting development costs, anticipated rent levels or per unit sales levels, occupancy projections, and the anticipated competition at the time of completion; and (iv) all value changes projected to occur from the conception of a project to its completion and/or stabilized occupancy should be set forth in sufficient detail so that the continuum of present value estimates over the life of the credit arrangement or investment can be reconciled with the values reported in the appraisal. Included as documentation should be a explanation of how discount and capitalization rates used in generating the present value estimates were deduced.

In addition to the above requirements, whenever value is estimated as of completion and/or stabilized occupancy, the appraisal must contain the following information:

a. The date or dates when the value estimate or estimates apply.

b. Factual data supporting the reasonableness of all conditions and assumptions impacting each value conclusion cited in the apprisal. Such information must be presented in sufficient detail and directly linked to current market information so that the appraiser's logic, reasoning, judgment and analysis indicate to a third-party reader the reasonableness of the value or values reported.

c. An explanation of the appraisal techniques selected and the data used to arrive at the final value estimate(s).

d. A fully documented and supported highest and best use analysis and conclusion which coincides with the date(s) of the value estimate(s).

e. A definitive statement as to whether the value estimate reflects the worth of the

property at stabilized occupancy and whether the appraiser considered and included the effect of income and expenses during the projected absorption period in developing a value estimate as of the date of completion.

13. Accurately reflect the impact upon value of any changes in plans and specifications from those utilized in an appraiser's analysis of a proposed project, improvement or change in use.

In all instances where an institution utilizes an appraisal based upon preliminary plans and specifications in a loan or investment decision, it shall take appropriate steps, prior to the disbursement of any funds, to ensure the validity of the appraisal, relative to the decision, has not been negated. Further, whenever significant changes in plans and specifications occur after a loan or investment decision has been made, the institution's management shall take appropriate steps to ensure its financial position is appropriately protected. Typically, such steps will involve either having the original appraiser recertify his value estimate after examining the final plans and specifications for the project or a new appraisal will be obtained based on the final plans and specifications.

For the purposes of this paragraph, significant changes in plans and specifications are defined as those which directly affect the value of the property, e.g., changes in the scope, character or timing of the proposed improvements.

14. Contain a properly documented and supported estimate of the highest and best use of the property appraised, which is consistent with the definition of market value cited in this memorandum. Such estimate must consider the effect on use and value of the following factors: Existing land use regulations, reasonably probable modifications of such land use regulations, economic demand, the physical adaptability of the property, neighborhood trends, and the optimal usage of the property. In addition, the appraisal must consider the effect on the property being appraised of anticipated public or private improvements, located on or off the site, to the extent that market actions reflect such anticipated improvements as of the appraisal date.

In all appraisals, including those involving proposed construction, development or changes in use, the appraiser must specifically address and consider in his analysis the anticipated economic feasibility, as well as cite all significant market data utilized in developing his/her conclusions. Such analyses must be presented in sufficient detail to support the appraiser's forecast of the probable success and the conclusion of highest and best use of the project.

In all instances where the appraiser relies on feasibility/marketability studies prepared by a third party to support his estimate of the highest and best use, he must:

a. Attest that such study has been thoroughly examined and that he fully concurs with its findings and conclusions, and;

b. Specifically identify both the study examined as well as set forth within the body of the appraisal, a summary of the significant data, analyses and conclusions presented in the study. Such summary must be presented in sufficient detail, so that further reference to the study is unnecessary by a third-party reader of the appraisal, and;

c. Have available for future examination by users of the appraisal, a complete copy of the feasibility/marketability study prepared by the third party.

15. Report the market value to a single purchaser as of the date of completion for all properties, wherein a portion of the overall real property rights or physical asset would typically be sold to its ultimate users over some future time period. Valuations involving such properties must fully reflect all appropriate deductions and discounts as well as the anticipated cash flows to be derived from the disposition of the asset over time. Appropriate deductions and discounts are considered to be those which reflect all expenses associated with the disposition of the realty, as of the date of completion, as well as the cost of capital and entrepreneurial profit.

16. For properties under construction, conversion or proposed, report the market value of the subject property as of the date of completion, excepting those properties described in paragraph 15 immediately above, where anticipated market conditions indicate stabilized occupancy is not likely as of the date of completion. Such valuations shall fully reflect the impact upon the "as if completed value" of all pertinent operating expenses as well as the anticipated pattern of income during the absorption period. In addition, the value estimate must reflect the impact of rental and other concessions, including the costs associated with preparing the improvement for occupancy by tenants.

17. Contain a summary of actual income and expenses experienced by the subject property where it is an existing income or revenue producing property. In addition, all such appraisals must contain a complete reconciliation of all deviations projected by the appraiser in his forecast of future financial performance from those historically realized by the property.

18. Report the "as is" value of the subject property as of the date when either the appraisal was prepared or when the property was last inspected. The date of the "as is" value estimate should be sufficiently current to reduce the likelihood of material changes in the actual market conditions from those upon which the loan or investment decision were predicated. In addition to any other value estimates contained in an appraisal, the "as is" value must be reported.

19. Consider and report the effect on value, if any, of the terms and conditions of any agreement establishing a fractional interest or estate, where the objective of the report is to estimate the value of such fractional interest or estate. All such appraisals must clearly demonstrate that the value of any fractional part or estate has been evaluated by an analysis of appropriate market data. Such analyses must recognize that it is generally considered inappropriate to arrive at either the value of the whole or its parts by simply summing the fractional interests or subdividing the value of the whole into proportional parts.

All analyses involving fractional interests or estates, where the combined value of all interests or estates is not reported, must definitively establish with market evidence whether the terms and conditions of the agreement creating the estates or fractional interests reflects market rates and terms.

In addition to the above requirements, all analyses involving fractional interests or estates must disclose whether the final value estimate of such fractional interests or estates included non-realty components, i.e., tenant or borrower's credit quality, other non-realty contractual arrangements, etc. Further, whenever such value estimate includes non-realty components, the value assignable to them must be specifically disclosed in the appraisal.

All appraisals, where there is a clear indication that the subject property is encumbered by a lease instrument or legal limitations upon its operation [e.g., when inspection reveals occupancy of the property by tenants or the property is subject to rent control statutes], must consider and report the impact of the terms of the lease or such legal limitations upon the value of the estate being appraised.

*Appraisal Content*

Prior to the approval of a loan or investment transaction, each appraisal accepted by an institution must be prepared in writing and contain sufficient information to enable the persons who receive or rely on the report to understand it properly. Appraisals which fail to set forth, in a clear and accurate manner, the analytical process followed by the appraiser, in a fashion that will not be misleading to the persons who receive or rely on the report, will be considered unacceptable.

The content of each appraisal accepted by an institution shall follow generally accepted and established appraisal practices, as reflected in the standards of the nationally recognized professional appraisal organizations and as noted in the body of this memorandum.

Specifically, each appraisal must:

1. Be totally self-contained so that when read by any third party, the appraiser's logic, reasoning, judgment and analysis in arriving at a final conclusion indicate to the reader the reasonableness of the market value reported.

2. Identify via a legal description the real estate being appraised.

3. Identify the property rights being appraised.

4. Describe all salient features of the property being appraised.

5. State that the purpose of the appraisal is to estimate market value as defined in this memorandum.

6. Set forth the effective date of the value conclusion(s) and the date of the report.

7. Set forth all relevant data and the analytical process followed by the appraiser in arriving at the highest and best use conclusion.

8. Set forth the appraisal procedures followed, the data considered, and the reasoning that supports the analyses, opinions, and conclusions arrived at by the

appraiser. The analytical process followed by the appraiser must be presented so that:

(a) It includes a complete explanation of all comparable data adjustments utilized in the analysis together with appropriate market support for each adjustment, and;

(b) It contains descriptive information for all comparable data presented with sufficient detail to demonstrate the transactions were conducted under the terms and conditions of the definition of value being estimated or have been adjusted to meet such conditions; have a highest and best use equivalent to the best use of the subject property, and; are physically and economically comparable to the subject property.

9. Set forth all assumptions and limiting conditions that affect the analyses, opinions, and conclusions in the report; however, such assumptions and limiting conditions must not result in either a non-market value estimate or one so limited in scope that the final product will not represent a complete appraisal. A summary of all such assumptions and limiting conditions must be presented in one physical location within the appraisal.

10. Include a manually signed certification by the appraiser that is similar in content to the following form:

I certify that, to the best of my knowledge and belief, . . .

—The statements of fact contained in this report are true and correct.

—The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, unbiased professional analyses, opinions, and conclusions.

—I have no present or prospective interest in the property that is the subject of this report, and I have no personal interest or bias with respect to the parties involved.

—My compensation is not contingent on an action or event resulting from the analyses, opinions, or conclusions in, or the use of, this report.

—My analyses, opinions, and conclusions were developed, and this report has been prepared, in accordance with the standards and reporting requirements of the Federal Home Loan Bank Board.

—I have made a personal inspection of the property that is the subject of this report. [If more than one person signs the report, this certification must clearly specify which individuals did and which individuals did not make a personal inspection of the appraised property.]

—No one provided significant professional assistance to the person signing this report. [If there are exceptions, the name of each individual providing significant professional assistance must be stated.]

*Related Considerations*

Appraisal reports prepared for the purpose of influencing in any way the action of a Federal Home Loan Bank, the Federal Home Loan Bank Board, a Federal Savings and Loan Association, any institution the accounts of which are insured by the FSLIC, any member of the Federal Home Loan Bank System, or the Federal Savings and Loan Insurance Corporation are subject to the provisions of Title 18, United States Code. It is incumbent upon all appraisers to diligently adhere to generally accepted professional appraisal standards of practice and the provisions and requirements of the Federal Home Loan Bank Board's standards and reporting requirements relating to the preparation of appraisal reports prepared for these entities.

## DEPARTMENT OF AGRICULTURE

### Forest Service

### 36 CFR Part 223

### National Forest Timber Sales; Control of Skewed Bidding

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice; withdrawal of proposed policy.

**SUMMARY:** The Forest Service published a proposed policy to control skewed bidding on National Forest System timber sales January 30, 1987, at 52 FR 3027. In response to public comments received on that policy, the Forest Service hereby gives notice that it is withdrawing its proposal.

**DATE:** This decision to withdraw the proposal is effective on May 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Questions about this notice should be addressed to Lloyd Olson, Timber Management Staff, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090-6090, (202) 447-4051.

**SUPPLEMENTARY INFORMATION:** On July 1, 1983, (48 FR 30417) and July 16, 1984, (49 FR 28748), the Forest Service published proposed policies to limit skewed bidding on National Forest timber sales. Based on the extensive comments received and the fact that numerous changes have been implemented in timber sale procedures since the last proposal, the Agency published a third proposal on January 30, 1987, (52 FR 3027). The public comment period closed March 31.

The Agency has received written responses on the 1987 proposal from 4 parties representing individual timber purchasers as well as several oral responses presented at a meeting of an association representing timber purchasers. While the majority of reviewers agreed that a policy on skewed bidding is needed, the preponderance of reviewers strongly objected to the latest proposal on the grounds that it is too complex, fails to adequately address differences among timber sale bidders and geographical areas, and contains factual errors. The strength and substance of these comments have led the Agency to conclude that it needs to take a fresh look at the issue of skewed bidding, to identify alternative approaches, and especially to simplify the procedures if possible. Accordingly, the Forest Service is withdrawing its present proposal. It is uncertain how quickly a new proposal can be developed, but the Agency hopes to be in a position to issue a revised proposal by the end of the year.

Dated: April 27, 1987.

BILLING CODE 3410-11-M

## VETERANS ADMINISTRATION

## DEPARTMENT OF DEFENSE

### 38 CFR Part 21

### Veterans Education; Effective Date of VEAP Disenrollment and Other Technical Changes

**AGENCIES:** Veterans Administration and Department of Defense.

**ACTION:** Proposed regulations.

**SUMMARY:** This proposed regulatory amendment would permit a veteran who has received a refund of his or her contributions to the Post-Vietnam Era Veterans Educational Assistance Program (VEAP) fund to retain his or her eligibility if the refund check is returned to the Veterans Administration (VA). Current regulations state that such a person is disenrolled from VEAP on the date the VA receives his or her request for a refund. Hence, he or she has lost eligibility by the time of receipt of the refund check. This amendment is the result of many attempts by veterans to return their refund checks, and will result in the VA's treating these veterans in a manner similar to veterans in other programs administered by the VA.

Besides this substantive proposal the VA is also proposing several technical amendments which are necessary to correct erroneous cross-references.

**DATES:** Comments must be received on or before June 15, 1987.

**ADDRESSES:** Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC

20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 132 of the above address between the hours of 8 a.m. to 4:30 p.m., Monday through Friday (except holidays) until June 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** June C. Schaeffer, Assistant Director for Education Policy and Program Administration, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, (202) 233-2092.

**SUPPLEMENTARY INFORMATION:** The VA is proposing an amendment to 38 CFR 21.5052 to make clear that the VA does not consider the return of a check representing a refund of contributions to the VEAP fund to be a contribution to the fund. Section 21.5062 is amended to state that a participant in VEAP is disenrolled on the date the participant negotiates a refund check. In addition, there are several amendments designed to correct erroneous cross-references. These are not substantive, but are technical only.

The VA has determined that these proposed regulatory amendments do not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The proposed regulatory amendments will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans Affairs and the Secretary of Defense have certified that these proposed regulatory amendments, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the amended regulations therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the proposed regulatory amendments affect only individuals. They will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

(The Catalog of Federal Domestic Assistance number for the program affected by these proposed regulatory amendments is 64.120.)

**Thomas K. Turnage**

Approved: March 9, 1987.

**A. Lukeman,**

*Deputy Assistant Secretary of Defense.*

**PART 21—[AMENDED]**

38 CFR Part 21, Vocational Rehabilitation and Education, is proposed to be amended as follows:

1. In § 21.5001, paragraph (c) is revised to read as follows:

**§ 21.5001 Administration of benefits program; Chapter 32.**

* * * * *

(c) Section 21.4003—(except paragraphs (d) and (e)—Revision of Decisions. (38 U.S.C. 1641)

* * * * *

2. In § 21.5052, parargaph (e) is revised to read as follows:

**§ 21.5052 Contribution requirements.**

* * * * *

(e) *Prohibition against contributing.* An individual may not make contributions to the fund after the date of his or her discharge. The Veterans Administration does not consider the return of an unnegotiated refund check to be a contribution. (39 U.S.C. 1622; Pub. L. 94–502)

* * * * *

3. In § 21.5062, paragraph (b) is revised to read as follows:

**§ 21.5062 Date of disenrollment.**

* * * * *

(b) The date of the individual negotiates the check which represents a refund of his or her remaining contributions to the fund, whichever is earlier. (38 U.S.C. 1621(d); Pub. L. 94–502)

4. In § 21.5130, paragraphs (a), (b), and (d) are revised and paragraph (h) added to read as follows:

**§ 21.5130 Payments—educational assistance allowance.**

(a) Section 21.4131 (except pars. (c)(3), (e), and (h))—Commencing dates.

(b) Section 21.4133–Notification of suspension or discontiunuance (38 U.S.C. 1641)

* * * * *

(d) Section 21.4135 (except pars. (b), (c), (d), (m), (o), and (v))—Discontinuance dates. (38 U.S.C. 1641)

* * * * *

(h) Section 21.4136(k) (except supar. (3))—Mitigating circumstances. (38 U.S.C. 1641, 1780(a))

5. In § 21.5131, the introductory text is revised to read as follows:

**§ 21.5131 Educational assistance allowance.**

The VA will pay educational assistance allowance at the rate specified in §§ 21.5136 and 21.5138 while the individual is pursuing a course of education. The VA will make no payment for training in any course if the training is not part of the veteran's program of education. The VA may withhold final payment until it receives proof of the individual's continued enrollment and adjusts the individual's account. (38 U.S.C. 1641; Pub. L. 94–502)

[FR Doc. 87–11089 Filed 5–14–87; 8:45 am]

BILLING CODE 8320-01-M

**VETERANS ADMINISTRATION**

**38 CFR Part 21**

**Veterans Education; Nonpunitive Grades**

**AGENCY:** Veterans Administration.

**ACTION:** Proposed regulations.

**SUMMARY:** A veteran's award of educational assistance allowance must be reduced when he or she withdraws from a course or when he or she receives a nonpunitive grade for a course. Regulations exist for determining the effective date of the reduction. Some readers of the regulations have been uncertain as to which of the pertinent regulations apply when a veteran withdraws from a course and, as a result of that withdrawal, receive a nonpunitive grade for it. This proposal eliminates this problem. It addresses this situation by expanding the regulation which deals with the effective date of reduction and termination of educational assistance allowance.

**DATE:** Comments must be received on or before June 15, 1987.

**ADDRESS:** Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 132 of the above address, between the hours of 8 a.m. to 4:30 p.m., Monday

through Friday (except holidays) until June 29, 1987.

**FOR FURTHER INFORMATION CONTACT:** June C. Schaeffer, Assistant Director for Education Policy and Program Administration, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, (202) 233–2092.

**SUPPLEMENTARY INFORMATION:** The VA is proposing to amend 38 CFR 21.4135. As proposed, the paragraphs dealing with termination or reduction of a veteran's award of educational assistance allowance due to withdrawal from one or more courses now recognize that a veteran can receive a nonpunitive grade as a result of withdrawing from a course.

The VA has determined that this amended regulation does not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulation will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator or Veterans Affairs has certified that this amended regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the amended regulation, therefore, is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the regulation affects only individuals. It will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

(The Catalog of Federal Domestic Assistance number for the program affected by this regulation is 64.111)

**List of Subjects in 38 CFR Part 21**

Civil rights, Claims, Education, Grant programs-education, Loan programs-education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: March 5, 1987.
Thomas K. Turnage,
*Administrator.*

**PART 21—[AMENDED]**

In 38 CFR Part 21, *Vocational Rehabilitation and Education*, § 21.4135 is proposed to be amended by revising paragraphs (e)(1), (s), and (w) to read as follows:

**§ 21.4135 Discontinuance dates.**

* * * * *

(e) *Course discontinued; course interrupted; course terminated; course not satisfactorily completed or withdrawn from §§ 21.4136 and 21.4137.* (1) If the individual withdraws from all courses; received all nonpunitive grades; and there are no mitigating circumstances as provided in §§ 21.4136(k) or 21.4137(h), the VA will terminate the individual's education assistance allowance effective the latter of the following:

(i) The first date of the term in which the withdrawal occurs, or

(ii) December 1, 1976.

* * * * *

(s) *Reduction in rate of pursuit of course (§ 21.4270).* (1) The VA will reduce an individual's educational assistance allowance effective the first date of the term in which the individual reduces training by withdrawing from part of a course, if the reduction occurs at the beginning of the term.

(2) The VA will reduce an individual's educational assistance allowance effective the earlier of the end of the month or end of the term in which an individual reduces training by withdrawing from part of a course when—

(i) The reduction does not occur at the beginning of the term; and

(ii) There are mitigating circumstances, or the individual receives a punitive grade for the portion of the course from which he or she withdraws.

(3) If the individual reduces training by withdrawing from a part of a course; there are no mitigating circumstances; and the individual receives a nonpunitive grade form that portion of the course from which he or she withdrew; the VA will reduce the individual's educational assistance allowance effective the later of the following:

(i) The first date of enrollment of the term in which the reduction occurs; or

(ii) December 1, 1976. See paragraphs (e) and (w) of this section also.

(4) An individual, who enrolls in several subjects and reduces his or her rate of pursuit by completing one or more of them while continuing training in others, may receive an interval payment based on the subjects completed, if the requirements of § 21.4136(f) are met. If those requirements are not met, the VA will reduce the individual's educational assistance allowance effective the date the subject or subjects were completed.

(38 U.S.C. 1780; Pub. L. 98–406)

* * * * *

(w) *Nonpunitive grade assigned without a withdrawal from courses.* (1) If an individual receives a nonpunitive grade for a particular course for any reason other than a withdrawal from it, the VA will reduce the individual's educational assistance allowance effective the last date attendance when mitigating circumstances are found.

(2) If an individual receives a nonpunitive grade in a particular course for any reason other than a withdrawal from it, and there are no mitigating circumstances, the VA will reduce his or her educational assistance effective the later of the following:

(i) The first date of enrollment for the term in which the grade applies, or

(ii) December 1, 1976. See paragraphs (e) and (s) of this section. (38 U.S.C. 1780(a)(4)

BILLING CODE 8320-01-M

---

**38 CFR Part 36**

**Loan Guaranty; Proposed Decrease in Amount of Time VA Will Allow Loan Holder To Begin Terminating Defaulted Loans**

**AGENCY:** Veterans Administration.

**ACTION:** Proposed regulatory amendment.

**SUMMARY:** The Veterans Administration (VA) is proposing to amend its loan guaranty regulations (38 CFR Part 36) by decreasing from two months to thirty days the amount of time the VA will allow a loan holder to begin termination proceedings on a defaulted VA-guaranteed home loan when imposing a cutoff date. Interest on, and charges to, the loan after the cutoff date may not be included in the computation of the guaranty claim. Reducing the time allowed to begin proceedings will facilitate the termination of defaulted loans and consequently reduce the average dollar amount per claim paid by the Administrator of Veterans Affairs. It will also reduce veterans debts to the VA resulting from the claims.

**DATES:** Comments must be received on or before June 15, 1987. The VA proposes to make this regulatory amendment effective 30 days after publication of the final regulations.

**ADDRESSES:** Interested persons are invited to submit written comments, suggestions, or objections regarding this proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NE., Washington, DC 20420. All written comments received will be available for public inspection in the Veterans Service Unit, room 132 of the above address, between the hours of 8:00 a.m.and 4:30 p.m., Monday through Friday (except holidays) until June 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mr. Raymond L. Brodie, Assistant Director for Loan Management (261), Loan Guaranty Service, Department of Veterans Benefits, (202) 233–3668.

**SUPPLEMENTARY INFORMATION:** When a VA-guaranteed loan is in default both the holder of the loan and the VA have servicing responsibilities. Efforts are made to work with the veteran-borrower to bring the loan current and to prevent foreclosure. However in some instances, even after extensive servicing efforts loan defaults are insoluble, and the loan must be foreclosed. VA may incur liability to pay a claim under guaranty in such cases. Section 36.4319(f) of title 38, Code of Federal Regulations, allows the Administrator to set a limit on the time span for which the VA will pay accrued interest and other charges in a claim, when the loan holder fails to begin or complete termination of the loan in a timely manner. The regulation states that in such cases the Administrator must request in writing that the holder take appropriate action to begin or prosecute termination action. The regulation further allows the holder up to two months from the date of request to begin termination proceedings.

During much of the existence of the Loan Guaranty Program this two month allowance had only a minor impact on the dollar amount of claims eventually paid by the VA. However, with the substantial increase in property values and loan amounts between 1975 and 1980, and with the increase in interest rates on loans closed between 1980 and 1985, the costs associated with delay in foreclosure have risen considerably. The purpose of the proposed amendment is to lower these costs by reducing from two months to 30 days the time the loan holder is allowed to begin terminating the loan. The proposed amendment will also reduce veterans debts to the VA which result from claims paid by the VA to the loan holders on the defaulted loan. Holder compliance should not present any difficulty, since 30 days allows reasonable time for normal preparations to begin termination.

The Administrator hereby certifies that this proposed regulatory amendment will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601 through 612. The provision concerning the amount of time the VA will allow a loan holder to begin termination proceedings will affect guaranty claims only in those cases in which the loan holder fails to take timely action to terminate loans when defaults have become insoluble. When a default is insoluble, and there is no reasonable alternative to foreclosure, prudent loan servicing practice dictates that action be taken to terminate the loan without delay. The loan holder is responsible for foreclosure and is able to avoid unnecessary delays. In addition, only a relatively small percentage of VA-guaranteed loans are held by small entities. For these reasons, this proposed regulatory amendment will not significantly affect small entites. Pursuant to 5 U.S.C. 605(b), this proposed regulatory amendment is exempt from the initial and final regulatory flexibility analysis requirement of sections 603 and 604.

The Administrator has also determined that this proposed regulatory amendment is not a "major rule" within the meaning of Executive Order 12291. It will not have an annual effect on the economy of $100 million or more, and will not cause a major increase in costs or prices for consumers or individual industries; nor will it have other significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance Program Numbers are 64.114 and 64.119.

**List of Subjects in 38 CFR Part 36**

Condominiums, Handicapped, Housing loan programs—housing and community development, Manufactured homes, Veterans.

This proposed regulatory amendment is proposed under the authority granted the Administrator by sections 210(c), 1816(c)(1)(D), and 1820 of title 38, United States Code.

Approved: April 21, 1987.

**Thomas K. Turnage,**

*Administrator.*

38 CFR Part 36, *Loan Guaranty*, is proposed to be amended as follows:

**PART 36—[AMENDED]**

1. The authority citation for §§ 36.4300 through 36.4375 continues to read:

**Authority:** Section 36.3400 through 36.4375 insured under 72 stat. 1114 (38 U.S.C. 210)

2. In § 36.4319, the first sentence of paragraph (f) is revised to read as follows:

**§ 36.4319 Legal proceedings.**

* * * * * *

(f) If following a default the holder does not begin appropriate action within 30 days after requested in writing by the Administrator to do so, or does not prosecute such action with reasonable diligence, the Administrator may at his option intervene in, or begin and prosecute to completion any action or proceeding, in his name or in the name of the holder, which the Administrator deems necessary or appropriate, and may fix a date beyond which no further charges may be included in the computation of the guaranty claim or an insured loss. * * *

**FOR FURTHER INFORMATION CONTACT:** Julie A. Rose, State Implementation Plan Section (A–2–3), Air Programs Branch, Air Management Division, Environmental Protection Agency, Region 9, 215 Fremont Street, San Francisco, CA 94105 (415) 974–8066, (FTS) 454–8066.

**SUPPLEMENTARY INFORMATION:**

## Background

On February 6, 1985 and April 12, 1985, the State of California submitted two revisions to its SIP. These revisions consist of new or amended control regulations for volatile organic compounds (VOC) nitrogen oxides (NOx) and sulfur oxides (SOx). A brief description of each of the regulations by submittal date and district is provided below. The affected pollutant is also identified for each rule. EPA's evaluations and proposed action follow the description of the regulations.

## Description of Regulations

## EPA's Evaluation

EPA has evaluated the above rules for consistency with the Clean Air Act, EPA policy and 40 CFR Part 51. The Clean Air Act requires that areas which have not attained the National Ambient Air Quality Standards (NAAQS) adopt, at a minimum, reasonably available control technology (RACT) for all significant sources of emissions.

EPA has established RACT for several VOC categories through the issuance of Control Techniques Guidelines (CTGs). Areas which have not attained the NAAQS for ozone must, if there are sources within the district, implement control measures (rules) for those source categories which require RACT-level control at a minimum. Implementation of such rules satisfies the requirements of the Clean Air Act, 40 CFR Part 51 and EPA policy.

The following rules have been evaluated by EPA and have been preliminarily found to satisy the requirements of the CTGs: Sacramento County Rule 447, South Coast Rules 1108 and 1128, Bay Area AQMD Regulation 8, Rule 14, San Diego Rule 67.3, and Stanislaus Rule 409.4.

Yolo-Solano APCD submitted only subparagraphs (7)(a) and (7)(b) of paragraph (a) of Rule 2.21. EPA has evaluated these subparagraphs and has found them to be approvable, as they meet the requirements of the Clean Air Act, 40 CFR 51 and EPA policy and they strengthen the SIP. The existing federally-approved version of Rule 2.21 contains only paragraphs 1 through 5. Paragraph 6 has never been submitted to EPA as a SIP revision and is not a part of the SIP. In its enforcement actions, EPA may enforce only those portions of the rule which have been approved by EPA, in this case, paragraphs 1 through 5 and paragraph 7.

San Diego County APCD Rule 67.10 has been evaluated for consistency with CAA requirements, EPA policy and 40 CFR Part 51.

There is no corresponding CTG documents for this rule. Rule 67.10 was found to satisfy Clean Air Act requirements, EPA policy, is consistent with 40 CFR Part 51 and strengthens the SIP.

South Coast Rule 1105, Fluid Catalytic Cracking Units has been evaluated and found to be approvable. The only change to the rule consists of a 6-month delay in an interim compliance date. The revision does not change the final compliance date nor does it change the sulfur dioxide emission limitation.

The following rules were found to strengthen the SIP, and are necessary for attainment and maintenance of the NAAQS: South Coast Rules 1110.1 and 1117, and Kern County APCD Rules 411.1 and 414.5.

## EPA Proposed Action

EPA proposes to approve these rules under Section 110 of the Clean Air Act because they satisfy the requirements of the Clean Air Act, 40 CFR 51 and EPA policy, and/or they strengthen the SIP. EPA is not at this time taking action under Part D until we more fully evaluate the rules in relation to EPA's RACT requirements.

## Regulatory Process

Under 5 U.S.C. Section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (see 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

## List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Hydrocarbons, Intergovernmental relations, Reporting and recordkeeping requirements.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[AA-850-85-4121-2410]

### 43 CFR Parts 3420 and 3450

### Competitive Leasing and Environment; Amendments to the Federal Coal Management Program

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Proposed rulemaking.

**SUMMARY:** This proposed rulemaking would clarify or modify those sections of the Federal coal management program regulations related to the 20 different coal unsuitability criteria and their application during the Bureau of Land Management's land use planning process. The proposed changes arise from the Office of Technology Assessment's study of the Federal coal management program's treatment of environmental issues, and from the Secretary of the Interior's decisions of February 1986 on the Federal coal leasing program.

**DATE:** Comments should be submitted by June 15, 1987. Comments postmarked or received after the above date may not be considered in the decisionmaking process on the issuance of a final rulemaking.

**ADDRESS:** Comments should be sent to: Director (140), Bureau of Land Management, Room 5555, Main Interior Building, 1800 C Street NW., Washington, DC 20240.

Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

**FOR FURTHER INFORMATION CONTACT:** Carole Smith, (202) 343-6821, or Robert C. Bruce, (202) 343-8735.

**SUPPLEMENTARY INFORMATION:** As part of Department of the Interior Fiscal Year 1984 Appropriations Act (Pub. L. 98-63), the Congress directed the Office of Technology Assessment to assess whether the Federal coal management pogramn was ensuring the development of coal leases in an environmentally compatible manner. Among the issues studied and discussed in the resulting report, *Environmental Protection in the Federal Coal Leasing Program* (May 1984), was the Department of the Interior's application of the 20 coal unsuitability criteria during the land use planning process.

The Secretary of the Interior responded to the Office of Technology Assessment report on July 9, 1984, in a document entitled *Review of Planning Considerations in Federal Coal Leasing.* As part of that response, he directed the Bureau of Land Management to study the effects of the regulation changes made in 1982 and 1983 on the coal unsuitability criteria. The Bureau expanded the Secretary's directive to include an evaluation of the application of the criteria and a determination of the results. The resulting document, *A Review of the Unsuitability Criteria In Federal Coal Leasing* (March, 1985), was published for public comment and appeared in the February 1985 Draft Environmental Impact Statement to the 1979 Federal coal management program.

The final document included responses to the comments received and appeared as Appendix I in the Supplement to the Final Environmental Impact Statement to the Federal Coal Management Program in October 1985.

Based on the Environmental Impact Statement and the Secretarial Issue Document of January 1986, the Secretary of the Interior on February 21, 1986, made his decisions on 11 program-related issues, one of which is the subject of this proposed rulemaking. The Secretary also concurred on a number of other program issues, some of them related to the unsuitability criteria and their application during land use planning. This proposed rulemaking incorporates these Secretarial concurrences and responds to proposals made by the task force on unsuitability criteria that prepared the unsuitability report.

This proposed rulemaking would amend §§ 3420.1-4(c) and 3420.1-6 to implement the Secretary of the Interior's decision on issue 3 of the Secretarial Issue Document. The Secretary decided that no new unsuitability criteria would be promulgated through the rulemaking process. Instead, the existing regulations would be revised to specify that such items as wetlands, riparian habitat, sole-source aquifers, reclaimability of lands, and lands adjacent to Class I air quality areas or to units of the National Park System would receive increased emphasis during the multiple use assessment screen of land use planning. (For a description of the coal screens and the land use planning process, see Chapter 2 of the Final Environmental Impact Statement Supplement to the Federal Coal Management Program.) This proposed rulemaking also would provide a stronger consultation process with other affected surface management agencies by requiring a joint determination during land use planning by the Bureau of Land Management and the other surface management agency(s) that the purposes and values of the other agency(s) are considered. Further, as part of this new consultation process, the final land use plan would identify the types of mitigation that might be required if the lands were found eligible for further consideration for coal leasing. This consultation process has already been established through a memorandum of understanding between the Bureau and the National Park Service. The public is requested to consider and comment on the question of whether the planning and program coordination provided in this proposed rulemaking could be implemented through a series of memoranda of understandings similar to that entered into by the Bureau and the Park Service. Copies of the memorandum discussed herein can be obtained by contacting the Washington Office of the Bureau.

The proposed rulemaking would modify § 3420.1-4(c)(3) of the existing regulations by adding additional items to be given increased emphasis during the multiple use assessment screen of land use planning. Section 3420.1-6 of the existing regulations would be amended to add a provision that the Bureau of Land Management and the other surface management agency(s) whose lands might be adversely affected by coal-related land use planning decisions must jointly determine that the Bureau's lands are acceptable for further consideration for Federal coal leasing.

The recommendations of the unsuitability criteria task force appear beginning on page III-33 of Appendix III of the Secretarial Issue Document. The recommendations are discussed later in this preamble in the order in which they appear in Appendix III. The first task force recommendation requiring an amendment to the existing regulations would be a reformatting of the existing unsuitability criteria regulations concerning application procedures as set out in §§ 3461.2 through 3461.5. The proposed reformatting would consolidate the procedural requirements found in those sections and move them to § 3420.1-4, which sets forth the general requirements for land use planning. This change should simplify the regulations by putting in one place all requirements for applying the four screens, one of which is the unsuitability criteria. However, this proposed rulemaking modifies the proposed reformatting. An effort to consolidate all

of the procedural requirements set forth in subpart 3461 into § 3420.1–4 resulted in an unwieldy text which unbalanced the paragraphs in the sections describing the other three coal screens, i.e., development potential, multiple use assessment, and surface owner consultation. The rewrite discussed above and the problems encountered resulted in the proposed rulemaking making changes based on an earlier task force recommendation, found in the review report but not in Appendix III. The recommendation was that the sections within subpart 3461 be reversed so that the procedures for applying the unsuitability criteria, now found at §§ 3461.2 through 3461.5, would appear in §§ 3461.1 through 3461.4, and the list of criteria, now found in § 3461.1 would be moved to § 3461.5.

The second task force recommendation is to define certain terms used within specific unsuitability criteria, i.e., "municipal watershed," "occupied dwelling," "church," "gravesite," "cultural property," and "cultural resource." The change was recommended by the task force because it wanted to assure consistency with the terms as they are defined in the regulations of the Office of Surface Mining Reclamation and Enforcement. Definitions for the terms "occupied dwelling" and "cemetery" are found in the Office of Surface Mining regulations at 30 CFR Chapter VII. The term "church" is covered in the Office of Surface Mining regulations under the definition of the term "community or institutional buildings." The other terms listed by the task force are not defined in the Office of Surface Mining regulations. The following terms recommended for definition are not used in any of the 20 coal unsuitability criteria: "cultural property," "cultural resource" and "gravesite." Because these terms are not used in any specific criterion, there is no need to include definitions of the terms in this proposed rulemaking. Criterion 17, in which the term "municipal watershed" is used, does not require a definition of that term since a "municipal watershed" is established when the surface management agency commits the lands for that purpose.

This proposed rulemaking would define only those terms found in the regulations of the Office of Surface Mining Reclamation and Enforcement by reference to those regulations within the specific criterion concerning the defined term. Detail as to how each unsuitability criterion is to be applied will be set out in manuals and handbooks.

A third task force recommendation was that the Bureau of Land Management should clarify several aspects of the existing coal management regulations as they relate to the application of any unsuitability criteria which are deferred during land use planning. One recommendation was to specify at what point in activity planning (either regional activity planning or lease-by-application activity planning) the deferred unsuitability criterion must be applied or the lands affected by the criterion dropped from further consideration for coal leasing. This proposed rulemaking would amend § 3461.3–1(b)(1) by adding a sentence providing that the application of Criterion 19 (alluvial valley floors) may be deferred until approval of the mining permit. The proposed rulemaking would require that any other unsuitability criteria deferred during land use planning be applied before the environmental analysis is completed for the lands being studied for possible Federal coal leasing.

The task force also recommended that § 3461.3–1(b)(1) be amended to require a public comment period on the application of any unsuitability criterion previously deferred during land use planning. This recommendation has been adopted by the proposed rulemaking by adding language at the end of the section specifying such a public comment period.

The task force recommended that the reference to the plan maintenance provisions at the end of § 3461.3–1(c) be deleted. Plan maintenance is discussed in § 1610.5–4 of the planning regulations, and its inclusion in these regulations was considered by the task force to be redundant. This proposed rulemaking would not change the existing language. While the retention of the language of § 3461.3–1(c) of the existing regulations may appear to be duplicative of the language in the Bureau of Land Management's land use planning regulations, the language serves a useful purpose by placing the public on notice that certain changes in unsuitability designations are considered plan maintenance activities.

All of the remaining task force recommendations concerned modifications of specific unsuitability criteria. The task force suggested that Criterion 2, Federal lands within rights-of-way or easements or within surface leases for commercial, industrial or other public purposes, be modified to add an exception. The exception would clarify that rights-of-way or easements granted after approval of the land use plan would be subject to being moved if the subsurface coal were later leased and mined. The proposed rulemaking has adopted this suggestion and would amend the exception at Criterion 2 in § 3461.1(b)(1) to make the suggested change.

The task force suggested that criteria 2 and 3 be rewritten so that only one of them addresses rights-of-way and easements, including public roads, and the other one addresses public buildings, cemeteries, churches and commercial, industrial and residential land uses and their associated buffers. According to the task force, the primary confusion in applying the two criteria comes from the fact that public roads are discussed in both of them.

A review of criteria 2 and 3 shows that the primary difference between them is not the subject matter of each of them, but whether the rights-of-way or easements are located on private or Federal lands. Criterion 2 concerns only those rights-of-way, easements or surface leases on Federal (public) lands. Criterion 3 concerns public roads, cemeteries, public buildings, churches and commerical, industrial and residential land use on all lands, whether public or private. In other words, Criterion 3 concerns the mandatory, nondiscretionary, unsuitability criteria listed in section 522(e) of the Surface Mining Control and Reclamation Act of 1977. As a result of the review of these two criteria, the proposed rulemaking has not adopted this recommendation.

The task force recommended that Criterion 5, Federal lands designated as Class I scenic areas, be rearranged so that the exception, which now appears as the second sentence in the description of the criterion, be moved so that it would appear in a separate entry as an exception to Criterion 5. The proposed rulemaking has adopted this recommendation and would make a change to § 3461.1(3)(1) of the existing regulations.

Another recommendation of the task force dealt with Criterion 7, which concerns publicly owned sites listed on the National Register of Historic Places, and suggested that the existing regulations be changed to include privately owned National Register sites. Criterion 7 was changed in December 1983 to be consistent with the Office of Surface Mining Reclamation and Enforcement regulations, which had been changed to specifically exclude privately owned sites. The Office of Surface Mining published a final rulemaking in the **Federal Register** of February 11, 1987 (52 FR 4244), that modifies its existing regulations to

exclude mining operations from the vicinity of National Register sites whether on public or private lands. This change resulted from an opinion of the United States District Court for the District of Columbia and from a petition for rulemaking filed by the Society of Professional Archeologists. Because the basis for the Bureau's existing provisions for Criterion 7 was for consistency with the regulations of the Office of Surface Mining, the proposed rulemaking would change the provisions of Criterion 7 to conform them to the final rulemaking issued by the Office of Surface Mining.

Another unsuitability task force recommendation is that Criterion 8 be modified by deleting Exception 1 as it appears in § 3461.1(h)(2) of the existing regulations. That exception allows "an area or site of regional or local significance only" to be further considered for surface coal mining operations with State concurrence. The task force concluded that the exception did not make any sense in its present form because a "national" site of regional or local significance only is difficult to envision. A review of the July 1979 Federal coal management regulations shows that this particular exception was placed in the regulations subject to its proving to be useful as part of the land use planning process (See A. Unsuitability Criteria, p. 46, and B. Issue Paper 1, Land Unsuitability Criteria, Volume 1 of the Secretarial Issue Document on the July 1979 Federal Coal Management Program). The task force concluded that in practice, those attempting to apply the criterion found it confusing and unusable. Therefore, the proposed rulemaking adopts the recommendation of the task force and deletes the exception.

The task force recommended that Criterion 9 be modified in two ways. Criterion 9 concerns Federal designated critical habitat and habitat determined by the Fish and Wildlife Service to be of essential value for threatened and endangered species. The task force recommended that the criterion be modified to include proposed threatened and endangered species and proposed critical habitat for these proposed species. The task force made these two recommendations after concluding that existing procedures are perceived as providing inadequate protection for proposed threatened and endangered species and their habitat. The task force could not find any specific examples, however, of any proposed threatened and endangered species being inadequately protected under existing procedure.

When the Fish and Wildlife Service proposes a species for listing as threatened and endangered, it must have evidence demonstrating the necessity for protecting that species under the Endangered Species Act. Section 7(a)(4) of that Act requires all Federal agencies, including the Bureau of Land Management, to confer with the Secretary of the Interior on any action likely to jeopardize the continued existence of any species proposed for listing as threatened and endangered. The Bureau currently confers with the Fish and Wildlife Service, the agency designated by the Secretary to carry out his/her responsibility under the Endangered Species Act, as part of the multiple use assessment screen during land use planning. In this screen, the proposed threatened and endangered species compete with other high priority species for protection, even though the Bureau has a responsibility to ensure the recovery of a species once it has been proposed for listing by the Fish and Wildlife Service. The result has been that treatment of proposed threatened and endangered species has been discretionary with the general management objectives established for individual species. The recommendation for treatment of proposed threatened and endangered species in the existing regulations was designed to achieve consistency of treatment for proposed species. This proposed rulemaking has adopted the recommendation of the task force on this point and would modify Criterion 9 in § 3461.1(i) to include proposed threatened and endangered species and their proposed critical habitat as unsuitable for further consideration for surface coal mining operations.

Criterion 15 as it appears in the existing regulations was the subject of two recommendations of the task force. Criterion 15 deals with Federal lands that are fish and wildlife habitat for resident species of high interest to the State and that are essential for maintaining these high priority wildlife species. The task force recommended that the criterion be amended to include protection for sensitive plants, and that the phrase "most critical" found in § 3461.1(o)(1)(ii) be changed to "crucial" to avoid confusion with the terminology used in connection with threatened and endangered species. The proposed rulemaking has adopted these recommended changes. Criterion 15 in its existing form covers game species of interest to a State because of the revenues generated from hunting licenses issued by the States for those species. Introducing sensitive plants into the criterion would change the criterion from what was originally intended and mix purposes. There is, however, no existing criterion for considering sensitive, that is, high interest, plants in the existing regulations. While the proposed rulemaking would include sensitive plants in Criterion 15, the public is specifically asked to comment on where, in the unsuitability criteria, to include a provision covering sensitive plants, as well as any nonregulatory process that might be used for ensuring that sensitive plants are given adequate consideration in coal land use planning.

A final task force recommendation was that Criterion 20 as it appears in § 3461.1(t)(1) of the existing regulations be expanded to allow Indian tribes, as well as State Governors, to recommend new unsuitability criteria to the Secretary of the Interior. The task force was of the view that this change to Criterion 20 would facilitate coordination with Indian tribes during land use planning. The proposed rulemaking has adopted this recommendation and would amend the existing regulations to allow Indian tribes to recommend specific unsuitability criteria to the Secretary, who would review the recommendation and either adopt it or not adopt it.

This proposed rulemaking also would make one change recommended by the task force report, but not found in Appendix H1 to the Secretarial Issue Document. The language contained in the exemption to Criterion 1 which refers to lands proposed for inclusion in the various land systems would be deleted. This language was inadvertently retained when Criterion 1 was changed in July 1982 to conform to the court decision in *Texaco and NCA v. Andrus*.

The principal author of this proposed rulemaking is Carole Smith, Division of Solid Mineral Leasing, Bureau of Land Management, assisted by the staff of the Division of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

BEST COPY AVAILABLE

The changes made by this proposed rulemaking may affect the acreage that the United States may ultimately offer for coal lease sale. However, the effect of the proposed changes on small entities will be no greater and no less than their effect on all other classes of potential lessees.

The information collection requirements for Group 3400 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned approval number 1004—0073.

*43 CFR Part 3460*

Coal, Environmental protection, Government contracts, Mines, Public lands—mineral resources.

Under the authority of the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands, as amended (30 U.S.C. 351—359), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), the Surface Mining Control and Reclamation Act (30 U.S.C. 1201 et seq.), the Multiple Mineral Development Act (30 U.S.C. 521—531), the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), the Federal Coal Leasing Amendments Act, as amended (90 Stat. 1083—1092) and the Act of October 30, 1978 (92 Stat. 2073—2075), is is proposed to amend Parts 3420 and 3460, Group 3400, Subchapter C, Chapter II of Title 43 of the Code of Federal Reguations as set forth below:

**PART 3420—[AMENDED]**

1. The authority citation for part 3420 continues to read:

Authority: 30 U.S.C. 181 et seq., 30 U.S.C. 351–359; 30 U.S.C. 521–531; 30 U.S.C. 1201 et seq.; 42 U.S.C. 1701 et seq.; 43 U.S.C. 1701 et seq.; 15 U.S.C. 631–644.

**§ 3420.1–4 [Amended]**

2. Section 3420.1–4(e) is amended by revising paragraph (3) to read:

"(3) Multiple land use decisions shall be made which may eliminate additional coal deposits from further consideration for leasing to protect other resource values and land uses that are locally, regionally or nationally important or unique and that are not included in the unsuitability criteria discussed in paragraph (e) of this section. Such values and uses include, but are not limited to, those identified in section 522(a)(3) of the Surface Mining Reclamation and Control Act of 1977 and as defined in 30 CFR 762.5. In making these multiple use decisions, the Bureau of Land Management or the surface management agency conducting the land use planning shall place particular emphasis on protecting the following: air and water quality; wetlands, riparian areas and sole-source aquifers; the Federal lands which, if leased, would adversely impact units of the National Park System, the National Wildlife Refuge System, the National System of Trails, and the National Wild and Scenic Rivers System."

3. Section 3420.1–6 is revised to read:

**§ 3420.1–6 Consultation with Federal surface management agencies.**

Where a Federal surface management agency other than the Bureau of Land Management administers limited areas overlying Federal coal within the boundaries of a comprehensive land use plan or land use analysis being prepared by the Bureau of Land Management, or where the Bureau of Land Management manages lands on which coal development may impact land units of other Federal agencies, the Bureau of Land Management shall consult with the other agency to jointly determine the acceptability for further consideration for leasing of the potentially impacted lands the other agency administers or lands managed by the Bureau of Land Management that may impact lands of another agency.

**PART 3460—[AMENDED]**

4. The authority citation for part 3460 continues to read:

Authority: 30 U.S.C. 181 et seq.; 30 U.S.C. 351–359; 40 U.S.C. 521–531; 30 U.S.C. 1201 et seq.; 43 U.S.C. 1701 et seq.; unless otherwise noted.

5. Sections 3461.2 through 3461.5 are renumbered §§ 3461.1 through 3461.4 and § 3461.1 is renumbered § 3461.5 and is amended by:

A. Amending paragraph (a)(3) by removing the last sentence of that paragraph in its entirety;

B. Amending paragraph (b)(2) by removing the period at the end of subparagraph (v) and replacing it with a semicolon and the word "or" and by adding a new subparagraph (vi) to read:

"(vi) The right-of-way or easement was granted after the approval of the land use plan in which case the right-of-way or easement would be subject to being moved, if the lands were later leased.";

C. Amending paragraph (c)(1) by adding immediately after the phrase *"Criterion Number 3."* the sentence "The terms used in this criterion have the meaning set out in the Office of Surface Mining Reclamation and Enforcement regulations at Chapter VII of Title 30 of the Code of Federal Regulations.";

D. Revising paragraph (e) to read:

"(e)(1) *Criterion Number 5.* Scenic Federal lands designated by visual resource management analysis as Class I (an areas of outstanding scenic quality or high visual sensitivity) but not currently on the National Register of Natural Landmarks shall be considered unsuitable.

(2) *Exception.* A lease may be issued if the surface management agency determines that surface coal mining operations will not significantly diminish or adversely affect the scenic quality of the designated area.

(3) *Exemptions.* This criterion does not apply to lands: to which the operator has made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977, or which include operations on which a permit has been issued."

E. Amending paragraph (g)(1) by removing from where it appears the phrase "All publicly owned places on Federal lands which are included" and replacing it with the phrase "All publicly or privately owned places which are included";

F. Amending paragraph (h)(2) by removing subparagraph (i) in its entirety and be renumbering subparagraphs (ii) and (iii) as subparagraphs (i) and (ii), respectively;

G. Amending paragraph (i)(1) by removing from where it appears the phrase "Federally designated critical habitat for threatened or endangered animal and plant species, and habitat" and replacing it with the phrase "Federally designated critical habitat for listed threatened or endangered plant and animal species, and habitat proposed to be designated as critical for listed threated or endangered plant and animal species or species proposed for listing, and habitat";

H. Revising paragraph (o)(1) to read:

"(o)(1) *Criteron Number 15.* Federal lands which the surface management agency and the state jointly agree are habitat for resident species of fish, wildlife and plants of high interest to the state and which are essential for maintaining these priority wildlife and plant species shall be considered

unsuitable. Examples of such lands which serve a critical function for the species involved include:

(i) Active dancing and strutting grounds for sage grouse, sharp-tailed grouse, and prairie chicken;

"(ii) Winter ranges crucial for deer, antelope, and elk;

"(iii) Migration corridor for elk; and

"(iv) Extremes of range for plant species."; and

I. Amending paragraph (t) by:

(1) Revising subparagraph (1)(i) to read:

"(i) Proposed by the state or Indian tribe located in the planning area, and"; and

(2) Amending subparagraph (2)(ii) by removing from where is appears the phrase "the state, the surface management agency" and replacing it with the phrase "the state or affected Indian tribe, the surface management agency".

6. Section 3461.2–1(b)(1), formerly § 2461.3–1, is revised to read:

"(b)(1) The authorized officer shall make his/her assessment on the best available data that can be obtained given the time and resources available to prepare the plan. The comprehensive land use plan or land use analysis shall include an indication of the adequacy and reliability of the data involved. Where either a criterion or exception (when under paragraph (a) of this section the authorized officer decides that application of an exception is appropriate) cannot be applied during the land use planning process because of inadequate or unreliable data, the plan or analysis shall discuss the reasons therefor and disclose when the data needed to make an assessment with reasonable certainty would be generated. In the case of Criterion 19, application shall be made before approval of the mining permit. In the case of other deferred criteria, application shall be made prior to finalizing the environmental analysis for the area being studied for coal leasing. The authorized officer shall make every effort within the time and resources available to collect adequate and reliable data which would permit the application of Criterion 19 in the land use or activity planning process. When those data are obtained, the authorized officer shall make public his/her assessment on the application of the criterion or, if appropriate, the exception and the reasons therefor and allow opportunity for public comment on the adequacy of the application as required by paragraph (a)(2) of this section."

J. Steven Griles,

*Assistant Secretary of the Interior.*

March 6, 1987.

BILLING CODE 4310–84–M

## FEDERAL MARITIME COMMISSION

### 46 CFR Part 586

[Docket No. 87–6]

### Actions To Adjust or Meet Conditions Unfavorable to Shipping in the United States/Peru Trade

**AGENCY:** Federal Maritime Commission.

**ACTION:** Proposed Rule; Extension of Time to Comment.

**SUMMARY:** The Federal Maritime Commission is extending until July 3, 1987, the period of filing comments in this proceeding.

**DATES:** Comments due on or before July 3, 1987.

**ADDRESS:** Send Comments (Original and 15 copies) to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573 (202) 523–5725.

**FOR FURTHER INFORMATION CONTACT:** Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523–5740.

**SUPPLEMENTARY INFORMATION:** The Commission instituted this proceeding by Notice published in the **Federal Register** on April 13, 1987 ("April Notice") (52 FR 11832) to address apparent conditions unfavorable to shipping the United States-Peru trade ("the Trade") pursuant to section 19(1)(b) of the Merchant Marine Act, 1920 ("Section 19"), 46 U.S.C. app. 876. Comments on the proposed rule are presently due May 13, 1987. Three Peruvian-flag carriers, Compania Peruana de Vapores, Naviera Neptuno, S.A., and Emprea Naviera Santa, S.A., ("Petitioners") have now jointly filed a petition to extend the time for comments "until July 1, 1987, or a date not earlier than fourteen (14) days after the promulgation of regulations by the Government of Peru" to implement a Memorandum of Understanding ("MOU") reached between the Government of Peru and the Government of the United States on May 1, 1987. Petitioners contend that conditions in the Trade will be directly affected by the regulations issued pursuant to the MOU and, therefore, any comments submitted in this proceeding should consider and address the regulations and their effect on conditions in the Trade.

The MOU, which is attached to the Petition, states that Peruvian authorities will, upon application from third-flag vessel operators, grant renewable two-year authorizations for free access to the Trade. The MOU states further that consistent with the principle of reciprocity, these authorizations may be denied to third-flag vessel operators whose countries deny Peruvian operators access to their cross-trades. Finally, the MOU provides that within forty-five days of its signing on May 1, 1987, the Government of Peru will promulgate "pertinent regulations" pertaining to the access of third-flag vessels to the Trade.

The section 19 action proposed by the April Notice is intended to address apparent conditions unfavorable to shipping in the Trade resulting from burdens imposed by the Government of Peru on non-Peruvian-flag carriers, which burdens are not experienced by Peruvian-flag carriers. The MOU appears to be a significant development which may be expected to affect access of non-Peruvian-flag carriers to the Trade. For this reason, the Commission believes it appropriate to extend the time for comments on the proposed rule in order to obtain the views of interested parties on this recent development.

Therefore, the time within which interested parties may file comments in this proceeding is extended to July 3, 1987. In addition to the matters previously set forth in the April Notice, such comments may address the Memorandum of Understanding and any regulations promulgated by the Government of Peru pursuant thereto.

By the Commission.

Joseph C. Polking,

*Secretary.*

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 67

[CC Docket Nos. 78–72 and 80–286; FCC 87J–2]

### Common Carrier Services; Allocation of Costs Between the State and Interstate Jurisdictions

**AGENCY:** Federal Communications Commission; Federal-State Joint Board.

**ACTION:** Recommended Decision and Order.

**SUMMARY:** As a result of AT&Ts intention to assume the billing and collecting functions from the local exchange carriers, this action recommends changing the Allocation method for revenue Accounting Expenses.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Michael Wilson or Gary Seigel, Accounting and Audits Division, Common Carrier Bureau, (202) 632-7500.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Federal-State Joint Board's *Recommended Decision and Order*, MTS and WATS Market Structure, Amendment of Part 67 of the Commission's Rules and Establishment of a Joint Board, CC Docket Nos. 78-72 and 80-286, adopted March 12, 1987, released April 9, 1987. The full text of this *Recommended Decision and Order* is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text may also be purchased from the Commission's copy contractors, International Transcription Service. (202 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

**Summary of Recommended Decision and Order**

1. The American Telephone and Telegraph Company (AT&T) has stated its intention to discontinue subscribing to a portion of the interexchange billing and collecting services offered by the local exchange carriers (LECs). AT&T is currently the only interexchange carrier (IC) generating significant amounts of billing and collecting revenues for the LECs. The Federal-State Joint Board was concerned that this assumption of the billing and collecting function by AT&T might have an impact on the state and interestate revenue requirements for revenue accounting expense. Therefore, the Joint Board sought comment and data on proposed amendments to Part 67 of the Commission's rules to change the manner in which the revenue accounting expenses in Account 662, Accounting Department Expense, are separated between the state and interstate jurisdictions.[1]

2. After reviewing the comments and on further analysis, the Joint Board recommended that the revenue accounting expenses in Account 662, Accounting Department Expense, for each study area, be segregated into the following categories based on an analysis of job functions: (1) Message Processing Expense; (2) Other Billing and Collecting Expense; and (3) Carrier Access Charge Billing and Collecting Expense. The Joint Board recommended that the Message Processing Expense category be divided into Toll Ticket Processing Expense and Local Message Processing Expense based on the relative number of toll and local messages. Those expenses apportioned to the Toll Ticket Processing Expense subcategory would be allocated between the jurisdictions based on the relative number of state and interstate toll messages. This is the same separations procedure currently used for the uncombined categories of Local Message Processing Expense and Toll Message Processing Expense. The Joint Board suggested that the Other Billing and Collecting Expense category be allocated on the basis of the proportion of users billed for interstate services adjusted to reflect any reduction in the number of interstate users billed by the LECs as AT&T discontinues subscribing to the billing and collecting services offered by the LECs. The Joint Board's further suggested that, for LECs, the allocation to the interstate jurisdiction, for the Other Billing and Collecting Expense category, be limited to a maximum of 33 percent and a minimum of 5 percent. For the Carrier Access Charge Billing and Collecting Expense, the Joint Board recommended retention of the current procedures which assigns all such expense to the interstate jurisdiction if there are no state access charges assessed; if state access charges, other than subscriber line access charges, are assessed, one-half of such expense will be allocated to the interstate jurisdiction and one-half to the state jurisdiction.

3. The Joint Board found that the current procedures for the Message Processing Expense the Carrier Access Charge Billing and Collecting Expense categories provide sound allocation methods and do not require the carriers to conduct additional usage studies. Therefore, the Joint Board recommended the procedures for allocating these categories be left intact. The Joint Board recommended that the Other Billing and Collecting category be changed from the current procedures to allow jurisdictional separations to reflect any reduction in the number of interstate users billed by the LECs as AT&T discontinues subscribing to the billing and collecting services offered by the LECs. The Joint Board stated that assignment of the Other Billing and Collecting category should reflect the three basic services for which the LECs render bills: local, state toll and interstate toll. Therefore, the maximum interstate assignment would be 33 percent of total costs in the Other Billing and Collecting Expense category. As AT&T begins performing its own billing and collecting functions, the 33 percent assignment to the interstate jurisdiction would be adjusted accordingly. The Joint Board recommended a minimum 5 percent assignment of the Other Billing and Collecting Expense category to the interstate jurisdiction to reflect the LEC's cost of billing all users for the federal subscriber line charge. The Joint Board recommended that these new procedures become effective January 1, 1988.

Federal Communications Commission.

**47 CFR Part 80**

**[General Docket 79-144; FCC 87-64]**

## Protection From Potentially Hazardous Environmental Radiofrequency Radiation From Ship Earth Stations and Ship Radar Stations

**AGENCY:** Federal Communications Commission (FCC).

**ACTION:** Proposed rule.

**SUMMARY:** This item proposes to amend Part 80 of the Commission's Rules to establish rules for ship earth stations and ship radar stations to help prevent excessive human exposure to RF radiation from these facilities. This item follows the Commission's earlier *Report and Order* and *Further Notice of Proposed Rule Making* in this proceeding, and is a consequence of the Commission's responsibilities under the National Environmental Policy Act of 1969 to assess environmental impact of FCC-regulated facilities.

**DATES:** Comments are due on or before July 17, 1987, and Reply comments are due on or before August 17, 1987.

**ADDRESS:** Federal Communications Commission, 1919 M Street, NW, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Dr. Robert F. Cleveland, Office of Engineering and Technology, FCC, telephone (202) 653-8169.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's *Third Notice of Proposed Rule Making (NPRM)*, General Docket 79–144, FCC 87–64, Adopted February 12, 1987, and Released May 8, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

The collection of information requirement contained in this proposed rule has been submitted to OMB for review under Section 3504(h) of the Paperwork Reduction Act. Persons wishing to comment on this collection of information requirement should direct their comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for Federal Communications Commission.

**Summary of Third Notice of Proposed Rulemaking**

1. In the first *Report and Order* (50 FR 11151; 3/20/85) in this proceeding the Commission amended its rules in Part 1 implementing the National Environmental Policy Act of 1969 (NEPA). The amendment provided that potential human exposure to environmental RF radiation would be explicitly evaluated at the time of licensing or authorization of designated FCC-regulated services. At the same time, a *Further Notice of Proposed Rule Making* (50 FR 10814; 3/18/85) proposed that most other FCC-regulated services would be categorically excluded from such routine environmental evaluation.

2. In addition to our proposal for categorical exclusion, we also requested comment in the *Further Notice* on a second proposal to require environmental evaluation under Part 1 of the Rules for ship earth stations. This proposal was based on our tentative conclusion that these transmitters might cause excessive exposures to RF radiation. However, we concluded that additional information was needed before a final decision could be made.

3. The *Second Report and Order* in this docket (52 FR 13240; 4/22/87), adopted at the same time as this NPRM, amends Section 1.1307(b) of the FCC Rules and Regulations specifying that routine environmental evaluation, with regard to RF radiation exposure will only be required for services licensed or approved under the following Parts of the Rules: Part 5 (experimental radio), Part 25 (satellite communications), Part 73 (radio and television broadcast), Part 74, Subpart A (experimental broadcast), and Part 74, Subpart G (low power television). All other FCC-regulated services are categorically excluded from routine environmental evaluation for RF radiation outlined in Part 1.

6. We have now modified our original proposal concerning ship earth stations. Through this *NPRM*, we are proposing to amend Part 80 of the FCC Rules to add a requirement that both ship earth stations and ship radar stations not cause excessive exposure to RF radiation. We believe that these facilities could cause potentially hazardous environmental exposure to RF radiation. But we believe that it would be administratively impractical to require routine environmental evaluation of each and every application for these facilities at the time of licensing.

7. By amending Part 80 we would be satisfying the Commission's obligation under NEPA to ensure that these facilities do not cause excessive exposure, and, thus, routine environmental analysis at the time of licensing would not be necessary. Our original proposal had only targeted ship earth stations for evaluation of RF environmental radiation. However, comments received and our own analysis have suggested that ship radar stations should also be evaluated. We invite comment on this proposal.

8. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, this action should not have significant impact on small entities. Public comment is requested on the initial regulatory flexibility analysis set out in full in the Commission's complete decision.

9. This item has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain new or modified form, information collection and/or recordkeeping, labeling, disclosure, or record retention requirements. Implementation of any new or modified requirements will be subject to approval by the Office of Management and Budget as prescribed by the Act.

**Ordering Clauses**

10. Accordingly, it is ordered that there is hereby instituted a *Third Notice of Proposed Rule Making* to amend Part 80 of the Commission's Rules and Regulations as set forth below. All interested persons may file comments on this specific proposal on or before July 17, 1987. Reply comments shall be filed on or before August 17, 1987. In accordance with § 1.1419 of the Commission's Rules, 47 CFR 1.1419, an original and five (5) copies of all filings shall be furnished to the Commission. Copies of comments and reply comments filed in this proceeding will be available for public inspection during regular business hours in the Commission's Reference Room at 1919 M Street NW., Washington, DC 20554.

11. These actions are taken pursuant to the provisions of sections 4(i), 4(j), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), and 303(r).

**List of Subjects in 47 CFR Part 80**

Maritime services, Ship earth stations, Marine radar, Radiofrequency radiation.

**Proposed Rule Changes**

It is proposed to amend Part 80, Chapter I of Title 47 of the Code of Federal Regulations as follows:

## PART 80—STATIONS IN THE MARITIME SERVICES

1. The authority citation for Part 80 continues to read:

**Authority:** Sections 4(i), 4(j), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), and 303(r).

### Subpart C—Operating Requirements and Procedures Station Requirements—Ship Stations

Section 80.83 would be added to Subpart C as follows:

**§ 80.83 Protection from potentially hazardous RF radiation.**

Transmitters for ship earth stations and ship radar stations must be operated and installed in such a way that no person will be exposed to radiofrequency (RF) radiation in excess of the RF exposure guidelines specified in § 1.1307(b) of the Commission's Rules. Otherwise an Environmental Assessment, as defined in § 1.1311, must be filed at the time of application for a license.

* * * * *

### Subpart E—General Technical Standards

* * * * *

Section 80.227 would be added to Subpart E as follows:

**§ 80.227 Special requirements for protection from RF radiation.**

As part of the information provided with each such unit, manufacturers of transmitters for ship earth stations and ship radar stations must include

installation and operating instructions advising how to prevent human exposure to radiofrequency (RF) radiation in excess of the RF exposure guidelines specified in § 1.1307(b) of the Commission's Rules.

Federal Communications Commission.

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Food and Nutrition Service

### Special Supplemental Food Program for Women, Infants and Children; Poverty Income Guidelines

**AGENCY:** Food and Nutrition, USDA.

**ACTION:** Notice.

**SUMMARY:** The Department announces adjusted poverty income guidelines to be used by State agencies in determining the income eligibility of persons applying to participate in the Special Supplemental Food Program for Women, Infants and Children (WIC Program). These poverty income guidelines are to be used in conjunction with the WIC Regulations, 7 CFR Part 246.

**EFFECTIVE DATE:** July 1, 1987.

**FOR FURTHER INFORMATION CONTACT:** Barbara Hallman, Branch Chief, Policy and Program Development Branch, Supplemental Food Programs Division, FNS, USDA, Park Officer Center, Alexandria, Virginia 22302. (703) 756–3730.

**SUPPLEMENTARY INFORMATION:** This final action has been reviewed under Executive Order 12291, and has been determined to be *not major*. The Department does not anticipate that this notice will have an annual effect on the economy of $100 million or more. This action will not result in a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. Nor will this action have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The action has been reviewed in accordance with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). Pursuant to that review, the Administrator of the Food and Nutrition Service has determined that the action will not have a significant economic impact on a substantial number of small entities. This notice does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

This program is listed in the Catalog of Federal Domestic Assistance Programs under No. 10.577 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, 48 FR 29112).

Section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786) requires the Secretary to establish income criteria to be used with nutritional risk criteria in determining a person's eligibility for participation in the WIC Program. The law provides that persons will be eligible for the WIC Program only if they are members of families that satisfy the income standard prescribed for reduced-price school meals under section 9 of the National School Lunch Act (42 U.S.C. 1758). Under section 9, the income limit for reduced-price school meals is 185 percent of the Federal poverty income guidelines, as adjusted.

Section 9 also requires that these guidelines be revised annually to reflect changes in the Consumer Price Index. The annual revision for 1987 was published by the Department of Health and Human Services (DHHS) in the Federal Register for February 20, 1987 at 52 FR 5340. The guidelines published by DHHS are referred to as the poverty income guidelines.

The Department published final WIC regulations on February 13, 1985, at 50 FR 6108. Section 246.7(c) specifies that State agencies may prescribe income guidelines either equaling the income guidelines established under section 9 of the National School Lunch Act for reduced-price school meals or identical to State or local guidelines for free or reduced-price health care. However, in conforming WIC income guidelines to State or local health care guidelines, the State cannot establish WIC guidelines which exceed the guidelines established under section 9 of the National School Lunch Act for reduced-price school meals, or are less than 100 percent of the Federal poverty income guidelines.

Consistent with the method used to compute eligibility guidelines for reduced-priced meals under the National School Lunch Program, the poverty income guidelines were multiplied by 1.85 and the results rounded upward to the next whole dollar.

At this time the Department is publishing the maximum and minimum WIC poverty income limits by household size for the period July 1, 1987 to June 30, 1988. The first table of this notice contains the income limits by household size for the 48 contiguous States, the District of Columbia and all Territories, including Guam. Because the poverty income guidelines for Alaska and Hawaii are higher than for the 48 contiguous States, separate tables for Alaska and Hawaii have been included for the convenience of the State agencies.

[Effective July 1, 1987—June 30, 1988]

| Family size | Annual poverty income guidelines (PIG) | Annual FNS income guidelines for reduced-price lunches (185% of PIG) |
|---|---|---|
| 48 States, District of Columbia, Puerto Rico, Virgin Islands, and Territories, including Guam: | | |
| 1 | 5,508 | 10,175 |
| 2 | 7,400 | 13,690 |
| 3 | 9,292 | 17,205 |
| 4 | 11,200 | 20,720 |
| 5 | 13,100 | 24,235 |
| 6 | 15,008 | 27,750 |
| 7 | 16,908 | 31,265 |
| 8 | 18,808 | 34,780 |
| For each additional family member add | 1,900 | 3,515 |
| Alaska: | | |
| 1 | 6,880 | 12,721 |
| 2 | 9,240 | 17,094 |
| 3 | 11,599 | 21,457 |
| 4 | 14,066 | 25,996 |
| 5 | 16,360 | 30,303 |
| 6 | 18,799 | 34,798 |
| 7 | 21,140 | 39,109 |
| 8 | 23,520 | 43,512 |
| For each additional family member add | 2,380 | 4,403 |
| Hawaii: | | |
| 1 | 6,310 | 11,674 |
| 2 | 8,500 | 15,725 |
| 3 | 10,690 | 19,777 |
| 4 | 12,880 | 23,828 |
| 5 | 15,070 | 27,880 |
| 6 | 17,260 | 31,931 |
| 7 | 19,450 | 35,983 |
| 8 | 21,640 | 40,034 |
| For each additional family member add | 2,190 | 4,052 |

**Authority:** (42 U.S.C. 1786).

Dated: May 11, 1987.

### Patent and Trademark Office

### Public Advisory Committee for Trademark Affairs; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee meeting:

The Public Advisory Committee for Trademark Affairs will meet from 10:00 a.m. until 5:00 p.m. on June 2, 1987, at the U.S. Patent and Trademark Office in Room 11C24 of Building 3, Crystal Plaza, located at 2021 Jefferson Davis Highway, Arlington, Virginia.

The agenda for the meeting is as follows:

(1) Automation Activities
(2) Financial Reporting
(3) Quality of the Registration Process
(4) Intent to Use Legislation

The meeting will be open to public observation; approximately twelve (12) seats will be available for the public on a first-come first-served basis.

If time permits, oral comments by the public of three (3) minutes on each topic within the above agenda will be allowed. Written comments and suggestions will be accepted before or after the meeting on any of the matters discussed.

Copies of the minutes will be available upon request.

For further information, contact Ellen J. Seeherman, Office of the Assistant Commissioner for Trademarks, Room CP3-11C17, Patent and Trademark Office, Washington, DC 20231. Telephone: 703-557-7464.

Dated: May 8, 1987.

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### Import Restraint Limits for Certain Cotton, Wool, Man-Made Fiber Silk Blend and Other Vegetable Fiber Textiles and Textile Products, Produced or Manufactured in Sri Lanka

May 12, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on June 1, 1987. For further information contact Kim Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 682-3075. For information on embargoes and quota re-openings, please call (202) 377-3715.

### Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983 as amended between the Governments of the United States and Sri Lanka establishes specific restraint limits for cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Categories 331, 333/633, 334, 335, 336, 337, 338, 339, 340, 341, 342, 345/845, 347, 348, 350, 351, 363, 369-S, 442, 445/446, 631, 634, 635, 636/836, 638/639/838, 640, 641, 642/842, 644, 645/646, 647 and 648, produced or manufactured in Sri Lanka and exported to the United States during the twelve-month period beginning on June 1, 1987 and extending through May 31, 1988. The levels for Categories 335, 336, 340, 341, 641 and 648 have been reduced to account for carryforward used in the previous agreement year.

In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of textiles and textile products in the foregoing categories, produced or manufactured in Sri Lanka and exported during the twelve-month period beginning on June 1, 1987 and extending through May 31, 1988, in the excess of the designated levels of restraint.

A description of the textile categories in terms of T.S.U.S.A. Numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 12, 1987.

### Committee for the Implementation of Textile Agreements

Commissioner of Customs,
*Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, as amended, between the Governments of the United States and Sri Lanka; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on June 1, 1987, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Sri Lanka and exported during the twelve-month period beginning on June 1, 1987 and extending through May 31, 1988, in excess of the indicated restraint limits:

| Category | 12-Mo. limit |
|---|---|
| 331 | 1,082,812 dozen pairs. |
| 333/633 | 30,740 dozen. |
| 334 | 211,029 dozen. |
| 335 | 145,904 dozen. |
| 336 | 67,416 dozen. |
| 337 | 119,102 dozen. |
| 338 | 260,675 dozen. |
| 339 | 449,442 dozen of which not more than 335,000 dozen shall be in other than tank tops and T-shirts.[1]. |
| 340 | 524,984 dozen. |
| 341 | 525,256 dozen. |
| 342 | 202,248 dozen. |
| 345/845 | 95,400 dozen. |
| 347 | 417,167 dozen. |
| 348 | 309,318 dozen. |
| 350 | 47,700 dozen. |
| 351 | 111,300 dozen. |
| 363 | 6,741,600 numbers. |
| 369–S [2] | 951,622 pounds. |
| 442 | 12,120 dozen. |
| 445/446 | 94,003 dozen. |
| 631 | 328,244 dozen pairs. |
| 634 | 126,248 dozen. |
| 635 | 208,308 dozen. |
| 636/836 | 145,000 dozen. |
| 638/639/839 | 495,000 dozen. |
| 640 | 108,550 dozen. |
| 641 | 525,256 dozen. |
| 642/842 | 140,000 dozen. |
| 644 | 23,320 dozen. |
| 645/646 | 113,623 dozen of which not more than 75,749 dozen shall be in Category 646. |
| 647 | 398,578 dozen. |
| 648 | 178,853 dozen. |

[1] In Category 339, all TSUSA numbers except 384.0205, 384.0207, 384.0208, 384.0212, 384.0218, 384.0220, 384.0221, 384.2806, 384.2810, 384.2812, 384.2814, 384.2910, 384.2914 and 384.2915.

[2] In Category 369, only TSUSA number 366.2540.

In carrying out this directive, entries of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the foregoing categories, produced or manufactured in Sri Lanka, and exported during the control periods extending through May 31, 1987 shall, to the extent of any unfilled balances, be charged to the levels of restraint established for such goods during those periods. In the event the levels of restraint established for those periods have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of May 10, 1983 between the Governments of the United States and Sri Lanka, which provide, in part, that (1) any specific limit and sublimit may be exceeded by designated percentages of the square yards equivalent total in any agreement period, provided that the amount of the increase is compensated for by an equivalent decrease in one or more other specific limits; (2) specific limits may be increased for carryover and carryforward up to 11 percent of the applicable category limit or sublimit, of which not more than 6 percent can be used for carryforward; however, carryover will not be available in the agreement period during which the specific limit is first established; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement, any of the adjustments referred to above, will be made to you by letter.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Indonesia

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 18, 1987. For further information contact Pamela Smith, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535-9450. For information on embargoes and quota re-openings, please call (202) 377-3515.

### Background

A CITA directive dated June 25, 1986 (51 FR 23807) established limits for certain specified categories of cotton, wool and man-made fiber textile products within the Group II limit, including Category 639, produced or manufactured in Indonesia and exported during the agreement year which began on July 1, 1986 and extends through June 30, 1987. A further directive dated April 30, 1987, established limits for certain cotton and man-made fiber textile products, including Category 342/642, produced or manufactured in Indonesia and exported during the six-month period which began on January 1, 1987 and extends through June 30, 1987.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 25 and October 3, 1985 between the Government of the United States and Indonesia, special carryforward is being applied to the restraint limits established for Categories 639 and 342/642. This adjustment will reopen the limit for Category 639 which is currently embargoed.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44783), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 12, 1987

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
*Department of the Treasury, Washington, D.C. 20229.*

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directives of June 25, 1986 and April 30, 1987 from the Chairman, Committee for the Implementation of Textile Agreements, which established restraint limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in Indonesia and exported during the periods which began, in the case of Category 639, on July 1, 1986; and, in the case of Category 342/642, on January 1, 1987; and extend through June 30, 1987.

Effective on May 18, 1987, the directives of June 25, 1986 and April 30, 1987 are hereby amended to adjust the previously established restraint limits for categories 342/642 and 639 under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 25 and October 3, 1985, as amended: [1]

| Category | Adjusted restraint limit [1] |
|---|---|
| 342/642 | 95,000 dozen. |
| 639 | 492,142 dozen. |

[1] The limits have not been adjusted to reflect any imports exported after June 30, 1986, in the case of Category 639, and December 31, 1986, in the case of Category 342/642.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

[FR Doc. 87-11162 Filed 5-14-87; 8:45 am]

BILLING CODE 3510-DR-M

[1] The agreement provides, in part, that: (1) within the group limit specific restraint limits may be exceeded by designated percentages; (2) specific limits may be increased for carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement.

## Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Indonesia

May 12, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 18, 1987. For further information contact Pamela Smith, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

### Background

A CITA directive dated October 31, 1985 (50 FR 46152) established limits for certain specific categories of cotton, wool and man-made fiber textile products, including categories subject to specific limits (Group I) and categories not subject to specific limits (Group II), produced or manufactured in Indonesia and exported during the agreement year which began on July 1, 1985 and extended through June 30, 1986.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 25 and October 3, 1985, as amended, between the Governments of the United States and the Republic of Indonesia, swing is being applied to the restraint limits established for Categories 314, 315, 317, 341, 631-W, and 645/646 in Group I for the agreement year July 1, 1985 to June 30, 1986. As a result of swing applied to the above categories, the charges for the 1986-1987 period will be reduced by the amount of the increase to the adjusted restraint limits for Categories 314, 315, 317, 341, 631-W, and 645/646. These same amounts will be charged to the 1985-1986 limits for these categories. The restraint limits for Group I and Group II are being decreased for carryover from the 1985-1986 period, applied to the 1986-1987 period.

Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to adjust the previously established restraint limits at the designated levels.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 12, 1987

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
*Department of the Treasury,*
Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of October 31, 1985 from the Chairman, Committee for the Implementation of Textile Agreements, which establishes restraint limits for certain cotton, wool, and man-made fiber textile products, produced or manufactured in Indonesia and exported during the agreement year which began on July 1, 1985 and extended through June 30, 1986.

Effective on May 18, 1987, the directive of October 31, 1985 is hereby further amended to adjust the previously established restraint limits for the following categories and groups under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 25 and October 3, 1985, as amended, between the Governments of the United States and the Republic of Indonesia [1]:

| Category | Adjusted 12-mo. limit [1] |
|---|---|
| Group I | 219,571,403 square yards equivalent. |
| 314 | 14,980,000 square yards. |
| 315 | 17,013,000 square yards. |
| 317 | 10,700,000 square yards. |
| 341 | 448,000 dozen. |
| 631-W [2] | 895,500 dozen pairs. |
| 645/646 | 374,500 dozen. |
| Group II | 43,801,449 square yards equivalent. |

[1] The limits have not been adjusted to reflect any imports exported after June 30, 1986.

[2] In Category 631, only TSUSA numbers 704.3215, 704.8525, 704.8550 and 704.9000.

Also effective on May 18, 1987, you are directed to deduct the following charges

[1] The agreement provides, in part, that: (1) within the aggregate limit specific restraint limits may be exceeded by designated percentages; (2) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement.

made to the restraint limits established in the directive of June 25, 1986 for the period July 1, 1986 through June 30, 1987. These same amounts are to be charged to the limits established for the July 1, 1985–June 30, 1986 period, for goods which had been exported during that period.

| Category | Deduct/charge |
|---|---|
| 314 | 980,000 square yards. |
| 315 | 1,113,000 square yards. |
| 317 | 700,000 square yards. |
| 341 | 28,000 dozen. |
| 631–W | 45,500 dozen pairs. |
| 645/646 | 24,500 dozen. |

The Committee for the Implementation of Textile Agreement has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Indonesia

May 12, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 18, 1987 For further information contact Pamela Smith, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377–3715.

### Background

A CITA directive dated June 25, 1986 (51 FR 23807) establishes limits for certain specific categories of cotton, wool and man-made fiber textile products, including categories subject to specific limits (Group I) and categories not subject to specific limits (Group II) and categories not subject to specific limits (Group II) produced or manufactured in Indonesia and exported during the agreement year which began on July 1, 1986 and extends through June 30, 1987.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 25 and October 3, 1985, as amended, between the Governments of the United States and the Republic of Indonesia, swing is being applied to the restraint limits established for Categories 339, 341, 347/348, 351, 640, 641 and 645/646 in Group I and for Group II for the agreement year July 1, 1986 to June 30, 1987. The restraint limits for Groups I and II are being increased for carryover for the same period.

Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to adjust the previously established restraint limits at the designated levels.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622) July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULRES OF THE UNITED STATES ANNOTATED (1987).

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

### Committee for the Implementation of Textile Agreements

May 12, 1987.

Commissioner of Customs,

*Department of the Treasury, Washington, D.C. 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of June 25, 1986 from the Chairman, Committee for the Implementation of Textile Agreements, which establishes restraint limits for certain cotton, wool, and man-made fiber textile products, produced or manufactured in Indonesia and exported during the agreement year which began on July 1, 1986 and extends through June 30, 1987.

Effective on May 18, 1987, the directive of June 25, 1986 is hereby amended to adjust the previously established restraint limits for the following categories and groups under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 25 and October 3, 1985, as amended between the Governments of the United States and the Republic of Indonesia: [1]

| Category | Adjusted 12-mo. limit [1] |
|---|---|
| Group I | 261,002,558 square yards equivalent. |
| 339 | 299,600 dozen. |
| 347/348 | 793,940 dozen. |
| 341 | 474,880 dozen. |
| 351 | 124,762 dozen. |
| 640 | 374,286 dozen. |
| 641 | 1,246,560 dozen. |
| 645/646 | 396,970 dozen. |
| Group II | 64,680,638 square yards equivalent. |

[1] The limits have not been adjusted to reflect any imports exported after June 30, 1986.

The Committee for the Implementation of Textile Agreement has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

**ADDRESS:** The meeting will be held at Palisades Institute for Research Services, Inc., 2011 Crystal Drive, Suite 307, Arlington, VA 22202.

**FOR FURTHER INFORMATION CONTACT:** David Slater, AGED Secretariat, 201 Varick Street, New York, NY 10014.

**SUPPLEMENTARY INFORMATION:** The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The AGED meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The agenda for this meeting will include programs on Radiation Hardened Devices, Microwave Tubes, Displays and Lasers. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Pub. L. No. 92–463, as amended, (5 U.S.C. App. II 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

**Patricia H. Means,**

*OSD Federal Register Liaison Officer, Department of Defense.*

May 11, 1987.

## Department of the Air Force

### Public Information Collection Requirement Submitted to OMB for Review

**ACTION:** Public Information Collection Requirement Submitted to OMB for Review.

**SUMMARY:** The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of submission; (2) Title of Information Collection and Form Number, if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; and (8) The point of contact from whom a copy of the information proposal may be obtained.

**Extension**

DOD Working Dog Program (AFLC Form 4504) (OMB No. 0704–0048).

Prospective donors of DOD working dogs are required to provide information about their animals prior to acquisition by the DOD for training as a military working dog. It is necessary for the animal to meet acceptable standards for health, age, temperament, and breed prior to acceptance by the DOD.

Individuals

Responses—608.
Burden hours—304.

**ADDRESSES:** Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Vitiello, DOD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone number (202) 746–0933.

**SUPPLEMENTARY INFORMATION:** A copy of the information collection proposal may be obtained from Mr. James Tatum, CML, Lackland AFB TX 78236, telephone (512) 671–4291.

**Patricia H. Means,**

*OSD Federal Register Liaison Officer, Department of Defense.*

## Department of the Navy

### Chief of Naval Operations Executive Panel Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Constrained Resources Task Force will meet May 28, 1987, from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to review the Navy's approaches to maritime operations and readiness in the management of resources, and related intelligence. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552(b)(1) of title 5, United States Code.

For further information concerning this meeting, contact Lieutenant Paul G. Butler, Executive Secretary of the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 601, Alexandria, Virginia 22302–0268. Phone (703) 756–1205.

Dated: May 18, 1987.

**Jane M. Virga,**

*Lieutenant, JAGC, U.S. Navy Reserve Federal Register Liaison Officer.*

BILLING CODE 3810–AE–M

## Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee Panel on Outer ASW Battle will meet on May 21 and 22, 1987. The meeting will be held at the Center for Naval Analyses, 4401 Ford Avenue, Alexandria, Virginia. The meeting will commence at 8:30 A.M. and terminate at 4:30 P.M. on May 21; and commence at 8:30 A.M. and terminate at 3:00 P.M. on May 22, 1987. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to compare the elements of the Outer ASW Battle with the elements of the Outer Air Battle and determine if platforms and sensors can be coordinated to provide information to ASW forces; review and address command, control and communication aspects; review information received from sensor systems, and assess efforts in defensive systems. The agenda will include technical briefings and discussions related to the Outer Air Battle Study, sensor correlation and networking, intelligence support and Soviet concept of operations. These briefings and discussions will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

**FOR FURTHER INFORMATION CONCERNING THIS MEETING CONTACT:** Commander T.C. Fritz, U.S. Navy, Office of Naval Research (Code 100N), 800 North Quincy Street, Arlington, VA 22217–5000, Telephone number (202) 696–4870.

Dated: May 12, 1987.

BILLING CODE 3810-AE-M

## DEPARTMENT OF ENERGY

## Conduct of Employees; Notice of Post-Employment Restriction Waiver

Section 207(f), Title 18, United States Code, authorizes the Secretary of Energy to waive the post-employment restrictions of subsection (a) of section 207, Title 18, United States Code, to permit a former employee with outstanding scientific or technological qualifications to make appearances before or communications to the Department in connection with a particular matter which requires such qualifications, where it has been determined that such a waiver would serve the national interest.

It has been established to my satisfaction that Charles W. Edington, formerly Associate Director of the Office of Health and Environmental Research, Department of Energy Office of Energy Research, has a unique combination of outstanding scientific qualifications in the field of biological science, including the study of radiation effects upon humans, and extensive experience in management of scientific research and development programs. I am further satisfied that it will serve the national interest to permit him, in his capacity as Principal Staff Officer and Deputy Associate Director for International Affairs of the Commission of Life Sciences of the National Research Council (National Academy of Sciences), to appear before and communicate with employees of the Department of Energy and other Government agencies with respect to funding and operation of the Radiation Effects Research Foundation (RERF), a nonprofit organization that receives funding from the Department of Energy through the National Academy of Sciences. I am satisfied that these activities are in a scientific field and require the qualifications stated.

I have, therefore, waived the post-employment prohibitions of subsection (a) of section 207, title 18, United States Code (in consulation with the Director of the Office of Government Ethics), with respect to contact by Dr. Edington with employees of the Department of Energy and other Government agencies to permit him to undertake the stated activities.

Dated: May 8, 1987.

John S. Herrington,

*Secretary of Energy.*

BILLING CODE 6450-01-M

## Restricted Eligibility for Morgantown Energy Technology Center; Financial Assistance Award to West Virginia University (Cooperative Agreement)

**AGENCY:** Department of Energy (DOE), Morgantown Energy Technology Center.

**ACTION:** Notice of Restricted Eligibility for Cooperative Agreement Award.

**SUMMARY:** The Department of Energy (DOE), Morgantown Energy Technology Center, in accordance with 10 CFR 600.7(b), gives notice of its plans to restrict eligibility for the award of a cooperative agreement to the West Virginia University , Energy and Waste Research Center, Morgantown, West Virginia. This agreement will support the National Energy Policy Plan by promoting fluidization phenomena-related research that will expand the Nation's Fossil Energy Date Base with an emphasis on direct utilization, conversion, cleanup processes, and ancillary requirements.

The DOE has determined that restriction to West Virginia University is appropriate based on the following information:

- In 1984, the National Science Foundation (NSF) formally recognized WVU's predominant role in fluidization phenomena by sponsoring the establishment of an exclusive research center titled "NSF/WVU/Industry Cooperative Research Center on Fluidization and Fluid Particle Science." This exclusive recognition by NSF represents the culmination of 15 years of dedicated research and development activities and assists WVU in remaining at the forefront of research in fluidization technology and related areas.
- WVU has several individuals that are considered to be unquestionably predominant experts in fields relevant to the fluidization phenomena activity. Dr. H. Kono and Dr. R. C. Bailie along with a technically diverse team of specialist provides the strongest possible support and complement to the DOE activity.

The total estimated project cost for this cooperative agreement shall not exceed $2,500,000 for the proposed 3-year duration, of which the anticipated project cost to the Government is $2,375,000. The distribution and availability of funds is subject to budget limitations, satisfactory definition of WVU's research projects, results of research under the proposed cooperative agreement and other Government-sponsored research, and may deviate from the above projection.

**FOR FURTHER INFORMATION CONTACT:** Raymond R. Jarr, U.S. Department of

Energy, Morgantown Energy Technology Center, P.O. Box 880, Morgantown, WV 26507-0880, Telephone: (304) 291-4068 or FTS 923-4068, Procurement Request No. 21-87MC24207.000.

Dated: May 4, 1987.

**Ronald E. Cone,**

*Director, Acquisition and Assistance Division, Morgantown Energy Technology Center.*

BILLING CODE 6450-01-M

## Office of Assistant Secretary for International Affairs and Energy Emergencies

### Proposed Subsequent Arrangement; European Atomic Energy Community

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreement involves approval of the following sale: Contract Number S-EU-918, for the sale of 5 milligrams of uranium-236 to the Department of Geology, Bedford New College, England, for use as tracer material for analysis of uranium in rock samples.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Dated: May 11, 1987.

For the Department of Energy.

**George J. Bradley, Jr.,**

*Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.*

[FR Doc. 87-11197 Filed 5-14-87; 8:45 am]

### Proposed Subsequent Arrangement; European Atomic Energy and Sweden

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended and the Agreement for Cooperation between the Government of the United States of America and the Government of Sweden concerning Peaceful Uses of Nuclear Energy.

The subsequent arrangement to be carried out under the above mentioned-agreements involves approval of the following retransfer: RTD/SW(EU)-141, for the retransfer of 42,000 kilograms of uranium, enriched to 3.12 percent in the isotope uranium-235 from France to Sweden for fabrication of fuel for the Brunsbuettel power reactor in the Federal Republic of Germany.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: May 11, 1987.

BILLING CODE 6450-01-M

## Federal Energy Regulatory Commission

**[Docket Nos. ER87-416-000 et al.]**

### Arkansas Power & Light Company et al.; Electric Rate and Corporate Regulation Filings

May 11, 1987.

Take notice that the following filings have been made with the Commission:

**1. Arkansas Power & Light Company**

[Docket No. ER87-416-000]

Notice is hereby given that, effective the 1st day of May 1987, Rate Schedule FERC No. 74, effective date July 31, 1978 and filed with the Federal Energy Regulatory Commission by Arkansas Power & Light Company, is to be cancelled.

Notice of the proposed cancellation has been served upon the following:

Mr. John H. McDaniel, Manager, City Light & Water, P.O. Box 9, Paragould, Arkansas 72451-0009

Arkansas Public Service Commission, P.O. Box C-400, Little Rock, Arkansas 72203.

Comment date: May 26, 1987, in accordance with Standard Paragraph E at the end of this notice.

**2. Boston Edison Company**

[Docket No. ER87-345-000]

Take notice that on May 1, 1987, Boston Edison Company (Edison) of Boston, Massachusetts, tendered for filing First Revised Sheet No. 2, First Revised Sheet No. 3 and Original Sheet No. 4 of the rate schedule tendered in the captioned proceeding on March 26, 1987. The revised sheets establish a $5,000 ceiling for the recovery of Boston Edison administrative and related costs, provide for recoveries over that amount by filing with the Commission under Section 205 of the Federal Power Act, insert a billing provision and eliminate the annual informational filing called for by the rate schedule as originally tendered to the Commission.

Edison did not change the effective date as requested in its March 26, 1987 tender to the Commission. Edison states that it has served copies of this rate filing upon each person served with the original rate filing.

Comment date: May 26, 1987, in accordance with Standard Paragraph E at the end of this notice.

**3. Carolina Power and Light Company**

[Docket No. ER87-240-001]

Take notice that on April 30, 1987, in compliance with a prior Commission Order Carolina Power and Light Company (CP&L or Company) tendered for filing revised rates and cost statements, as well as revised testimony and exhibits, reflecting a 34 percent Federal income tax rate.

The Company states that it is filing an application for rehearing of the Commission's March 31, 1987, Order. Pending resolution of CP&L's application for rehearing, the Company is complying, under protest, with that Order's requirement concerning the 34 percent tax rate.

CP&L states that by making the filing, CP&L is not waiving any rights it may have with regard to its application for rehearing nor should this filing be construed in any way as evidence of the Company's agreement with, or acquiesence in, those aspects of the March 31, 1987, Order granting summary disposition and requiring the use of a 34 percent Federal income tax rate in the Company's cost of service and resultant rates.

The Company submits the following:

1. Revised Sheet Nos. 5 through 8b of CP&L's FPC Electric Tariff containing Resale Service Schedule RS87–1A for service to Electric Membership Corporations; Resale Service Schedule RS87–2A for service to Municipal customers, Partial Requirements Resale Service Schedule RS87–3A for service to partial requirements customers; and Resale Fuel Adjustment Clause Rider No. 87B, which is applicable to all three rate schedules.

2. Revised statements comparing the sales and revenues under the above-listed rate schedules and rider, by month and for the year, with the following:

a. For Period I, Rate Schedules RS87–1A, and RS87–2A, and RS87–3A, and accompanying rider, are compared with Rate Schedules RS85–1B, RS85–2B and RS85–3B and Resale Fuel Adjustment Clause Rider 85D; and

b. For Period II, Rate Schedules RS87–1A, RS87–2A and RS87–3A, and accompanying rider, are compared with Rate Schedules RS85–1B, RS85–2B, and RS85–3B and Resale Fuel Adjustment Clause Rider 85E.

3. Revised pages as required for revised Statements AK, BG and BK for Period I;

4. Revised pages as required for revised Statements, AA, AB, AC, AF, AG, AH, AK, AL, AN, AO, AP, AR, AT, AU, AV, AW, AY, BG, BJ, BK, and BL for Period II;

5. Supplemental workpapers; and

6. Supplemental testimony and exhibits.

Copies of this entire filing have been mailed to all persons included in the Commission's official Service List in this proceeding.

Comment date: May 26, 1987, in accordance with Standard Paragraph E at the end of this notice.

**4. Cogeneration Coalition American, Inc.**

[Docket No. EL87–34–000]

Take notice that on April 28, 1987, the Cogeneration Coalition of America, Inc., ("the Coalition"), pursuant to section 210 of the Public Utility Regulatory Policies Act of 1978 and Rule 207 of the Federal Energy Regulatory Commission's Rules of Practice and Procedure, 18 CFR 385.207, tendered for filing a petition requesting that the Commission initiate an expedited investigation nationwide into current state regulatory commission practices which act to eliminate the opportunity for valid competition among generators of electric energy and to limit the development of energy efficient alternatives to traditional sources of electric energy generation. The Coalition requests that the Commission exercise its authority under section 210(h) of PURPA to oversee the implementation of state regulatory programs.

The Coalition alleges that an investigation is necessitated by the recent approvals by various state regulatory commissions of filings by electric utilities to provide discount rates with cogeneration "buy-out"; features, rights of first refusal, or contractual limitations which are anti-competitive and discriminate against qualifying cogeneration facilities. The Coalition further alleges that approval of contracts, rates and tariff's containing such features, rights or limitations violates PURPA and is contrary to the intent of Congress in enacting this legislation.

Comment date: June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

**5. Consolidated Edison Company of New York, Inc.**

[Docket No. ER87–420–000]

Take Notice That on May 1, 1987, Consolidated Edison Company of New York, Inc. ("Con Edison") tendered for filing, as an initial rate schedule, an agreement to provide interruptible transmission service to Baltimore Gas and Electric Company ("BG&E"). The agreement provides for a charge of 2.6 mills per kilowatthour for transmission of power purchased by BG&E from the companies of the Northeast Utilities system.

Con Edison requests waiver of the notice requirements of Section 35.3 of the Commission's regualtions so that the Rate Schedule can be made effective as of November 18, 1986.

Con Edison states that a copy of this filing has been served by mail upon BG&E.

Comment date: May 26, 1987, in accordance with Standard Paragraph E at the end of this notice.

**6. El Paso Electric Comapny**

[Docket Nos. ER86–366–006, ER86–366–007, ER86–366–008, ER86–366–012, ER86–366–015, ER86–638–001, ER86–638–002, ER86–638–003, ER86–638–004, ER86–638–005]

Take notice that on April 15, 1987, El Paso Electric Company (EPE) tendered for filing in these dockets a report of refunds pursuant to the Commission's order of March 30, 1987. EPE also tendered for filing in the same transmittal its proposed accounting for various charges and expenses listed in the Commission's order of March 30, 1987.

Comment date: May 26, 1987, in accordance with Standard Paragraph E at the end of this notice.

**7. Gulf States Utilities Company**

[Docket No. ER85–538–000]

Take notice that on April 28, 1987, Cajun Electric Power Cooperative, Inc., tendered for filing its comments to Compliance Report filed by Gulf States Utilities Company.

Comment date: May 26, 1987, in accordance with Standard Paragraph E at the end of this document.

**8. Niagara Mohawk Power Corporation**

[Docket No. ER87–418–000]

Take notice that Niagara Mohawk Power Corporation ("Niagara Mohawk") on May 1, 1987, tendered for filing an application to increase the Company's charges for transmission and delivery of power and energy for the New York Power Authority under Niagara Mohawk FERC Rate Schedule No. 138. The Power Authority customers affected are certain municipal and cooperatives located in Connecticut, Massachusetts, New Jersey, Ohio, Pennsylvania, and Rhode Island. Niagara Mohawk requests an effective date of July 1, 1987.

The proposed change implements a provision of the Settlement Agreement dated December 9, 1986 and approved by the Commission on March 13, 1987 in Docket ER86–354–001 requiring a filing reflecting the Tax Reform Act of 1986, plus other cost-of-service items.

Copies of the filing were served upon NYPA and the New York State Public Service Commission.

Comment date: May 26, 1987, in accordance with Standard Paragraph E at the end of this notice.

**9. New England Power Company**

[Docket No. ER87–411–000]

Take notice that on May 1, 1987, New England Power Company (NEP) tendered for filing revisions which reduce the return on equity (ROE) components in the following rate schedules:

FERC Rate Schedule No. 324—Newport Electric Corporation
FERC Rate Schedule No. 325—Vermont Marble Company
FERC Rate Schedule No. 326—Green Mountain Power Company; Central Vermont Public Service Corp.; Vermont Electric Power Company
FERC Rate Schedule Nos. 327 and 328—Boston Edison Company.

NEP states that these rate schedules establish rates in accordance with a cost-of-service formula and provide for unit power sales or transmission support arrangements. NEP further states that the proposed revisions are in compliance with its contractual

obligation to seek adjustment of the currently effective fixed ROE components of these contracts in the event the FERC generic ROE differs from the fixed ROE by more than 1%.

NEP seeks waiver of the Commission's notice requirements so that the proposed reductions may become effective January 1, 1987, for Rate Nos. 324 and 325 and February 1, 1987 for the remainder of the rate schedules, in accordance with the terms of these agreements. NEP states that copies of this filing have been served on all customers under these rate schedules.

Comment date: May 28, 1987, in accordance with Standard Paragraph E at the end of this document.

**10. Florida Power Corporation**

[Docket No. ER87-365-000]

Take notice that on May 1, 1987 Florida Power Corporation (Florida Power) tendered for filing amended revisions to the capacity charges, reservation fees and energy adder for various interchange services provided by Florida Power pursuant to interchange contracts with Florida Power & Light Company, Fort Pierce Utilities Authority, Jacksonville Electric Authority, Kissimmee Utility Authority, Orlando Utilities Commission, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., Tampa Electric Company, and the Cities of Gainesville, Homestead, Key West, Lakeland, Lake Worth, New Smyrna Beach, St. Cloud, Starke, Tallahassee and Vero Beach, Florida. The interchange services which are affected by these revisions are Service Schedule B—Short Term Firm, current negotiated commitments under Service Schedule D—Long Term Firm, Service Schedule F—Assured Capacity and Energy, Service Schedule G—Backup Service, Service Schedule H—Reserve Service, and the Contract for Assured Capacity and Energy with Florida Power & Light Company. Florida Power states that the revised capacity charges, reservation fees, and energy adder were developed using the same methodology as used in the original filings.

Florida Power requests that the amended revised capacity charges, reservation fees and energy adder be made effective on May 1, 1987 through and including June 30, 1987 for the first period and July 1, 1987 for the second period. Florida Power therefore requests waiver of the sixty day notice requirement. According to Florida Power, the filing has been served on each of the affected utilities and the Florida Public Service Commission.

Comment date: May 28, 1987, in accordance with Standard Paragraph E at the end of this notice.

**11. Puget Sound Power and Light Co.**

[Docket No. ER87-413-000]

Take notice that on April 10, 1987 Puget Sound Power and Light Co., ("Puget"), tendered for filing pursuant to 18 CFR 35.30(c) relating to the calculation of Average System Cost (ASC) for Puget for the Exchange Period effective October 1, 1986 through January 31, 1987. Puget states that this filing includes the ASC material demonstrating the Energy Cost Adjustment Clause adjustment reflecting Case No. U-86-111 data.

Puget submits copies of the following:

1. The ECAC ASC adjustment demonstrated on Schedule 4 of Appendix 1 to the Residential Purchase and Exchange Agreement, Contract No. DE-MS79-81BP90804 ("Agreement"), between Puget and BPA reflecting Puget's ASC schedules.

2. BPA Report dated April 14, 1987, pertaining to the above ASC filing.

Comment date: May 28, 1987, in accordance with Standard Paragraph E at the end of this notice.

**12. Puget Sound Power & Light Company**

[Docket No. ER87-175-000]

Take notice that Puget Sound Power & Light Company ("Puget") on May 1, 1987 tendered for filing an amendment to its filing of February 24, 1987 for proposed changes in its Supplement No. 5 to the General Transfer Agreement between Puget and the United States of America, Department of Interior, acting by and through the Bonneville Power Administrator ("Bonneville"), Contract No. 14-03-110-11487. (Puget Sound Power & Light Company Supplement No. 10 to Rate Schedule FPC No. 16.)

The amendment to filing sets forth cost data supporting the levelized fixed charge rate and loss factor used in determining the proposed rate changes.

Copies of the amendment to filing were served upon Bonneville.

Comment date: May 28, 1987, in accordance with Standard Paragraph E at the end of this notice.

**13. Southern California Edison Company**

[Docket No. ER87-377-000]

Take notice that, on April 10, 1987, Southern California Edison Company ("Edison") tendered for filing, as an initial rate schedule, the following agreement, which has been executed by Edison and The Metropolitan Water District of Southern California ("MWD" or "District"): District—Edison, 1987 Service Interchange Agreement between The Metropolitan Water District of Southern California and Southern California Edison Company.

The Service and Interchange Agreement provides for the integration of MWD's electric facilities associated with the providing of electric power for pumping on MWD's Colorado River Aqueduct, and the generating resources available to MWD from the Hoover Power Plant and the Parker Power Plant, with Edison's electric system; for Edison to provide MWD with firm transmission service; for Edison to provide to MWD, if requested by MWD, with energy for pumping Colorado River water; and for Edison to provide MWD with an amount of off-peak energy for water supply purposes.

Edison has requested a waiver of the 60-day notice period in order that the Service Interchange Agreement may become effective on June 1, 1987.

Copies of this filing were served upon the Public Utilities Commission of the State of California and The Metropolitan Water District of Southern California.

Comment date: May 28, 1987, in accordance with Standard Paragraph E at the end of this notice.

**14. Union Electric Company**

[Docket No. ER87-419-000]

Take notice than on May 1, 1987, Union Electric Company (Union) tendered for filing proposed changes in its transmission service rate in Transmission Service Transaction 3 of the Transmission Service Agreement between Union Electric Company and the City of Malden, Missouri. The proposed changes would decrease revenues from jurisdictional sales and service by approximately $6,300, based on the 12 month period ending June 30, 1988.

Union states that the decrease in this rate is filed pursuant to a settlement which calls for the filing of an application for a change in the transmission service rate to Malden that will reflect the provisions of the Tax Reform Act of 1986, Pub. L. No. 99-514.

Copies of the filing were served upon the public utility's customer, the City of Malden, as well as the Missouri Public Service Commission.

Comment date: May 28, 1987, in accordance with Standard Paragraph E at the end of this notice.

**Standard Paragraphs**

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington.

DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

[FR Doc. 87-11135 Filed 5-14-87; 8:45 am]

BILLING CODE 6717-01-M

---

[Project Nos. 10335-000 et al.]

**Hydroelectric Applications (Peter Renner et al.); Applications Filed With the Commission**

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Preliminary Permit.

b. Project No: 10335-000.

c. Date Filed: February 27, 1987.

d. Applicant: Peter Renner.

e. Name of Project: Cedarburg Nail Factory.

f. Location: Cedar Creek, Ozaukee County, Wisconsin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Peter Renner, 626 N. Water St., Milwaukee, WI 53202, (414) 273–6637.

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed project would consist of: (1) An existing reinforced concrete gravity dam 80 feet long and 20 feet high; (2) an existing reservoir of 3.6-acre surface area and 35 acre-feet storage capacity at a normal maximum surface elevation of 756 feet msl; (3) an existing 90-foot-long, 8-foot-wide millrace, an existing mill building housing an existing 125-kW capacity turbine-generator (to be refurbished), and an existing 40-foot-long tailrace; (4) a proposed 240-volt transmission line 40 feet long; and (5) appurtenant facilities.

The estimated annual energy production is 0.6 GWh. The net hydraulic head is 23 feet. Power would be sold to Cedarburg Light and Water Commission. The existing facilities are owned by the applicant. Applicant estimates that the cost of the work to be performed under the preliminary permit would be negligible.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, D2.

2 a. Type of Application: Major License, 5MW or Less.

b. Project No: 6459-001.

c. Date Filed: May 31, 1984.

d. Applicant: Southeastern Hydro-Power, Inc.

e. Name of Project: Tar River Water Power.

f. Location: On the Tar River in Nash County, North Carolina.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Charles B. Mierek, Southeastern Hydro-Power, Inc., Route 2, Box 302 A, One Clifton—Glendale Road, Spartanburg, SC 29302.

i. Comment Date: June 29, 1987.

j. Description of Project: The proposed project would consist of: (1) An existing concrete dam, approximately 450 feet long and having a maximum height of 30 feet; (2) an existing reservoir with an estimated gross storage capacity of 8,000 acre-feet at normal pool elevation of 125 feet, m.s.l.; (3) a proposed intake structure 40 feet wide with three sets of trash racks, each 12 feet wide and 20 feet high; (4) a proposed steel penstock, 14 feet in diameter and 270 feet long, which will bifurcate at the proposed powerhouse into two branches each seven feet in diameter; (5) a proposed concrete powerhouse, 65 feet long and 31 feet wide containing two turbine/generating units with a total installed capacity of 2,100 kW; (6) a proposed tailrace; (7) a new substation; (8) two proposed 23-kV transmission lines, one about 1.7 miles long, the other about .9 miles long; and (9) appurtenant facilities. It is proposed to remove the Old Davenport Mill Dam, located about one mile downstream from the project, which is breached at several locations and in very poor condition. Applicant estimates that the average annual energy generation would be 8,100,000 kWh. Project power would be sold to Carolina Power and Light Company. The project dams are owned by the City of Rocky Mount, North Carolina.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

3 a. Type of Application: Major License (5 MW or Less).

b. Project No: 9868-000.

c. Date Filed: March 2, 1986.

d. Applicant: Spartan Mills.

e. Name of Project: John P. King Mill.

f. Location: Augusta Canal and Savannah River, Richmond County, Georgia.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. J. Lester Eledge, Vice—President, Spartan Mills, P.O. Box 1668, Spartanburg, SC 29304, (803) 574–0211.

i. Comment Date: June 29, 1987.

j. Description of Project: The existing project consists of: (1) A headgate and intake structure, approximately 50 feet long and 15 feet high, located on the east bank of the City-owned Augusta Canal; (2) a concrete lined, masonry open flume headrace, approximately 200 feet long and 40 feet wide; (3) a powerhouse of brick and masonry construction, containing two generating units with a total capacity of 2,050 kW; (4) a tailrace excavated in rock, approximately 435 feet long and 30 feet wide; and (5) appurtenant facilities. The estimated average annual generation of 13.0 GWh is used by the applicant in its textile mill operation.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

4 a. Type of Application: Preliminary Permit.

b. Project No: 10344-000.

c. Date Filed: March 9, 1987.

d. Applicant: Windsor Machinery Company, Inc.

e. Name of Project: Marlboro Mills.

f. Location: On the Lattintown Creek in Ulster County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Harry A. Terbush, RD3, Box 157, Orbit Lane, Hopewell Junction, NY 12533, (914) 897–4194.

i. Comment Date: June 26, 1987.

j. Description of Project: The proposed project would consist of: (1) An existing gravity dam 20 feet high and 40 feet long at elevation 180 feet msl owned by William Lyons and Nancy Dalby; (2) a small existing impoundment with a normal surface elevation of 180 feet msl; (3) a proposed 24-inch-diameter penstock approximately 800 feet long; (4) a proposed 12-footwide and 12-foot-long powerhouse to contain one turbine/generator with an installed capacity of 300 kW with flows discharging directly into the stream; (5) an existing three phase 13.2-kV transmission line 300 feet long; and (6) appurtenant facilities. The estimated average annual energy produced by the project would be 984,500 kWh operating under a net hydraulic head of 175 feet. The applicant estimates that the cost of the work to be performed under the preliminary permit would be $15,400.

k. Purpose of Project: Project power will be sold to the Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, & D2.

5 a. Type of Application: Application for Relicense (5MW or Less).

b. Project No: 1510-001.

c. Date Filed: January 29, 1987.

d. Applicant: City of Kaukauna, Wisconsin.

e. Name of Project: Kaukauna Hydro Project.

f. Location: On the Fox River near Kaukauna, Outagamie County, Wisconsin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ernest J. Mullen, General Manager, Kaukauna Electric and Water Department, 777 Island Street, Kaukauna, WI 54130, (414) 766–5721.

i. Comment Date: July 10, 1987.

j. Description of Project: The existing project is owned and operated by the City of Kaukauna, and consists of: (1) The Kaukauna City Dam, approximately 2,860 feet long and 25 feet high, which is designed as an overflow spillway with the exception of 2 Tainter gate sections, one of which contains a single 30-foot-wide gate and the second of which contains two 30-foot-wide gates; (2) a 19-acre reservoir having a normal pool elevation of 629 msl; (3) a concrete powerhouse located north of the dam and containing two 2,400-kW generators each rated at a 22-foot head; (4) a downstream tailrace; (5) the 2.4-kV generator leads connected by 68 feet of cable to two 2.4/12-kV, 3,000-kVA transformer banks in the applicant's substation adjacent to the powerhouse; and (6) appurtenant facilities. The applicant estimates that the average annual generation is 34,577 MWh. All of the power generated is utilized by the City of Kaukauna.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

6 a. Type of Application: Transfer of License (Minor).

b. Project No.: 1992–001.

c. Date Filed: January 16, 1987.

d. Applicant: Ken Willis.

e. Name of Project: Fire Mountain Lodge Hydropower Project.

f. Location: On Fern Springs Creek, within the Lassen National Forest, Tehama County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person:

Transferor: Donald R. Townsend, P.O. Box 26, Mineral, CA 96063, (916) 595–3279

Transferee: Ken Willis, Five Mountain Lodge, Mill Creek, CA 96061, (916) 258–2938

i. Comment Date: June 22, 1987.

j. Description of Proposed Transfer of Project: The applicant requests the transfer of the license from Mr. Donald R. Townsend, licensee, since the applicant has purchased the Fire Mountain Project. The project has been completed and is operational. It generates 45 kW for private use purposes. The transferee, Ken Willis, is a resident of the State of California and will comply with all the applicable laws of the State of California as required by section 9(b) of the Federal Power Act.

k. This notice also consists of the following standard paragraphs: B and C.

7 a. Type of Application: Preliminary Permit.

b. Project No.: 10233–000.

c. Date Filed: January 7, 1987.

d. Applicant: Klamath Hydroelectric Company.

e. Name of Project: Klamath Pumped Storage.

f. Location: On U.S. Bureau of Reclamation irrigation canal, in Klamath County, Oregon near the town of Malin.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Bart O'Keeffe, Mutual Energy Company, Inc., P.O. Box 60565, Sacramento, CA 95860, (916) 971–3717.

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed pumped storage project would consist of: (1) A 100-foot-high, 2,000-foot-long earth dam; (2) the Pope Reservoir enlarged to have a surface area of 150 acres, a storage capacity of 10,500 acre-feet at elevation 5,300 feet m.s.l.; (3) an intake structure; (4) a 20-foot-diameter power tunnel consisting of a 1,160-foot-high vertical section from the intake to elevation 4,250 feet and an 8,500-foot-long horizontal section extending to the powerhouse; (5) a powerhouse containing four generating units with a total installed capacity of 200 MW, producing approximately an average annual energy output of 600,000 MWh; (6) a 90-foot-high, 6,000-foot-long earth dam creating; (7) a 210-acre Lower Reservoir at the foot of Bryant Mountain with a storage capacity of 10,500-acre-feet at elevation 4,200 feet m.s.l.; (8) a 36-inch-diameter, 2-mile-long pipeline extending from the pumping plant to the Lower Reservoir; (9) a pumping plant located on the "D" canal; (10) a 3-mile-long transmission line tying into a Pacific Southwest Intertie at the Malin substation. No new access road will be needed to conduct the studies.

The applicant estimates that the cost of the studies to be conducted under the preliminary permit would be $1,000,000.

The proposed project would be located on lands under the administration of the U.S. Bureau of Land Management.

k. Purpose of Project: Project power would be sold to California private utility companies or other purchasers.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C and D2.

8 a. Type of Application: Preliminary Permit.

b. Project No.: 10325–000.

c. Date Filed: February 17, 1987.

d. Applicant: Draper Irrigation Company.

e. Name of Project: Big Willow Creek Water Treatment Plant Supply Penstock Project.

f. Location: On Big Willow Creek, near Draper, in Salt Lake County, Utah.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person:

Noel H. Ennis, President, Draper Irrigation Company, 1201 East 13200 South, Draper, UT 84020, (801) 571–1436

Alden C. Robinson, P.E., Sunrise Engineering, Inc., P.O. Box 188, Fillmore, UT 84631, (801) 743–6151

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed project would consist of: (1) A 10-foot-high, 30-foot-long concrete diversion dam across Big Willow Creek; (2) a 12-inch-diameter, 6,000-foot-long penstock; (3) a powerhouse containing a single turbine-generator unit with a rated capacity of 300 kW, operating under a head of 855 feet and producing an estimated annual generation of 1,645,329 kWh; and (4) a 50-foot-long, 12.5-kV transmission line interconnecting the project to an existing Utah Power and Light Company line. The proposed project would be located in Sections 22, 23, and 26, Township 3 South, Range 1 East, SLB&M, Salt Lake County, Utah.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

l. The applicant estimates the cost of the work to be performed under the preliminary permit would be $7,500.

9 a. Type of Application: Preliminary Permit.

b. Project No.: 10334–000.

c. Date Filed: February 25, 1987.

d. Applicant: Warren T. Jacobson.

e. Name of Project: Boulder Creek No. 2 Project.

f. Location: On Boulder Creek in Garfield County, Utah: Sections 2 & 3, T33S, R4E: SLB&M.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Warren T. Jacobson, P.O. Box 241, Fountain Green, UT 84632.

i. Comment Date: July 10, 1987.

j. Description of Project: The proposed project would be located on lands of the Dixie National Forest, would utilize tailrace canal flows of Garkane Power Association's Boulder Creek Project No. 2219, and would consist of: (1) A small diversion dam at elevation 7,600 feet m.s.l.; (2) a steel pipeline/penstock, 30 inches in diameter and about ¼ mile long; (3) a powerhouse with an installed capacity of 1,200 kW under a head of 390 feet; (4) a tailrace returning flow to Boulder Creek; (5) a 7.2-kV transmission line, about 1.25 miles long; and (6) appurtenant facilities. The applicant estimates that the average annual energy output would be 4,285,000 kWh. The applicant estimates that the cost of studies under the permit would be $7,400.

k. Purpose of Project: Project energy would be sold to the Garkane Power Association.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

10 a. Type of Application: Preliminary Permit.

b. Project No.: 10356–000.

c. Date Filed: March 20, 1987.

d. Applicant: Snoqualmie River Hydro.

e. Name of Project: Middle Fork Snoqualmie River Project.

f. Location: Part of the project is within the Snoqualmie-Mt. Baker National Forest, near the town of North Bend, in King County, Washington. Township 24N and Range 10E and 11E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Lawrence J. McMurtrey, 12122—196th NE., Redmond, WA 98053, (206) 885–3986.

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed project would consist of the following:

(A) The Middle Fork Snoqualmie River Development would consist of: (1) Seven diversion structures with inlet elevations of 2,800 feet msl; and (2) seven feeder penstocks connected to a main penstock 45,000 feet long and 96 inches in diameter.

(B) The Dingford and Cripple Creek Development would consist of: (1) Two diversion structures with inlet elevations of 2,000 feet msl; and (2) two penstocks 10,000 feet long and 48 inches in diameter.

(C) The Burntboot Creek Development would consist of: (1) A diversion structure with an inlet elevation of 2,300 feet msl; and (2) a penstock 1,000 feet long and 48 inches in diameter.

The Middle Fork Snoqualmie River, Dingford and Cripple Creek, and Burntboot Creek Developments would share a powerplant at elevation 1,200 feet msl containing three turbine/generator units with an installed capacity of 22,703 kW and a 12-mile-long, 115-kV transmission line.

(D) The Taylor River Development would consist of: (1) Eight diversion structures with inlet elevations of 2,000 feet msl; and (2) eight feeder penstocks connected to a main penstock 30,000 feet long and 60 inches in diameter.

(E) The Quartz Creek Development would consist of: (1) A diversion structure with an inlet elevation of 2,000 feet msl; and (2) a penstock 5,000 feet long and 18 inches in diameter.

The Taylor River and Quartz Creek Developments would share a powerplant at elevation 1,200 feet msl containing two turbine/generator units with an installed capacity of 7,684 kW and a 10-mile-long, 115-kV transmission line.

(F) The Pratt River Development would consist of: (1) Five diversion structures with inlet elevations of 2,400 feet msl; (2) five feeder penstocks connected to a main penstock 30,000 feet long and 84 inches in diameter leading to; (3) a powerplant at elevation 1,040 feet msl containing a single turbine/generator unit with a capacity of 11,580 kW; and (4) a 6-mile-long, 115-kV transmission line.

(G) The Granite Creek Development would consist of: (1) A diversion structure with an inlet elevation of 2,400 feet msl; (2) a penstock 7,000 feet long and 18 inches in diameter leading to: (3) a powerplant at elevation 880 feet msl containing a single turbine/generator unit with a capacity of 2,072 kW; and (4) a 3-mile-long, 115-kV transmission line.

The total installed capacity would be 44,039 kW. The applicant estimates the average annual energy production to be 192.91 GWh. The approximate cost of the studies under the permit would be $40,000.

k. Purpose of Project: Applicant intends to sell the power generated at the proposed facility.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

11 a. Type of Application: Preliminary Permit.

b. Project No.: 10359–000.

c. Date Filed: March 25, 1987.

d. Applicant: Snoqualmie River Hydro.

e. Name of Project: Young's Creek No. 1 and 2.

f. Location: In Snoqualmie-Mt. Baker National Forest on Young's Creek, in Snohomish County, Washington. Township 27N and Range 7E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Lawrence J. McMurtrey, 12122—196th NE., Redmond, WA 98053, (206) 885–3986.

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed project would consist of the following:

(A) The Young's Creek No. 1 Development would consist of: (1) A diversion structure with an inlet elevation of 2,380 feet msl; (2) a penstock 20,000 feet long and 24 inches in diameter leading to: (3) a powerplant at elevation 600 feet msl and containing a single turbine/generator unit with a capacity of 3,010 kW operating at 1,780 feet of hydraulic head; and (4) a 4-mile-long, 115-kV transmission line.

(B) The Young's Creek No. 2 Development would consist of: (1) A diversion structure with an inlet elevation of 600 feet msl; (2) a penstock 5,000 feet long and 84 inches in diameter leading to: (3) a powerplant at elevation 300 feet msl and containing a single turbine/generator unit with a capacity of 1,974 kW operating at 300 feet of hydraulic head; and (4) a 3-mile-long, 115-kV transmission line.

The applicant estimates the average annual energy production to be 26.2 GWh. The approximate cost of the studies under the permit would be $40,000.

k. Purpose of Project: Applicant intends to sell the power generated at the proposed facility.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

12 a. Type of Application: Preliminary Permit.

b. Project No.: 10360–000.

c. Date Filed: March 25, 1987.

d. Applicant: Snoqualmie River Hydro.

e. Name of Project: Upper South Fork Snoqualmie.

f. Location: In Snoqualmie-Mt. Baker National Forest on the Upper South Fork Snoqualmie River, in King County, Washington. Township 22N and Range 10E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Lawrence J. McMurtrey, 12122—196th NE., Redmond, WA 98053, (206) 885–3986.

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed project would consist of: (1) A diversion structure with an inlet elevation of 2,800 feet msl; (2) a penstock 12,000 feet long and 24 inches in diameter leading to: (3) a powerplant at elevation 2,000 feet msl and containing a single turbine/generator unit with a capacity of 1,838 kW operating at 800 feet of hydraulic head; and (4) a one-mile-long, 115-kV transmission line. The applicant estimates the average annual energy production to be 8.05 GWh. The approximate cost of the studies under the permit would be $40,000.

k. Purpose of Project. Applicant intends to sell the power generated at the proposed facility.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

13 a. Type of Application: Preliminary Permit.

b. Project No.: 10361–000.

c. Date Filed: March 25, 1987.

d. Applicant: Snoqualmie River Hydro.

e. Name of Project: North Fork Tolt River Project.

f. Location: In Snoqualmie-Mt. Baker National Forest on the North Fork Tolt River, in King County, Washington. Township 26 N and Range 6 E.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Lawrence J. McMurtrey, 12122—196th NE., Redmond, WA 98053, (206) 885–3986.

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed project would consist of: (1) Two diversion structures with inlet elevations of 1,150 feet msl; (2) a bifurcated penstock 17,000 feet long and 120 inches in diameter leading to; (3) a powerplant at elevation 400 feet msl containing a single turbine/generator unit with a capacity of 10,004 kW operating at 750 feet of hydraulic head; and (4) a 2-mile-long, 115-kV transmission line. The applicant estimates the average annual energy production to be 43.82 GWh. The approximate cost of the studies under the permit would be $40,000.

k. Purpose of Project: Applicant intends to sell the power generated at the proposed facility.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C and D2.

14 a. Type of Application: Declaration of Intention.

b. Project No: EL87–25.

c. Date Filed: March 18, 1987.

d. Applicant: Greyhound Mine.

e. Name of Project: Ronald C. Yanke.

f. Location: On Sulphur Creek, Custer County, Idaho, Sections 4, 5, and 9, T. 14 N., R. 11 E., B.M., and Sections 31 and 32, T. 15 N., R. 11 E., B.M.

g. Filed Pursuant to: Section 23(b) of the Federal Power Act, 16 U.S.C. 817(b).

h. Contact Person: Ronald C. Yanke, P.O. Box 5411, Boise, Idaho 83705.

i. Comment Date: June 22, 1987.

j. Description of Project: The proposed project would consist of: (1) A 15-foot-long, 6-foot-high diversion structure; (2) a 2,800-foot-long, 1-foot-diameter penstock; (3) a powerhouse containing one generating unit with capacity of 50 kW; (4) appurtenant facilities.

When a Declaration of Intention is filed with the Federal Energy Regulatory Commission, the Federal Power Act requires the Commission to investigate and determine if the interests of interstate or foreign commerce would be affected by the project. The Commission also determines whether or not the project: (1) Would be located on a navigable waterway; (2) would occupy or affect public lands or reservations of the United States; (3) would utilize surplus water or water power from a government dam; or (4) if applicable, has involved or would involve any construction subsequent to 1935 that may have increased or would increase the project's head or generating capacity, or have otherwise significantly modified the project's pre-1935 design or operation.

k. Purpose of Project: The proposed project would furnish electric power for the Applicant's mining and milling operation.

l. This notice also consists of the following standard paragraphs: B, C, and D2.

15 a. Type of Application: Preliminary Permit.

b. Project No.: 10280–000.

c. Date Filed: January 29, 1987.

d. Applicant: Washington Hydro Development Company.

e. Name of Project: Cumberland Creek.

f. Location: On Cumberland Creek, tributary of the Skagit River, within the Snoqualmie—Mt. Baker National Forest in Skagit County, Washington near the town of Concrete. T. 35 N., R. 6 E., sec. 23, E½, sec. 24, SW¼; sec. 25.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Lawrence J. McMurtrey, President, Washington Hydro Development Company, 12122 196th Avenue NE., Redmond, WA 98052, (206) 885–3986.

i. Comment Date: June 25, 1987.

j. Description of Project: The proposed project would consist of: (1) A 36-inch-wide diversion-intake structure at elevation 2,000 feet; (2) a 24-inch-diameter, 10,000-foot-long penstock; (3) a powerhouse containing a single generating unit with an installed capacity of 3,702 kW, producing an average annual energy output of 16.29 GWh; (4) a tailrace; (5) a 9-mile-long, 115-kV buried transmission line tying into an existing Puget Sound Power and Light Company line. No new access road will be needed to conduct the studies.

The applicant estimates that the cost of the studies to be conducted under the preliminary permit would be $40,000.

k. Purpose of Project: Project power would be sold to Puget Sound Power and Light Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

16 a. Type of Application: Preliminary Permit.

b. Project No: 10286–000.

c. Date Filed: January 29, 1987.

d. Applicant: Washington Hydro Development Company.

e. Name of Project: Lower Pressentin Creek.

f. Location: On Lower Pressentin Creek, tributary of the Skagit River, within Snoqualmie-Mt. Baker National Forest in Skagit County, Washington. T. 35 N., R. 7 E., sec. 31, W½; T. 34 N., R. 7 E., sec. 1, NE¼, E½NW¼; T. 35 N., R. 7 E., sec. 24, SE¼, E½SW¼, S½NE¼, SE¼NW¼; sec. 25, E¾; sec. 36, E¾.

i. Comment Date: June 25, 1987.

j. Description of Project: The proposed project would consist of: Two developments on tributaries of Grandy Creek. Tributary No. 1 development would consist of: (1) A 36-inch-wide concrete diversion-intake structure at elevation 2,500 feet; (2) an 18-inch-diameter, 7,000-foot-long penstock; (3) a powerhouse containing a single generating unit with an installed capacity of 2,524 kW, producing an average annual energy output of 11.05 GWh; (4) a tailrace; (5) a 4-mile-long, 115-kV transmission line tying into an existing Puget Sound Power and Light Company line; The Tributary No. 2 development would consist of: (1) a 36-inch-wide concrete diversion-intake structure at elevation 1,000 feet, (2) a 12-inch-diameter, 3,000-foot-long penstock; (3) a powerhouse containing a single generating unit with an installed capacity of 680 kW, producing an average annual energy output of 4.8 GWh; (4) a tailrace; (5) a 2-mile-long, 115-kV transmission line tying into an existing Puget Sound Power and Light Company line. No new access road will be needed to conduct the studies.

The Applicant estimates that the cost of the studies to be conducted under the preliminary permit would be $40,000.

k. Purpose of Project: Project power would be sold to Puget Sound Power and Light Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

18 a. Type of Application: New Major License (5 MW or Less).

b. Project No: 663–001.

c. Date Filed: May 4, 1984.

d. Applicant: Puerto Rico Electric Power Authority.

e. Name of Project: Rio Blanco.

f. Location: Rio Blanco River, Naguabo Municipality, Puerto Rico.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

i. Comment Date: July 10, 1987.

j. Description of Project: The existing project consists of: (1) A concrete gravity dam structure, 32 feet high and 150 feet long, including a 90-foot-long overflow spillway section; (2) four small concrete diversion structures; (3) approximately 9,300 feet of concrete pipeline, 18 to 42 inches in diameter, leading from the various diversions; (4) a 32 inch diameter riveted steel penstock, approximately 3,690 feet in length; (5) a powerhouse containing two generating units with a total capacity of 5,000 kW; (6) a concrete flume tailrace structure, approximately 210 feet long and 6 feet wide; and (7) appurtenant facilities. The average annual generation is 19 GWh. Project power is sold by the applicant to its customers. The existing project is not subject to federal takeover under sections 14 and 15 of the Federal Power Act.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

19 a. Type of Application: License (under 5 MW).

b. Project No.: 9980–000.

c. Date Filed: April 24, 1986.

d. Applicant: Hyrum City, Utah.

e. Name of Project: Blacksmith Fork Power Project No. 2.

f. Location: On Blacksmith Fork River in Cache County, Utah: Section 7 and 8, T10N, R2E; section 12, T10N, R1E: SLB&M.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Honorable Bruce E. Darley, Mayor, Hyrum City, 83 West Main, Hyrum, UT 84319.

i. Comment Date: June 19, 1987.

j. Competing Application: Project No. 9375. Date Filed: March 24, 1986. Due Date: May 29, 1987.

k. Description of Project: The proposed project would be located in the Cache National Forest and would consist of: (1) An earthfill dam, 27 feet high and 125 feet long; (2) a reservoir of minimal pondage at maximum water surface elevation 4,995 feet m.s.l.; (3) a steel penstock, 54 inches in diameter and 1.5 miles long; (4) a powerhouse with an installed capacity of 1,400 kW under a net head of 144 feet; (5) a tailrace returning flow to the Blacksmith Fork River; (6) a 12.5-kV transmission line, 400 feet long; and (7) appurtenant facilities. The Applicant estimates that the average annual energy output would be 7,560,00 kWh.

l. Purpose of Project: Project energy would be utilized by the Applicant.

m. This notice also consists of the following standard paragraphs: A4, B, C, and D1.

20 a. Type of Application: Exemption (5MW or Less).

b. Project No.: 10056–000.

c. Date Filed: August 1, 1986 and supplemented March 6, 1987.

d. Applicant: Michiana Hydroelectric Company and the Village of Bellevue, Michigan.

e. Name of Project: Bellevue Mill Dam Hydro Project.

f. Location: On Battle Creek in Bellevue, Eaton County, Michigan.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, 16 U.S.C. 2705 and 2708 as amended.

h. Contact Persons:

William Stockhousen, Michiana Hydroelectric Company, 218 W. Dunlop Street, Northville, MI 48167, 313–349–2333

Mr. Bernard Otto, Village Hall, 201 N. Main Street, Bellevue, MI 49021, 616–763–9571.

i. Comment Date: June 18, 1987.

j. Description of Project: The proposed project would consist of: (1) The existing Bellevue Mill Dam approximately 165 feet long and 16 feet high; (2) an existing 33-acre reservoir having a storage area of 82 acre-feet at an elevation of 852.5 msl; (3) a new powerhouse containing two 30-kW generator for a total installed capacity of 60 kW; (4) a tailrace; (5) a new 1,300-foot-long, 8.32-kV transmission line; and (6) appurtenant facilities. Applicants estimate that the average annual generation would be 200 MWh. Applicants hold all real estate interests necessary to develop and operate the proposed project.

k. Purpose of Project: All project energy produced would be sold to Consumers Power Company.

l. Purpose of Exemption: An exemption, if issued, gives the Exemptee

BEST COPY AVAILABLE

priority of control, development, and operation of the project under the terms of exemption from licensing, and protects the Exemptee from the permit or license applicants that would seek to take or develop the project.

m. This notice also consists of the following standard paragraphs: A3, A9, B, C, & D3a.

21 a. Type of Application: Major License (5MW or less).

b. Project No.: 10096–000.

c. Date Filed: September 23, 1986.

d. Applicant: Trafalgar Power, Inc.

e. Name of Project: Saugerties.

f. Location: Esopus Creek in Ulster County, New York.

i. Comment Date: July 13, 1987.

j. Description of Project: The proposed project would consist of: (1) An existing 32-foot-high, 346-foot-long concrete gravity dam; (2) a reservoir with a surface area of 140 acres, a storage capacity of 826 acre-feet, and a normal water surface elevation of 48.0 feet m.s.l.; (3) a new 10-foot-diameter, 45-foot-long steel penstock; (4) a new concrete powerhouse containing one generating unit with a capacity of 2,225 kW; (5) a new 60-foot-wide, 80-foot-long tailrace; (6) a new transmission line, 4,000 feet long; and (7) appurtenant facilities. The applicant estimates the average annual generation would be 7,400,000 kWh. The existing dam is owned by Houseboat Realty, Bearsville, New York.

k. Purpose of Project: Project power would be sold to the Central Hudson Gas and Electric Corporation.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

22 a. Type of Application: Exemption (5MW or less).

b. Project No.: 10113–000.

c. Date Filed: October 2, 1986.

d. Applicant: Perpetual Storage, Inc.

e. Name of Project: Whitmore Hydro Project.

f. Location: On Little Cottonwood Creek in Salt Lake County, Utah.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, (16 U.S.C. 2705 and 2708 *as amended).*

h. Contact Person: Mr. Stanley S. Postma, 106 West 500 South, Suite 101, Bountiful, UT 84010.

i. Comment Date: June 19, 1987.

j. Description of Project: The proposed project would be located on private lands leased by the applicant, would utilize and replace existing project works and would consist of: (1) An existing reinforced concrete weir diversion structure; (2) rehabilitated penstock intake works; (3) a new 48-inch-diameter steel pipeline/penstock, about 7,500 feet long; (4) an existing powerhouse to contain new generating units rated at 5,000 kW under a 550 foot head; (5) a rehabilitated tailrace returning flow to Little Cottonwood Creek; (6) an existing 12.5-kV transmission line, about 7 miles long; and (7) appurtenant facilities. The applicant estimates that the average annual energy output would be 19,154,000 kWh.

k. Purpose of Project: Project energy would continue to be utilized by the Applicant and by the Whitmore Oxygen Company; surplus energy would be sold to the Utah Power and Light Company.

l. This notice also consists of the following standard paragraphs: A5, A9, B, C, & D3a.

23 a. Type of Application: Exemption Under 5MW.

b. Project No: 10128–000.

c. Date Filed: October 22, 1986.

d. Applicant: Mr. Ivan D. Davis.

e. Name of Project: St. George River.

f. Location: On the St. George River in Waldo County, Maine.

h. Contact Person: Mr. James D. Sysko, Small Hydro East, Star Route 240, Bethel, ME 04217, (207) 824–3244.

i. Comment Date: June 19, 1987.

j. Description of Project: The proposed project would consist of: (1) A proposed inlet utilizing the existing stilling pool; (2) a proposed 18-inch-diameter penstock; (3) replacement of existing fish screen; (4) a proposed powerhouse to contain one turbine/ generator with an installed capacity of 100 kW; (5) a proposed tailrace channel; and (6) appurtenant facilities. The property is owned by the applicant. The estimated average annual energy produced by the project would be 657,000 kWh per year operating under a net hydraulic head of 154 feet.

k. Purpose of Project: Project power will be sold to the Central Maine Power Company.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, & D3a.

m. Purpose of Exemption: An exemption, if issued, gives the exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the exemptee from permit or license applicants that would seek to take or develop the project.

24 a. Type of Application: Preliminary Permit.

d. Applicant: Columbia County Partners.

e. Name of Project: Claverack Creek Project.

f. Location: On the Claverack Creek, in Columbia County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. J. Kirk Rector, 5041 S. Boabab Drive, Salt Lake City, UT 84117, (801) 272–2030.

i. Comment Date: July 10, 1987.

j. Description of Project: The proposed project would consist of: (1) An existing 200-foot-long, 12-foot-high concrete gravity dam; (2) an impoundment having a surface area of 1 acre with negligible storage and a water surface elevation of 140 feet m.s.l.; (3) a proposed intake structure; (4) a proposed 80-foot-long 40-inch-diameter steel penstock; (5) a proposed powerhouse containing one generating unit with an installed capacity of 400 kW; (6) a proposed tailrace; (7) a proposed 200-foot-long,

12.5-kV transmission line; and (8) appertenant facilities. The applicant estimates the average annual generation would be 1,600,000 kWh. The applicant intends to acquire all of the necessary property rights from the various property owners. All project energy generated would be sold to the Niagara Mohawk Power Corporation. The applicant estimates the cost of the work to be performed under the preliminary permit would be $155,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

Standard Paragraphs:

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications, must be filed in response to and in compliance with public notice of the intial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the rules of practice and procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—States, agencies established pursuant to federal law that have the authority to prepare a comprehensive plan for improving, developing, and conserving a waterway affected by the project, federal and state agencies exercising administration over fish and wildlife, flood control, navigation, irrigation, recreation, cultural and other relevant resources of the state in which the project is located, and affected Indian tribes are requested to provide comments and recommendations for terms and conditions pursuant to the Federal Power Act as amended by the Electric Consumers Protection Act of 1986, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. Recommended terms and conditions must be based on supporting technical data filed with the Commission along with the recommendations, in order to comply with the requirement in section 313(b) of the Federal Power Act, 16 U.S.C. § 825*l*(b), that Commission findings as to facts must be supported by substantial evidence.

All other federal, state, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the statutes listed above. No other formal requests will be made. Responses should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the applicant. If an agency does not respond to the Commission within the time set for filing, it will be presumed to have no comments. One copy of an agency's response must also be set to the Applicant's representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described

application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: May 12, 1987.

Kenneth F. Plumb,

*Secretary.*

**[Docket Nos. CI87-548-000 and CI87-558-000]**

## Conoco Inc.; Application

May 11, 1987.

Take notice that on April 30, 1987, Conoco Inc. (Conoco), P.O. Box 2197, Houston, Texas 77252, filed an application pursuant to sections 4 and 7 of the Natural Gas Act (15 U.S.C. 717 c and f) and Part 157 of the Commission's Regulations under the Natural Gas Act (18 CFR Part 157), for authorization to permanently abandon certificates of public convenience and necessity issued to Conoco heretofore authorizing the slaes of natural gas to Southern Natural Gas Company (Southern) under various contracts covering gas sales subject to the Commission's Natural Gas Act jurisdiction as shown in Exhibit "A". Conoco additionally requests the issuance of a permanent blanket certificate with pregranted abandonment authorizing the sale for resale of natural gas in interstate commerce from sources formerly committed to Southern. Conoco also requests abandonment of individual sales made pursuant to the requested blanket certificate upon expiration of the term of such sales.

Conoco states that these authorities are necessary to enable Conoco to implement a comprehensive settlement agreement between Conoco and Southern to settle, compromise and release certain claims arising from various contractual relationships including the mutual understanting and agreement to rescind, terminate and cancel as of April 1, 1987 the contracts covering sales for which abandonment authorization is requested.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 26, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must filed a petition to intervne in accordance with the Commission's rule.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

*Secretary.*

## Enron Gas Marketing, Application

May 11, 1987.

Take notice that on April 29, 1987, Enron Gas Marketing, Inc. (EGM), 1400 Smith Street, Houston, Texas 77002, filed in this proceeding an application pursuant to section 7 of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations requesting blanket certificate authorization for (1) Self-implementing sales for resale of certain natural gas in interstate commerce, without market restriction; (2) self-implementing sales of certain natural gas by others to EGM for resale in interstate commerce, without market restriction; and (3) self-implementing sales for resale of certain natural gas in interstate commerce, without market restriction, by producers through EGM acting as their agent. EGM also seeks pregranted abandonment of all sales for resale for which sales certificate authority is sought herein and a waiver of Parts 154 and 271 of the Commission's Regulations concerning maintenance of rate schedules. Finally, EGM requests that the Commission declare in its order issuing the requested authorizations that the Commission's NGA jurisdiction over the activities and operations of EGM is limited to the transactions for which authorization is sought in the Application.

EGM states that the purpose of its application is to permit EGM to make sales in interstate commerce for resale of gas which is available for sale to markets, but is still subject to the certificate and abandonment provisions of the Natural Gas Act, including natural

gas for which abandonment of service has been granted under section 7 of the NGA and imported natural gas, without market restriction and regardless of classification under the NGPA.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 28, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to herein must file a petition to intervene in accordance with the Commission rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

*Secretary.*

[Docket No. RP87-43-002]

## MIGC, Inc.; Proposed Changes in FERC Gas Tariff

May 11, 1987.

Take notice that on May 4, 1987, MIGC, Inc. (MIGC) tendered for filing pursuant to § 154.38(d)(4)(vi)(a) of the Commission's regulations and Ordering Paragraph (D) of the order issued March 31, 1987 in the above-captioned proceeding, a Base Tariff Rate restatement restating, effective May 1, 1987, base tariff rates reflected in MIGC's FERC Gas Tariff, Original Volume No. 1. Also included in the filing is a cost and revenue study supporting such restated base tariff rates.

MIGC states that this filing updates and restates MIGC's base cost of purchased gas included in its base tariff rates effective May 1, 1987. MIGC further states that the cost and revenue study included in its filing, which is based on the twelve months of actual experience (as annualized) ending December 31, 1986, indicates an annual revenue deficiency of $751,153 and, thus, more than adequately supports MIGC's restated base tariff rates. MIGC further states that copies of this filing were served upon all of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE, Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure. All such motions or protests should be filed on or before May 18, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

## Mountain Fuel Resources, Inc.; Tariff Filing

May 11, 1987.

Take notice that on May 4, 1987, Mountain Fuel Resources, Inc. (MRF) tendered for filing and acceptance revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, as follows:

First Revised Sheet No. 1
Seventh Revised Sheet No. 12
Eighth Revised Sheet No. 12
Sixth Revised Sheet No. 14

Seventh Revised Sheet No. 12 reflects the removal of the $0.02/Dth Moxa Arch surcharge, approved by the Commission's May 20 1986, letter order in Docket Nos. RP85-208-000 and CP80-274-011. The surcharge was to be effective from May 1, 1986, through the earlier of April 30, 1987, or until MFR has accumulated $1,400,000 by virtue of applying the surcharge. MFR has requested an effective date of May 1, 1987.

Eighth Revised Sheet No. 12 reflects a change in MFR's Commodity Base Cost of Purchased Gas As Adjusted of $(0.07001)/Dth from $2.29661/Dth to $2.22660/Dth, and a change in its Uncovered Purchased Gas Cost Adjustment of $(0.19373)/Dth from $(0.02157)/Dth, currently in effect, to $(0.21530)/Dth, resulting in a net decrease in the commodity rate change under Rate Schedule CD-1 of $0.26374/Dth. Also reflected on Eighth Revised Sheet No. 12 is a decrease in the Demand Base Cost of Purchased Gas As Adjusted of $0.00015/Mcf from $1.10944/Mcf to $1.10929/Mcf. Sixth Revised Sheet No. 14 reflects $0.00 projected incremental pricing for the June 1, 1987, through November 30, 1987, PGA period. First Revised Sheet No. 1 updates MFR's Table of Contents to First Revised Volume No. 1 to reflect changes in MFR's tariff from various filings. MFR has requested an effective date of June 1, 1987.

Copies of the filing were served upon Mountain Fuel Supply Company, MFR's sole sale-for-resale customer, and the Public Service Commissions of Utah and Wyoming.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 18, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

[Docket No. RP87-13-001]

## South Georgia Natural Gas Co.; Proposed Changes in FERC Gas Tariff

May 11, 1987.

Taken notice that South Georgia Natural Gas Company (South Georgia) on May 1, 1987 tendered for filing revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1 and First Revised Volume No. 2. The purpose of these tariff sheets is to place into effect the rates accepted, subject to refund, by the Commission's order of November 28, 1986, in Docket No. RP87-13-000, and to update the cost of gas in Docket No. RP87-13-000 to reflect the current level of purchased gas costs as represented in South Georgia's Purchased Gas Adjustment (PGA) filing which became effective January 1, 1987.

In addition, South Georgia has tendered certain revised tariff sheets with a proposed effective date of June 1, 1987, modifying the PGA provisions of its FERC Gas Tariff so as to permit purchases from suppliers other than

Southern Natural Gas Company and to provide for the treatment of nonconcurrent exchange transactions.

Copies of this filing have been served upon South Georgia's jurisdictional customers, interested state public service commissions and all parties of record.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 18, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

[Docket No. ST87-1653-000 et al.]

## Tennessee Gas Pipeline Co. et al.; Self-Implementing Transactions

May 11, 1987.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations, and sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA).[1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeling or a local distribution company pursuant to Section 284.102 of the Commission's Regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's Regulations and section 311(a)(2) of the NGPA. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and the expiration date of the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a petition to intervene with the Secretary of the Commission.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to § 284.163 of the Commission's Regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to Section 284.222 and a blanket certificate issued under §§ 284.221 of the Commission's Regulations.

A "G-S" indicates transportation by an interstate pipeline company on behalf of any shipper pursuant to a §§ 284.223 and a blanket certificate issued under §§ 284.221 of the Commission's Regulations.

A "G(LT)" or "G(LS)" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

A "G(HT)" or "G(HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

Any person desiring to be heard or to make any protest with reference to a transaction reflected in this notice should on or before May 29, 1987, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

*Secretary.*

BILLING CODE 6717-01-C

[Docket No. TA87-4-45-000,001]

**Williston Basin Interstate Pipeline Co.; Motion of Williston Basin Interstate Pipeline Co. for Waiver of Requirements To Permit an Additional Sixty Day Extension of Time To File Purchased Gas Adjustment**

May 11, 1987.

Take notice that on May 4, 1987, Williston Basin Interstate Pipeline Company (Williston Basin) filed a Motion for Waiver of Requirements to Permit an Additional Sixty Day Extension of Time to File Purchased Gas Adjustment pursuant to Rules 212 and 2008 of the Commission's rules of practice and procedure. Williston Basin requests the waiver to permit it to file its regular semi annual purchased gas adjustment (PGA) on June 30, 1987, to be effective August 1, 1987.

Williston Basin states that it is currently involved in extensive restructuring/renegotiation of gas purchase contracts with its various suppliers. Therefore, sufficient information is not currently available to make the filing required under Section 21.3.3.1 of First Revised Volume No. 1. Williston Basin believes that the additional sixty days provided by the requested extension of time will allow for the development of the information necessary to accurately reflect gas costs in the rates charged its customers. This will serve to mitigate future deferred account adjustments, thus promoting rate stability.

In the alternative, should the Commission deny the request for extension, Williston Basin submitted for filing as part of its FERC Gas Tariff the following sheets:

*First Revised Volume No. 1*

Third Revised Sheet No. 10
Second Revised Sheet No. 11

*Original Volume No. 1-A*

Second Revised Sheet No. 11
Fourth Revised Sheet No. 12

*Original Volume No. 2*

Sixth Revised Sheet No. 10
Seventh Revised Sheet No. 11

The proposed effective date of the tariff sheets is June 1, 1987.

Third Revised Sheet No. 10, Second Revised Sheet No. 11 (First Revised Volume No. 1), Sixth Revised Sheet No. 10 and Seventh Revised Sheet No. 11 (Original Volume No. 2) and the schedules in support thereof were computed in adherence to Williston Basin's PGA clause and the Commission's Rules and Regulations, except that that "proxy" price levels included in the Company's last PGA filing in Docket No. TA87-1-49-000 are reflected n the current gas cost adjustment for those gas supply sources with whom contract negotiations have not yet been completed, as the Company has no basis for specifying either the volumes to be purchased or the price to be paid where settlement has not been reached. The use of such "proxy" pricing was allowed in Docket Nos. TA85-3-49-000, TA85-3-49-001, TA86-1-49-000, TA86-1-49-001 TA86-2-49-000 and TA87-1-49-000. The changes herein reflect a cumulative gas cost adjustment for Rate Schedules G-1, SGS-1, I-1 and X-1 of a negative 16.456 cents per dkt. The surcharge adjustment for Rate Schedules G-1, SGS-1 and I-1, which also reflects "proxy" pricing as allowed in the last PGA, is a negative 6.751 cents per dkt. These changes represent a net increase in rates for Rate Schedules G-1, SGS-1 and I-1 of 12.888 cents per dkt and a net increase of 7.834 cents per dkt for Rate Schedule X-1, from currently effective rates. Rate Schedule X-5 reflects a cumulative gas cost adjustment of a negative 17.561 cents per dkt, an increase of 18.394 cents per dkt.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE, Washington, DC 20426, in accordance with the Commission's Rules 211 and 214. All such motions or protests should be filed on or before May 18, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
*Secretary.*

## Office of Hearings and Appeals

**Issuance of Decisions and Orders; Week of March 30 Through April 3, 1987**

During the week of March 30 through April 3, 1987, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

**Appeals**

*David R. Soler, 3/31/87; KFA-0078*

David R. Soler filed an Appeal from a denial by the Freedom of Information Authorizing Official of the Chicago Operations Office of the Department of Energy (DOE) of a Request for Information which he submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the documents at issue contained pre-decisional evaluative comments and were properly withheld under Exemption 5 of the FOIA. In addition, the DOE found that the Exemption 5 privilege had not been waived by limited release of the report to the contractor operating the facility. Therefore, the Appeal was denied. Important issues considered in the Decision and Order were the agency's deliberative process privilege and waiver of Exemption 5 by disclosure to a person outside the government.

*Tooze Marshall Shenker, Holloway & Duden, 3/31/87; KFA-0083*

Tooze Marshall Shenker Holloway & Duden filed an Appeal from a partial denial by the Director, Customer Service Division, of the Bonneville Power Administration of a Request for Information which the firm had submitted under the Freedom of Information Act. In considering the Appeal, the DOE generally upheld the initial determination, but found that some of the memoranda which were initially withheld under Exemption 5 did not contain deliberative information and should be released to the public. The Appeal was therefore granted in part.

**Requests for Exception**

*Jasper Oil Company, 3/31/87; KEE-0068*

Jasper Oil Company filed an Application for Exception from the requirement to file Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In evaluating the request, the DOE found that the firm had not responded to DOE's repeated requests that it provide documentation of its claim that it was experiencing hardship in filing Form EIA-782B. Accordingly, exception relief was denied.

*Kelley Williamson Company, 4/3/87; KEE-0069*

The Kelley Williamson Company filed an Application for Exception on November 18, 1986, in which it sought relief from the reporting requirements of Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In considering the request, the DOE found that the firm did not bear an unusual burden as a result of the reporting requirements. Accordingly, exception relief was denied.

*Morgan Oil Company, 3/30/87; KEE-0112*

Morgan Oil Company filed an Application for Exception from the requirement that it prepare and file Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report," and Form EIA-863,

"Petroleum Product Sales Identification Survey." In considering the Application, the DOE found that Morgan had not demonstrated that it was particularly adversely affected by the requirement that it file the Forms. Accordingly, exception relief was denied.

*Pickett Oil Company, Inc., 3/30/87; KEE–0113*

Pickett Oil Company, Inc. filed an Application for Exception from the requirement that it prepare and file Form EIA–782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In considering the Application, the DOE found that Pickett had not demonstrated that it was particularly adversely affected by the requirement that it file the Form. Accordingly, exception relief was denied.

*State of Hawaii, 4/2/87; KEE–0102*

The State of Hawaii filed an Application for Exception from the provisions of 10 CFR Parts 450 and 455. In particular, Hawaii requested that it be excepted from the requirement that to be eligible for grants under the DOE's Institutional Conservation Program (ICP), buildings must be heated or cooled by mechanical means. In considering the Application, the DOE found that many Hawaii school buildings, which together represent a majority of the State's ICP-related structures, were ineligible to receive ICP grants because they were cooled by the trade winds rather than by mechanical means. The DOE concluded that the exclusion of such a large proportion of the State's ICP-related buildings from participation in the ICP program frustrated the goals of the National Energy Conservation Policy Act and therefore imposed a gross inequity on Hawaii. Accordingly, the Application for Exception was granted.

**Motions for Discovery**

*Dane Energy Company, 4/1/87; HRD–0141, HRX–0141, KRX–0030*

The Dane Energy Company filed Motions for Discovery and for Evidentiary Hearing in connection with a Proposed Remedial Order issued to the firm by the Economic Regulatory Administration (ERA) on January 7, 1983. With respect to the Motion for Discovery, OHA found that Dane did not show that there was information in ERA's possession which would assist Dane in establishing the amount of the overcharges stemming from the alleged layered transactions or the validity of the layering rule as interpreted by the DOE. In denying the evidentiary hearing motion, the OHA found that Dane did not explain why such a hearing was necessary to decide any issue in the case. In addition, OHA ruled that the correct method of determining the amount of Dane's overcharges should be a gross profits methodology rather than a methodology of matching purchases and sales. OHA therefore required Dane to submit evidence of its total cost of crude oil and total crude oil sales revenues for the audit period in order for ERA to calculate its gross profits.

*Port Petroleum, Inc., 4/3/87; KRD–0150, KRZ–0151*

Port Petroleum, Inc. (Port) filed a Motion for Discovery and a Motion to Defer Filing a Motion for Evidentiary Hearing in connection with a Proposed Remedial Order (PRO) issued to it by the Economic Regulatory Administration (ERA) on August 13, 1985. Port sought discovery related to the administrative record and contemporaneous construction of 10 CFR Subpart L (the layering and permissible average markup regulations). The DOE denied these requests in their entirety, finding that Port had failed to show their relevance and materiality. Specifically, it was determined that Port had access to all of the materials in the official administrative records, and contemporaneous construction was not warranted because there had been no inconsistency in the DOE's interpretation of the layering regulation. The DOE also denied Port's Motion to Defer Filing a Request for Evidentiary hearing, finding no reason for such a delay. Notwithstanding this determination, the DOE permitted Port to file a Motion for Evidentiary Hearing within 15 days of the receipt of the Decision and Order.

**Refund Applications**

*Apco Oil Corporation/ Apco Quick Shop, et al., 4/2/87; RF83–149 et al.*

The DOE issued a Decision and Order concerning six Applications for Refund filed by Apco Quick Shop, *et al.* Each of the applicants had purchased refined petroleum products from Apco Oil Corporation, and each sought a portion of the settlement fund obtained by the DOE through a consent order with Apco. *Apco Oil Corp.*, 12 DOE ¶ 85,140 (1985). Each of the six applicants applied for refunds of less than $5,000 and followed the small claims procedures outlined in *Apco*. After examining the applications, the DOE concluded that each of the six firms should receive a refund based on its purchases from Apco times the volumetric per gallon refund amount, as described in the Appendix to the Decision. The total amount of refunds granted was $4,541.

*Conoco Inc./ Block Oil Company, Inc., et al., 4/2/87; RF220–265 et al.*

The DOE issued a Decision and Order concerning five Applications for Refund filed by purchasers of Conoco refined products. Each customer documented the volumes of refined products that it purchased from Conoco and requested a refund based upon the small claims procedures outlined in *Conoco Inc.*, 13 DOE ¶ 85,316 (1985). After examining the claims, the DOE concluded that all five applicants should receive refunds based on the volumetric refund amount established in *Conoco*. The total amount of refunds granted was $1,763.

*First Nationwide Corporation, et al., 3/30/87; RF270–1758 et al.*

The DOE issued a decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE Stripper Well Exemption litigation. The DOE approved the purchase volumes of refined petroleum products claimed by twelve trucking companies and will use those volumes as a basis for the refund that will ultimately be issued to the twelve firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the twelve firms' refunds will be determined at a later date.

*Faribault Transportation Company, Inc., et al., 3/31/87; RF270–593 et al.*

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE Stripper Well Exemption litigation. The DOE approved the purchase volumes of refined petroleum products claimed by twelve trucking companies and will use those volumes as a basis for the refund that will ultimately be issued to the six firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the twelve firms' refunds will be determined at a later date.

*Gary Energy Corporation/Vangas, Inc., 3/30/87; RF47–21*

The DOE issued a supplemental Decision and Order granting Vangas, Inc., an additional refund from the Gary Energy Corporation deposit escrow account. The additional refund of $4,225 in principal was granted after it appeared that the refund approved for the firm in a Decision and Order issued on March 23, 1987, had been understated.

*Gulf Oil Corporation/B. J. McAdams, Inc., et al., 3/30/87; RF40–3679 et al.*

The DOE issued a Supplemental Decision and Order concerning six Applications for Refund filed in the Gulf Oil Corporation special refund proceeding. The Decision corrected the interest and total refund amounts calculated for six of the applicants listed in the Appendix to *Gulf Oil Corp./ Laurens Glass*, 15 DOE ¶ 85,415 (1987). The refunds totaled $42,718, representing $34,514 in principal and $8,204 in interest.

*Gulf Oil Corporation/Morris Oil Company, et al., 4/3/87; RF40–3574 et al.*

In accordance with the procedures outlined in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984), and after examining the evidence and the supporting documentation submitted, the DOE issued a Decision and Order granting seven applications for refund from the Gulf Oil Corporation escrow account. These refund totalled $21,867, representing $17,667 in principal plus $4,200 in interest.

*Lewtex Oil & Gas Corporation/Enterprise Products Company, 4/2/87; RF9–2*

Enterprise Products Company filed an Application for Refund in the Lewtex Oil Gas Corporation special refund proceeding. The request for a refund of more than $5,000 was based upon the claim that Enterprise had purchased 3,161,251 gallons of mixed LPGs from Lewtex. However, Enterprise failed to demonstrate that it had experienced any economic injury as a result of its purchases. As a result the DOE limited the Enterprise refund to $5,000, plus accrued interest of $4,930.

*Macmillan Ring-Free Oil Co. Inc./Cool Fuel, Inc., Delta Petroleum Company, Inc., Armolene Oil Company, 3/31/87; RF217–1, RF217–2, RF217–4*

The DOE issued a Decision and Order concerning three Applications for refund in the Macmillan Ring-Free Oil Co., Inc. special refund proceeding. Macmillan Ring-Free Oil Co., Inc., 13 DOE ¶ 85,165 (1985). Each applicant documented the volumes of petroleum products purchased from Macmillan and claimed a refund of less than $5,000. After examining the applications and supporting documentation, the DOE approved refunds totaling $12,857, representing $10,624 in principal and $2,233 in accrued interest.

*Marathon Petroleum Company/A. L. Ross & Sons, Inc., et al., 3/30/87; RF250–2852 et al.*

The DOE issued a Decision and Order concerning 60 Applications for Refund filed by resellers of products covered by a consent order that the agency entered into with Marathon Petroleum Company. Each applicant submitted information indicating the volume of the Marathon purchases, and none requested a refund greater than the $5,000 small claims refund amount. The sum of the refunds approved in this Decision is $80,070, representing $74,074 in principal and $5,990 in interest.

*Marathon Petroleum Company/J&L Oil, Inc., 4/13/87; RF250–2398, RF250–2399*

The DOE issued a Decision and Order concerning two Applications for Refund filed by J&L Oil, Inc. (J&L), a reseller of Marathon covered products. Although the firm's purchase of distillates and motor gasoline from Marathon during the consent order period exceeded the threshold refund level established in *Marathon Petroleum Co.*, J&L elected to file its refund applications in accordance with procedures for filing claims of less than $50,000 under the 35 percent presumption method outlined in the Marathon decision. After examining the evidence and supporting data submitted by the firm, the DOE concluded that J&L should receive a refund of $49,999.99 in principal and $3,403.89 in accrued interest for a total refund of $53,403.88.

*Marathon Petroleum Company/Kare Oils, Inc., Forest City Oil Co., Inc., Charles P. Addis, 4/3/87, RF250–621, RF250–622, RF250–702*

The DOE issued a Decision and Order concerning three Applications for Refund filed on behalf of Kare Oils, Inc., Forest City Oil Co., Inc., and Charles P. Addis, purchasers of products covered by a consent order that the agency entered into with Marathon Petroleum Company. Because the three firms are under common ownership, the DOE determined that their claims should be consolidated for purposes of analysis. Under the medium-range presumption of injury, refunds totaling $8,300 in principal and $711 in interest were approved for the three firms on the basis of 35 percent of their combined allocable shares.

*Marathon Petroleum Company/Sellers Oil Company, Inc., 3/31/87, RF250–1298*

The DOE issued a Decision and Order concerning an Application for Refund filed on behalf of Sellers Oil Company, Inc. in the Marathon Petroleum Company refund proceeding. According to the procedures outlined in *Marathon Petroleum Co.*, 14 DOE ¶ 85,289 (1986), Sellers demonstrated that it indirectly purchased 1,841,560 gallons of covered product from Marathon through Southwest Georgia Oil Company of Bainbridge, Georgia, a direct Marathon customer. Since the agency granted Southwest a refund under the 35 percent (medium-range) presumption of injury in *Marathon Petroleum Co./Southwest Georgia Oil Co.*, 15 DOE ¶ 85,328 (1987), there was no conclusive finding that Southwest absorbed all of the alleged overcharges. Therefore, Sellers is eligible to receive a small claims refund in this proceeding. Sellers will receive its full allocable share of $773 in principal plus $0 in accrued interest.

*Marathon Petroleum Company/ Smith-Shafer Oil Company, 4/3/87; RF250–2385, RF250–2386.*

The DOE issued a Decision and Order concerning two Applications for Refund filed by Smith-Shafer Oil, Inc. (Smith-Shafer), a reseller of Marathon covered products. Although the firm's purchase of distillates and motor gasoline from Marathon during the consent order period exceeded the threshold refund level established in *Marathon Petroleum Co.*, Smith-Shafer elected to file its refund applications in accordance with procedures for filing claims of less than $50,000 under the 35 percent presumption method outlined in the Marathon decision. After examining the evidence and supporting data submitted by the firm, the DOE concluded that Smith-Shafer should receive a refund of $10,147.24 in principal and $690.25 in accrued interest for a total refund of $1,838.49.

*Market Transport, Ltd, et al., 4/1/87; RF270–1787 et al.*

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE Stripper Well Exemption litigation. The DOE approved the purchase volumes of refined petroleum products claimed by twelve trucking companies and will use those volumes as a basis for the refund that will ultimately be issued to the twelve firms. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amounts of the twelve firms' refunds will be determined at a later date.

*Mobil Oil Corporation/ Ambler Mobil Service, et al., 4/2/87; RF225–7540 et al.*

The DOE issued a Decision granting 49 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in the *Mobil* decision. *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $24,208, representing $19,946 in principal and $4,262 in interest.

*Mobil Oil Corporation/Bentz Oil Company, et al., 3/31/87; RF225–8344 et al.*

The DOE issued a Decision granting 39 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in the *Mobil* decision. *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $61,931, representing $51,020 in principal and $10,911 in interest.

*National Helium Corp./Nevada, 4/2/87; RQ3–351*

The DOE issued a Decision approving the second-stage refund application submitted by the State of Nevada in the National Helium Corp. refund proceeding. The State will use $110,857 for Energy Extension services. The funds will be used for workshops, publications, public service announcements, a ride-share hotline for Las Vegas commuters, and National Energy Education Day activities. Nevada may not use these oil overcharge monies for energy education activities for grades K–12 because the students would not have been purchasers of refined petroleum products during the period of price controls, 1973–1981.

*National Helium Corp./New Jersey, 4/3/87; RQ3–381*

The DOE issued a Decision approving the second-stage refund plan of New Jersey for use of funds from the National Helium Corp. escrow account. New Jersey stated that it planned to use its remaining share of National Helium funds, $175,001 plus accrued interest, to expand the state's ridesharing and vanpooling program. The DOE found that New Jersey's plan would reduce motorists' consumption of motor gasoline, thereby providing indirect restitution to injured consumers of refined petroleum products. Accordingly, New Jersey was granted $344,794 ($175,001 principal plus $169,793 interest) for the program.

*Standard Oil Company (Indiana)/North Dakota, Coline Gasoline Corporation/ North Dakota, Vickers Energy Corporation/North Dakota, 3/31/87, RQ251–350, RQ1–352, RQ2–352*

The DOE issued a Decision and Order approving the second-stage refund application submitted by the State of North Dakota for use of funds from the Standard Oil Company (Indiana), Coline Gasoline Corp. and Vickers Energy Corp. escrow accounts. North Dakota stated that it planned to use $421,002 plus accrued interest to supplement operational funding of three city bus systems and to subsidize state-wide transportation services that benefit the elderly and handicapped. The DOE found that North Dakota's plan would make restitution to injured consumers of refined petroleum products. The total amount of the second-stage funds released to North Dakota was $443,602.

*Standard Oil Company (Indiana)/Oglala Sioux Tribe, 3/31/87, RQ251–325, RQ251–326*

The Oglala Sioux Tribe filed a second-stage refund application with the Office of Hearings and Appeals, pursuant to a consent order entered into with Standard Oil Co. (Indiana) (Amoco). The Tribe proposed to fund a home energy audit program for all residents of the Pine Ridge Reservation. The application was granted.

**Dismissals**

## Implementation of Special Refund Procedures

**AGENCY:** Office of Hearings and Appeals, Department of Energy.

**ACTION:** Notice of Implementation of Special Refund Procedures.

**SUMMARY:** The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding a $5 million consent order fund to members of the public. This money is being held in escrow following the settlement of an enforcement proceeding involving Total Petroleum, Inc. of Denver, Colorado (KEF-0061).

**DATE AND ADDRESS:** Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to Total Petroleum, Inc. Consent Order Proceeding, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to Case No. KEF-0061.

**FOR FURTHER INFORMATION CONTACT:** Richard W. Dugan, Associate Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-2860.

**SUPPLEMENTARY INFORMATION:** In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set forth below. The Proposed Decision relates to a consent order entered into by Total Petroleum, Inc. of Denver, Colorado and the DOE which settled a number of outstanding enforcement issues involving Total Petroleum, Inc. and Vickers Petroleum, Inc., a petroleum products reseller acquired by Total in October 1980. Among the issues settled by the consent order was Total's alleged non-compliance with certain provisions of the Crude Oil Entitlements Program, 10 CFR 211.67. The consent order also settled Total's possible regulatory violations in sales of certain refined petroleum products during the period September 1, 1973 through October 31, 1980.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively formulated to distribute the escrow account funded by Total pursuant to the consent order. The DOE has tentatively established procedures under which purchasers of Total motor gasoline, No. 2 heating oil, and No. 2-D diesel fuel during the period September 1, 1973 through October 31, 1980 may file claims for refunds. In addition, purchasers of crude oil and refined petroleum products may apply for refunds in accordance with the DOE Modified Statement of Restitutionary Policy concerning crude oil overcharges. 51 FR 27899 (August 4, 1986). Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the **Federal Register**, and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection between the hours of 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals located in Room 1E-234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: May 8, 1987.
George B. Breznay,
*Director, Office of Hearings and Appeals.*

**Proposed Decision and Order of the Department of Energy**

*Implementation of Special Refund Procedures*

May 8, 1987.

Name of Firm: Total Petroleum, Inc.
Date of Filing: October 2, 1986.
Case Number: KEF-0061.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulated and implement special refund procedures in order to remedy the effects of alleged violations of the DOE regulations. *See* 10 C.F.R. Part 205, Subpart V. On October 2, 1986, the ERA requested that the OHA formulate procedures to distribute $5 million which the DOE received pursuant to a Consent Order entered into by Total Petroleum, Inc. (Total) and the DOE.

The general guidelines which the OHA may use to formulate and implement a plan to distribute funds are set forth in 10 C.F.R. Part 205, Subpart V. The Subpart V process may be used in situations where the DOE cannot readily identify the persons who may have been injured as a result of alleged or adjudicated violations or ascertain the amount of each person's injuries. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds, see *Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

We have considered the ERA's request to implement Subpart V procedures with respect to the funds received from Total and have determined that such procedures are appropriate. Accordingly, we will grant the ERA's request. This Proposed Decision and Order sets forth the OHA's tentative plan to distribute these funds. Comments are solicited.

**I. Background**

During the period January 1, 1973 through January 27, 1981, Total engaged in the production, importation, sale and refining of crude oil, the sale of refined petroleum products, and the extraction, fractionation, and sale of natural gas liquids and natural gas liquid products. Total was therefore subject to the federal petroleum price and allocation regulations.

On June 12, 1986, a Consent Order was executed between Total and the DOE which resolved a number of outstanding enforcement issues involving Total and Vickers Petroleum, Inc. (Vickers), a petroleum products reseller which was acquired by Total in October 1980.[1] The Consent Order

[1] These issues were:

(i) Allegations in a Proposed Remedial Order which the ERA issued to Total on April 25, 1985 alleging non-compliance with certain provisions of

Continued

was finalized on August 5, 1986. Under the terms of the settlement, Total paid $5 million to the DOE. The Consent Order states that the DOE has made no formal findings of violation and that Total does not admit it has committed any regulatory violations. Of the settlement fund, now held in an interest-bearing escrow account maintained by the Department of the Treasury, $2 million is intended to resolve all claims concerning Total's possible crude oil violations. Consent Order ¶ 402. The remaining $3 million is attributable to issues regarding Total's sale of refined products. *Id.* Accordingly, we propose to establish two refund pools, one for crude oil and one for refined products.

**II. Proposed Refund Procedures for Crude Oil Pool**

As indicated above, Total remitted $2 million to the DOE to settle alleged crude oil regulatory violations. Therefore, we propose that a portion of the settlement fund equivalent to this amount (plus interest) be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges issued on July 26, 1986, 51 Fed. Reg. 27899 (August 4, 1986) (hereinafter referred to as "the DOE Policy").[2] Under that policy, up to 20 percent of alleged crude oil violation amounts will be reserved to satisfy valid claims by eligible purchasers of crude oil and refined petroleum products. Remaining funds are to be disbursed to the state and federal governments for indirect restitution, also in accordance with the DOE Policy. In the present case, we have decided to reserve the full 20 percent—$400,000—of the alleged crude oil violation amount, plus a proportionate share of the accrued interest, for direct refunds to purchasers of refined petroleum products and crude oil who prove that they were injured by these alleged crude oil violations.[3]

The process which the OHA will use to evaluate claims based on alleged crude oil violations will be modeled after the process the OHA has used to evaluate claims based on alleged refined product overcharges pursuant to 10 C.F.R. Part 205, Subpart V. *See Mountain Fuel Supply Co.*, 14 DOE ¶ 85,475 (1986).

As in non-crude oil cases, applicants will be required to document their purchase volumes and to prove that they were injured by the alleged violations (i.e., that they did not pass on alleged overcharges to their own customers). We propose to utilize the standards for showing injury which the OHA has developed in analyzing non-crude oil claims. *See, e.g., Dorchester Gas Corp.*, 14 DOE ¶ 85,240 (1986). These standards include a presumption that end-users and ultimate consumers whose businesses are unrelated to the petroleum industry absorbed the increased costs resulting from a consent order firm's alleged overcharges. *See A. Tarricone, Inc.*, 15 DOE ¶ _____ No. KEF-0049 (April 15, 1987) (*Tarricone*); *O.B. Mobley, Jr.*, 16 DOE ¶ _____ No. HEF-0498 (May 4, 1987) (*Mobley*). Reseller and retailer claimants must submit detailed evidence of injury, and may not rely upon the presumptions of injury utilized in refund cases involving refined petroleum products. *Id.* They can, however, use econometric evidence of the type used in the OHA Report in *In Re: The Department of Energy Stripper Well Exemption Litigation*, 6 Fed. Energy Guidelines ¶ 90,507.

Refunds to eligible claimants will be calculated on the basis of a volumetric refund amount derived by dividing the money available in the crude oil pool ($2 million) by the total consumption of petroleum products in the United States during the period of price controls (2,020,997,335,000 gallons). The crude oil volumetric refund amount in this proceeding is $0.0000009896. In addition, after all valid claims are paid, unclaimed funds from the 20 percent claims reserve will be divided equally between federal and state governments. The federal government's share of the unclaimed funds will ultimately be deposited into the general fund of the Treasury of the United States.

We propose that the remaining 80 percent of the crude oil funds—$1,600,000—be disbursed to the federal and state governments for indirect restitution. We propose to direct the DOE's Office of the Controller to segregate this amount and distribute $400,000 plus appropriate interest to the states and $1,200,000 plus appropriate interest to the federal government.[4] Refunds to the states will be in proportion to the consumption of petroleum products in each state during the period of price controls. The share (ratio) of the funds in the state account which each state will receive if these procedures are adopted is contained in Appendix B to the Settlement Agreement. These funds will be subject to the same limitations and reporting requirements as all other crude oil monies received by the states under the Settlement Agreement.

**III. Proposed Refund Procedures for Refined Product Pool**

Total remitted $3 million to the DOE to settle allegations regarding its sales of refined products. This portion of the settlement fund (plus interest) should be distributed to wholesale customers of Total who purchased motor gasoline and No. 2 oils (No. 2 heating oil and No. 2-D diesel fuel) from the firm between September 1, 1973 and October 31, 1980 (hereinafter referred to as the consent order period).[5] The principal non-crude oil issue resolved by the Consent Order pertained to Total's pricing of motor gasoline and No. 2 oils in sales to its wholesale customers. This matter was the subject of an earlier Consent Order with which Total did not comply (*see* n.1.). The dispute involving Total's Compliance with that earlier Consent Order is specifically mentioned as an issue which is resolved by the current Consent Order. ¶ 501. *See also* 51 FR 22860 (June 23, 1986) (Notice of Proposed Consent Order). Moreover, the amount of money whith Total originally agreed to remit to the DOE in settlement of claims regarding its wholesale sales of motor gasoline and No. 2 oils, $2 million, plus the interest which accrued on this amount from the date on which it should

---

the Crude Oil Entitlements Program, 10 C.F.R. § 211.67.

(ii) Total's compliance with a Consent Order executed in January 1981, requiring Total to make restitution for alleged overcharges by implementing a price rollback in its retail sales of motor gasoline and paying $2 million to the DOE with respect to its wholesale sales of motor gasoline, No. 2 heating oil, and No. 2-D diesel fuel during the period from September 1, 1973 through October 31, 1980. Total implemented the price rollback but did not remit the $2 millions to the DOE.

(iii) Vicker's compliance with a Consent Order requiring it to refund $2,350,000 to the DOE and to implement a price rollback of $6,300,000 in its retail sales of motor gasoline. Vickers remitted $2,350,000 to the DOE and implemented a price rollback. However, the ERA and Vickers disagreed as to whether the firm refunded the entire amount required under the Consent Order.

[2] In the Order implementing the DOE Policy, the OHA solicited comments and objections regarding the proper application of the DOE Policy to OHA refund proceedings involving alleged crude oil violations. On April 6, 1987, the OHA issued a notice which analyzes the comments that were submitted and explains the procedures which the Office will follow in processing applications filed under the Subpart V regulations for refunds of the crude oil overcharge funds. 52 Fed. Reg. 11737 (April 10, 1987).

[3] On July 7, 1986, the United States District Court for the District of Kansas approved the Stripper Well Settlement Agreement in *In Re: The Department of Energy Stripper Well Exemption Litigation*, M.D.L. No. 378, 3 Fed. Energy Guidelines ¶ 26,563. That Agreement resolves a number of matters, including the distribution of funds collected by the Court and the distribution of alleged crude oil violation amounts collected by the DOE in order cases. Under the Settlement Agreement, firms which apply for a portion of the Stripper Well Exemption Litigation funds generally must sign a waiver releasing their claims to a portion of the crude oil funds to be distributed by the OHA. Settlement Agreement, Part III.

[4] This distribution reflects a ratio of 25 percent of the state governments and 75 percent of the federal government. Under the terms of the Settlement Agreement, the states received an advance of $266 million from funds which would otherwise have been disbursed to the DOE. In order to reimburse the DOE for one-half of the advance, the Settlement Agreement provides that for amounts which the OHA transfers to the state and federal governments in excess of $100 million, the DOE shall receive 75 percent and the states shall receive 25 percent. This arrangement shall continue until the OHA has distributed the next $400 million. Settlement Agreement, Paragraph II.B.3.c.ii. The first transfer of funds to the states by the OHA occurred on August 7, 1986, when the OHA transferred $104,081,950.61 to the state and federal governments. Stripper Well Exemption Litigation, 14 DOE ¶ 85,382 (1986). The $4 million in excess of $100 million was disbursed 75 percent to the federal government and 25 percent to the states. Under the Agreement, the next $200 million, including the $316 million disbursed to the states and federal government in *Torricone* and the $9.87 million disbursed in *Mobley*, will be disbursed using the 75/25 percent formula.

[5] Notwithstanding the period of time encompassed by the consent order period, Total customers will only be eligible to receive refunds for their purchases of No. 2 oils through June 30, 1976, the last day on which these products were subject to federal price controls. *See* 41 FR 24516 (June 16, 1976).

have been remitted to the DOE, totals more than the $3 million of available product-related funds.[6] We have therefore determined that the entire $3 million should be available for distribution to Total's wholesale customers.

*A. Eligible Claimants*

We propose that the funds in the refined product pool be distributed to claimants who can satisfactorily demonstrate that they were injured by Total's alleged regulatory violations in wholesale sales of motor gasoline and/or No. 2 oils during the relevant period.

During the consent order period, Total sold to three groups of wholesale customers. *See* Letter dated November 3, 1986 from L.C. Ross, Total's Vice-President, to Janice Pliner, OHA staff analyst. First, Total sold petroleum products to customers of its Alma, Michigan refinery throughout the entire consent order period. Second, on April 1, 1978, Total acquired another refinery located in Arkansas City, Kansas, from APCO Petroleum Corporation, and began selling to customers of that refinery. Finally, on October 2, 1980, Total purchased Vickers and began selling to Vickers' wholesale customers. We propose that customers in all three groups be eligible to apply for refunds in this proceeding. However, customers who purchased product from the former APCO refinery or who were Vickers' customers may only apply for refunds for the periods beginning April 1, 1978 or October 2, 1980, respectively. Prior to those dates, Total had no relationship with those customers. In addition, as we previously stated, no refunds will be granted for purchases of No. 2 oils made after June 30, 1978. The following chart depicts these parameters.

| Site of purchase | Dates of refund eligibility motor gasoline | No. 2 oils |
|---|---|---|
| Total refinery. | 9/1/73–10/31/80 | 9/1/73–6/30/76 |
| Former APCO refinery. | 4/1/78–10/31/80 | Not eligible |
| Former Vickers refinery. | 10/2/80–10/31/80 | Not eligible |

[6] While the question of the accuracy of the price rollback implemented by Vickers during the period of controls is also a matter resolved by the current Consent Order, we do not believe that setting aside anyof the fund for retail purchasers of Vickers' motor gasoline is appropriate in this case. From the language in the Consent Order, it appears that the issue was simply closed by the execution of the settlement. Moreover, it is indisputed that money has already been refunded to Vickers' customers through the price rollback. In contrast, Total's wholesale customers have received no refunds to date for the pricing violations which they allegedly experienced. Thus, we believe that the entire fund should be allocated for claims arising from matters intended to be settled in the January 1981 Consent Order with Total.

*B. Showing of Injury*

To demonstrate injury, a reseller claimant (including refiners and retailers) must provide evidence that it would have maintained its prices for the specified petroleum products purchased from Total at the same level had the alleged overcharges not occurred. Accordingly, any claimant should show that at the time it purchased petroleum products from Total, market conditions would not permit it to increase its prices to pass through the additional costs associated with the alleged overcharges. *Office of Enforcement*, 10 DOE ¶ 85,056 (1983); *Office of Enforcement*, 10 DOE ¶ 85,029 (1982). In addition, a reseller must show that it had "banks" of unrecovered increased product costs from the date of purchase through decontrol in order to demonstrate that it did not subsequently recover these costs by increasing its prices.[7]

The maintenance of a bank, however, will not automatically establish injury. *See Tenneco Oil Co./Chevron U.S.A., Inc.*, 10 DOE ¶ 85,014 (1982).

1. Applicants Claiming a Refund of $5,00 or Less

Making a detailed showing of injury may be too complicated and burdensome for resellers who purchased relatively small amounts of covered products from Total. For example, such firms may have limited accounting the data-retrieval capabilities and may therefore be unable to produce the records necessary to prove that they did not pass on the alleged overcharges to their own customers. The cost to the applicant and to the government of compiling and analyzing information sufficient to make a detailed showing of injury should also not exceed the amount of the refund to be gained. We thus propose to adopt a small claims presumption in this case. *See, e.g., Aztex Energy Co.*, 12 DOE ¶ 85,116 (1984); *Marion Corp.*, 12 DOE ¶ 85,014 (1984) (*Marion*). Any reseller applicant claiming a refund of $5,000 or less, based upon the volumetric refund amount established below, need not make a detailed showing of injury in order to be eligible to receive a refund.

2. Spot Purchasers

We further propose that resellers that made spot purchases from Total be ineligible to receive a refund, even a refund below the threshold level, unless they can make a showing that rebuts the presumption that they were not injured. Spot purchasers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot purchases unless they were able to pass through the full amount of the alleged overcharges to their own customers. *See Vickers*, 8 DOE at 85,396–07.

[7] Retailer applicants will not be required to submit bank information in connection with sales made after July 15, 1979, the date on which the amendment to the price rule eliminating the banking requirement for retailers became effective. 44 Fed. Reg. 42541 (July 19, 1979). Reseller applicants will not be required to submit bank information for the period beginning May 1, 1980, with the exception of the firms who elected not to be subject to the new price rules which became effective on that date. 45 FR 29546 (May 2, 1980); 45 FR 81255 (December 10, 1980).

Accordingly, any reseller claimant who was a spot purchaser must submit evidence to rebut the spot purchaser presumption and establish the extent to which it was injured as a result of its spot purchase(s).

3. End-Users

We also propose to adopt a finding that end-users (or ultimate consumers) of Total motor gasoline and No. 2 oils whose businesses are unrelated to the petroleum industry were injured by the alleged overcharges addressed in this proceeding. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the time covered by the Consent Order, and thus were not required to keep records which justified selling price increases by reference to cost increases. For these reasons, an analysis of the impact of the alleged overcharges on the final price of non-petroleum goods and services would be beyond the scope of a special refund proceeding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983); *see also Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 (1984), and cases cited therein. Thus, in order to qualify for a refund from the Total consent order fund, end-users who purchased Total motor gasoline and No. 2 oils need only document their purchases from the firm.

4. Regulated Firms

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or by the terms of a cooperative agreement not be required to demonstrate that they absorbed the overcharges alleged by the ERA. In the case of regulated firms, e.g., public utilities, any overcharges incurred as a result of Total's alleged violations of the DOE regulations would routinely be passed through to the utilities' customers. Similarly, any refunds received by such firms should be reflected in the rates they are allowed to charge their customers. Refunds to agricultural cooperatives should likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) and *Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982). Instead, those firms should provide with their application a full explanation of the manner in which refunds will be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money. Sales by a cooperative to non-members, however, will be treated the same as sales by any other reseller.

*C. Calculation of Refund Amounts*

We propose to use a volumetric method to divide the Total refined products refund pool among the applicants who demonstrate that they are eligible to receive refunds. In this case, there will be a separate volumetric refund amount for motor gasoline purchases and for No. 2 oil purchases.

The January 1981 Consent Order stated that $1,400,000 of the $2 million consent order fund should be used for refunds to motor gasoline purchasers and $600,000 should go to No. 2 oil purchasers. Consent Order at 4. This information, when considered in conjunction with Total sales volume data, leads us to the conclusion that the per gallon amount of alleged overcharges in Total's sales of motor gasoline differs from the per gallon alleged overcharges in No. 2 oil sales. We thus propose to utilize two different volumetric refund amounts in order to distribute the refund monies to firms in a manner which more closely approximates claimant's actual injury. *See, e.g., E.B. Lynn Oil Co.*, 14 DOE ¶ 85,228 (1986); *Blex Oil, Inc.*, 13 DOE ¶ 85,019 (1985).

We have divided the Total refined product refund pool into two pools in proportion to the manner in which the January 1981 settlement amount was divided. Thus, the refund pool for motor gasoline purchases is $2,100,000 and the refund pool for No. 2 oil purchases is $600,000. We have determined the volumetric refund factors by dividing each of Total's refind product refund pools by the estimated total volume of applicable product(s) sold by Total to its wholesale customers during the relevant period. This results in refund amounts of $0.000651 ($2,100,000 divided by 3,225,066,372) for each gallon of motor gasoline and $0.002652 ($600,000 divided by 339,339,279 gallons) for each gallon of No. 2 oils which an applicant purchased from Total during the relevant period. In addition, the interest which has accrued on the money in escrow will be added to the refund of each successful applicant in proportion to the size of its refund.

As in previous cases, we propose to establish a minimum amount of $15 for refund claims. We have found through our experience in prior refund cases that the cost of processing claims in which refunds are sought for amounts less than $15 outweighs the benefits of restitution in those situations. *See e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 at 85,225 (1982). *See also* 10 C.F.R. § 205.286(b).

Refund applications in this proceeding should not be filed until issuance of a final Decision and Order. Detailed procedures for filing applications will be provided in the final Decision and Order. Before disposing any funds received, we intend to publicize the distribution process and to provide an opportunity for any affected party to file a claim. Any funds remaining in the refined product pools after all refund applications have been considered will be distributed to the state and federal governments in accordance with the provisions of the Petroleum Overcharge Distribution and Restitution Act of 1986, Pub. L. 99-509, Title III, Fed. Energy Guidelines ¶ 11,700.

It is therefore ordered that: The refund amount remitted to the Department of Energy by Total Petroleum, Inc. pursuant to the Consent Order finalized on August 5, 1986 will be distributed in accordance with the foregoing Decision.

### Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared April 27, 1987 through May 1, 1987 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act (CAA) and section 102(2)(c) of the National Environmental Policy Act (NEPA) as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5076/73. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 24, 1987 (52 FR 13749).

### Draft EISs

*ERP No. D-BLM-L70007-ID*, Rating EC2, Pocatello Resource Area, Resource Mgmt. Plan, ID. SUMMARY: EPA has concerns on how Best Management Practices will be implemented and the water quality and fisheries effects from management practices

*ERP No. DS-CDB-K85038-AZ*, Rating EC2, Rio Nuevo—North Redevelopment Project, Land Use Changes and New Information, CDBG, AZ. SUMMARY: EPA requested that the final supplemental EIS assess whether: (1) There is any soil or water contamination on the project site due to past waste disposal practices at a paint and varnish company; and (2) the project complies with the draft Air Quality Plan for Pima County, Arizona

*ERP No. D-COE-C32033-NJ*, Rating EC2, Port Jersey Channel Navigation Improvement Plan, NJ. SUMMARY: EPA's review concluded that the proposed channel dredging would have no significant impacts on the channel environment, however,

BEST COPY AVAILABLE

updated bioassay and bioaccumulation testing is required for approval of ocean disposal of the dredged material

*ERP No. D–ICC–D53006–00,* Rating EC2, Georgetown Subdivision (Docket No. AB–19) (Sub–No. 112) Rail Line Abandonment, Milepost 0.23 to Milepost 10.96, License, MD and DC. SUMMARY: EPA has concerns and requested additional information on mitigation for impacts resulting from the project, energy projections, impacts of truck traffic, and impacts of possible hazardous wastes

**Final EISs**

*ERP No. F–FHW–F40130–MN,* New US 10 Construction and Reconstruction, Egret Blvd. in Coon Rapids to I–35W in Moundsview, 404 Permit, MN. SUMMARY: EPA has concerns regarding the lack of specific wetland or noise mitigation for the second and third phases of this project. A commitment to future coordination was requested. EPA also expressed concerns regarding the value of the proposed wetland mitigation for phase one

**Amended Notice**

The following review should have appeared in the FR Notice published on May 1, 1987.

*ERP No. D–AFS–J61069–CO,* Rating EC2, East Fork Ski Area Development, Special Use Permit, San Juan Nat'l Forest, 404 Permit, CO. SUMMARY: EPA has some concerns with wetlands disturbance and portions of air quality modeling and requests additional discussion and modification of modeling methodology to eliminate them

Dated: May 12, 1987.

## Florida; Reports of Performance Under FY 87 Section 105 Grants

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of availability of grantee performance evaluation reports.

**SUMMARY:** EPA's grant regulations (40 CFR 35.150) require the Agency to evaluate the performance of agencies which receive grants. EPA's regulations for regional consistency (40 CFR 56.7) require that the Agency notify the public of the availability of the reports of such evaluations. EPA recently performed midyear evaluations of the Florida Department of Environmental Regulation, the State agency, and one of the local agencies in the State, the Pinellas County Department of Environmental Management. These midyear audits were conducted to assess the agencies' performance under the grants made to them by EPA pursuant to Section 105 of the Clean Air Act. The audits were also conducted as part of the National Air Audit System (NAAS) established by EPA in an effort to assure nationwide consistency in the evaluation of state and local air pollution programs. EPA Region IV has prepared reports for both agencies and these NAAS/Section 105 reports are now available for public inspection.

**ADDRESS:** The reports may be examined at the EPA's Regional IV Office, 345 Courtland Street NE., Atlanta, GA 30365, in the Air, Pesticides & Toxics Management Division.

**FOR FURTHER INFORMATION CONTACT:** Walter Bishop (Florida) at 404/347–2864 (FTS: 257–2864) or Jeff Pallas (Pinellas County) at 404/347–2904 (FTS 257–2904).

Dated: May 6, 1987.

Jack E. Ravan,

*Regional Administrator.*

## Science Advisory Board; Environmental Health Committee, Drinking Water Subcommittee; Open Meeting

Under Pub. L. 92–463, notice is hereby given that a two-day meeting of the Drinking Water Subcommittee of the Environmental Health Committee of the Science Advisory Board will be held on June 4–5, 1987, in the basement auditorium at the Andrew Breidenbach Environmental Research Center of the U.S. Environmental Protection Agency, 26 West St. Clair Street, Cincinnati, Ohio 45268. The meeting will start at 8:30 a.m. on June 4th and adjourn no later than 4:00 p.m. on June 5th.

The purpose of the meeting will be to review the Health Effects Research Program on Drinking Water Disinfectants and Disinfectant By-Products. The Subcommittee will hear presentations concerning the research program on June 4th and will discuss the program on June 5th.

An issue paper has been prepared for this review and is available from Mr. David Kleffman, Office of Research and Development (RD–683), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC, (202) 382–5895.

The meeting will be open to the public. Any member of the public wishing to attend the meeting must contact Dr. C. Richard Cothern, Executive Secretary to the Committee, or Mrs. Frederica Jones, by telephone at (202) 382–2552 or by mail to: Science Advisory Board (A–101–F), 401 M Street SW., Washington, DC 20460 no later than c.o.b. on May 29, 1987.

Dated: May 8, 1987.

Terry F. Yosie,

*Director, Science Advisory Board.*

[OPP–30280; FRL 3202–5]

## Abbott Laboratories; Application To Register a Pesticide Product

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces receipt of an application to register a pesticide product containing an active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

**DATE:** Comment by June 15, 1987.

**ADDRESS:** By mail submit comments identified by the document control number [OPP–30280] and the file number (275–AO) to:

Information Services Section (TS–757C), Program Management and Support Division, Attn: Product Manager (PM) 17, Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460

In person, bring comments to: Rm. 236, CM#2, Attn: PM 17, Registration Division (TS–767C), Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for

public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** Arturo Castillo, PM 17, (703–557–2690).

**SUPPLEMENTARY INFORMATION:** Abbott Laboratories, Chemical and Agricultural Products Division, 14th Street, and Sheridan Road, North Chicago, IL 60064, has submitted an application to EPA to register the pesticide product DiBeta Solution Concentrate an insecticide, EPA File Symbol 275–AO, containing the active ingredient thuringiensin or Beta-exotoxin (2-0-(4'-0-5-L-deoxyadenosine-5'-yl-beta-0-glucopyranosyl)-4-0-phospho-0-allaric acid) at 1.5 percent, pursuant to the provisions of section 3(c)(4) of FIFRA. The application proposes that the product be classified for general use on all raw agricultural commodities and for specific use on cotton, potatoes, and greenhouse ornamentals. Notice of receipt of this application does not imply a decision by the Agency on the application. Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. The procedure for requesting data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the Program Management and Support Division (PMSD) office at the address provided from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the PMSD office (703–557–3262), to ensure that the file is available on the date of intended visit.

**Authority:** 7 U.S.C. 136.

Dated: May 7, 1987.

**James W. Akerman,**

*Acting Director, Registration Division, Office of Pesticide Programs.*

BILLING CODE [illegible]

---

**[OPTS-59236B; FRL-3200-2]**

## Certain Chemical; Denial of an Application for a Modification to a Test Marketing Exemption

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces EPA's denial of an application for a modification to a test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME–87–5.

**EFFECTIVE DATE:** April 30, 1987.

**FOR FURTHER INFORMATION CONTACT:** John G. Davidson, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Environmental Protection Agency, Rm. E–613, 401 M St., SW., Washington, DC 20460, (202 382–3373).

**SUPPLEMENTARY INFORMATION:** Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury. On January 6, 1987, EPA received an application for a modification to TME–87–5. The application requested an increase in the production volume limit of an additional 45,000 kilograms, a 3 month extension of the test marketing period, and the addition of one customer. This substance was previously test marketed under TME–85–31 (50 FR 19228) and under a modification to TME–85–31 (51 FR 19063).

EPA has not been able to determine that test marketing of the TME substance described below, under the conditions set out in the application and the application for modification for additional production volume and time period, will not present any unreasonable risk of injury to the environment. Therefore, . the application for modification is denied.

**T–87–5**

*Date of Receipt:* December 15, 1986.

*Notice of Receipt:* January 6, 1987 (52 FR 44943).

*Applicant:* Confidential.

*Chemical:* (G) Functional acrylate type polymer.

*Use:* (G) Industrial paint ingredient.

*Modified Production Volume:* 45,000 kilograms.

*Number of additional Customers:* 1.

*Worker Exposure:* Manufacturer: dermal, a total of 20 workers up to 8 hours/day up to 26 days/year.

*Modified Test Marketing Period:* Three Months.

*Risk Assessment:* EPA identified no significant health concerns. EPA identified potential adverse environmental effects associated with exposure to the TME substance. EPA is unable to determine, in the absence of chronic test data on the test market substance, its potential toxicity to aquatic species.

*Public Comments:* None.

Dated: April 30, 1987.

**Charles L. Elkins,**

*Director, Office of Toxic Substances.*

[MM Docket No. 86-484]

## Notification of Inquiry Regarding Reexamination of the Commission's Comparative Licensing, Distress Sale and Tax Certificate Policies Premised on Racial, Ethnic or Gender Classifications; Extension of Comment Deadline

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of inquiry; extension of initial comment deadline.

**SUMMARY:** This action grants a motion for an extension of time for filing comments in response to the *Notice of Inquiry* in MM Docket No. 86-484 (Reexamination of the Commission's Comparative Licensing, Distress Sale and Tax Certificate Policies Premised on Racial, Ethnic or Gender Classifications), 52 FR 596 (January 7, 1987). American Women in Radio and Television, Inc. (AWRT) requested that the deadline for filing initial comments be extended from May 7, 1987, to May 21, 1987, a period of two weeks, to allow for the computerization and compilation of data collected in response to an industry survey and a survey of the Commission's broadcast comparative hearing initial decisions utilizing minority and female enhancement credits. The National Association of Black Owned Broadcasters and other interested parties ("NABOB") filed a motion in support of an extension of time, but suggested that the deadline be extended three weeks to May 28, 1987. NABOB stated in support that a three-week extension would be more appropriate since recent developments, including the Commission's recent instructions to its Administrative Law Judges on the treatment of comparative hearing cases involving enhancement credits, and the required minority ownership report questionnaire, have caused them to reevaluate the direction their comments in this proceeding might take. As the *Notice* in this proceeding specifically requested the type of empirical and statistical data being compiled by AWRT and since the Commission was persuaded that the requested extension was reasonably necessary to facilitate the completion of the subject studies, the Commission is extending the initial comment date in this proceeding. The Commission also granted the additional time requested by NABOB to allow it and other commenters to incorporate into their comments the above-noted developments. Consequently, an extension of time for filing comments until May 28, 1987, was granted.

**DATES:** Comments are now due by May 28, 1987. Reply comments remain due by July 6, 1987.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Terry L. Haines, Policy and Rules Division, Mass Media Bureau, (202) 632-7792.

**SUPPLEMENTARY INFORMATION:** The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

## Applications for Consolidated Hearing; Boyd W. Fellows et al.

1. The Commission has before it the following mutually exclusive applications for a new FM station:

| Applicant, city/State | File No. | MM Docket No. |
|---|---|---|
| A. Boyd W. Fellows; Sturgeon Bay, WI. | BPH-850711OZ | 87-122 |
| B. Assembly of God; Sturgeon Bay, WI. | BPH-850712YU | |
| C. Margaret E. Maney; Sturgeon Bay, WI. | [illegible] (dismissed). | |
| D. James C. Anderson; Sturgeon Bay, WI. | [illegible] (dismissed). | |

2. Pursuant to 47 U.S.C. 309(e), the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

*Issue Heading and Applicant(s)*

1. Comparative, A, B
2. Ultimate, A, B

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M. Street, NW., Washington, DC 20037. (Telephone (202) 857-3800).

W. Jan Gay,

## FEDERAL HOME LOAN BANK BOARD

[No. AC-613]

### Brandywine Savings and Loan Association, Downingtown, PA; Final Action Approval of Conversion Application

Dated: May 8, 1987.

Notice is hereby given that on April 30, 1987, the Office of the General Counsel of the Federal Home Loan Bank Board, acting pursuant to the authority delegated to the General Counsel or his designee, approved the application of Brandywine Savings and Loan Association, Downingtown, Pennsylvania for permission to convert to the stock form of organization. ## Listing of Controlled Carriers Under the Shipping Act of 1984

**AGENCY:** Federal Maritime Commission.

**ACTION:** Listing of controlled carriers.

**SUMMARY:** The Federal Maritime Commission is adding Romanian Shipping Company Constanta, China Resources Transportation & Godown Co., Ltd., Guangdong International Shipping Co., Ltd. and Zhu Sheng Transportation Co., Ltd. to the list of controlled carriers subject to the advance tariff filing and other regulatory requirements of section 9 of the Shipping Act of 1984.

**DATE:** None.

**FOR FURTHER INFORMATION CONTACT:** Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573.

**SUPPLEMENTARY INFORMATION:** Sections 3(8) and 9 of the Shipping Act of 1984, 46 U.S.C. app. 1702(8) and 1708, provide for the regulation of rates and charges by certain state-controlled carriers in the foreign commerce of the United States. The Commission has determined that Romanian Shipping Company Constanta, China Resources Transportation & Godown Co., Ltd. ("China Resources"), Guangdong International Shipping Co., Ltd., and Zhu Sheng Transportation Co., Ltd. meet the definition of a "controlled carrier" as set forth in section 3(8) of the Act. Letters dated February 27, 1987, were sent to each of the carriers named above with copies to their agent or tariff publisher in the United States, notifying them of such determination. Of the four, only China Resources responded to the letter. However, the information contained in the China Resources letter did not alter the Commission's original determination to classify China Resources as a "controlled carrier."

The Commission's list of controlled carriers previously published in the **Federal Register** on Monday, January 26, 1987 [52 FR 2769]. The amended list is shown below:

Baltic Shipping Co.—U.S.S.R.
Bangladesh Shipping Corp.—Bangladesh
Black Sea Shipping Company—U.S.S.R.
Black Star Line—Ghana
China Ocean Shipping Co. (COSCO)—People's Republic of China
China Resources Transportation & Godown Co., Ltd.—People's Republic of China
Compagnie Maritime Zairoise (CMZ)—Zaire
Compagnie Nationale Algerienne de Navigation—Algeria
Companhia de Navegacao Loide Brasileiro—Brazil
Compania Peruana de Vapores (CPV) (Peruvian State Line)— Peru
Djakarta Lloyd P. T.—Indonesia
Egyptian National Line—Egypt
Empresa Maritima del Estado (Empremar Line)—Chile
Far Eastern Shipping Co. (FESCO)—U.S.S.R.
Flota Bananera Ecuatoriana S.A.—Ecuador
Flota Mercante Gran Centro Americana S.A. (Flomerca)— Guatemala
Guangdong International Shipping Co., Ltd.—Peoples's Republic of China
MISR Shipping Company (MISR)—Egypt
Murmansk Shipping Co. (Arctic Line)—U.S.S.R.
Nauru Pacific Line—Nauru
National Galleon Shipping Corporation—Philippines
National Shipping Corporation of the Philippines— Philippines
Neptune Orient Lines (NOL)—Singapore
Pakistan National Shipping Corporation—Pakistan
Pharaonic Shipping Co. (S.A.E.) (Pharaonic)—Egypt
Polish Ocean Lines (POL)—Poland
Romanian Shipping Company Constanta (NAVROM)—Romania
Shipping Corporation of India (SCI)—India
Sudan Shipping Line Limited—Sudan
Transportes Navieros Ecuatorianos (Transnave)—Ecuador
Zhu Sheng Transportation Co., Ltd.—People's Republic of China

The process of identification and classification of controlled carriers is continuous. The list as shown will be amended as such carriers enter and leave the United States trades.

By the Commission May 7, 1987.

Joseph C. Polking,
*Secretary.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Office of the Secretary

### Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on May 8, 1987.

**Public Health Service (PHS)**

(Call Reports Clearance Officer on 202–245–2100 for copies of Package)

*Centers for Disease Control*

Subject: Teenage Health Teaching Evaluation—NEW.
Respondents: Individuals or households

**National Institutes of Health**

Subject: Program Evaluation: Office of Cancer Communications Education Program—NEW
Respondents: Individuals or households
Subject: Final Invention Statement and Certification (For Grant or Award)—Extension—(0925–0159)
Respondents: State or local governments; Businesses or other for-profit; Non-profit institutions; Small businesses or organizations
Subject: Health Professionals' Use of MEDLINE—NEW
Respondents: Individuals or households; State or local governments; Businesses or other for-profit; Federal agencies or employees; Non-profit institutions; Small businesses or organizations

*Health Resources Services Administration*

Subject: Common Reporting Requirements for IHS Community Health Representative Program—NEW
Respondents: State or local governments
OMB Desk Officer: Shannah Koss

**Office of Human Development Services**

(Call Reports Clearance Officer on 202–472–4415 for copies of package)

Subject: FY 1988 Coordinated Discretionary Funds Program; Availability of Funds and Request for Applications
Respondents: State or local governments; Non-profit institutions; Small businesses or organizations

OMB Desk Officer: Allison Herron

Social Security Administration

(Call Reports Clearance Officer on 301–594–5706 for copies of package)

Subject: Report on Individuals with Mental Impairment—Revision—(0960–0058)

Respondents: Businesses or other for-profit; Non-profit institutions; Small businesses or organizations

Subject: Application for Mother's or Father's Insurance Benefits—Extension—(0960–0003)

Respondents: Individuals or households

OMB Desk Officer: Elana Nordon

Office of the Secretary

(Call Reports Clearance Officer on 202–245–0509 for copies of package)

Subject: Health Care Program Violations Notification Form—Revision—(0990–0141)

Respondents: State or local governments

OMB Desk Officer: Elana Nordon

As mentioned above, copies of the information collection clearance packages can be obtained by calling the Reports Clearance Officer, on one of the following numbers:

PHS: 202–245–2100
SSA: 301–594–5706
OS: 202–245–0509
OHDS: 202–472–4415

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503, ATTN: (name of OMB Desk Officer).

Dated: May 8, 1987.

James F. Trickett,

*Deputy Assistant Secretary, Administrative and Management Services.*

## Alcohol, Drug Abuse and Mental Health Administration

### Advisory Committee Meetings, June

AGENCY: Alcohol, Drug Abuse, and Mental Health Administration.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the forthcoming meetings of the agency's initial review committees and one of its national advisory bodies in the month of June 1987. These committees will be open for discussion of administrative announcements and program developments. The committees will be performing initial review of applications for Federal assistance. Therefore, portions of the meetings will be closed to the public as determined by the Administrator, ADAMHA, in accordance with 5 U.S.C. 552(b)(6) and 5 U.S.C. app. 2 10(d). Notice of these meetings is required under the Federal Advisory Committee Act, Pub. L. 92–463.

Committee name: Epidemiology Subcommittee of the Epidemiologic and Services Research Review Committee, NIMH.

Date and time: June 1–3: 9:00 a.m.

Place: Sheraton Washington Hotel, 2660 Woodley Road NW., Washington, DC 20008.

Status of meeting:

Open—June 1: 9:00–10:00
Closed—Otherwise

Contact: Gloria Yockelson, Room 9C14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1367.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities as they relate to mental health epidemiology, mental health service systems research, and evaluation of clinical mental health services with recommendations to the National Advisory Mental Health Council for final review.

* * * * *

Committee name: Research Scientist Development Review Committee, NIMH.

Date and time: June 3–5: 9:00 a.m.

Place: Chevy Chase Holiday Inn, 5520 Wisconsin Avenue, Chevy Chase, Maryland 20815.

Status of meeting:

Open—June 3: 9:00–10:00 a.m.
Closed—Otherwise

Contact: Linda Rainey, Room 9C05, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–6470.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of activities to develop and execute a program of Research Scientists and Research Scientists Development Awards to appropriate institutions for the support of individuals who are engaged full time in research and related activities relevant to mental health with recommendations to the National Advisory Mental Health Council for final review.

* * * * *

Committee name: Behavioral Sciences Subcommittee of the Mental Health Research Education Review Committee, NIMH.

Date and time: June 4–5: 9:00 a.m.

Place: The Marbury Hotel, 3600 M Street NW., Washington, DC 20007.

Status of meeting:

Open—June 4: 9:00–10:00 a.m.
Closed—Otherwise

Contact: Jean Byrne, Room 9C18, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3857.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research training activities in the areas of biological sciences, the psychological sciences, and the applied behavioral sciences related to mental health with recommendations to the National Advisory Mental Health Council for final review.

* * * * *

Committee name: Mental Health Small Grant Review Committee, NIMH.

Date and time: June 4–5: 9:30 a.m.

Place: The Canterbury Hotel, 1733 N Street NW., Washington, DC 20036.

Status of meeting:

Open—June 4: 9:30–10:30 a.m.
Closed—Otherwise

Contact: Betty Russell, Room 9C06, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4843.

Purpose: The Committee is charged with the initial review of applications for research in all disciplines pertaining to alcohol, drug abuse, and mental health for support of research in the areas of psychology, psychiatry, and the behavioral and biological sciences.

* * * * *

Committee name: National Advisory Council on Alcohol Abuse and Alcoholism, NIAAA.

Date and time: June 4–5: 10:30 a.m.

Place: National Institutes of Health, Building #31, Conference Room 6, 9000 Rockville Pike, Bethesda, MD 20892.

Status of Meeting:

Open—June 4: 10:30 a.m.–5:00 p.m.
Closed—Otherwise

Contact: James Vaughan, Room 16C20, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–4375.

Purpose: The Council advises the Secretary, Department of Health and Human Services regarding policy direction and program issues of national significance in the area of alcohol abuse and alcoholism. Reviews all grant applications submitted, evaluates these

applications in terms of scientific merit and adherence to Department policies, and makes recommendations to the Secretary with respect to approval and amount of award.

* * * * *

Committee name: Child and Family and Prevention Subcommittee of the Life Course and Prevention Research Review Committee, NIMH.

Date and time: June 4–6: 9:00 a.m.

Place: The Canterbury Hotel, 1733 N Street NW., Washington, DC 20036.

Status of Meeting:

Open—June 4: 9:00–10:00 a.m.
Closed—Otherwise

Contact: Dorothy Tengood, Room 9C18, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–3857.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities relating to community and developmental psychology with recommendations to the National Advisory Mental Health Council for final review.

* * * * *

Committee name: Biological and Neurosciences Subcommittee of the Mental Health Research Education Review Committee, NIMH.

Date and time: June 8–9: 9:00 a.m.

Place: Linden Hill Hotel, 5400 Pooks Hill Road, Bethesda, MD 20814.

Status of Meeting:

Open—June 8: 9:00–10:00 a.m.
Closed—Otherwise

Contact: Shirley Maltz, Room 9C26, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–3936.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research training activities in the area of biological sciences related to mental health with recommendations to the National Advisory Mental Health Council for final review.

* * * * *

Committee name: Criminal and Violent Behavior Research Review Committee, NIMH.

Date and time: June 10–11: 9:15 a.m.

Place: The River Inn, 924 25th Street NW., Washington, DC 20037.

Status of Meeting:

Open—June 10: 9:15–10:30 a.m.
Closed—Otherwise

Contact: Peg Lyons, Room 9C18, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–3857.

Purpose: The Committee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research grants, individual postdoctoral research fellowships and institutional research training grants, cooperative agreements, and research and development contracts, as they relate to the mental health aspects of criminal, delinquent, and antisocial behavior; individual violent behavior; sexual assault; and law-mental health interactions related to these areas, with recommendations to the National Advisory Mental Health Council for final review.

* * * * *

Committee name: Alchol, Drug Abuse, and Mental Health Advisory Board, ADAMHA.

Date and time: June 11–12: 9:00 a.m.

Place: National Institutes of Health, 9000 Rockville Pike, Building #1, Wilson Hall, 3rd Floor, Bethesda, MD 20892.

Status of Meeting: Open.

Contact: Barbara Wagner, Room 12C05, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–1910.

Purpose: The Board assesses the national needs for alcoholism, alcohol abuse, drug abuse, and mental health treatment and prevention services and the extent to which those needs are being met by State, local, and private programs, and programs receiving funds under Title V and Parts B and C of Title XIX of the Public Health Service Act. The Board provides advice and recommendations to the Secretary and to the Administrator, Alcohol, Drug Abuse, and Mental Health Administration respecting these activities to assist in guiding national strategies aimed at the amelioration of alcohol, drug abuse, and mental health programs.

* * * * *

Committee name: Psychopharmacological, Biological, and Physical Treatments Subcommittee of the Treatment Development and Assessment Research Review Committee, NIMH.

Date and time: June 11–12: 9:00 a.m.

## Health Resources and Services Administration

### Health and Allied Health Professions Eligibility for Scholarship Consideration Under the Health Professions Preparatory and Pregraduate Scholarship Programs for Indians, and the Indian Health Scholarship Program

**AGENCY:** Health Resources and Services Administration, HHS.

**ACTION:** Correction of notice.

**SUMMARY:** On February 25, 1987 a "Notice of Health and Allied Health Professions Which Will be Eligible for Scholarship Support under the Indian Health Service (IHS) Scholarship Programs" was published in the Federal Register (52 FR 5586). The "Summary" portion of the notice incorrectly included the statement that "Awards will not be available in health and allied health professional areas not listed". This statement was in conflict with the body of the Notice which correctly stated that:

Applicants for health and allied health professions not on the above priority list will be considered pending the availability of Funds and dependent upon the availability of qualified applicants in the priority areas.

The statement in the Summary should have read: Awards may be available in health and allied health professional areas not listed pending the availability of funds and dependent upon the availability of qualified applicants in the priority areas.

**EFFECTIVE DATE:** May 15, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mr. Larry Thomas, Indian Health Service, Parklawn Building, Room 6–12, 5600 Fishers Lane, Rockville, Maryland 20857; telephone 301–443–6197. (This is not a toll-free number.)

Dated: May 11, 1987.

## National Institutes of Health

### Advisory Committee to the Director, Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Advisory Committee to the Director, NIH, on June 15–16, 1987, at the National Institutes of Health, Bethesda, Maryland 20892. The meeting will take place from 8:30 a.m. to 5:00 p.m. on June 15, and from 8:30 to approximately 11:45 a.m. on June 16, in Building 31, Conference Room 10, C Wing. The meeting will be open to the public.

The meeting will be devoted to discussions of "The Health of Biomedical Research Institutions."

The Executive Secretary, Jay Moskowitz, Ph.D., National Institutes of Health, Shannon Building, Room 137, Bethesda, Maryland 20892, (301) 496–3152, will furnish the meeting agenda, rosters of Committee members and consultants, and substantive program information upon request.

Dated: May 4, 1987

**Betty J. Beveridge,**

### Establishment and Reestablishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972 [Pub. L. 92–463, 86 Stat. 770–776] and the Health Research Extension Act of 1985, November 20, 1985 [Pub. L. 99–158, section 402(b)(6)], the Director, NIH, announces the establishment, effective June 1, 1987, of the following committees:

Board of Scientific Counselors, Biometry and Risk Assessment Program, National Institute of Environmental Health Sciences.

Gerontology and Geriatrics Review Committee, National Institute on Aging

The Director, NIH, also announces the reestablishment, effective June 1, 1987, of the Board of Scientific Counselors, National Eye Institute, and the Vision Research Review Committee, National Eye Institute.

The duration of these committees is continuing unless formally determined by the Director, NIH, that termination would be in the best public interest.

Dated: May 12, 1987.

**National Cancer Institute; Board of Scientific Counselors; Meeting**

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Etiology on June 11–12, 1987, Building 31, C Wing, Conference Room 10, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

This meeting will be open to the public from 1 p.m. to recess on June 11 and from 9 a.m. to adjournment on June 12 for discussion and review of the Division budget and review of concepts for grants and contracts. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sec. 552(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public from 9 a.m. to approximately 12 p.m. on June 11 for the review, discussion and evaluation of individual programs and projects conducted by the Division of Cancer Etiology. These programs, projects, and discussions could reveal personal information concerning individuals associated with the programs and projects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. David McB. Howell, Executive Secretary of the Board of Scientific Counselors, Division of Cancer Etiology, National Cancer Institute, Building 31, Room 11A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–6927) will furnish substantive program information.

Dated: May 1, 1987.

**National Cancer Institute; (Division of Cancer Treatment Board of Scientific Counselors); Meeting**

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, DCT, National Cancer Institute, June 1–2, 1987, Building 31, 6th Floor, "C" Wing, Conference Room 10, Bethesda, Maryland 20892.

This meeting will be open to the public on June 1 from 8:30 a.m. to approximately 5:30 p.m., and again on June 2 from 8:30 a.m. until adjournment, to review program plans, contract recompetitions and budget for the DCT program. In addition, there will be scientific reviews by several programs in the Division. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sec. 552b(c)(6), title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 1 from 5:30 p.m. until recess, for the review, discussion and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A–06, National Institute of Health, Bethesda, Maryland 20892 (301–496–5708) will provide summaries of the meeting and rosters of committee members upon request.

Dr. Bruce A. Chabner, Director, Division of Cancer Treatment, National Cancer Institute, Building 31, Room 3A–52, National Institute of Health, Bethesda, Maryland 20892 (301–496–4291) will furnish substantive program information.

Dated: May 1, 1987.

**National Cancer Institute; (President's Cancer Panel); Meeting**

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the President's Cancer Panel, National Cancer Institute, June 22, 1987, at the University of Pittsburgh, School of Medicine-Scaife Hall, Lecture Room 6, 3550 Terrace Street, Pittsburgh, PA 15261.

This meeting will be open to the public on June 22 from 8:30 a.m. to adjournment. Agenda items include reports by the Chairman, President's Cancer Panel and the Director, National Cancer Institute; and reports and discussions from experts to obtain information regarding research programs supported by the National Cancer Institute. Attendance by the public will be limited to space available. Dr. Elliott Stonehill, Executive Secretary, President's Cancer Panel, National Cancer Institute, Building 31, Room 11A23, National Institutes of Health, Bethesda, Maryland 20892 (301/496–1148) will provide an agenda for the meeting, a roster of the Panel members, and substantive program information upon request.

Dated: May 11, 1987.

BILLING CODE 4140–01–M

**National Eye Institute; Board of Scientific Counselors, NEI; Meeting**

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Eye Institute, June 18–19, 1987, Building 31, NEI Conference Room 6A35, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public on June 18 from 8:30 a.m. until approximately 4 p.m for general remarks

by the Institute's Scientific Director on matters concerning the intramural programs of the National Eye Institute. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sec. 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 18 from approximately 4 p.m. until recess and on June 19 from 8:30 a.m. until adjournment for the review, discussion, and evaluation of individual projects conducted by the Laboratory of Mechanisms of Ocular Diseases. These evaluations and discussions could reveal personal information concerning individuals associated with the projects, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Consequently, this meeting is concerned with matters exempt from mandatory disclosure.

Ms. Kay Valeda, Committee Management Officer, National Eye Institute, Building 31, Room 6A03, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–4903, will provide a summary of the meeting, roster of committee members, and substantive program information upon request.

Dated: May 1, 1987.

## National Institute of Allergy and Infectious Diseases, Board of Scientific Counselors; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, National Institute of Allergy and Infectious Diseases, on June 8, 9 and 10. The meeting will be held in Conference Room 428, Building 5, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The meeting will be open to the public on June 8 from 9:00 a.m. until 12:30 p.m. and 1:30 p.m. until 3 p.m. During this open session, the permanent staff of the Laboratories of Immunogenetics, Immunopathology and Microbial Immunity will present and discuss their immediate past and present research activities.

In accordance with the provisions set forth in sec. 552b(c)(6), title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting of the Board will be closed to the public on June 8 from 8:30 a.m. until 9:00 a.m., 12:30 p.m. until 1:30 p.m. and from 3 p.m. until recess, on June 9 from 8:00 a.m. until recess and on June 10 from 8:30 a.m. until adjournment for the review, discussion, and evaluation of individual intramural programs and projects conducted by the National Institute of Allergy and Infectious Diseases, including consideration of personal qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Patricia Randall, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Maryland 20892, telephone (301–496–5717), will provide a summary of the meeting and a roster of the committee members upon request.

Dr. John I. Gallin, Executive Secretary, Board of Scientific Counselors, NIAID, National Institutes of Health, Building 10, Room 11C103, telephone (301–496–3006), will provide substantive program information.

## Meeting of the General Clinical Research Centers Committee

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the General Clinical Research Centers (GCRC) Committee, Division of Research Resources (DRR), June 17-19, 1987, Conference Room 10, Bldg. 31, 9000 Rockville Pike, Bethesda, MD 20892.

The meeting will be open to the public on June 19, from 1:30 p.m. to adjournment, during which time there will be comments by the Director, DRR; an update on the GCRC Program; and reports on the Clinical Associate Physician Program, the diffusion of the CLINFO System, possible new technologies for GCRCs, and clinical research data management. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92-463, the meeting will be closed to the public on June 17 from 1 p.m. to recess and on June 18 from 8 a.m. to recess and on June 19 from approximately 8 a.m. to 1:30 p.m. for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, Bldg. 31, Room. 5B-10, National Institutes of Health, Bethesda, Maryland 20892, (301) 496-5545, will provide a summary of the meeting and a roster of the Committee members upon request. Dr. Stanley L. Slater, Executive Secretary of the General Clinical Research Centers Review Committee, Bldg. 31, Room 5B-51, National Institutes of Health, Bethesda, Maryland 20892, (301) 496-6595, will furnish program information upon request.

## National Eye Institute; Meeting of the National Advisory Eye Council

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the

National Advisory Eye Council, National Eye Institute, June 1–2, 1987, Building 31, Conference Room 9, National Institutes of Health, Bethesda, Maryland.

This meeting will be open to the public from 9 a.m. until approximately 12 noon on Monday, June 1. Following opening remarks by the Director, National Eye Institute, there will be presentations by the staff of the Institute concerning Institute programs and various research assistance mechanisms. Attendance by the public will be limited to space available.

In accordance with provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, the meeting will be closed to the public from approximately 12 noon until recess on Monday, June 1, and from 9 a.m. until adjournment on Tuesday, June 2, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

There will also be a meeting of the Vision Research Program Planning Subcommittee on Sunday, May 31, from 7 p.m. to 9 p.m. to discuss further the plans for *Vision Research: A National Plan 1989–90*. The meeting will be held in the Embassy Room at the Hyatt Regency, One Bethesda Metro Center, Bethesda, Maryland. Attendance by the public will be limited to space available.

Ms. Kay Valeda, Committee Management Officer, National Eye Institute, Building 31, Room 6A03, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–4903, will provide summaries of meetings, rosters of committee members, and substantive program information upon request.

## National Institute of Child Health and Human Development; Review Committee Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of meetings of the review committees of the National Institute of Child Health and Human Development for June 1987.

These meetings will be open to the public to discuss items relative to committee activities including announcements by the Director, NICHD, and executive secretaries, for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Marjorie Neff, Committee Management Officer, NICHD, Landow Building, Room 6C08, National Institutes of Health, Bethesda, Maryland, Area Code 301, 496–1485, will provide a summary of the meeting and a roster of committee members.

Other information pertaining to the meetings may be obtained from the Executive Secretary indicated.

Name of Committee: Population Research Committee
Executive Secretary: Dr. A.T. Gregoire, Rm. 6C03, Landow Building, Telephone: 301, 496–1696
Date of Meeting: June 18–19, 1987
Place of Meeting: Landow Building, Conference Room A
Open: June 18, 1987, 8:30 a.m.–10:00 a.m.
Closed: June 18, 1987, 10:00 a.m.–5:00 p.m., June 19, 1987, 8:30 a.m.–adjournment
Name of Committee: Maternal and Child Health Research Committee
Executive Secretary: Dr. Scott Andres, Room 6C08, Landow Building, Telephone: 301, 496–1485
Date of Meeting: June 23–24, 1987
Place of Meeting: Landow Building, Conference Room A
Open: June 23, 1987, 9:00 a.m.–10:00 a.m.
Closed: June 23, 1987, 10:00 a.m.–5:00 p.m., June 24, 1987, 9:00 a.m.–adjournment
Name of Committee: Mental Retardation Research Committee
Executive Secretary: Dr. Susan Streufert, Room 6C08, Landow Building, Telephone: 301, 496–1696
Date of Meeting: June 25–26, 1987,
Place of Meeting: Landow Building, Conference Room A
Open: June 25, 1987, 9:00 a.m.–10:00 a.m.
Closed: June 25, 1987, 10:00 a.m.–5:00 p.m., June 26, 1987, 9:00 a.m.–adjournment

(Catalog of Federal Domestic Assistance Program No. 13.864, Population Research and No 13.865, Research for Mothers and Children, National Institutes of Health)

Dated: May 4, 1987.

## National Library of Medicine; Meetings of the Biomedical Library Review Committee and the Subcommittee for the Review of Medical Library Resource Improvement Grant Applications

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Biomedical Library Review Committee on June 17–18, 1987, convening each day at 8:30 a.m. in the Board Room of the National Library of Medicine, Building 38, 8600 Rockville Pike, Bethesda, Maryland, and the meeting of the Subcommittee for the Review of Medical Library Resource Improvement Grant Applications on June 16 from 3 p.m. to 4 p.m. in the 5th-Floor Conference Room of the Lister Hill Center Building.

The meeting on June 17 will be open to the public from 8:30 to 11 a.m. for the discussion of administrative reports and program developments. Attendance by the public will be limited to space available.

In accordance with provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C., and sec. 10(d) of Pub. L. 92–463, the regular meeting and the subcommittee meeting will be closed to the public for the review, discussion, and evaluation of individual grant applications as follows: The regular meeting on June 17 from 11 a.m. to 5 p.m., and on June 18, from 8:30 a.m. to adjournment; and the subcommittee meeting on June 16 from 3 to 4 p.m. These applications and the discussion could reveal confidential trade secrets or commercial property, such as patentable material, and personal information concerning individuals associated with applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Roger W. Dahlen, Executive Secretary of the Committee, and Chief, Biomedical Information Support Branch, Extramural Programs, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20894, telephone number: 301–496–4221, will provide summaries of the meeting, rosters of the committee members, and other information pertaining to the meeting.

(Catalog of Federal Domestic Assistance Program No. 13.879—Medical Library Assistance, National Institutes of Health)

Dated: May 14, 1987.

Betty J. Beveridge,

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[WY–040–08–4212–08; W101088]

### Intent To Amend the Big Sandy Management Framework Plan; Sweetwater County, WY

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of intent to amend the Big Sandy management framework plan, Sweetwater County, Wyoming.

**SUMMARY:** This notice issued pursuant to 43 CFR Part 1600 invites public review and comment on the proposal to amend the Big Sandy MFP to authorize the withdrawal of the following 357.34 acres of public land for the protection of the Natural Corrals archeological site near Superior, Wyoming.

T.21N., R.101W., Sixth Principal Meridian.
Sec. 18: Lots 1–3, W½NE¼, E½NW¼, NE¼SW¼, NW¼SE¼.

Utilizing input received from the public, an interdisciplinary team will prepare an environmental assessment in accordance with 40 CFR Part 1502. Upon approval of the plan amendment by the Wyoming State Director, a public notice will be issued and a thirty day protest period will be allowed (43 CFR 1610.5–2).

**DATE:** Comments are to be submitted by July 6, 1987.

**ADDRESS:** Area Manager, Green River Resource Area, P.O. Box 1170, Rock Springs, Wyoming 82902.

**FOR FURTHER INFORMATION CONTACT:** Sally Haverly, BLM Green River Resource Area, (307) 362–6422.

**SUPPLEMENTARY INFORMATION:** Preliminary issues identified include: consistency with plans and program of other governmental agencies, rights of existing permittees and lessees, impact on present and future surface and mineral use, level of protection required for the archeological site.

The lands have been segregated for a two-year period from surface entry and mining (52 FR 10954, April 6, 1987).

Donald H. Sweep,

*District Manager.*

May 7, 1987.

### Intent To Amend the Warner Lakes Resource Area Management Framework Plan; Lakeview, OR

**AGENCY:** Bureau of Land Management, (BLM) Lakeview, Oregon, Interior.

**ACTION:** Opportunity for public comment: Notice of intent to amend the Warner Lakes resource area management framework plan (MFP), specifically for wetland management.

**SUMMARY:** This Notice of Intent is to advise the public that the BLM Lakeview District Office intends to amend an existing planning document to address wetland management opportunities and a potential Area of Critical Environmental Concern.

**SUPPLEMENTARY INFORMATION:** The BLM is proposing to amend the 1980 Warner Lakes Resource Area MFP to address management of permanently or intermittently flooded wetlands on public lands in Lake and southwestern Harney Counties in south central Oregon. The Warner Lakes Resource Area is bounded by the Fremont National Forest and the (BLM) High Desert Resource Area on the west, Oregon/California/Nevada state lines on the south, and the (BLM) Burns District on the east and north.

The purpose of the amendment would be to identify alternatives which resolve management issues for public wetlands in the Warner Lakes Resource Area. Preliminary management alternatives identified to date include: (1) Maintain present situation (No Action). (2) Emphasize maximum protection of wildlife habitat and watershed values on wetlands. (3) Maximize protection of wildlife (especially waterflow) habitat, while continuing to utilize other existing resources.

The existing plan (MFP) does not adequately address the current management opportunities for wetlands habitat in the Warner Lakes Resource Area. This amendment, when final, will specify management direction and priorities for wetlands on the public lands within the resource area.

The Warner Potholes Allotment, a 39,200 acre are including lakes and wetlands in the vicinity of Flagstaff Lake in the Warner Valley, has been nominated for designation as an Area of Critical Environmental Concern (ACEC). Analysis of the resources and application of the Bureau review criteria for ACEC supports the nomination. The plan amendment will evaluate the nomination to determine whether the area should be designated as an ACEC.

Disciplines to be represented on the interdisciplinary team preparing the plan amendment and environmental assessment are; wildlife, recreation, geology, cultural resources, watershed, range management, lands and realty, and land use planning. More detailed information on planning issues, criteria and preliminary management alternatives is available at the Lakeview District Office, and has also been mailed to known interested parties. The comment period on preliminary issues and planning criteria for the plan amendment and associated Environmental Assessment will close June 30, 1987. Other public participation activities will include a 45 day review of the draft plan amendment and EA and an open house to receive comments and answer questions. Dates, times and locations will be announced through local media and mailings to interested parties. Existing planning documents and information are available at the Lakeview District Office of the BLM, 1000 South Ninth Street, P.O. Box 151, Lakeview, Oregon 97630 during normal working hours. Phone (503) 947–2177.

**FOR FURTHER INFORMATION CONTACT:** Jerry E. Asher, Lakeview District Manager.

Dated: May 1, 1987.

Jerry E. Asher,

*District Manager.*

BILLING CODE 4310–33–M

[NM–030–07–4333–09]

### Emergency Closure of Off-Road Travel Within the Horse Mountain Wilderness Study Area (WSA) in Catron County, NM

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of emergency closure.

**SUMMARY:** Notice is hereby given that effective immediately May 15, 1987, all vehicle use is prohibited on a 2 mile vehicle trail in the Horse Mountain

WSA (NM-020-043). The trail is located in T. 3 S., R. 12 W., Section 31, SW¼; T. 4 S., R. 13 W., Section 1, S½; T. 4 S., R. 12 W., Section 6, N½; T. 4 S., R. 12 W., Section 5, SW¼NW¼.

The purpose of this designation is to prevent impairment of the existing wilderness values, soil erosion, and degradation of the watershed within the WSA which will be caused by off-road travel. The authority for this closure is 43 CFR 8341.2. This designation will remain in effect until further notice.

**FOR FURTHER INFORMATION CONTACT:** Kevin Carson at the Bureau of Land Management, Socorro Resource Area Office, 198 Neel Avenue, NW., Socorro, New Mexico 87801 or at (505) 835-0412.

## Realty Action; Exchange of Public Land in Dona Ana County for Private Land in Hidalgo County, NM

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of realty action.

**SUMMARY:** The following described lands and interests therein have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716.

T. 22 S., R. 3 E., NMPM
Sec. 6, Lots 3, 4, 5, 6, 7, SE¼NW¼, E½SW¼,

Containing 327.93 acres, more or less.

In exchange for these lands, the United States will acquire the following described land from Joe S. Jackson of Animas, New Mexico.

T. 28 S., R. 20 W., NMPM
Sec. 17, W½SW¼;
Sec. 18, E½SE¼;
Sec. 19, E½NE¼, SE¼;
Sec. 20, W½NW¼, SW¼;
Sec. 27, W½;
Sec. 28, All;
Sec. 29, E½;
Sec. 33, N½;
Sec. 34, W½.
T. 28 S., R. 21 W., NMPM
Sec. 26, N½, N½S½, SE¼, SE¼.
T. 29 S., R. 21 W., NMPM
Sec. 3, Lots 1, 2, SE¼NE¼, N½SE¼;
Sec. 10, E½SW¼, SE¼;
Sec. 11, NW¼NE¼, W½;
Sec. 14, NW¼NW¼;
Sec. 15, N½, N½S½, SW¼SW¼;
Sec. 16, N½, N½N½SW¼, SE¼NE¼ NW¼, N½SE¼, E½SE¼SE¼;
Sec. 22, W½NW¼, SE¼NW¼, SW¼;
Sec. 23, NE¼SW¼, S½SW¼, W½SE¼;
Sec. 26, NW¼NE¼, NW¼, W½SW¼, SE¼;
Sec. 27, S½NE¼, NW¼, N½SE¼;
Sec. 34, E½SE¼;
Sec. 35, NE¼NE¼, W½NE¼, E½NW¼, SW¼NW¼, W½SW¼.

Containing 6,549.55 acres, more or less.

**DATE:** Comments must be submitted on or before June 29, 1987.

**ADDRESSES:** Comments should be sent to Bureau of Land Management, Las Cruces District Office, 1800 Marquess, Las Cruces, New Mexico 88005.

**FOR FURTHER INFORMATION CONTACT:** Marvin M. James at the address above or at 505-525-8228, (FTS 571-8350).

**SUPPLEMENTARY INFORMATION:** The land to be transferred will be subject to:

1. Reservations to the United States for ditches and canals, and all minerals together with the right to prospect for, mine, and remove same.

2. Subject to rights-of-way: (a) NM45805, Dona Ana County Road Department for County Road D087; (b) NM61214, Moongate Water Association for a water pipeline; and (c) Application NM64745, City of Las Cruces for an access road and water pipeline.

3. The grazing permit will be cancelled on that portion of Allotment No. 5007 which is encompassed by the public land described in this Notice. Cancellation will occur 2 years after the date of publication of this Notice unless the 2-year notification period is waived by the grazing allottee.

Private land to be acquired by the United States will be subject to the following conditions:

1. The grazing preference on land to be acquired in the Joe S. Jackson Allotment No. 1514 will be allocated to him.

2. The grazing preference on land that is outside of designated allotments may be allocated to qualified applicants at the discretion of the authorized officer. Grazing use shall be allocated under 43 CFR 4130.1-2 of this title.

3. Mr. Joe S. Jackson will retain 40 acres of private land around each of the base waters.

The purpose of the exchange is to implement the following decisions in the Gila Management Plan: (1) To consolidate public land into areas that provide habitat for desert bighorn sheep, mule and white-tail deer, javelina, small game, and a great variety of nongame species including several listed as threatened or endangered by the State of New Mexico and (2) to consolidate public land for better management opportunities and legal hunter access.

Publication of this notice will segregate the public land from all appropriations under the public land laws, including the mining laws but not mineral leasing laws. This segregation will terminate upon the issuance of a patent or 2 years from the date of publication of this notice in the Federal Register or upon publication of a notice of termination.

Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Robert R. Calkins,

*Acting District Manager.*

## Availability of Approved Piceance Basin Resource Management Plan/Record of Decision; Colorado

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of Availability of Resource Management Plan/Record of Decision.

**SUMMARY:** Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 (40 CFR 1505.2), the Department of the Interior, Bureau of Land Management (BLM), has prepared a Record of Decision (ROD) for the Piceance Basin Resource Management Plan (RMP). Initiation of actions which implement this plan can begin with the signing of the ROD. Concurrently, with the signing of the ROD, five sites within the Piceance Basin are designated as areas of critical environmental concern (ACECs), pursuant to the Federal Land Policy and Management Act of 1976 (Section 202(c)(3)) and 43 CFR Part 1610.

**EFFECTIVE DATE:** The Record of Decision and the ACEC designations thereunder became effective with the signing of that document on March 13, 1987, by Neil F. Morck, State Director for Colorado.

**ADDRESS:** Copies of the ROD/RMP are available upon request at the White River Resource Area Office, Bureau of Land Management, PO Box 928, Meeker, Colorado 81641.

**FOR FURTHER INFORMATION CONTACT:** B. Curtis Smith, Area Manager, at the above address. Telephone: (303) 878-3601.

**SUPPLEMENTARY INFORMATION:**

### Alternatives Analyzed

Five alternatives for managing 674,370 acres of public land in the Piceance

Basin Planning Area were analyzed in the RMP/environmental impact statement [EIS].

1. The Current Management Alternative maintained present management directions to resolve issues under existing decisions and the Management Framework Plan currently in effect. This was the No Action Alternative required by NEPA.

2. The Wildlife Alternative emphasized the management and use of the public lands for the benefit of wildlife and other renewable resources. Significant surface disturbing activities would be discouraged with management actions directed toward maintaining or enhancing wildlife habitat and other related resource values. Although this alternative was the environmentally preferable alternative, it did not resolve all of the planning issues or balance all land uses and resource values to the greatest benefit of all the public; therefore, it was not BLM's preferred plan.

3. The Oil and Gas Alternative placed management emphasis on planning and providing for oil and gas development and transportation. In addition, management emphasis was directed toward providing access to the public lands for other resource values including forest products, off-road vehicle use, and major linear rights-of-way.

4. The Oil Shale Alternative placed management emphasis on the development, production, and transportation of oil shale and other associated minerals. Management priority would be directed toward making lands available for commercial oil shale leasing by private industry as demand and economics dictate. Minimum management of renewable resources would generally occur under this alternative.

5. The Proposed Resource Management Plan (Preferred Alternative) achieves the combination of management options that is the most acceptable resolution of the planning issues identified during the planning process. It attempts to balance all land uses and resource values and was developed only after considering the impacts to all management options and the long-term public interest and benefits of implementation.

### Decision

The decision is to adopt the Proposed Plan as the Piceance Basin Resource Mnagement Plan. Major decisions contained in the plan are to:

—Allow for potential future oil shale leasing for open pit mining on 27,303 acres and for underground mining on 207,295 acres
—Implement a sequential lease offering process for future oil shale leasing whereby critical environmental and socioeconomic carrying capacities are not exceeded
—Reserve the multimineral zone (76,595 acres) from future commercial oil shale leasing until improved recovery rates have been proven, as determined by the BLM State Director
—Allow for potential future coal leasing by underground mining on 29,610 acres. Of this amount, 24,635 acres are also potentially available for coal leasing by surface mining
—Continue oil and gas leasing and development subject to the terms of approval cited in the White River Resource Area Oil and Gas Leasing Umbrella Environmental Assessment (EA). The Umbrella EA will be updated to reflect changes appropriate to implement plan decisions and to comply with current policy
—Continue livestock grazing management as identified in the Proposed Grazing Management Program for the White River Resource Area, Final EIS, and as approved in subsequent Rangeland Program Summaries, providing for a long-term allocation of 64,011 AUMs for livestock grazing
—Continue wild horse management according to decisions approved in the White River Resource Area Herd Management Area Plan to reach a herd management objective of 65 to 100 animals in the Piceance Basin.
—Continue implementation of the Piceance Basin Habitat Management Plan
—Provide for long-term increases to initial wildlife forage allocation of 36,253 AUMs to 40,501 AUMs over a 20-year period. Place off-road vehicle restrictions on approximately 177,000 acres in the Piceance Basin
—Designate the Piceance Basin Special Recreation Management Area
—Designate 16 utility corridors for major linear rights-of-way
—Designate five areas as ACECs (Deer Gulch, Dudley Bluffs, Lower Greasewood Creek, South Cathedral Bluffs, Yanks Gulch/Upper Greasewood Creek. See Federal Register Vol. 51, No. 224, Friday, December 19, 1986, for a complete legal description of these units as well as a discussion of the resource value and resource use limitations for each unit)
—Designate the Soldier Creek area as an ACEC if the State of Colorado designates their adjoining acreage
—Designate the School Gulch area as an ACEC if ongoing monitoring indicates the important values present require designation

### Mitigation Measures

All practicable measures will be taken to mitigate adverse impacts. These measures will be strictly enforced during implementation. Monitoring will tell how effective these measures are in minimizing environmental impacts. Therefore, additional measures to protect the environment may be taken during or following monitoring.

Dated: April 22, 1987.

## National Park Service

### Great Basin National Park, Nevada; Legal Description

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice of legal description, correction.

This document corrects an erroneous map reference and certain minor errors contained in the legal description published April 27, 1987, Vol. 52, No. 80, FR Doc. 87-9454, pp 13881-13882.

The first paragraph is corrected to read as follows: Pub. L. 99-565 dated October 27, 1986, established Great Basin National Park as generally depicted on a map titled "Boundary May, Great Basin National Park, Nevada," numbered NA-GB 20,017, and dated October 1986. Pursuant to section 2(c) of that Act a legal description is provided. The lands set forth below comprise approximately 77,109.15 acres and are located in the Mount Diablo Meridian. All sections are unsurveyed and protracted unless otherwise noted. Acreages shown are therefore approximate and subject to survey.

The following corrections are made to the legal description:

1. On page 13881, third column, twenty-fourth line of description "1,258.00" is corrected to read "1,280.00".

2. On page 13882, first column, seventh line, "conrers" is corrected to read "corners".

3. On page 13882, first column, last line, "Secs. 34, and 36" is corrected to read "Secs. 34, 35, and 36".

4. On page 13882, second column, first line, "320.00" is corrected to read "320.05".

### Denali National Park Subsistence Resource Commission Meeting

**AGENCY:** National Park Service, Alaska Region.

**ACTION:** Subsistence Resource Commission Meeting.

**SUMMARY:** The Alaska Regional Office of the National Park Service announces a forthcoming meeting of the Denali National Park Subsistence Resource Commission. The following agenda items will be discussed:

1. Call to order.
2. Reading and approval of minutes.
3. Internal Commission business (election of officers).
4. Subsistence use zones.
5. Time limits for Cantwell residents to apply for permits.
6. Status of hunting plan.
7. Review correspondence addressed to Commission.
8. Update on Park plans that could affect subsistence.
9. Subsistence research data needs.
10. Other business.
11. Adjourn.

The Denali National Park Subsistence Resource Commission is authorized under Title VIII, Section 808, of the Alaska National Lands Conservation Act, Public Law 96-487.

**DATE:** The meeting will begin at 9:00 a.m. on Friday, June 5, 1987, and conclude the afternoon or the morning of June 6 if needed.

**ADDRESS:** Denali National Park, Headquarter Recreational Hall.

**FOR FURTHER INFORMATION CONTACT:** Bob Cunningham, Superintendent, Denali National Park, P.O. Box 9, McKinley Park, Alaska 99755, Phone (907) 683-2294.

**SUPPLEMENTARY INFORMATION:** The Denali National Park Subsistence Resource Commission is authorized under Title VIII, Section 808, of the Alaska National Interest Lands Conservation Act Pub. L. 96-487 .

Dated: May 4, 1987.

## DEPARTMENT OF LABOR

### Office of the Secretary

### Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

*Background:* The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

**List of Recordkeeping/Reporting Requirements Under Review**

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in. Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable. How often the recordkeeping/reporting requirement is needed. Who will be required to or asked to report or keep records. Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

**Comments and Questions**

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

**Extension**

Employment and Training Administration

On occasion
Individuals or households; Federal agencies or employees
16,560 respondents; 3,312 hours; 1 form

Job Corps enrollees may elect to have a portion of their Readjustment Allowance sent to a dependent monthly. This form provides the information necessary to administer those allotments.

**Reinstatement**

Employment and Training Administration
In-Season Farm Labor Report
1205-0006; ETA 223
On occasion
Individuals or households; State or local governments; Farms
8,047 respondents; 16,094 hours; 1 form

In planning and budgeting for agricultural worker placement programs and programs to provide health and related services to migrant and seasonal farmworkers, it is important to know where seasonal farm jobs are located, level of labor needs, active work periods, tasks to be performed and home bases of workers.

Pension and Welfare Benefits Administration
Class Exemption 77-4 for Certain Transactions
1210-0049
Annually when exemption is used
Business or other for profit; Small Business or Organizations
18,150 responses; 1,633 hours

This class exemption exempts from the prohibited transaction restrictions of ERISA the purchase and sale by an employee benefit plan of shares of a registered open-end mutual fund when a fiduciary with respect to the plan (e.g., an investment manager) is also investment adviser for the mutual fund.

**Reinstatement**

Pension and Welfare Benefits Administration
DOL Regulation § 2560-503-1 Claims Procedure
1210-0053
On Occasion
individuals or households; Buiness or other for-profit; non-profit institutions; Small business or organizations
73,567 responses; 30,634 hours

The regulation requires employee benefit plans to establish procedures which provide adequate written notice to any participant or beneficiary of an employee benefit plan whose claim has been denied. An opportunity for a review of a denied claim must also be

provided; the decision upon a review must also be in writing.

**Reinstatement**

Pension and Welfare Benefits Administration
DOL Regulation § 2550.408b–3, Loans to Employee Stock Ownership Plans (ESOP)
On occasion
Individuals or households; business or other for-profit; small businesses or organizations
4,640 responses; 427 hours

The paperwork requirement included in this regulation is a disclosure requirement to furnish certain individuals receiving securities from an ESOP, notices of their right to exercise put options under certain limited circumstances and within a limited time frame.

**Reinstatement**

Pension and Welfare Benefits Administration
Suspension of Benefits Regulation
1210-0040
Whenever benefits are suspended
Business or other for-profit; Small businesses or organizations
106,188 responses; 26,547 hours; 0 forms

DOL Regulation § 2530.203–3 allows a plan to suspend an individual's pension benefits if the individual continues to work or returns to work. The plan is required to notify the individual during the first calendar month or payroll period in which the plan withholds payment of the reasons for the suspensions.

**Reinstatement**

Office of Pension and Welfare Benefits Administration
Prohibited Transaction Exemption 78–19
Recordkeeping
Business or other for-profit; small businesses or organizations
1 Respondent; 1 hour

This exemption allows parties in interest of an employee benefit plan that invests in an insured pooled separate account to engage in transactions with the separate account if the plan's participation in the separate account does not exceed specified limits. Six year recordkeeping is required.

**Reinstatement**

Pension and Welfare Benefits Administration
Prohibited Class Exemption 76–1
Recordkeeping
Business or other for-profit; non-profit institutions; small businesses or organizations
3,200 recordkeepers; 800 hours

The class exemption permits parties in interest, under specified conditions, (A) to make delinquent employer contributions (B) to receive construction loans, and (C) to obtain office space, administrative services, and goods from plans.

Signed at Washington, DC, this 12th day of May, 1987.

## Employment and Training Administration

### Investigations Regarding Certifications of Eligibility To Apply for Workers Adjustment Assistance; A&E Products Groups et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or theratened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than (10 days after public). May 26, 1987.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 26, 1987.

The petition filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC, this 4th day of May 1987.

**Marvin M. Fooks,**

*Director, Office of Trade Adjustment Assistance.*

## AT&T Technologies, Inc.; AT&T Technology Systems, Reading, PA; Affirmed Determination Regarding Application for Reconsideration

By an application dated March 30, 1987, counsel for the International Brotherhood of Electrical Workers, Local #1696, requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance on behalf of workers and former workers of AT&T Technologies, Inc., AT&T Technology Systems, Reading, Pennsylvania. The determination was published in the Federal Register on March 10, 1987 (52 FR 7330).

Counsel for the union claims, among other things, that the Department did not investigate the Regional Operating Bell Companies. Counsel for the union also does not agree with the Department's negative findings concerning the outsourcing of production to offshore facilities in 1986.

### Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 8th day of May 1987.

**Harold A. Bratt,**

*Deputy Director, Office of Program Management, UIS.*

BILLING CODE 4510-30-M

[TA-W-18, 115, et al.]

## Conoco, Inc., Petroleum Exploration and Production Division and All Other Locations of the Petroleum Exploration and Production Division in Alaska et al.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In the matter of: Conoco, Inc., Petroleum Exploration and Production Division.

Lakewood, Colorado, TA-W-18,115
Houston, Texas, TA-W-18,115A
Midland, Texas, TA-W-18,116
Lafayette, Louisiana, TA-W-18,117
New Orleans, Louisiana, TA-W-18,118

And all other locations of the petroleum exploration and production division in the following states:

Alaska, TA-W-18,116A
Arkansas, TA-W-18,116B
California, TA-W-18,116C
Colorado, TA-W-18,116D
Kansas, TA-W-18,116E
Louisiana, TA-W-18,116F
Mississippi, TA-W-18,116G
Montana, TA-W-18,116H
New Mexico, TA-W-18,116I
North Dakota, TA-W-18,116J
Oklahoma, TA-W-18,116K
Texas, TA-W-18,116L
Utaha, TA-W-18,116M
Wyoming, TA-W-18,116N

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assitance on December 19, 1986 applicable to all workers of the Petroleum Exploration and Production Division of Conoco, Incorprated, headquartered in Houstion, Texas and including several other locations. The Certification was published in the Federal Register shortly thereafter.

The certification notice is amended to identify the states in which the Petroleum Exploration and Production Division maintains operations. The company has oil fields in numerous states as well as offices which support crude oil production. Worker separations have occured throughout the Division.

The intent of the certification is to cover all workers of the Petroleum Exploration and Production Division in all locations. The amended notice applicable to TA-W-18,115 through TA-W-18,118 is hereby issued as follows:

All workers of the Petroleum Exploration and Production Division of Conoco, Incorporated, headquartered in Houston, Texas, and operating in the states of Alaska; Arkansas; California; Colorado; Kansas; Louisiana; Mississippi; Montana; New Mexico; North Dakota; Oklahoma; Texas; Utah; and Wyoming who became totally or partially separated from employment on or after June 18, 1985 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 8th day of May 1987.

## Whitaker Division of Ristance Corp. et al.; Dismissals of Applications for Reconsideration

Pursuant to 29 CFR 90-18 applications for administrative reconsideration were filed with the Director of the Office of Trade Adjustment Assistance for workers at the Whitaker Division of Ristance Corporation, St. Joseph, Missouri; Amerada Hess Corporation, Anchorage, Alaska; Halliburton Company, Halliburton Services Manufacturing Center, Oilfield Services Division, Duncan, Oklahoma. The reviews indicated that the applications

contained no new substantial information which would bear importantly on the Department's determinations. Therefore dismissals of the applications were issued.

TA–W–18,646; Whitaker Division of Ristance Corporation, St. Joseph, Missouri (April 23, 1987).

TA–W–18,771; Amerada Hess Corporation, Anchorage, Alaska (May 1, 1987).

TA–W–19,342; Halliburton Company, Halliburton Services Manufacturing Center, Oilfield Services Div., Duncan, Oklahoma (April 23, 1987).

Signed at Washington, DC, this 6th day of May 1987.

## Job Training Partnership Act; Native Employment and Summer Youth Employment and Training Programs; Allocations, Distribution Formulas and Rationale

**AGENCY:** Employment and Training Administration, Labor.

**ACTION:** Notice.

**SUMMARY:** The Employment and Training Administration of the Department of Labor is publishing the final Native American programs total allocations, distribution formulas, and rationale for Program Year 1987 (July 1, 1987—June 30, 1988) for regular programs funded under Title IV–A of the Job Training Partnership Act, and for Calendar Year 1987 for Summer Youth Employment and Training Programs funded under Title II–B of the Job Training Partnership Act.

**FOR FURTHER INFORMATION CONTACT:** Mr. Paul A. Mayrand, Director, Office of Special Targeted Programs, Employment and Training Administration, 200 Constitution Avenue, NW., Room N–4641, Washington, DC 20213; Phone: 202–535–0500.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 162 of the Job Training Partnership Act (JTPA), The Employment and Training Administration (ETA) of the Department of Labor (DOL) publishes the final allocations and distribution formula for Native American grantees to be funded under JTPA section 401, and JTPA Title II, Part B. The amounts to be distributed are $61,484,000 for JTPA section 401 programs for Program Year (PY) 1987 (July 1, 1987–June 30, 1988); and $11,565,739 for JTPA Title II, Part B, for the Summer Youth Employment and Training Program (SYETP) for the summer of Calendar Year 1987.

This information, along with individual grantee planning estimates, was published in the **Federal Register** as a proposal on December 8, 1986. 51 FR 44132.

Written comments from the public were invited, but none were received.

The formula for JTPA section 401, provides that 25% of the funding will be based on the number of unemployed Native Americans in the grantee's area, and 75% will be based on the number of poverty-level Native Americans in the grantee's area.

The formula for allocating SYETP funds divides the funds among eligible recipients based on the proportion that the number of youths in a recipient's area bears to the total number of youths in all eligible areas.

The rationale for the above formulas is that the number of poverty-level persons, unemployed persons, and youth among the Native American population is indicative of the need for employment and training funds.

No hold-harmless provisions have been applied to the Title IV or the Title II–B allocations. 51 FR 21639 (June 13, 1986); 51 FR 44132 (December 8, 1986).

Statistics on youth, unemployed persons, and poverty-level persons among Native Americans used in the above program are derived from the Decennial Census of the Population, 1980.

Signed at Washington, DC, this 11th day of May 1987.

**Roger D. Semerad,**

*Assistant Secretary of Labor.*
